REPORTS OF THE 1969 CENSUS OF AGRICULTURE

Individual County Reports

Eight-page reports have been issued for each county and State.

Volume I. Area Reports

A separate report has been published for each State, American Samoa, Guam, Puerto Rico, Trust Territory, and the Virgin Islands. The report consists of two sections. Section 1 contains State summary data, county summary of selected data, and miscellaneous items by counties; Section 2 contains the detailed county reports.

Volume II. General Report

Statistics by subject are presented in separate chapters with totals for the United States, regions, geographic divisions, and States. The nine chapters are being issued as individual reports as follows:

Chapter 1 General Information; Procedures for Collection, Processing, Classification
Chapter 2 Farms: Number, Use of Land, Size of Farm
Chapter 3 Farm Management, Farm Operators
Chapter 4 Equipment, Labor, Expenditures, Chemicals
Chapter 5 Livestock, Poultry, Livestock and Poultry Products
Chapter 6 Crops, Nursery and Greenhouse Products, Forest Products
Chapter 7 Value of Products, Economic Class, Contracts
Chapter 8 Type of Farm
Chapter 9 Irrigation and Drainage on Farms

Volume III. Agricultural Services

This new report contains data relating to agricultural services for the United States by State and county.

Volume IV. Irrigation

Data will be included on drainage basins, land irrigated, crop production on irrigated land, water conveyed, users, and types of organizations.

Volume V. Special Reports

Reports may contain data obtained from supplemental surveys, such as type of farm, horticulture, and farm finance; in addition to information obtained in the census.

Parts 1 to 9. Type-of-Farm Operations.—One for each of nine major type-of-farm classifications.
Part 10. Horticultural Specialties.
Part 11. Farm Finance.
Part 12. Ranking Agricultural Counties.
Part 13. Forms and Procedures.
Part 14. Procedural History.
Part 15. Graphic Summary.
Part 16. Coverage Evaluation.

Volume VI. Drainage of Agricultural Lands

This report will include agricultural drainage statistics collected from individual farms and from publicly organized drainage projects.

ACKNOWLEDGMENTS—As with any data collection effort of this type, credit is due first and foremost to the respondents, the farm operators, members of their families, and employees who filled out and returned the enterprise survey forms; they furnished the information tabulated and published in these reports. Many others made significant contributions.

The Department of Agriculture cooperated at all levels: Local employees in the county offices of the Agriculture Stabilization and Conservation Service, the Farmers Home Administration, the Federal Extension Service, and the Soil Conservation Service aided in the publicity and provided assistance to the farm operators who requested help in filling out the census forms correctly; personnel of the Economic Research Service and the Statistical Reporting Service were especially helpful in the determination of what data should be collected, and the tabulations that were needed.

Members of the Census Advisory Committee on Agriculture Statistics and representatives from public and private agencies and firms gave generously of their time and effort in establishing the data requirements and priorities for collection and publication of the information.

The press, radio, and television media, especially those relating to agribusiness activities, were most helpful in promoting awareness of the 1969 census among farm and ranch operators and enlisting their cooperation.

Charles Merzel, International Statistical Programs Division; **Jack H. Margolis** and **Ralph A. Graham**, Agriculture Division, were responsible for the systems and processing procedures, including clerical procedures and computer programing.

A large part of the clerical and data-keying operations were performed in the Data Preparation Division, Jeffersonville, Ind. **Hobert A. Yerkey**, Chief, under the supervision of **Rex L. Pullin, Don L. Adams**, and **Rebecca Nesbitt. John A. Blackledge, William A. Harlan**, and **John C. Womack**, Agriculture Division, were responsible for the subject-matter review in Jeffersonville.

Computer processing was performed in the Computer Services Division under the supervision of **James R. Pepal**.

Orvin L. Wilhite, Assistant Division Chief, and **Joseph A. Correll**, Chief of the Crops Statistics Branch, assisted by **John H. Barrett** and **Donald R. Jahnke**, participated in the overall planning and supervised the preparation of the data collection form, specifications for editing and tabulation, review of tabulations, and preparation of tables for the six crop surveys. The specifications for precomputer and computer edit were prepared by **Patricia H. Mitchell** and **Frank J. Shelton**, who also participated in review of the tables along with **Neng W. Chin, Carl N. McAllister**, and **Bernard L. Ross**. The text specifically related to the crops surveys was written by **John H. Barrett, Bernard L. Ross, Carl N. McAllister**, and **Frank J. Shelton. Reginald Masano** prepared the formatting program. The computer edit program was written by **Charles King**. The tabulation programs were prepared by **Charles King, Loyd Brown, William Eng**, and **Billy Stark**.

J. Jack Ingram, Assistant Division Chief for Research and Methodology, assisted by **Maurice R. Kniceley** and **Harold V. Edwards**, designed the sample and wrote the related text. The general part of the text was written by **Orvin L. Wilhite. Arnold L. Bollenbacher**, Chief of the Farm Economics Branch, assisted by **Ted J. McGrath**, prepared the agricultural labor tables and text. **Joseph A. Correll**, assisted by **John H. Barrett**, prepared the specifications for the fertilizer tables. **Helen D. Turner** assisted by **Janet W. Hall** was responsible for editing and liaison in the publications area.

The program was under the primary direction of **J. Thomas Breen**, Chief, Agriculture Division.

Introduction

THE FARM ENTERPRISE SURVEYS

The first part of this text provides information that applies to the nine specialized type-of-farm enterprises included in the survey. The second, provides information specifically related to the enterprise for which data are presented in this book.

Authority, Area Covered, and Method

The 1971 Survey of Specialized Agriculture was conducted as part of the 1969 Census of Agriculture authorized by the Congress of the United States in "Title 13, United States Code—Census," Sections 142(a) and 193. The survey was conducted primarily by mail, and covers all States except Alaska.

History and Precedent

The 1971 Survey of Specialized Agriculture is the first that is devoted almost entirely to providing data at the State and county level, in addition to that obtained on the general census of agriculture report form. It is, however, the natural outgrowth of prior agriculture census-taking activities in the sense that it reflects the Bureau's continuing effort to make available information fully descriptive of current developments in our Nation's agriculture. In association with the 1950 and more recent censuses of agriculture, special supplemental surveys have been utilized to provide, on a sample basis, selected items of information not included in the general reports. In general, these were items for which United States and regional totals were needed, but for which State and county totals could not be justified.

Following World War II, industrial and technological advances in animal breeding and nutrition, in machinery, and in the use of chemicals for fertilization and for weed and insect control together with a number of other factors, accelerated the movement of agricultural management toward specialization. Special tabulations and analyses of data for several major types of farm for the United States and the geographic regions in which each had substantial significance were presented in volume III, part 9, chapters 1 to 9 of the published reports for the 1954 Census of Agriculture.

During the planning of the 1969 census program, it was recognized that specialization had attained a position that could not be adequately described by statistics limited to the national and regional levels. Accordingly, within the limits of the appropriated funds, adjustments were made to provide for specialized type-of-farm enterprise surveys that would provide supplemental data for States and for counties with significant amounts of the specified activities.

Background and Purpose

During the planning stage of each agriculture census, opportunity is provided to the various Federal and other government agencies, universities, news media, manufacturers, processors, marketers, farm organizations, and members of the general public to make known the items related to agricultural organization and production for which data are needed. The data demands made in preparation for the five most recent censuses of agriculture have included an increasing number of economic oriented items. More and more of these items are specialized in nature, and not appropriate for inclusion in a general report form directed to all farm operators.

The trend of these data demands has paralleled the movement of agriculture from generalized to specialized operations. The desire to lower the cost per unit of production has led to the development of tractors with more and more power and with an increasing variety of attachments; of specialized, often self-propelled tilling and harvesting machines; of chemicals for weed and insect control; of improved breeds of livestock and higher-yielding varieties of seeds. These developments have made it feasible for farm operators to handle more and more land. Indeed, the purchase cost of these larger, more specialized machines, and of the improved livestock and seeds, have made it economically mandatory for farm operators to handle more land, and to become more specialized in their agricultural operations. Because it has become increasingly advantageous, many farm operators have specialized in only one product, while others have reduced the number of products but have specialized in several products in order to make fuller use of labor and equipment throughout the year. Thus, the general farms that produce a variety of crops, poultry, livestock and their products have decreased in number and in variety of products, while specialization has increasingly become more representative of North American agriculture.

