		Other tenant	9	10		6	100-174			

I.—FARM OPERATOR, JANUARY 1, 1935

1. Name of person

2. Address (Street or R.F.D. number) (Post office) (State)

3. Color or race

4. Year when you first began to operate this farm? (Year)

5. How many days in 1934 did you work for pay or income at jobs, business, or professions not connected with farm you operate? (Omit labor exchanged.) (If no days, write "None") Days

6. Principal occupation on days worked as reported above in Question 5

II.—FARM TENURE, JANUARY 1, 1935

7. If you rent any farm land from others, or manage any farm land for others, give name and address of owner(s) of the land:

Name

Address (Street or R.F.D. number) (Post office) (State)

8. Does the person from whom you rent this farm furnish all of the work animals? (Yes or No)

9. Do you operate this farm for others as a hired manager? (Yes or No)

10. How many acres in this farm do you own? Acres

11. How many acres in this farm do you rent from others? Acres
(The sum of Questions 10 and 11 must equal Question 12 unless operated by a hired manager.)

III.—FARM ACREAGE, JANUARY 1, 1935 (INCLUDE AAA CONTRACT ACREAGE)

12. Total number of acres in this farm Acres
Include all outlying or separate fields, meadows, pastures, woodland, or waste lands operated by the person whose name is given under Question 1, whether owned, rented from others, or managed for others. AAA contract acreage must be included. Omit from this farm any land now rented to or cropped by others. Secure a separate schedule for each tenant, renter, or cropper.

Crop land in this farm:

13. Land from which crops were harvested in 1934 Acres
Include all field crops, all tame and wild hay cut, and gardens, orchards, and vineyards. Do not count the same land twice, even though two crops were harvested from it.

14. Land from which no crop was harvested in 1934 because of crop failure or destruction Acres

15. Crop land lying idle all of 1934 or land in summer fallow in 1934 (omit crop failure and land pastured) Acres

Pasture land in this farm:

16. Land used only for pasture or grazing in 1934 which could be plowed and used for crops without clearing, draining, or irrigating (omit crop land harvested and hay cut) Acres

17. Woodland used for pasture in 1934 Acres
Include as woodland all farm wood lots or timber tracts, natural or planted, and cut-over land with young growth. Omit chaparral and woody shrubs, and woodland not pastured.

18. All other land used for pasture in 1934 Acres

Other land in this farm:

19. Woodland not used for pasture in 1934 Acres
See definition of woodland under Question 17.

20. All other land now in this farm Acres
Include here all waste land not in forest, pasture, nor crops. Include also house yards, barnyards, feed lots, lanes, roads, etc. The sum of Questions 13 to 20, inclusive, must equal Ques. 12.

21. Irrigated land from which crops were harvested in 1934. (If none, write "None.") Acres
Do not count the land twice, even though two crops were harvested from it.

IV.—FARM VALUE, JANUARY 1, 1935

22. Total value of this farm (land and buildings), including farm land and buildings rented from others \$
Give the amount for which this farm (Questions 10 and 11) would sell. Include the land actually operated by you as owner, part owner, tenant, cropper, or manager, and all farm buildings and improvements. (Omit land and buildings rented by you to tenants and croppers, or managed by others. Omit livestock and machinery.)

V.—FARM MORTGAGE DEBT, JANUARY 1, 1935

To be answered only if you own and operate all of this farm and do not own any land elsewhere.

23. Was there any mortgage debt on land and buildings so owned by you, Jan. 1, 1935? (Yes or No)

24. Amount of mortgage debt on land and buildings in this farm owned by you, January 1, 1935 (omit chattel mortgages) (Omit cents) \$

VI.—FARM HOUSING, POPULATION, AND LABOR

25. Number of dwellings on this farm: (a) Occupied (b) Not occupied B-7,8

26. Number of persons living in these dwellings, Jan. 1, 1935: (a) White (b) Colored B-9,10

27. How many of these persons were not living on a farm 5 years ago? That is, how many were living in a city or other nonfarm residence? (Omit children under 5 years of age) Number B-11

28. Farm labor.—Number of persons working on this farm, first week in January (do not include persons doing housework):

(a) Family labor, include yourself and members of your family doing farm work without wages Number B-12

