TABLE XI.

SELECTED STATISTICS OF MANUFACTURES,

SHOWING

CERTAIN SELECTED INDUSTRIES BY TOTALS OF COUNTIES IN EACH STATE AND TERRITORY,

AT THE CENSUS OF 1870.

REMARKS ON THE SELECTED STATISTICS OF MANUFACTURES.

The following table, containing the Selected Statistics of Manufactures by Counties, is intended to embrace only those industries which are so far considerable in amount as to justify space being given to them in the present publication. With this view, whenever in any county the gross production of any industry does not reach the value of $10,000, that industry is omitted. Moreover, those industries which may be called "neighborhood industries," (*i. e.*, where the production is presumably for use and consumption within the immediate locality,) are excluded from the table. These industries, according to the classification here adopted, are as follows: Blacksmithing; custom boot and shoe making; butchering; carpentering; locksmithing and bellhanging; millwrighting; house-painting; paperhanging; photographing; plastering; plumbing and gasfitting; watch and clock repairing; wheelwrighting; mechanical dentistry; the grinding, at the ordinary "grist-mill," of grain for individual owners, and not as the venture of the proprietor of the mill; and, finally, the sawing of lumber at small mills producing under the value of $2,500 annually.

The production of each of these branches of mechanical effort is duly included in Table IX (B,) which presents the full manufacturing statistics of each State by specific industries, while Table IX (A) exhibits the entire manufacturing and mechanical production of each county in each State, embracing the production of the industries which, for the purpose of the following publication, are discarded.

The reason for thus selecting the industries to be embraced in Table XI is found in the fact that the publication of the unabridged list by counties consumes an amount of space wholly disproportionate to the importance of the information conveyed. Five hundred and fifty-two pages of the Volume on Manufactures, in the census of 1860, were devoted to the county tables, a considerable proportion of the counties presenting no industries beyond carpenters', blacksmiths', and cobblers' shops, or establishments of the same general industrial grade. Now, it can always be assumed that wherever communities of men, in a civilized state, exist, these trades will be found, and they will, in any American community, bear a pretty definite proportion to population.

What cannot be assumed of any county is the existence of branches of industry which produce articles for export or for consumption irrespective of locality. It is for the purpose of more precisely locating industrial establishments of this grade that the following tables have been prepared.

A second and a stronger reason for omitting these petty and neighborhood industries is found in the fact, brought into strong relief in the Remarks prefacing the General Statistics of Manufactures, that the production of some of these trades is returned so irregularly as between States and sections, and, at the best, so partially, as to make the distribution of that product among the counties of any State of the least possible value. It would undoubtedly have been better to omit the production of these common trades entirely from the Statistics of Manufactures on the ground of the enormous deficiencies known to exist, and in the nature of the case certain to exist, in the returns; but the Superintendent was not prepared to take quite so wide a departure from the methods of previous publications. All the purposes, however, which could be served by the inclusion of these trades have been answered by their publication by totals of States and Territories. To carry the details down to counties, in the face of such wholesale deficiencies, is considered eminently undesirable, even were considerations of space in publication disregarded.

TABLE XI.—THE STATE OF ALABAMA.

INDUSTRIES BY COUNTIES.	Establishments.	Hands employed.	Capital.	Wages.	Materials.	Products.
			Dollars.	Dollars.	Dollars.	Dollars.