The purpose of the 1971 Survey of Specialized Agriculture was to collect relevant data specifically related to each of nine specialized types of agricultural production. A separate data collection form was used for each specialization so that the information collected could be restricted to items directly involved in the type of agricultural operation being conducted. Farms that in 1969 reported sales of at least $10,000 for each of two or more specialized operations were asked to complete the two or more related data collection forms. The results of the

survey are presented in nine separately published reports, as follows:

Volume V,
Part 1. Grains, Soybeans, Dry Beans and Dry Peas
2. Tobacco
3. Cotton
4. Sugar Crops, Potatoes, Other Specified Crops
5. Vegetables, Including Tomatoes and Melons
6. Fruits, Nuts, and Berries
7. Poultry
8. Dairy
9. Cattle, Hogs, Sheep, Goats

The agricultural products assigned to each of these fields of specialization are generally the same as for the corresponding type-of-farm classifications for which agricultural census data have been presented since 1959. A more detailed listing of the products comprising each type of specialization is given in the discussion of **sample selection.**

Scope of the Survey

The farm operators included in the 1971 Survey of Specialized Agriculture were a stratified sample selected from those who operated farms in 1969 with sales of at least $2,500. The sample rate varied by economic class and type of farm to provide estimates for quantitative items with an acceptable level of accuracy for publication at the county level for those counties with significant activity and at the same time to minimize the respondent burden.

These surveys were neither intended nor designed to provide universe totals for the items included in the survey at the county, State, or national level. In general, no attempt was made to contact successors to those operators in the sample who had ceased agricultural operations in 1969 or later. Neither was any attempt made to contact newly established operators. Further, for those sample farms still operating in 1971, no attempt was made to obtain data for any additional specialized operations that had not been conducted in 1969, or if conducted, that were not large enough to be included in the survey. Partially offsetting the effects of these omissions, however, those who had enlarged their specialized operations since 1969 were asked to include the entire 1971 specialized operation in their reports.

These surveys were designed to provide information about the extent to which various production and other practices and facilities, including specialized equipment, are reported on farms having the specialized enterprises, and to provide data for those counties where the enterprise has some significance. This information is intended to serve as the basis for further analysis and estimates with regard to related data from other sources.

Development of Data Collection Forms, Content, and Format

Development of the specialized report forms began in the latter part of 1968. The principal items included in the report forms were suggested in the meetings of the Census Advisory Committee on Agriculture Statistics in April and October 1968 and in written suggestions received from various governmental agencies and private organizations during 1968 and 1969. These suggestions were augmented and refined by staff research and consultation with the suggesting agencies and organizations. Particularly noteworthy was the assistance provided by the Economic Research Service, U.S. Department of Agriculture.

In May 1969, draft versions of three of the specialized report forms (Grains, Soybeans, Dry Beans, Dry Peas; Cotton; and Cattle, Hogs, Sheep, Goats) were field tested in a limited number of interviews conducted by professional staff members who also obtained the respondent's reactions to the purpose and content of the survey.

Based on an evaluation of these interviews and further research, data collection forms were developed for 11 type-of-farm enterprises for further testing. These forms were mailed on August 28, 1969, to nearly 1,300 addressees who had had agricultural operations in 1964 sufficient to qualify them as operators of specialized agricultural enterprises. One mail followup was sent to nonrespondents in early October. Letters accompanying both mailings stated the purpose of the test and asked for the addressee's assistance on a voluntary basis.

Approximately 400 report forms were returned to the Bureau in various stages of completion. These returns were analyzed for completeness and apparent accuracy of response. Of particular interest were items for which response was not complete or was apparently inconsistent with other data. Also considered was the format of the various sections of the report form. Did the respondent follow the flow of the items to be answered? Did he understand what information was wanted? Was he able to supply the information requested?

On the basis of the analysis, the final versions of the data collection forms were prepared. Two of the 11 types of enterprises (those for "General" and "Miscellaneous" farms) were dropped from the survey as not being identifiable as "specializations" for which the data about management and operation practices, inventory, and equipment would yield sufficient characterization. Other changes included revisions in format, the deletion of some items for which there was evidence of poor response capability, and the standardization of some sections common to two or more enterprises.

Method of Data Collection

The survey was conducted primarily on a mailout/mailback basis. A farm included in the sample received a separate report form for each of the specialized enterprises for which it qualified. The forms were mailed early in January 1972. A "Thank you" reminder card (see appendix) was sent to each addressee on January 12th, and up to six followup letters were mailed to nonrespondents at intervals between February 1 and June 30. As of April 9, all nonrespondent operators who had reported sales of $100,000 or more in 1969 were assigned for direct interview by personal visit or telephone. For economic efficiency of field operations, personal visits were restricted to those counties with eight nonrespondents or more. The nonrespondents in all other counties were interviewed by telephone.

Those nonrespondents with sales of less than $100,000 were handled in a second effort, during July and August 1972. Interviews by personal visit were restricted to counties with 12 nonrespondents or more. In the remaining counties, nonrespondents received additional request letters, supplemented to some extent by telephone interviewing. The general effort to obtain reports from nonrespondents was stopped at the end of August. Of the 412,000 forms mailed out in the surveys, returns were received for 390,000, of which 340,000 were considered in scope and appropriate for inclusion in the survey tabulations. During the processing operations, telephone calls were used to resolve the internal consistency or incompleteness of the reports for large operations.

Processing Procedures for Individual Report Forms

As the forms were received from the respondents they were checked in. Periodically the address register was updated and a reminder letter was sent to nonrespondents. If more than one specialized form had been required for the same farm, they were held together until completion of the pre-key clerical edit process.

The basic edit policy for the survey was to accumulate and present the publishable data the forms contained without attempting the followup required to obtain data for every section of every form, or, except in a few instances, to impute for missing data.

Implementation of this policy called for a pre-key clerical edit sufficient only to make the data keyable, and to assure consistency between two or more specialized forms for the same farm. The computer edit programs identified and resolved or displayed incomplete items, inconsistencies and data outside limit parameters. In general, no attempt was made to impute for completely missing items of data. However, if one part of a question was answered but some other part was not, the missing item was imputed.

For example, if the number of animals sold was reported but the value was missing, then the value was imputed; if acres were reported without yield, or yield without acres, then the missing component was imputed. Insertion of missing data based on information for an adjacent farm or for other items reported for the same farm was held to a minimum. Nationwide parameters were used for testing the ratios of production to acres, production to sales, etc. Thus, the major review and correction of the individual reports followed computer rejection of questionable data. Corrections were keyed to tape, merged into the record tape and re-edited to assure that the records were acceptable for tabulation.

The edit process included three computer passes. The first of these presented the problems, the second and third, following merging of keyed corrections, monitored the acceptability of the corrected records, as compared with the edit rules.

Tabulation Policy and Limitations

The type-of-farm enterprise survey was designed as a follow-on survey to the 1969 agriculture census. It was financed out of the savings resulting from the use of mail procedures for data collection, modification of the evaluation program, and improvements in the programing and processing of the regular census. Limited financial and staff resources dictated a modest tabulation and publication program. The tabulations presented in this report consist, for the most part, of basic summations of individual data items. Selected data are presented separately for farms that reported some specified condition, such as milk cows on hand, or turkeys sold.

The percentages and ratios presented or that may be derived from the data are believed to be representative of the farms conducting that type of enterprise within the geographic area.

The base data are those that were reported by the farms that responded to the survey, multiplied by their assigned sample weights. Thus, published totals are not estimates for all such enterprises in the given county or State but only for those that were represented in the sample drawn and that responded to the item tabulated. No attempt was made to identify and include in the survey enterprises organized since 1969 or grown large enough since 1969 to qualify. In general, no attempt was made to impute for completely missing items of data on partially completed report forms.