(b) Hired help, include monthly, day, and piece-work hands, and members of your family paid wages by you Number B-13

VII.—CROPS HARVESTED ON THIS FARM IN 1934

	Acres harvested in 1934	Quantity harvested in 1934		
		X	X	X
Corn: <small>Omit sweet corn, pop corn, "Egyptian corn," kafir, and milo maize. Where grown with other crops, report total acreage of mixture.</small>				
29. Total acreage of corn for all purposes		X	X	X
30. Corn for grain, whether snapped, husked, or machine-harvested for grain. (Shelled corn, 56 pounds equal 1 bushel. Ear corn, 70 pounds equal 1 bushel.)			Bu.	2,3
Sorghums for grain or feed:				
31. Grain sorghums (kafir, milo maize, feterita, hegari, and "Egyptian corn") harvested for grain, either threshed or fed in the head after cutting from stalk (1 ton of heads equals 25 bushels of grain)			Bu.	E-01 1,2
32. Sweet and grain sorghums cut for silage, hay, or fodder (heads not cut off or threshed)			Tons	E-02 1,2
Annual legumes harvested or grazed:				
	Acres grown in 1934	Quantity harvested in 1934		
	Alone	With other crops	Nuts, peas, beans, etc. (bushels)	
33. Peanuts for nuts, hay, or grazing			Bu.	D-10 1,2,3
34. Soybeans for beans, hay, or grazing			Bu.	D-11 1,2,3
35. Cowpeas for peas, hay, or grazing			Bu.	D-12 1,2,3
36. Velvetbeans, vetches, Canada and other ripe field peas, for beans, peas, hay, or grazing			Bu.	D-13 1,2,3
37. Navy, pinto, kidney, lima, and other ripe field beans (omit soy, velvet, green lima, and snap or string beans)			Bu.	D-14 1,2,3
38. Annual legumes saved for hay (also include acres which produced hay under Questions 33 to 37)			Tons	E-10 1,2
Principal hay crops:				
	Acres harvested in 1934	Quantity harvested in 1934		
		Tons		
39. Alfalfa cut for hay			Tons	E-11 1,2
40. Timothy or clover, alone or mixed, including red, mammoth, alsike, and crimson clovers, cut for hay			Tons	E-12 1,2
41. Sweetclover (Melilotus) and Lespedeza (Japan clover) cut for hay			Tons	E-13 1,2
42. All other tame and wild grasses cut for hay (omit grain and annual-legume hays)			Tons	E-14 1,2

