* Gallons of milk skimmed on farms per pound butterfat sold as cream.

At the time these conversion factors were furnished the Bureau of the Census by the United States Department of Agriculture, caution was given that these figures do not have official standing, but were prepared chiefly for the use of the workers in the Department of Agriculture who have need of conversion factors in statistical computations. In transmitting these milk equivalents, the Department stated:

"The figures shown *** have been derived on the basis of estimated tests of milk skimmed for sale as cream in the various States, together with allowances for losses of fat in skimming and delivery.***
 "The estimated butterfat tests of milk skimmed used in arriving at the factors range from 3.8 percent to 4.6 percent, with tests relatively high in the South where Jersey cattle predominate. Losses allowed for butterfat in the skim milk were as low as 1 percent in areas where the volume skimmed per farm is large and where the use of centrifugal separators is universal."***

The Dairyman's Dollar - Distribution of Income on Dairy Farms and of Value of Sales of Specified Dairy Products on All Farms, for the United States: 1939

VALUE OF FARM PRODUCTS SOLD, TRADED, OR USED BY FARM HOUSEHOLDS ON FARMS REPORTING DAIRY PRODUCTS AS THE MAJOR SOURCE OF INCOME

Total	\$1,214,181,902	Vegetables harvested for sale	\$ 12,267,289
Dairy products sold	761,106,226	Fruits and nuts sold	6,761,846
Livestock sold	144,118,058	Horticultural specialties sold	593,152
Poultry and poultry products sold	61,240,492	Forest products sold	6,548,139
Other livestock products sold	7,272,464	Farm products used by farm households	130,310,214
Field crops sold	83,964,022		

CALCULATED VALUE OF SALES OF SPECIFIED DAIRY PRODUCTS ON ALL FARMS

Total	\$1,201,275,754	Cream sold	\$265,013,045
Whole milk sold	917,084,619	Butter sold	19,178,090