Presentation of Data

The standard pattern of the tabulations provides three lines of data for each area (State or county) for which data are shown, as follows:

Principal enterprise—That enterprise (product or groups of products for which sales in 1969 amounted to $10,000 or more) which in 1969 represented 50 percent or more of the total value of sales for the farm. This enterprise is the same as the type of farm code for the place for 1969. EXCEPTION: For 14,538 farms in the $10,000 to $19,999 TVP group the principal specialized operation had less than $10,000 of sales. The in-scope report forms for these operations that were returned by the respondents have been included in the tabulations on the PRINCIPAL line, since the report forms were sorted by total value of products sold by the farm, rather than by the value of sales of the product or group of products comprising the specialized operation.

Secondary enterprise—An enterprise (product or group of products for which sales in 1969 amounted to $10,000 or more) on a place with a principal enterprise. If three or more enterprises were conducted on the same place, all except the enterprise that agreed with the type-of-farm code were secondary.

Under $10,000—For places with less than $10,000 total value of products, the specialized operation that agreed with the 1969 type of farm.

The data are weighted estimates, based on the information furnished by the respondents to the survey. Sampling rates are shown in exhibit 1. Data are presented for all States and for all counties in which more than a limited number of farms were engaged in the enterprise. No data are shown separately by county if less than 10 reports for the enterprise were tabulated. For some enterprises the minimum number of tabulated reports for publication at the county level was set at some higher

Exhibit 1. Sampling Rate by Total Value of Products Sold by Type of Farm

	Type of farm and expansion factor									
	Cash-grain	Tobacco	Cotton	Field crop	Vege-table	Fruit and nut	Poultry	Dairy	Other live-stock[1]	General and misc.[2]
$100,000 and over	1	1	1	1	1	1	1	1	1	1
$40,000 to $99,999	2	1	1	1	1	1	1	2	2	1
$20,000 to $39,999	4	2	2	1	1	1	2	4	8	2
$10,000 to $19,999	8	4	4	2	2	2	4	8	16	([3])
$5,000 to $9,999	16	8	8	4	4	4	8	16	32	([3])
$2,500 to $4,999	32	16	16	8	8	8	16	32	64	([3])

NOTE: These rates are based on 1969 Census of Agriculture distribution.
[1] Includes livestock ranches for 17 Western States, Louisiana, Florida, and Hawaii.
[2] Expansion factors assigned to secondary enterprises on these types of farm.
[3] Not in survey.

number. The minimum number of tabulated reports for which separate county data are shown for the type-of-farm enterprise presented in this report is given in the part of this text that deals specifically with the enterprise.

Data for all counties with less than the minimum number of reports have been combined and are presented for "All other counties." Those who desire to examine ratios, comparisons between items, etc., for *enterprises* of a given type may do so by first combining the data presented for "principal" and "secondary" enterprises.

Similarly, those who wish to compare 1971 data with data by type of farm previously published from the 1969 Census of Agriculture should combine the data presented for "principal enterprises" and for places whose major agricultural operation had sales of "Under $10,000."

Relationship of Data to Other Agriculture Census Data

The 1971 data presented for the various specialized agricultural enterprises are, for the most part, an extension of the 1969 data previously published by type of farm in volume I and in chapter 8, volume II of the published reports of the 1969 Census of Agriculture.

Acres of land in the farm by ownership, acres of cropland harvested, farm labor information, and total sales and expenses were the only items common to every specialized enterprise report form. In addition, the report form for each specialized enterprise contained inventory, production, and sales items appropriate to the type of agricultural products comprising the enterprise. These basic items provide a rough measure of the coverage of the 1971 specialized enterprise, as compared with 1969 census data for the corresponding type of farm. They also provide some basis for evaluation, analysis, and interpretation of the specialized information obtained and presented.

Census Confidentiality

The data in this report have been reviewed to prevent the disclosure of individual operations, while presenting as many items of data as feasible. The probability of recognizing data about an individual operation is a function of the size of the operation and the number of farms reporting the item. For State totals, only an extremely large quantity reported would be recognized as possibly pertaining to the operations of an individual farm. For a county also, the number would need to be so large as to be grossly atypical of such operations within the county. Further, it is highly unlikely that anyone would know whether another's enterprise was "principal" or "secondary" in a county with 10 occurrences or more of the enterprise. Thus, the general policy was developed that a report for a secondary enterprise that exceeded 10 percent of the amount reported for the principal enterprises would be suppressed since it might be possible for others to associate the number with the specific farm that reported it. At least two numbers were deleted in the same line of any table that consisted of a total and detail to avoid the possibility of the user obtaining the missing number by subtraction.

This policy was adopted, in lieu of deleting all numbers for which less than three farms were tabulated because it permitted a very large reduction in the number of cells of data to be suppressed (and therefore a large reduction in the time and cost of the operation) with little likelihood of revealing the individual operations of any farm.

Abbreviations and Symbols

The following abbreviations and symbols are used throughout the published tables:

Z—Less than half of one unit reported
D—Data withheld to avoid disclosure of information for individual enterprises.

Definitions and Explanations

Except for the introduction of the term "Enterprise" (defined in the paragraph on **presentation of data)** the definitions and explanations are the same as for the other parts of the 1969 census, and are as fully comparable as possible with reports of earlier censuses. The more important definitions and explanations, including any variations from earlier censuses, are provided on pages 6 through 12 of chapter 1, volume II of the

published reports of the 1969 Census of Agriculture. The reproduction of the specialized enterprise data collection form in the appendix provides the content of the survey and the frame of reference for each data item.

Unpublished Data

The individual enterprise records from which these published tabulations were prepared are being retained for a period of about 5 years in computer processable form. Thus, it will be possible for the Census Bureau to prepare special tabulations for which a demand arises. Such tabulations could be tailored to the specific needs of the requester and would be done at the requester's expense. The cost would include programing, tabulation, review for consistency with published data, and suppression of data that would disclose individual operations. Inquiries should be directed to the Chief, Agriculture Division, Bureau of the Census, Social and Economic Statistics Administration, Washington, D.C. 20233.

Sample Selection

For the purpose of the farm enterprise surveys an enterprise occurs within a farm if the value of products sold for the product or product group included in the enterprise description is $10,000 or greater.

The universe for the 1971 Farm Enterprise Surveys was the 1969 Census of Agriculture data file excluding farms with total value of products less than $2,500, abnormal (primarily institutional) farms, and all farms located in Alaska.

For selection of the samples, the universe was stratified by value-of-sales class within type of farm, within State. The basic samples were selected by type of farm with all enterprises included in the sample farm (except "General" and "Miscellaneous") also included in enterprise sample. Farms classified as general or miscellaneous types were sent the applicable report forms only for their secondary enterprises, if any. The products or groups of products assigned to each enterprise (or enterprise-like) classification are the same as those for corresponding type-of-farm classifications, except that sales of dairy cattle and calves were included in the livestock-farm type classification in 1969 and in the dairy-farm enterprise classification for 1971.

The procedure used in selecting the sample for the type of farm enterprise survey was—

1. For each type of farm, select an indicated number of farms within each total value of products sold (TVP) stratum. Sampling rates by type of farm and TVP stratum are given in exhibit 1. The resulting numbers of enterprises in the samples are given in exhibit 2.

2. Once a farm is selected for the sample, determine the enterprises (product or group of products with sales of $10,000 or more) and provide a report form for each. By definition, only those farms with total value of products of $10,000 or greater could include an enterprise; however, it was possible for some farms with total value of products between $10,000 and $20,000 to have no enterprise. (Note: These farms, however, were tabulated in the line for PRINCIPAL enterprises since the sorting was based on the total value of products sold by the farm.)

3. If a sample farm has no enterprise, provide a report form matching its type of farm. However, exclude general and miscellaneous farms, regardless of size, when they do not include at least one in-scope enterprise.

The effect of this procedure is—

1. Estimates are provided for all nine of the enterprises in scope for the surveys.

2. Estimates for enterprise-like statistics are provided for farms with 1969 total value of products of $2,500 or greater but which include no enterprises. These estimates are by type of farm and are not combined with the estimates for enterprises.

3. Except for the qualifying farms containing no enterprise, there are no estimates for farm characteristics which are not included in an enterprise. For example, if a sample farm with $39,000 total value of products sold has a $20,000 grains enterprise and an $11,000 tobacco enterprise and cotton sales of $8,000, cotton operations characteristics from that farm are not included in the estimates.