<i>Small grains:</i> Where flax and wheat were grown together, report one-half of the acreage under each crop.		Acres harvested in 1934	Quantity harvested in 1934	CODE	ENUMERATOR'S RECORD	
43. Flax threshed for grain			Bu	E-20 1, 2	State _____ County _____ S.D. No. _____	
44. Winter wheat (fall or winter sown) cut for grain and threshed			Bu	E-21 1, 2	Number of farm in order of visitation _____ Number _____ E.D. No. _____	
45. Spring wheat, including durum (spring sown), cut for grain and threshed			Bu	E-22 1, 2	Township (M.C.D.) _____ <small>(Insert name, also class as township, town, precinct, district, etc. If in more than one M.C.D., write name and acreage of each on margin of schedule)</small>	
46. Mixed grains, other than flax and wheat mixture, cut for grain and threshed			Bu	E-23 1, 2	If farm is inside any incorporated place, give name _____	
47. Oats cut for grain and threshed (unmixed with other crops)			Bu	E-24 1, 2	Enumerated by me this _____ day of _____, 1935.	
48. Oats cut for grain when ripe or nearly ripe and fed unthreshed (omit oats cut for hay)			X X X	E-25 1, X	(Signed) _____, Enumerator.	
49. Barley cut for grain and threshed			Bu	E-26 1, 2	VIII.—LIVESTOCK ON THIS FARM OR RANCH (OR ON THE RANGE) JANUARY 1, 1935, AND LIVESTOCK PRODUCTS PRODUCED IN 1934	
50. Rye cut for grain and threshed			Bu	E-27 1, 2	<small>Include all animals on this farm, whether belonging to the farm operator or not, also any animals belonging to this farm but grazing in national forests or on open range.</small>	
51. Rice (rough or paddy) cut for grain and threshed			Bu	E-28 1, 2	77. Total mules and mule colts, of all ages, Jan. 1, 1935..... Number.....	G-1
52. Small grains cut for hay (wheat, oats, barley, and rye) (Omit oats reported under Ques. 48)			Tons	E-29 1, 2	78. Of the total number, how many are mule colts under 2 years of age?..... Number.....	G-2
Miscellaneous crops harvested in 1934: <small>Report fractions of acre as 1/4, 1/2, 3/4, etc.</small>		Acres or fractions of acre harvested	Quantity harvested	CODE	79. Total horses and colts, of all types and ages, Jan. 1, 1935..... Number.....	G-3
53. Sweetpotatoes or yams (whether grown for home use or for sale)			Bu	E-30 1, 2	80. Of the total number, how many are colts under 2 years of age?..... Number.....	G-4
54. Cotton, picked, or to be picked (if sold in the seed, estimate square bales of lint). Convert round to square bales: 2 round equal 1 square.			Bales (Square)	W-1, 2	81. Total cattle and calves, of all ages, Jan. 1, 1935... Number.....	H-1
55. Sugarcane or sugar beets harvested			Tons	E-31 1, 2	Of the total number, how many are:	
56. Tobacco			Lb	E-32 1, 2	82. Calves under 1 year of age?..... Number.....	H-2
57. Irish potatoes, all varieties (whether grown for home use or for sale)			Bu	E-33 1, 2	83. Heifers 1 year old and under 2 years?..... Number.....	H-3
58. Value of farm garden vegetables grown in 1934, for home use only (omit Irish and sweet potatoes) (Omit cents) \$.....				E-40 X, 2	84. Steers and bulls 1 year old and over?..... Number.....	H-4
Vegetables harvested for sale, not for home use: <small>Where a crop was grown and harvested following another crop on the same land during the year, report acreage for each crop. (Report fractions of acre as 1/4, 1/2, 3/4, etc.)</small>					85. Cows and heifers 2 years old and over?..... Number.....	H-5
Crop	Acres or fractions	CODE	Crop	Acres or fractions	Cows milked and milk and butter produced on farm in 1934:	
59. Beans (snap or string)		E-41 1, X E-42 1, X	63. Watermelons		86. Total cows and heifers of all kinds milked during all or any part of 1934..... Number.....	H-6
60. Cabbages		E-43 1, X E-44 1, X	64. All other vegetables, except Irish and sweet potatoes		87. Milk produced in 1934 (report in gallons: 8.6 pounds equal 1 gallon)..... Gallons.....	H-7
61. Corn (sweet)					<small>Report all milk produced, whether consumed, sold, fed to stock, or otherwise disposed of.</small>	
62. Tomatoes					88. Butter churned on this farm in 1934..... Pounds.....	H-8
65. Strawberries harvested in 1934 (Report fractions of acre as 1/4, 1/2, 3/4, etc.) Acre.....					89. Total sheep and lambs, of all ages, Jan. 1, 1935... Number.....	J-1
66. All other crops not listed on schedule (nurseries, broomcorn, buckwheat, emmer and spelt, hemp, hops, sorghum for sirup, seeds, cranberries, raspberries, etc.) Acre.....					90. Of the total number, how many are ewes 1 year old and over?..... Number.....	J-2
Fruits, nuts, and grapes: <small>Do not include nursery trees or vines grown for sale or replanting.</small>					91. Sheep and lambs shorn in 1934..... Number.....	J-3
67. Land in fruit orchards, vineyards, and planted nut trees, January 1, 1935 (omit nurseries). Report fractions of acre as 1/4, 1/2, etc. Acre.....					<small>Report the number of sheep and lambs shorn, and not the number of fleeces. If shorn twice, write "Shorn twice."</small>	
Kind of fruit (Report dried fruit on basis of fresh)	Number of trees or vines, Jan. 1, 1935		Quantity harvested in 1934 (Report on fresh basis)		92. Total weight of wool shorn in 1934 (unwashed)... Pounds.....	J-4
	Not of bearing age	Of bearing age			93. Total hogs and pigs, of all ages, Jan. 1, 1935..... Number.....	K-1
68. Apples			Bu	D-20 1, 2, 3	94. Of the total number, how many are sows and gilts bred or to be bred to farrow before June 1, 1935?..... Number.....	K-2
69. Cherries			Bu	D-21 1, 2, 3	95. Total goats and kids, of all ages, Jan. 1, 1935..... Number.....	K-3
70. Peaches			Bu	D-22 1, 2, 3	96. Total weight of mohair clipped in 1934 (unwashed)..... Pounds.....	K-4
71. Pears			Bu	D-23 1, 2, 3	97. Chickens over 3 months old on this farm, Jan. 1, 1935..... Number.....	L-1
72. Plums and prunes			Bu	D-24 1, 2, 3	98. Chicken eggs produced in 1934, whether sold, used, incubated, or otherwise disposed of..... Dozens.....	L-2
73. Grapes			Lb	D-25 1, 2, 3	99. Chickens raised on this farm in 1934, whether sold, consumed, or on hand (include baby chicks bought and raised, but none that were sold as baby chicks)..... Number.....	L-3
74. Oranges			Field boxes	D-26 1, 2, 3	100. Turkeys over 3 months old on this farm, Jan. 1, 1935..... Number.....	L-4
75. Grapefruit			Field boxes	D-27 1, 2, 3		
76. Value of all forest products of this farm sold in 1934 (include value of firewood) (Omit cents) \$.....				E-80 X, 2		

