¹ Farms reporting trees on census date, or production for the previous crop year for censuses of 1935 and 1930. For census of 1940, production for the season of 1939-40 (from the bloom of 1939) for all citrus-producing States, except Arizona and California for which the production is for the season of 1938-39 (from the bloom of 1938).
² For the States for which separate inquiries were carried on the Farm and Ranch Schedule. Although no separation was made on the 1940 schedule, practically all of the oranges in Alabama and Mississippi are of the satsuma type. Notes made on the schedules by the enumerators and the 1930 tabulations of oranges by types grown bear out this fact.
³ Valencia oranges only.