4. No estimates are provided from farms having TVP less than $2,500.

Simple unbiased estimates are provided for totals. They are based on reports received, with no adjustment for nonresponse, or for enterprises established since 1969. Sampling errors have not been presented. The purpose of the reports is to present characteristics for only those enterprises and farms reporting and not to provide estimates for the universe. Time and other resources were not available to follow up nonrespondents as intensively as was desired and for given enterprises it was believed unsafe to assume a distribution for characteristics. Greatest effort was made in following up nonrespondent farms with expansion factors of 1 and 2. Thus, the sampling error for enterprises such as sugar, potatoes, and other field crops; vegetables, including tomatoes and melons; and fruits and nuts should be close to negligible for characteristics reported by all farms containing the enterprise.

Estimates are provided for specialized enterprises corresponding to nine type-of-farm classifications, as follows:

Grains, Soybeans, Dry Beans, Dry Peas (vol. V, part 1)

Barley for grain	Mustard seed
Buckwheat for grain	Oats for grain
Corn for grain	Proso millet
Cow peas for dry peas	Rice
Dry field and seed beans	Rye for grain
Dry field and seed peas	Safflower
Emmer and spelt	Sorghum for grain (includes milo)
Flaxseed	Soybeans for beans
Mixed grains for grain	Wheat for grain

Tobacco (vol. V, part 2)
Tobacco

Cotton (vol. V, part 3)
- Cotton

Sugar Crops, Potatoes, and Other Specified Crops (vol. V, part 4)
- Broomcorn
- Castor beans
- Dill for oil
- Flax for fiber
- Guar
- Hops
- Irish potatoes
- Lentils
- Mint for oil
- Mung beans
- Peanuts for nuts
- Popcorn
- Sesame seed
- Sugar beets for seed
- Sugar beets for sugar
- Sugarcane for seed
- Sugarcane for sirup
- Sugarcane for sugar
- Sunflower seed
- Sweet corn for seed
- Sweetpotatoes

Vegetables, Including Tomatoes and Melons (vol. V, part 5)
- Asparagus
- Beets
- Cabbage
- Cantaloups, persians, and muskmelons
- Carrots
- Cucumbers and pickles
- Dry onions
- Green lima beans
- Green peas
- Lettuce and romaine
- Radishes
- Snapbeans, bush and pole
- Squash and pumpkins
- Sweet corn
- Sweet peppers
- Tomatoes
- Watermelons
- Other vegetables

Fruits, Nuts, and Berries (vol. V, part 6)
- Citrus fruits:
  - Grapefruit
  - Oranges
  - Lemons
  - All other citrus
- Noncitrus tree fruits:
  - Apples
  - Cherries
  - Peaches
  - Pears
  - Plums and prunes
  - All other noncitrus fruits
- Grapes, American type
- Grapes, European type:
  - Raisin varieties
  - Table varieties
  - Wine varieties
- Berries:
  - Blackberries and dewberries
  - Blueberries
  - Cranberries
  - Raspberries
  - Strawberries
  - All other berries
- Tree nuts:
  - Walnuts, English or Persian
  - Almonds
  - Pecans, improved
  - Pecans, wild and seedling
- Other fruit and nut trees

Poultry, (vol. V., part 7)
- Poultry and eggs

Dairy (vol. V., part 8)
- Milk
- Dairy cows and heifers
- Dairy bulls

Cattle, Hogs, Sheep, and Goats (vol. V, part 9)
- Beef cattle and calves
- Hogs and pigs
- Sheep and lambs
- Goats, kids, mohair

Type-of-farm operations not represented by corresponding specialized enterprise survey report forms are—

General:
Field seed crops, hay, grass, and silage. A farm was also classified as general if it had cash income from three or more sources and did not meet the criteria for any other type.

Miscellaneous:[1]
Greenhouse and nursery products, mushrooms, sod, forest products, mules, horses, colts, ponies, fur-bearing animals, bees, honey, goat milk, and farms with no value of farm products sold. Also all institutional farms and Indian reservations.

Farm Enterprises by Type of Farm

Table 1 shows the enterprises for each census type of farm in the sample. For example, the horizonal line for cash-grain farms shows the various specialized enterprise report forms that cash-grain farms received. The first number (12,028) represents cash-grain farms with less than $10,000 sales of cash grains. Such farms received the enterprise form that corresponded with their type-of-farm classification. The second number (44,551) represents cash-grain farms with $10,000 or more sales of cash grains. The third number shows that 66 of the 44,551 farms whose principal enterprise was cash grain also had a secondary tobacco enterprise ($10,000 or more of tobacco sales). Additional secondary enterprises on the selected sample farms whose principal enterprise was cash grain were cotton, 2,060; other field crops, 741; vegetables, 315; fruit and nut, 88; poultry, 45; dairy, 517; and other livestock, 8,184. The total number of report forms (all nine specializations) sent to farms whose principal type of operation was cash grain was 68,595.

The vertical columns of table 1 show the number of farms by type that received a specific specialized report form. For example, the tobacco column shows 18,852 total tobacco enterprise forms mailed, of which 66 went to cash-grain-type farms, 8,496 to tobacco-type farms, 12 to cotton type of farm, etc. The last entry in this column (7,636) is tobacco-type farms with less than $10,000 sales of tobacco; therefore they received a tobacco enterprise report form.

To determine the number of farms classified as a specific type of farm, it is necessary to add the "farms under $10,000" group to the group classified for that type. For example, to determine the number of farms classified as tobacco type, add the "farms under $10,000" group (7,636) to the tobacco type of farm group (8,496) which equals 16,132. These 16,132 tobacco-type farms received 16,132 tobacco enterprise report forms and 1,495 report forms for other enterprises.

Table 2 shows the universe from which mailing cases were selected. Farm counts derived from table 2 for type-of-farm classifications can be related directly to counts available from the 1969 Census of Agriculture.

Table 3 provides data indicating the extent of coverage shown in the tabulations of the farm enterprise surveys. The unweighted

[1] A census of greenhouse products, nursery products, mushrooms and sod was taken for the year 1970. (Volume V, part 10).

Exhibit 2. Enterprises in the Sample by Value of All Farm Products Sold

	Type of farm enterprise								
	Cash-grain	Tobacco	Cotton	Other field crops	Vegetables	Fruit and nut	Poultry	Dairy	Other livestock
Total	95,700	18,852	18,389	27,141	15,020	29,234	38,920	61,202	107,887

$40,000 to 99,999									
Principal	14,529	1,856	3,315	4,955	2,564	5,638	18,388	14,809	30,880
Secondary	20,357	1,548	3,275	3,787	1,770	771	887	4,101	14,423
$20,000 to 39,999									
Principal	17,877	3,746	2,846	6,753	2,903	8,528	7,707	20,345	13,088
Secondary	6,420	587	1,021	1,105	448	218	238	2,314	7,370
$10,000 to 19,999									
Principal (>$10,000)	8,025	2,649	870	1,887	1,171	4,867	1,601	7,592	5,266
Principal (<$10,000)	3,944	1,676	1,039	1,372	535	475	251	2,265	2,981
$5,000 to 9,999									
Under $10,000	5,616	3,797	1,076	1,455	1,055	3,194	535	2,893	4,764
$2,500 to 4,999									
Under $10,000	2,468	2,163	890	621	551	1,662	217	623	2,704

Note: These counts are based on 1969 Census of Agriculture distributions.

number of forms tabulated are shown with the unweighted number of forms mailed for each type. Data were not imputed for nonresponse nor for forms received which were incomplete or no longer in scope.

Expanded figures are shown for principal and secondary enterprises and for the reports for farms with less than $10,000 value of products sold (1969) by type of enterprise and farm.

The expanded figures for specialized reports by type of farm are shown with the number of farms by type from the 1969 Census of Agriculture.