I.—LEGAL REQUIREMENT AND DEFINITION OF A FARM

Legal requirement.—A report is required of every operator of a farm in the United States by the Decennial Census Act of the Congress, approved June 18, 1929.

Definition of a farm.—A farm, for census purposes, is all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. The land operated by a partnership is likewise considered a farm. A "farm" may consist of a single tract of land, or of a number of separate tracts, and these several tracts may be held under different tenures, as when one tract is owned by the farmer and another tract is rented by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm. Thus on a plantation the land operated by each cropper or tenant should be reported as a separate farm, and the land operated by the owner or manager by means of wage hands should likewise be reported as a separate farm.

Do not report as a farm any tract of land of less than 3 acres, unless its products in 1934 were valued at \$250 or more.

II.—ENUMERATOR'S RECORD

Every blank must be properly filled.

Writing must be legible and reasonably large.

The name of the township or minor civil division should be written with any additional numerical identification usually employed. The term "M.C.D." means "Minor Civil Division", i.e., the governmental subdivision of the county established by county ordinance or by the State legislature. These divisions are known by various names in the different States, such as township, precinct, district, etc.

Number farms in the order visited, *beginning each enumeration district with number 1.*

Where a farm is located in two or more counties or townships, write the name and number of acres located in each on the margin of the schedule.

The farms within incorporated places should be enumerated consecutively and kept separate from the remainder of the enumeration district, if possible. Complete one minor civil division before starting another.

