possibly higher than the actual production, if measured in bushel containers.

Cherries. - Inquiries for cherries were carried on the 1945 schedule in all regions except region 3 (Florida). The production was reported in pounds except for Arizona and Callfornia where tons were specifled as the unit of measure. The total of $11,989,659$ cherry trees in 1945 is slightly under the $12,228,521$ enumerated in 1940. The 1935 census recorded 15,074,004 cherry trees.

Peaches. - The number of trees of $2 l l$ ages and the production of peaches were required on the 1945 schedule for all regions. The production was reported in bushels for all regions except region 6 (Arizona and California) where the unit of measure was tons. The factor used for converting peach production to bushels was 45 pounds $=1$ bushel. The number of peach trees of all ages has changed only slightly in the last 10 years. The total of $56,470,131$ trees reported in 1945 is only 3.5 percent smaller than the $68,867,222$ trees in 1940 and less than one percent below the $67,039,002$ trees reported in 1935.

Pears. - Information on the number of trees of all ages and the production of pears was obtained for all regions in 1945. For this crop, the production was also reported in bushels, except for Arizona and Calfformia where tons was the specifled unit of measure. The production in these States was converted to bushels on the basis of 50 pounds $=1$ bushel. The 1934 production of pears in California and the 1929 production in California and selected counties in Arizona, idaho, oregon, and Washington were also in tons. The production ilgures, when published in the general summary tables in 1935 and 1930, were converted to bushels for these States by using the conversion factor of 53 pounds per bushel. Research since 1935 indicates that the weight per bushel of pears should de 50 pounds. For the summary tables shown in the 1940 Census reports, the 1934 and 1925 production figures were recomputed.

The number of pear trees of all ages has been declining. The 1945 totai is $13,375,756$; whereas, the 1340 census recorded $14,450,416$ trees and the 1935 census, $19,433,157$ trees.

Plums and prunes. - Two columns were provtded o: the . 945 schedule for each region to report the number of trees of all

STRAWBERRIES-AGREAGE AND PRODUCTION, FOR THE UNITED STATES: 1899 TO 1944

LAND IN FRUIT ORGHARDS-ACREAGE, FOR THE UNITED STATES: 1930 TO 1945

APPLES - NUMBER OF. TREES (ALL AGES), 1910 TO 1945; AND PRODUCTION, 1889 TO 1944; FOR THE UNITED STATES

CHERRIES - NUMBER OF TREES (ALL AGES), 1910 TO 1945; AND PRODUGTION, 1889 TO 1944; FOR THE UNITED STATES Millions of trees (ALl ages)