Comparisons with data shown in table 1 and exhibit 2 provide some interesting relationships of the expanded reports tabulated with the unweighted number of forms mailed. For example, the weighted number of principal tobacco enterprises tabulated,

Table 1. Number of Enterprises in the Sample, by Type of Farm

Under $10,000	123,645	45,264	14,272	6,038	5,608	20,271	4,521	47,905	250,597	518,121
Farms by type, 1969	369,312	89,903	40,534	31,190	19,660	53,754	57,545	260,956	647,884	1,570,738
Specialized reports by type of farm (principal plus under $10,000)	295,172	66,424	28,935	22,118	11,245	43,548	43,566	212,123	521,813	1,244,944
Percent of 1969 farms by type	79.9	73.9	71.4	70.9	57.2	81.0	75.7	81.3	80.5	79.3

21,136, represents the useable returns received from the 10,172 forms mailed (8,496 principal enterprise, $10,000 or more, table 1; and 1,676, less than $10,000, exhibit 2). The 45,288 tabulated tobacco reports for farms with less than $10,000 in sales of all farm products represent the useable returns received from the 5,960 forms mailed (exhibit 2). The figure of 3,007 for secondary tobacco enterprises tabulated represent the useable returns received from the 2,720 secondary tobacco enterprises on farms of all other types that were drawn in the sample and to which tobacco forms were mailed (table 1).

Agricultural Labor Related to Specialized Operations

The items pertaining to labor were identical for all nine of the specialized surveys. These inquiries were divided into three separate parts. These three parts are as follows: (1) Operator and unpaid workers, (2) paid workers, and (3) man-days worked by paid workers. (See the reproduced data-collection form in the appendix.)

Data on the number of days the operator worked and the portion of expenditures for hired labor related to the given enterprise are shown only for the reports that provided both the number of days worked and the portion of labor expenditures related to the given enterprise. Incomplete responses were not imputed or otherwise corrected and were not included in the tabulations. Separate data by days worked are shown for those operators who reported that one-half of their work or more was related to the given enterprise.

The same limitation on presentation of the data was used for the number of unpaid workers and the number of days they worked. The reporting of these other unpaid workers was more incomplete than for the operator due to the necessity of listing each unpaid worker. Many operators apparently did not consider their wives or children as farm workers if they did only infrequent work on the farm. There was no attempt made to impute or otherwise correct the reports for unpaid labor.

In presenting data for hired workers the following definitions were used:

Regular workers represent those workers who performed agricultural work on a farm 150 days or more during the year.

Part-time workers (seasonal) represent those workers who performed agricultural work on a farm less than 150 days during the year. Such workers may have worked as little as part of one day or as much as full time for not more than 149 days on a particular farm.

Contract workers represent those workers who performed agricultural work on a farm, but who were paid by a crewleader, contractor, buyer, processor, cooperative, customwork operator, or other such person having an oral or written agreement with the farm operator.

Man-day is considered to be any day on which a person was employed one hour or more.

The data relating to regular hired workers include the number of farms reporting, number of workers, and cash wages for the farms reporting workers working 250 days or more and farms reporting workers working 150 to 249 days. Additional data are also presented for farms reporting 3/4 or more of the cash wages paid for regular farm workers being used on the given enterprise. Only those reports showing number of workers, cash wages, and the proportion of cash wages paid for work on the given enterprise are included in the data shown.

SUGAR CROPS, POTATOES, OTHER SPECIFIED CROPS

General Background

The Specialized Agriculture Survey of Other Field Crops (Sugar Crops, Potatoes, and Other Specified Crops), 1971, was conducted to obtain more in-depth and intensive information on characteristics of such operations; it had not been feasible to ask all the additional items desired on the regular census report form. Because little information was available nationwide at the county level, data were collected pertaining to production practices including nutrient components of fertilizers and method of application, use of pesticides, customwork, contracts, specialized machinery, and labor.

Items of information not previously available are compared to traditional census items such as inventory or sales for the same farms in many of the publication tables. These relationships should provide some measure of distribution of characteristics of other field crop operations throughout the United States.

Scope of the Other Field Crop Survey

The 27.1 thousand sample farms to which other field crop survey forms were mailed included 19.2 thousand other-field-crop-type farms and 7.9 thousand other field crop operations on other type farms. They represent a total of 41.7 thousand other field crop operations. The number of sample farms from which acceptable reports were received and which are included in the tabulations shown in this publication is 20.1 thousand. When weighted, these reports represent 29.9 thousand other field crop operations or approximately 72 percent of those in the universe being sampled.

The sampling rate by value of all agricultural products sold for other-field-crop-type farms is shown in the table below:

	Number of other field-crop-type farms in 1969 census	Sampling rate for 1971 survey
$100,000 and over	2,198	1
$40,000 to $99,999	4,970	1
$20,000 to $39,999	6,713	1
$10,000 to $19,999	6,508	2
$5,000 to $9,999	5,819	4
$2,500 to $4,999	4,982	8

The following table shows, on a weighted basis, the proportion that each level of other field crop operation (principal, secondary, under $10,000) contributes to the total field crop operations represented in the sample.

	Farms reporting	Percent
Total	29,921	100
Principal	16,084	54
Secondary	7,799	26
Under $10,000	6,038	20

Availability of Data

Data are shown at the State level for 31 tables and at the county level for the most important States for the 3 tables believed to be of most general interest. Space limitations preclude publication of data for all 31 tables at the county level; however, the data are available in the form of unpublished tabulations for all counties with 25 field crop survey reports or more included in the tabulations. Copies of any or all of the 28 unpublished county tables can be provided upon payment of the cost of review for disclosures and consistency and of making reproductions. A cost estimate will be furnished upon request. Inquiries should be addressed to the Chief, Agriculture Division, Bureau of the Census, Washington, D.C. 20233.

Presentation of Other Field Crop Data

The tabulations for the other field crop survey are limited for most items to those farms that reported the item on the report form, with the further limitation that the item reported was acceptable in comparison to related items on the form. Many of the tables have one column or more of data that can be related to the universe reporting. For example, the number of farms reporting Irish potatoes and the acres harvested are shown in "Table 4, Commercial Fertilizer Used and Method of Application."

Counts of farms for the other field crop survey that had acceptable reports for various items are shown in the following table:

Weighted Counts of Number of Farms and of Farms Reporting Selected Items

	Farms reporting	Percent
Farms tabulated	29,921	100
Hired-labor expenditures	21,578	72
Labor on the other field crop operations:		
Farm operator labor	15,051	50
Other unpaid workers	7,431	25
Regular workers (150 to 249 days)	4,809	16
Regular workers (250 days or more)	4,370	15
Part-time workers (less than 25 days)	6,631	22
Part-time workers (25 to 149 days)	6,586	22
Contract workers	3,900	13
Irish potatoes:		
Farms	7,780	100
Fertilized acres	7,473	96
Airplane treatment	1,528	20
Insect treatment	6,695	86
Disease treatment	4,641	60
Weed treatment	3,980	51
Customwork—total cost	2,455	32
Sugar beets for sugar:		
Farms	7,861	100
Fertilized acres	7,642	97
Airplane treatment	1,224	16
Insect treatment	3,121	40
Disease treatment	848	11
Weed treatment	5,215	66
Customwork—total cost	3,665	47

Weighted Counts of Number of Farms and of Farms Reporting Selected Items—Continued

	Farms reporting	Percent
Sugarcane for sugar:		
Farms	1,540	100
Fertilized acres	1,412	92
Airplane treatment	408	26
Insect treatment	759	49
Disease treatment	158	10
Weed treatment	1,194	78
Customwork—total cost	885	57
Peanuts for nuts:		
Farms	11,633	100
Fertilized acres	9,863	85
Airplane treatment	2,106	18
Insect treatment	7,705	66
Disease treatment	6,595	57
Weed treatment	8,724	75
Customwork—total cost	4,829	42

Some indication of the degree of completion or response for these items may be obtained from this table. For example, for Irish potatoes, 96 percent of the respondents in the survey reported acres fertilized, and 86 percent reported use of treatment for insects. For this survey only 50 percent of the operators reported both their total days of farm work during the year and the portion of that time which they spent on their other field crop operations; this appears to be a poor response since close to 100 percent would be expected to do some work on their other field crop operations. In contrast, 72 percent of the farms reported hired labor for the other field crop operations, compared with 75 percent of the other field crop type farms in the 1969 census.

Imputation and Analytical Review

Acres harvested and production—Production was imputed when *acres harvested* was reported but production was inconsistent with specified limits. The computer edit program deleted and identified for analytical review all production data when corresponding *acres harvested* was not reported.

Commercial fertilizer—The fertilizer section provided for up to three different fertilizer applications to be reported for each crop. Except in the case of crop failure, the maximum acreage accepted for each application reported was the total acres of the crop harvested, as reported in section 3.