III.—GENERAL INSTRUCTIONS TO THE ENUMERATOR

- a. Instructions must be studied carefully before the schedule is filled out.
- b. The supervisor should explain doubtful points.
- c. Do *not* write in the *code columns* or *blocks*.
- d. Use black ink. (*Never use pencil.*)
- e. Do not write cents where values are required. Use only dollars, omit ciphers or cents.
- f. If a farm is located in two or more counties or townships, enumerate in place where farm buildings are located.
- g. A schedule must be returned for every going farm in each district (see par. k).
- h. Obtain information from present farm operator for the farm he is now on. Get information, if possible, from farm operator. If necessary to accept statements of a member of the family or some other person, be sure that he can give reliable information.
- i. If he is a newcomer, get his inventory items and the closest approximation of previous years' crops for this farm that he can give.
- j. *Farms operated separately* the past year when combined require only one schedule.
- k. *Farms abandoned or idle* in both 1934 and 1935 are to be listed but no schedules prepared. If a farm was idle in 1934 but will be operated in 1935, prepare a schedule giving necessary information, and write across crop section "Not operated in 1934, will be in 1935." The list of abandoned and idle farms should be turned in with schedules when district is completed.
- l. *Market and truck gardens*, nurseries, greenhouses, fruit orchards, poultry lots, hatcheries, apiaries, and feed lots (except stockyards and shipping pens) in cities, towns, and villages are farms for census purposes, if they produced agricultural products worth \$250 or more in 1934.
- m. *Institutional farms* (schools, prisons, reformatories, etc.), should be recorded with value of land and buildings used for farm purposes only. (See definition of farm.) Do *not* include with the farm population as reported under Question 26, any of the *inmates* of public institutions.
- n. *Livestock on range.*—A flock of sheep or a herd of cattle being pastured on the public range or in a national forest by a person who does not own or rent any land used for that purpose should be reported on a farm schedule, and in answer to Question 12, total acres, write "No land owned or leased."
- o. *Contract Acreage—Agricultural Adjustment Administration (AAA).* Acreage under contract or leased to the Agricultural Adjustment Administration for the crop year 1934 must be included under total acreage, Question 12. Report in detail as follows:
 - If any crop was harvested or hogged off, under the crop land harvested, Question 13.
 - If the crop was plowed under and no other crop planted for harvest in 1934, under crop failure or destruction, Question 14.
 - If the crop was plowed for planting soil-building or erosion-preventing crops, which are in turn plowed under without harvesting, under idle or fallow land, Question 15.
 - If not planted to any crop and not pastured, under idle or fallow land. If actually used as pasture, under plowable pasture, Question 16.
 - Fall planted winter grain on contract acreage to be harvested in 1935 is *not* to be recorded, because the acreage has been accounted for under crop land harvested, crop failure, idle or fallow land, or plowable pasture.
- p. *Plantations.*—Visit the plantation manager and secure from him a complete itemized report for the plantation divided as follows:
 - (1) A schedule for the home farm operated by him.
 - (2) A schedule for each cropper and tenant.

- (3) After you have secured from the owner or manager all information possible for each tenant, check against the report for the plantation and see that the home farm includes all items *not* carried on the tenant schedule, also that the combined acreage and value reported for the home farm and tenants' schedules equal the total farm acreage and value of the plantation.
- (4) Interview each tenant and find out if any of the family, the crops, livestock, or other items were omitted from the plantation operator's reports.
- (5) Examine the schedule and see that no information reported on the tenant farms is included on the home farm schedule. Be sure the name and address of the landlord recorded on the tenant schedule is written in exactly the same way. Tie a string around the schedules belonging to the same plantation, with the home farm schedule placed on top.

q. *Indian reservations and allotted Indian land.*—Where land has been allotted to Indians an individual schedule has to be secured for each Indian whose use of his land would bring it under the classification of a farm. An Indian having no allotted land, but having livestock pastured on unallotted reservation, national forest, or public domain is to be classed as a farmer if his livestock products in 1934 were valued at \$250. In the latter case write on schedule "No land owned or leased." Any acreage belonging to an Indian reservation that has not been allotted to Indians, that is not assigned to an unallotted Indian for his own use, and that is not leased to corporations or individuals, if used for agricultural purposes, constitutes a single farm for which a schedule is to be secured from an Indian agent. The name of the Indian agent is to be written in answer to Question 1 as the farm operator, he is to be reported as a manager in answer to Question 9, and the name of the reservation is to be reported as owner in answer to Question 7. The reservation schedule should report only such acreage as is usually devoted to crops, improved pasture, farm buildings, etc., with the value of such acreage and farm buildings. The vast acreage of wild land over which livestock may graze is to be treated as public range and is not to be reported as a part of the farm. All livestock belonging to the reservation must be reported on the reservation schedule whether grazed on the improved acreage or on the wild land that is included in reporting the acreage under Question 12.

r. *Collectively developed or unit farms.*—Where agricultural land is being developed and sold in small tracts to nonresidents, if the original tract is farmed essentially as a unit, it should be returned as one farm in the name of the person managing it, and the words "Unit development" written in reply to Question 7.

s. Explain unusual yields, operations, and other conditions briefly on margin of schedule.