For each crop, *acres harvested* was imputed as acres fertilized for reports with no acres fertilized reported and either or all of the following reported: (1)Total tons of fertilizer including filler, (2) percentage analysis, and (3) nutrients per acre. Otherwise, the form of the fertilizer and the method of application were deleted. Reports of acres fertilized only were acceptable and are included in the acres fertilized data.

Total tons of fertilizer including filler was acceptable in all cases where the *average tons per acre* was less than 3.0. Percentage analysis was accepted and used in computing pounds of nutrients per acre for all instances where the sum of percentage analysis was less than 91. Up to 350 pounds per acre of any one of the elements (nitrogen, phosphate, or potash) and 1,000 pounds of total nutrients per acre were acceptable. All cases exceeding these limits were deleted and reviewed.

These limits were later raised to 750 pounds per acre of any one of the elements and 1,500 pounds of total nutrients and many cases were restored in the review process. Where total tons of fertilizer including filler, percentage analysis and/or pounds of nutrients per acre were reported, the percentage analysis was used in determining pounds of nutrients per acre.

When both dry and liquid forms were reported and the method of application was through the irrigation system, the dry form was deleted. When fertilizer was not applied through an irrigation system and both forms were reported, both were deleted. A report of acres fertilized without a report of form applied was acceptable.

Generally, only one of the four possible methods of application was acceptable for each application. However, fertilizer applied through an irrigation system and one of the three remaining methods was permissible.

Fertilizer applied through the irrigation system was allowed only if the acres were irrigated. A report of acres fertilized without a report of method of application was acceptable.

Insecticides, fungicides, herbicides or other pesticides—For other field crops, *acres treated* was not allowed to exceed the acres harvested except in cases of crop failure. When the number of times treated was not reported, but *acres treated* was reported, one time was edited in for the number of times treated. The reported number of times treated was accepted up to and including 24. All reports of five times treated or more for insects, disease, or weeds were reviewed and reduced in cases of obvious reporting errors. For example, if the respondent reported 20 acres of Irish potatoes harvested and 20 times treated for insect control, it was assumed the 20 acres were treated once rather than 20 times and the number of times treated was changed to 1. However, if the respondent reported 20 acres harvested and 10 times treated, the report was accepted. If the reported number of times exceeded 24, the edit divided the reported entry by 10 until the reported entry was equal to or less than 24. The method of application was accepted as reported; if method of application was not reported, it was not imputed.

Acres treated with chemicals by airplane—In general, an entry for acres treated by airplane was accepted only if the respondent reported custom application for insect control, disease control, and/or weed control. The largest entry of acres treated for insect, disease, and/or weed control was determined to be the maximum accepted value for acres treated by airplane for all cases with two or more of these practices used. EXAMPLE: If the respondent reported 500 acres treated for insects and 1,000 acres treated for disease and the method of application was custom applied, *1,000 acres* was the largest value to be accepted for acres treated by airplane. EXAMPLE: If the respondent reported just acres treated for insects as custom applied, *acres treated for insects* was the maximum acceptable value for acres treated by airplane.

Customwork—*Acres custom tilled* was accepted up to six times acres harvested for each crop. In cases where acres tilled exceeded six times the sum of acres harvested, the computer edit program changed the acreage tilled to equal the acres harvested. *Acres custom planted* was accepted up to the number of acres harvested. *Acres custom fertilized or limed* was accepted up to acres fertilized plus acres harvested when the method of application was custom applied or applied by the operator with equipment not owned by the operator.

Acres custom sprayed or dusted was accepted up to the sum of acres treated for insect control, disease control, and weed control times the number of times treated when the method of application was custom applied or applied by the operator with equipment not owned by the operator. *Acres custom harvested* was accepted up to acres harvested. *Acres for other machine hire or customwork* was accepted up to three times acres harvested.

Expenditures for customwork and machine hire were accepted if within tolerances based on acres reported for each customwork item times a specified dollar limit for each item.

Contracts—In order to be accepted as a valid contract for tabulation, the report had to have acres under contract. *Acres under contract* was accepted up to and including the number of acres of the crop harvested.

Crops Reported

The following table shows the crops reported in this survey by farms reporting and acres harvested.

Other Field Crops by Farms Reporting in the Survey and Acres Harvested

	Farms reporting	Percent	Acres harvested	Percent
Total	29,921	100	3,871,737	100
Irish potatoes	7,780	26	1,048,384	27
Sweetpotatoes	1,185	4	43,976	1
Sugar beets for sugar	7,861	26	915,352	24
Sugarcane for sugar	1,540	5	534,516	14
Broomcorn	195	1	38,395	1
Castor beans	14	(1)	1,235	(1)
Hops	185	1	25,700	1
Lentils	154	1	42,735	1
Mint for oil	546	2	76,011	2
Peanuts for nuts	11,633	39	931,867	24
Popcorn (ear corn)	789	3	52,156	1
Dill for oil	40	(1)	2,513	(1)
Flax for fiber	8	(1)	120	(1)
Guar	189	1	21,436	1
Mungbeans	31	(1)	2,240	(1)
Sugar beets for seed	71	(1)	2,607	(1)
Sugarcane for sirup	90	(1)	2,564	(1)
Sugarcane for seed	895	3	28,797	1
Sunflower seed	320	1	61,858	2
Sweet corn for seed	157	1	6,426	(1)
Pineapples	36	(1)	32,713	1
Ginger root	16	(1)	32	(1)
Lotus root	8	(1)	8	(1)
Wetland taro	22	(1)	96	(1)

[1] Less than 0.5 percent.

Crops grown exclusively in Hawaii (pineapple, ginger root, lotus root, and wetland taro) were written in by respondents. For many reports, the yields for these crops were not reported or were reported in an unnamed unit; in such cases the yields were imputed based on the respondents 1969 census report form.

Reporting Problems

Although not major, some problems did show up in the reporting of data on other field crops report forms and in computer edit. During the computer and the clerical review operations, several tests were made for reporting errors and keypunch errors. Although, the majority of these errors were identified and corrected, some inconsistencies were not adjusted. The specific suspected problem areas in this survey are as follows:

Partly irrigated production—Because of limitations on the extent of the edit used in refining the data, some unusual relationships on partly irrigated reports remain in the tabulations. It appears as though some respondents inaccurately estimated the amount of production of specified field crops that were harvested from the irrigated area. Nevertheless, all reports with the reported irrigated production within specified limits and the reported dryland production within specified limits, however unusual the relationship, remain in the tabulations.

Custom spraying and dusting—Respondents were requested to report the acres each time a custom service was performed for tilling, planting, fertilizing and liming, spraying and dusting, harvesting, and other customwork or machine rental for each of the crops. However, there were indications of misreporting on numerous occasions for acres sprayed or dusted. The computer edit determined and placed in storage two values (the maximum and minimum accepted values) for testing the reported acres custom sprayed or dusted. The maximum accepted value was the sum of acres treated times the number of times treated for insects, disease, and weeds when the method of application was reported as custom applied and/or applied by the operator with equipment not owned by the operator. The minimum accepted value for acres sprayed or dusted was determined as follows:

a. *Acres treated* was defined as the minimum accepted value for acres sprayed or dusted for all cases with only one report of acres treated for insects, disease, or weeds, with the method of application as custom applied and/or applied by the operator with equipment not owned by the operator. EXAMPLE: If the respondent reported just acres sprayed for insects as custom applied and/or applied by him with equipment not owned by him, *acres treated for insects* was determined to be the minimum accepted value.

b. In cases with more than one acreage reported, the largest entry of acres treated for insects, disease, and/or weeds, was determined to be the minimun accepted value for acres sprayed or dusted for all cases with two or more of these practices used and the method of application was custom applied and/or applied by the operator with equipment not owned by the operator. EXAMPLE: If the respondent reported 500 acres treated for insects and

1,000 acres treated for disease and the method of application was custom applied and/or applied by operator with equipment not owned by operator *1,000 acres* was determined to be the minimum accepted value.

Other customwork or machine rental acres—Respondents were requested to report the acres and to explain the purpose of customwork or machine rental for purposes other than those specified on the report form; that is tilling, planting or seeding, fertilizing or liming, spraying and dusting, and harvesting. The recognizable reporting errors in the "other machine hire or customwork" question were corrected. However, unspecified entries were not deleted or moved.