IV.—INSTRUCTIONS TO ENUMERATORS FOR SPECIFIC INQUIRIES

(The numbers given are the question numbers on the face of the schedule)

GENERAL FARM INFORMATION

1. *Name of person.*—The name of the *person* (owner, manager, or tenant) operating the farm must be given, not that of a firm, institution, school, etc., which may own the land.
2. *Post-office address.*—The correct post-office address of the person whose name is entered after Question 1 should be obtained by direct inquiry. Do not assume that the operator receives his mail through the nearest post office.
3. *Color or race.*—Write in full, White, Mexican, Hindu, Negro, Indian, Chinese, Japanese, etc.
4. *Year began operating.*—Farmers living on a place since birth are apt to give that date. See that the *year given* is that in *which operator began to run farm*.
5. *Days worked off farm.*—If the farm operator worked for pay or income at some other job, profession, or business not connected with the farm he operated in 1934, report total number of days so worked. If none, write "None."
6. *Principal occupation days worked.*—Specify the *principal occupation* engaged in during the days worked as indicated in Question 5. The principal occupation is that at which he *worked the most days*.
7. *Address of owner of rented or managed land.*—If the operator is a tenant or cropper, or if he owns a part of this farm and rents a part, give the name and address of the owner or owners of the rented land. If the operator is a hired manager give the name and address of the person or firm hiring him as manager. In case this operator owns all of the farm or ranch he is operating there will be no answers to Questions 7, 8, 9, or 11.
8. *Landlord furnishing work animals.*—If landlord furnishes all work animals or enough to carry on the farming, answer this "Yes." If not, answer "No."
9. *Hired manager.*—Be careful to report *only actual hired farm managers*. If a mere caretaker, report farm in name of owner. When Question 9 is answered "Yes", no entries should appear in Questions 10 and 11.
10. *Acres owned.*—Report as acres owned those acres which the operator holds under title, homestead law, purchase contract, as one of the heirs, or as trustee of an undivided estate, or which are owned by the operator's wife. Do not include any acres owned elsewhere unless considered as a part of this farm or ranch.
11. *Acres rented.*—Report the number of acres in this farm which the operator rents from others, paying the rent in cash or in kind.
12. *Total acres in farm.*—Report here the number of acres farmed by the operator. Include all land (except free public range) whether it be cropped, lying idle, pastured, in woodland, in waste land, in yards, or used by agreement or consent. Should the operator cut hay on land not owned by him for which he pays no rent, include this acreage in Questions 10, 12, and 13. See general instructions (par. o) about Contract Acreage—Agricultural Adjustment Administration.
13. *Acres of crop land harvested.*—Report here *only the acres of land* from which crops were actually harvested in 1934, as distinguished from *acres of crops* which may be twice as great because two crops may be grown on the same land in the same year. Include acreage hogged off, and also acreage in orchards, vineyards, nurseries, and greenhouses whether crops were produced or not.

- 14. Acres of crop failure.**—Report here all failures due to wind, hail, drought, floods, insects, disease, or destruction from any cause, including plowed under but not replanted. Include crops not harvested because of low prices or lack of labor.
- 15. Crop land idle or fallow.**—All crop land neither in crops nor pastured in 1934. (See AAA general instructions.) Include fallow or crop land idle in 1934, planted latter part of year for harvest in 1935.
- 16. Acres of plowable pasture.**—Acreage reported here must actually have been used for pasture or grazing in 1934.
- 17. Acres of woodland pasture.**—All land occupied by trees or young growth other than orchards or nursery stock, which has or will have value as wood or timber should be classified as woodland. Such land used for pasture in 1934 should be reported here.
- 18. Acres of all other land for pasture.**—Land used for pasture other than plowable or woodland pasture should be reported here.
- 19. Woodland not pastured.**—Report here all woodland on farm in 1934 except that reported as pasture under Question 17. See definition of woodland under Question 17.
- 20. All other land.**—Report here all land now in farm which does not properly belong in Questions 13 to 19, inclusive.
- 21. Irrigated land.**—That part of the crop land (Question 13) which was irrigated, must also be reported here.
- 22. Value of farm (land and buildings).**—Must be answered for every farm with as accurate a valuation as can be secured. The value asked for is the market value of all the land (reported under Question 12) and buildings as of January 1, 1935, whether owned, rented from others, or managed. On institutional farms the value should cover only the value of farm land and farm buildings.

23 and 24. Farm mortgage debt.—Ask all farmers who own and operate all the land reported under Question 12 if they own any other land in addition to this farm. If they state that they do not, then ask whether the farm is mortgaged, entering the reply under Question 23. If the answer is "Yes", secure from the farmer the amount of mortgage debt and enter it under Question 24.