Cost of customwork or machines rented—Respondents were requested to report the cost of customwork (machine plus operator) and the cost of machines rented for other field crops in 1971. The cost of materials was not to be included. The obvious errors in reporting were corrected; however, it appears likely that the cost of materials used was included in the retained data in many cases. All reported cost data were accepted without review up to specified limits.

O.M.B. No. 41-S71100; Approval Expires December 31, 1972

FORM 69-A13
(6-18-71)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

SURVEY OF SPECIALIZED AGRICULTURE - 1971

SUGAR CROPS, POTATOES, AND OTHER SPECIFIED CROPS

Response to this inquiry is required by law (Title 13, U.S. Code.) By the same law your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are exempt from legal process.

If you write to us about this report, please mention the Census File Number (the ten-digit number in the upper left corner of the address label)

A13

(Please correct any error in name and address including ZIP code)

CENSUS USE ONLY	001	002	003	004

Please read . . .

this message and the letter below.

Then begin with Section I and continue, following the instructions and explanations on the form.

For your convenience, the various production items have been organized into sections by type or purpose. Thus, if your answer to the title question of a section is a mark in the "No" box, your report for that section is complete and the individual items do not require your attention. You should move directly to the next section.

Please answer all sections of the form. If your records do not include the information for one or more items, give us your best estimates.

January 1972

We need your help --
in your answers to the questions in this census form. Please fill it out and return it just as soon as you can.

Your replies, along with those of other operators like yourself, will provide some badly needed information about your type of farming or ranching.

If you reported, in the 1969 Census of Agriculture, significant production from more than one specialized type of farming or ranching, we are asking you to complete a form for each one.

Your filled out report form (or forms) must be returned to us for the successful completion of this survey, which is a part of the Census of Agriculture. The study is needed to measure the changes taking place so rapidly in United States agriculture.

By taking part in this study you are making an important contribution to the development of information which will benefit you and everyone concerned with the progress of agriculture.

Your answers will be used only in combination with those furnished by others. We will not publish or reveal anything which could lead to identification of you or your operation.

Please complete this report and mail it to us as soon as possible, preferably within the next ten days. Please include the completed reports for other specialized types of agriculture if you received forms for more than one type. You will find explanations and instructions throughout the form to assist you in recording your answers. Use the enclosed preaddressed postage-paid envelope to return your completed report or reports.

Thank you

J. Thomas Breen

J. THOMAS BREEN
Chief, Agriculture Division
Bureau of the Census

Section 1 – TYPE OF MANAGEMENT

Mark (X) the box which best describes the TYPE OF MANAGEMENT under which the agricultural operations of this place were conducted in 1971.

010

1 ☐ Individual or family farm, excluding partnership, and corporation

2 ☐ Partnership, including family

3 ☐ Corporation, including family *(Do not include co-ops.)*
4 ☐ 10 or fewer shareholders

5 ☐ Other – *Specify*

For example: Estate or trust, Indian reservation, prison farm, grazing association, cooperative, etc.

Please read . . . The items in this report are to be completed for the management marked above.

Section 2 – ACREAGE AND OWNERSHIP in 1971 – *Include cropland, pastureland, and any woodland and wasteland associated with agricultural operations controlled during 1971 by the management marked in Section 1 above. (Do not include nonfarm business and residential properties.)*

		Acres
1. Land owned in 1971 – *Include land owned regardless of where it was located*	None ☐	011
2. Land rented or leased from others – *Include land worked on shares; leased Federal, State, and railroad land; and land used rent free. (Do not include land used on a per-head basis under a grazing permit.)*	None ☐	012
3. Land rented or leased to others – *Include land subleased and land worked on shares by others*	None ☐	013
4. **Total acres – Please ADD acres owned (item 1) to acres rented (item 2), then SUBTRACT acres rented to others (item 3), and enter your answer in this space. These are the ACRES in "THIS PLACE" for this census report.**	→	014
5. Cropland harvested – *Include all land in this place from which crops were harvested or hay was cut in 1971. If two crops were harvested from the same land in 1971, report acres only once*	None ☐	015 _____ Acres

Section 3 – HARVESTED ACREAGE AND PRODUCTION ON THIS PLACE IN 1971

Complete the appropriate line for each crop grown; for each crop not grown, mark the "None" box.

Crop	None	Acres harvested	Quantity harvested		Irrigated acres harvested (water applied at least once in 1971)	Quantity harvested from irrigated acres	
1. Irish potatoes	☐	020	1	Hundred weight	2	3	Hundred weight
2. Sweetpotatoes	☐	021	1	Bushels	2	3	Bushels
3. Sugar beets for sugar	☐	022	1	Tons	2	3	Tons
4. Sugar cane for sugar	☐	023	1	Tons	2	3	Tons
5. Broomcorn	☐	024	1	Tons	2	3	Tons
6. Castor beans	☐	025	1	Pounds	2	3	Pounds
7. Hops	☐	026	1	Pounds	2	3	Pounds
8. Lentils	☐	027	1	Pounds	2	3	Pounds
9. Mint for oil	☐	028	1	Pounds	2	3	Pounds
10. Peanuts for nuts	☐	029	1	Pounds	2	3	Pounds
11. Popcorn (ear corn)	☐	030	1	Pounds	2	3	Pounds
12. Dill for oil	☐	031	1	Pounds	2	3	Pounds
13. Flax for fiber	☐	032	1	Pounds	2	3	Pounds
14. Guar	☐	033	1	Pounds	2	3	Pounds
15. Mung beans	☐	034	1	Pounds	2	3	Pounds
16. Sesame seed	☐	035	1	Pounds	2	3	Pounds
17. Sugar beets for seed	☐	036	1	Pounds	2	3	Pounds
18. Sugarcane for sirup	☐	037	1	Pounds	2	3	Pounds
19. Sugarcane for seed	☐	038	1	Pounds	2	3	Pounds
20. Sunflower seed	☐	039	1	Pounds	2	3	Pounds
21. Sweetcorn for seed	☐	040	1	Pounds	2	3	Pounds

22. From how many of the acres in this place were two or more crops harvested in 1971? . . . . . None ☐ 041 _____ Acres

Please read . . . The remainder of this report form is required only of the producers of one or more of the crops listed in Section 3. If none of the crops listed in Section 3 were grown on "this place" in 1971, skip to Section 11.

Section 4 – Was COMMERCIAL FERTILIZER used on this place in 1971 on any of the crops listed in Section 3?

☐ Yes – *Complete this Section*

☐ No – *Go to Section 5*

Report fertilizer only for crops listed in Section 3. Report all applications including top dressings and side dressings. Three lines are provided for each crop for entries when more than one analysis is used. Please report each analysis separately. In the quantity column, report amounts including carrier or filler. If the analysis is not known, report pounds of nutrient, such as nitrogen, per acre. In the examples below, N refers to nitrogen, P_2O_5 refers to phosphate, and K_2O refers to potash. If fertilizer was applied to more than four of the crops listed in Section 3, report for the additional crops in Remarks on page 6.

Examples of analyses of fertilizers:		N	P_2O_5	K_2O	Nitrogen solutions:	N	P_2O_5	K_2O	Mixed fertilizers:	N	P_2O_5	K_2O
	Ammonium Nitrate	33.5	0	0		37	0	0		5	10	10
	Anhydrous Ammonia	82.0	0	0		32	0	0		6	24	24
										18	46	0

Enter item number and crop name from Section 3		Acres fertilized	Total tons of fertilizer used (including filler)	Report nutrient either by analysis or pounds of nutrient per acre, whichever is more convenient: Analysis (Percentage)			or Pounds per acre				Form of fertilizer applied Mark (X) one		Method of application Mark (X) one or none if applicable: By you with equipment – Owned by you	Not owned by you	By custom operator or other person	Through irrigation system
				N	P_2O_5	K_2O	N	P_2O_5	K_2O		Dry	Liquid or gas				
Item No.	Crop Name

FORM DO-613 (10-1-71)

Section 7 – Did you use any CUSTOMWORK or RENTED MACHINES, on this place in 1971 on any of the crops listed in Section 3?

☐ Yes – *Complete this section*

☐ No – *Go to Section 8*

Report acreage in columns (1) through (6) to indicate the services performed. Columns (7) and (8) call for the cost of using agricultural equipment you do not own for activities such as plowing, spraying, dusting, harvesting, etc. In column (7) put the cost of customwork *(operators furnished with the machines)* but do not include the cost of materials used, expenditures for contract labor, or custom work done as exchange work with other farmers. In column (8) report cash payments for rental of agricultural machinery which was operated by you or your employees, including family workers.

Crop	Number of ACRES on which customwork or rented machines was used (Count acreage each time a service was performed)						Total cost of customwork (machine plus operator) *Exclude machine rental* (7) *CENTS NOT REQUIRED*		Total cost of machines rented but operated by you or your employees (8) *CENTS NOT REQUIRED*

e. Mint still	784	785
f. Specialized machinery and equipment for any crops listed in Section 3 – *Specify crop on which used and kind of equipment.*		
Crop on which used / Kind of machinery or equipment	786	787
	788	789
	790	791
	792	793

Section 9 – LABOR USED ON THIS PLACE IN 1971 – *Report for all unpaid and paid workers (including family members) who did some agricultural work on this place at any time during 1971.*

Part A – Operator and unpaid workers – *Report all family or other workers who did not receive cash wages. List as the operator the person who operates the farm or directly supervises the agricultural operations. For partnerships list the senior member as the operator and include other partners in item 2.*

		Total days on which unpaid agricultural work was done — *Mark (X) one box for each worker reported*				What part of total unpaid agricultural work was related ONLY to the sugar crops, potatoes, and other specified crops on this place? — *Mark (X) one box for each worker reported*					
		1–24 days	25–149 days	150–249 days	250 days or more	None	Less than 1/4	1/4 but less than 1/2	1/2 but less than 3/4	3/4 or more
1. Operator	900	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	6 ☐	7 ☐	8 ☐	9 ☐
2. Unpaid workers (family and nonfamily)	901	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	6 ☐	7 ☐	8 ☐	9 ☐
	902	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	6 ☐	7 ☐	8 ☐	9 ☐
	903	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	6 ☐	7 ☐	8 ☐	9 ☐
	904	1 ☐	2 ☐	3 ☐	4 ☐	5 ☐	6 ☐	7 ☐	8 ☐	9 ☐

List additional unpaid workers in Remarks on page 6.

Part B – Paid workers – Did you have any paid workers doing agricultural work on this place in 1971?

☐ Yes – *Complete Parts B and C*

☐ No – *Go to Section 10*

Regular and part-time workers – Include all money paid in cash for agricultural work, including payments to family members, for Social Security taxes, and workmen's compensation. Do not include the value of housing, food, etc., given in payment or partial payment. Also do not include housework, customwork, or exchange work. If agricultural operation has salaried manager, exclude this person and his salary.

Contract workers – Are those doing agricultural work on the operators' land but who were paid by a crew leader, contractor, buyer, processor, cooperative, customwork operator, or other such person having an oral or written contract with the operator. (Exclude labor associated with machine customwork reported in Section 7.)

		Number of workers	Total cash wages paid for hired labor doing agricultural work on this place — *CENTS NOT REQUIRED* — Dollars	Cents	What part of the total paid to agricultural workers was related ONLY to the sugar crops, potatoes, and other specified crops on this place? — *Mark (X) one for each kind of worker reported* — None	Less than 1/4	1/4 but less than 1/2	1/2 but less than 3/4	3/4 or more
1. Regular workers (150 days or more)		920	921		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
a. 150 to 240 days		922	923		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
b. 250 days or more			925		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
2. Part-time workers (less than 150 days)									
a. Less than 25 days			927		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
b. 25 to 149 days			929		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
3. Contract workers			931		1 ☐	2 ☐	3 ☐	4 ☐	5 ☐
4. Total									

Part C – Man-days worked – A man-day is considered to be any day on which a person was employed one hour or more.

1. During 1971, how many estimated man-days were worked by the paid workers reported above? For example: One man working six days a week during a year is equal to 312 man-days of work (6 days per week multiplied by 52 weeks). – *Mark (X) ONE box only.* 932
   - 1 ☐ Under 100
   - 2 ☐ 100–199
   - 3 ☐ 200–299
   - 4 ☐ 300–399
   - 5 ☐ 400–499
   - 6 ☐ 500–749
   - 7 ☐ 750–999
   - 8 ☐ 1,000 and over

2. During which quarter of the year were the most man-days worked? – *Mark (X) ONE box only.* 933
   - 1 ☐ January 1–March 31
   - 2 ☐ April 1–June 30
   - 3 ☐ July 1–September 30
   - 4 ☐ October 1–December 31

3. During this quarter, how many estimated man-days were worked by paid workers? – *Mark (X) ONE box only.* 934
   - 1 ☐ Under 100
   - 2 ☐ 100–199
   - 3 ☐ 200–299
   - 4 ☐ 300–399
   - 5 ☐ 400–499
   - 6 ☐ 500–749
   - 7 ☐ 750–999
   - 8 ☐ 1,000 and over

Section 10 – SALES AND EXPENSES DURING 1971

Sales

1. Mark (X) only one box to show the total gross market value of all crops, poultry, livestock, and products sold from this place during calendar year 1971. Do not report your net income. If you rent land from others or work land on shares for others, include the value of the landlord's share of any products removed from this place. If any crops or livestock were produced under contract, include the contractor's share of any products removed. Include the value of crops placed under Government loan or seal in 1971. 935
   - 01 ☐ Under $250
   - 02 ☐ $250–$2,499
   - 03 ☐ $2,500–$4,999
   - 04 ☐ $5,000–$9,999
   - 05 ☐ $10,000–$19,999
   - 06 ☐ $20,000–$39,999
   - 07 ☐ $40,000–$59,999
   - 08 ☐ $60,000–$79,999
   - 09 ☐ $80,000–$99,999
   - 10 ☐ $100,000–$499,999
   - 11 ☐ $500,000–$999,999
   - 12 ☐ $1,000,000 and over

2. Of the total market value of all products sold (reported in 1 above), approximately what percent was from the sugar, potato, and other specified crops grown on this place? 936 _____ Percent

Expenses

3. Mark (X) only one box to show the total production expenses for this place in 1971. Include current operating expenses, depreciation, taxes, interest, cash rent, insurance, repairs, etc., whether paid by you or your landlord. Also include your best estimate of expenses paid by others for crops or livestock purchased under contract. Do not include any capital expenditures such as purchase of equipment or the cost of new buildings. 937
   - 01 ☐ Under $250
   - 02 ☐ $250–$2,499
   - 03 ☐ $2,500–$4,999
   - 04 ☐ $5,000–$9,999
   - 05 ☐ $10,000–$19,999
   - 06 ☐ $20,000–$39,999
   - 07 ☐ $40,000–$59,999
   - 08 ☐ $60,000–$79,999
   - 09 ☐ $80,000–$99,999
   - 10 ☐ $100,000–$499,999
   - 11 ☐ $500,000–$999,999
   - 12 ☐ $1,000,000 and over

4. Of the total production expenses (reported in 3 above), approximately what percent was for the sugar, potato, and other specified crops grown on this place? 938 _____ Percent

FORM SR-A13 (10-1-71)

Section 11 – REMARKS AND EXPLANATION

Our records show that this place reported production of the crops shown in Section 3 in the 1969 Census of Agriculture. If you did not harvest any of these crops last year, would you please list the type of agricultural enterprise, if any, you operated in 1971.

Also add any other remarks here. Identify any remarks or explanations you make by section and item number. Use the blank sheets following this page, if necessary. Sign below and mail back.

Section 12 – SIGNATURE of person filling this report - *Please check your answers, then sign below.*

A reminder

Thank you . . . for completing and returning the **Survey of Specialized Agriculture – 1971** report form which we recently sent you. We very much appreciate your time and effort.

Up-to-date information is badly needed in all areas of agricultural specialization. Changes in most areas of agriculture have been occurring so rapidly during the last few years that nobody really knows what the situation is.

Please. . . . . . If you haven't finished filling your report form, please do so and mail it back to us right away. It is important that we complete the big job of tabulating the returns, so that we can publish the information just as soon as possible.