25. Dwellings on farm.—Report as "Occupied" all dwellings on this farm that were actually occupied on January 1, 1935, by farm operator and his family or by any other persons. Under "Not occupied" report all dwellings vacant January 1, 1935.

26. Number of persons living on farm.—Report under the proper classification (white or colored) all persons living on the farm whether or not they have anything to do with the operation of the farm. All children and infants must be included. Do not include here the inmates of an institution, even though they may do some work on the farm.

27. Persons not living on a farm 5 years ago.—The purpose of this question is to find out how many persons now living on farms have moved to these farms from cities, towns, and villages during the past 5 years (exclude children under 5 years of age). Do not separate by color.

28. Farm labor.—(a) Include as family labor the farm operator, and those members of his family who have worked on this farm without pay for the equivalent of two or more days (at work other than housework) during the week beginning January 1, 1935, and who did not work longer than this during the same week at some paid occupation. Note that members of the family who are paid wages for work on this farm are to be reported as hired help. Exclude all members of the family who were living on this farm but were not working on this farm; for example adult sons and daughters who are unemployed, or visitors, and whose services are not used on this farm.

(b) Report as hired help all who received (or will receive) wages for working the equivalent of two or more days during the week beginning January 1, 1935. This should include members of the family who are paid wages for work on this farm.

CROPS HARVESTED

29. Total acres in corn.—The answer to Question 29 should include all acres of land devoted to raising field corn for any purpose. Do not include sweet corn (except where cut for silage), pop corn or any of the sorghums. If other crops are grown with corn, unless the corn crop is a failure, report the acres of the mixture under corn, as well as under other crops included in the mixture.

30. Corn harvested for grain.—Report here the acres and the yield in bushels of all corn harvested for grain. Caution—Report in bushels of shelled corn. Convert all other units to bushels of shelled corn: 2 bushel baskets level full, or 1½ bushel baskets heaped of husked ear corn, or 6 level or 4 heaped bushel baskets of unhusked corn equal 1 bushel of shelled corn.

31. Grain sorghums.—Be sure milo "maize" and kafir "corn" are reported here, but not under "corn."

32. Sweet and grain sorghums cut for silage, hay, or fodder.—Report all sorghums cut for silage, hay, or fodder under this question. Note that sweet sorghums for sirup must be reported under "All other crops", Question 66. Sweet sorghums, sometimes locally known as "cane" should be reported here if used for forage. True sugarcane grown from stalks or stubble should be reported under Question 55.

33 to 37. Annual legumes harvested, or grazed in 1934.—Report annual legumes harvested for nuts, beans, peas, hay, or grazed off. Where grown with corn or other crops, report acreage of mixture in second column. Report the quantities of nuts, peas, or beans actually harvested in the third column, although "picking" may have been only incidental. See that the total acreage from which hay was saved is also reported under Question 33 as well as the tonnage. Note particularly that this applies to that acreage from which peanuts, beans, or peas were separated or threshed and the by-product hay, or straw, saved or fed to livestock.

38. Annual legumes saved for hay.—The tons reported here must include all of the annual legume hay and straw saved for feed for livestock whether or not the seed has been removed. The acres of annual legumes used in the production of this hay should be entered under acres in this question, even though it has been included in acreage grown alone or with other crops in Questions 33 through 37. It should be noted that Question 38 may include other annual legumes in addition to those listed above, except annual varieties of *Melilotus* and *Lespedeza* which should be reported under Question 41.

39 to 42. Hay crops.—Be careful to report each kind of hay under the proper heading. Small grains cut for hay must be reported under *Quest. 52. All other tame and wild grasses (Q 42)*. Be sure to include the acres of these hays cut on land that might not be locally considered as part of the farm. If hay is cut on shares, such acreage should be considered as rented land and included under Questions 11 and 12, with value included under Question 22. If cut from public or other lands with no rental paid, the acres should be included in this question as well as Questions 10 and 12 and value under Question 22.

Small grains.—Caution—Do not report grain growing at the end of 1934, to be harvested in 1935. Report only grains harvested in 1934. Report buckwheat under "All other crops", Question 66.

43. Flax threshed for grain.—Do not include flax grown only for fiber here, but report it with "All other crops", Question 66.

44 and 45. Distinguish between winter and spring wheat according to time of planting, rather than variety.

46. Mixed grains.—All mixed grains, other than flax and wheat, such as oats and barley, barley and wheat, etc., should be reported here with the total acreage and production of the mixture. Write the names of mixed grains on the margin of schedule above "Small grains."

47. Oats cut for grain and threshed.—Report here only oats cut and actually threshed. Oats cut for grain and fed unthreshed must be reported under Question 48 and oats cut for hay under Question 52. Enumerators in the South and in California should note carefully the instructions on oats.

48. Oats cut for grain when ripe or nearly ripe and fed unthreshed.—Report here oats cut in the milk or dough stage.

49 and 50. Barley and rye now growing for harvest in 1935 are not to be reported here. Rye plowed under for soil improvement should not be reported. NOTE.—For all grains only the crops harvested in 1934 should be reported.

51. Be sure and report both "patch" and "Providence" rice.

52. Small grains cut for hay.—Be sure there is no duplication between Questions 47, 48, and 52 and that each is reported under its proper question.

53. Sweetpotatoes or yams for home use and for sale.—Also include acreage and production of sweetpotatoes grown in the farm garden.

54. Cotton picked or to be picked.—Cotton is to be reported in running bales (square) of approximately 500 pounds. Convert round bales to square (2 round bales equal 1 square bale).

55. Sugarcane or sugar beets harvested.—Report acres and tons of sugarcane harvested for all purposes, except for feed. Sugar beets.—Report acres and tons of sugar beets harvested for sugar only. Caution—Report sorghum cane for sirup under "All other crops", Question 66.

56. Tobacco.—Caution—Be certain to report the total production—not the average yield per acre.

57. Irish potatoes, all varieties.—Also include acreage and production of all Irish potatoes grown in the farm garden.

58. Value of farm garden vegetables.—Report here the approximate value in dollars of all of the farm garden vegetables grown for home use in 1934. Do not include Irish or sweet potatoes, which must be reported under Questions 57 and 53. Do not include acres or value of vegetables grown in institutions which must be reported as grown for sale.

59 to 64. Vegetables for sale.—Report acres only for each vegetable listed. Do not write in names of vegetables not listed, but include them (except Irish and sweet potatoes) under "All other vegetables" (Question 64). All other vegetables.—Report the total acres devoted to all other vegetables (except those listed) grown for market, such as garden beets, carrots, cucumbers, lettuce, spinach, squashes, etc. Do not write in names of vegetables not listed. Do not include Irish or sweet potatoes.

65. Strawberries harvested in 1934.—Do not write in name of other small fruit, the acreage of which should be included under "All other crops." (Question 66.)

66. All other crops.—Report here total acres of all crops not specifically called for on schedule, such as buckwheat, broom corn, emmer and spelt, grass seeds, hemp, hops, pop corn, root crops, kale for stock, sorghum for sirup, sunflowers, flax for fiber, raspberries, cranberries, etc. Acres devoted to nurseries, etc., must also be included here. Do not report production or write in names of crops.

67. Land in fruit orchards, vineyards, and planted nut trees.—The acres of land devoted to production of tree fruits, nuts, and grapes (including all not listed on schedule) should be reported here. It should also be included in crop land harvested (Question 13). Do not include here acres used to grow nursery trees or vines for sale or replanting.

68 to 75. Kind of fruit.—Be very careful to get all entries on proper lines and report production in the specified unit of measure. Do not write in the name of fruits or nuts not called for on the schedule.

76. Value of all forest products sold.—Report value in dollars of all forest products sold in 1934. Do not include in value any forest products on hand but unsold. Include lumber, poles and piling, logs, firewood, pulpwood, fence posts, railroad ties, mine timber, etc.

LIVESTOCK AND LIVESTOCK PRODUCTS

The totals for each class of livestock must be carefully recorded. Be sure that animals of various ages are included in the total and that the sum of the age groups of cattle is correct.

77 to 100.—In cattle note particularly that heifers 1 year old or under 2 years are called for.

Cows and heifers milked all or any part of 1934 should be reported. Milk produced, if reported in pounds must be reduced to gallons. (Divide pounds by 8.6 to reduce to gallons.)

Sows and gilts bred or to be bred.—Report here all sows and gilts expected to have pigs before June 1, 1935.
