REPORTS ON AGRICULTURE

Volume I.—Statistics for farms, acreage, value, characteristics, livestock, livestock products, crops, fruits, and value of farm products. This volume consists of 33 parts, comprised of State reports with statistics for counties.

Part 1. New England States:	Part 13. Kansas
Maine	14. Delaware, Maryland, and District of Columbia
New Hampshire	15. Virginia and West Virginia
Vermont	16. North Carolina and South Carolina
Massachusetts	17. Georgia
Rhode Island	18. Florida
Connecticut	19. Kentucky
2. Middle Atlantic States:	20. Tennessee
New York	21. Alabama
New Jersey	22. Mississippi
Pennsylvania	23. Arkansas
3. Ohio	24. Louisiana
4. Indiana	25. Oklahoma
5. Illinois	26. Texas
6. Michigan	27. Montana
7. Wisconsin	28. Idaho
8. Minnesota	29. Wyoming and Colorado
9. Iowa	30. New Mexico and Arizona
10. Missouri	31. Utah and Nevada
11. North Dakota and South Dakota	32. Washington and Oregon
12. Nebraska	33. California

Volume II.—General Report—Statistics by subjects for the United States, geographic divisions, and States (one volume).

Chapter I. Farms and Farm Property	VI. Farm Facilities, Roads, and Farm Machinery
II. Size of Farms	VII. Livestock and Livestock Products
III. Color and Tenure of Farm Operator	VIII. Field Crops and Vegetables
IV. Age, Residence, Years on Farm, and Work off Farm	IX. Fruits and Nuts, and Horticultural Specialties
V. Farm Population and Farm Labor	X. Value of Farm Products, and Type of Farm

SPECIAL REPORTS

Multiple-unit Operations—Units, subunits, acreage, value, characteristics, specified crops and livestock and value of products.

Ranking Agricultural Counties—The rank of the leading counties in the United States in agriculture and agricultural products, 1945 and 1944, with comparisons, 1940 and 1939.

Report for 1945 Sample Census of Agriculture—Statistics by States for items for which data were collected on a sample basis and data for farms classified by size of farm, color and tenure of farm operator, type of farm, value of products, and economic class.

LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS
Washington 25, D. C.
June 20, 1947

Sir:

I transmit herewith a special report for the 1945 Census of Agriculture entitled "Multiple-Unit Operations." This report covers selected areas in nine Southern States. Farm units operated by croppers and tenants in Southern States, even though these cropper and tenant units comprised a part or subunit of larger operating units, have been considered as separate farms in the various censuses of agriculture. Requests for the tabulation of data on the basis of the actual operating units resulted in the preparation of this special report. Statistics are given in this report for some of the principal characteristics of multiple units and their component subunits.

Legal provision for the 1945 Census of Agriculture was made by the Act providing for the Fifteenth Decennial Census, approved June 18, 1929.

The compilation of these statistics was made under the supervision of Ray Hurley, Chief of the Agriculture Division, assisted by Henry G. Brown and Snider W. Skinner, Agricultural Statisticians. Acknowledgement is made of the cooperation and technical assistance in the planning and preparation of this report by Lee E. Langsford, Roscoe J. Saville, and J. J. Morgan of the Bureau of Agricultural Economics of the United States Department of Agriculture.

Respectfully,

J. C. CAPT,
Director of the Census

HON. W. AVERELL HARRIMAN,
Secretary of Commerce

MULTIPLE-UNIT OPERATIONS

Introduction.—There exists in southern agriculture a pattern of farm operation not found to any extent in other parts of the United States. It is an arrangement by which the landlord or operator provides capital and management, and share croppers provide labor in carrying on farming operations on an integral unit. This pattern is, in part, an outgrowth of the abrupt change in the economic status of farm workers which developed immediately following the Civil War. In the shift in the status of the workers from that of slaves to that of freedmen, it became necessary for landowners to develop new arrangements in order to continue farming operations. Under the new arrangement, landowner and worker continued to farm the same land resources. In the early stages of the development of this system, plantation operators frequently did not have sufficient funds or credit to pay cash wages while the crop was being made and to meet other production expenses. Croppers did not have the funds or managerial experience to set themselves up as independent farm operators, but they and their families were able to supply labor to operate the multiple unit. They lived on the place, usually received advances for the purchase of food and other items, and obtained a share of the crop, or proceeds therefrom, as a return for their labor. Under this system, the cropper partially shared in the economic risks brought about by changing prices and fluctuating yields. In the transition to this pattern of farm operation, the working of the land has not been confined to Negroes as many white farmers are recorded as croppers in the censuses of agriculture.

Plantation agriculture in which the land is regarded as a unit for general administration, even though farmed with croppers or other classes of tenants, has continued to exist. Also, other tracts of land not locally thought of as plantations, but encompassing more than one farm, as defined for Census purposes, are operated as a unit from the standpoint of the cropping system or managerial or supervisory functions. In many cases the tenants under these arrangements are subjected to as close supervision by the owner, general lessee, or hired manager as that to which wage laborers are subjected either on the same farms, in the same local area, or in other parts of the country.

This basis of farm operation caused sharp changes in the statistics reported because the operating unit which had been enumerated as one "farm" under slavery conditions became many farms according to the Census definitions. A "farm" for Census purposes is, in brief, a tract of land on which some agricultural operations are performed by one person, either by his own labor alone or with the assistance of unpaid members of his household or hired employees. Under this definition, each tract of land operated by a tenant—whether a renter in a more restricted meaning of the word "tenant" or whether a share cropper—has been considered as a separate farm.

The tract of land operated by each cropper or other class of tenant has been recorded as a separate farm even though a part of a larger operating unit. In order to enumerate all the land that is actually associated with the operating unit (hereafter designated as multiple unit), it is necessary to record all land other than that assigned to croppers or tenants as the home farm. Sometimes no crops are grown on the home farm; in other cases, only feed crops are grown; and, in still other cases, a part or all of the cropland is used for the growing of cash crops with the help of wage hands. The cropper parts of the multiple unit often have no work stock or machinery to report as the operator of the multiple unit furnishes the work power and machinery. Such work stock and machinery, in accordance with the instructions to report these items on the schedule for the unit or farm where they are kept, are usually reported for the home farm. Thus, neither the home farm nor the other subunits of a multiple-unit operation, when enumerated individually, represent complete operating units.

Sharing in the proceeds from the crops grown provides an incentive for the croppers to follow good husbandry under the

multiple-unit operator's direction and assists in holding the croppers on the place until completion of the harvest. The usual share for the cropper is one-half of the crop, but many variations occur because of variation in the amount of the production items each participant furnishes and for other reasons. Each cropper is charged with his share, usually one-half, of the fertilizer used and, in the case of cotton, he may pay a share of the cotton-ginning cost.

Multiple units are closely associated with the production of major crops in the South that have high labor requirements. Cotton and tobacco have been important cash crops grown under the cropper system; consequently, cotton- and tobacco-growing areas are the centers of high concentration of multiple-unit operations. (See figures 1 to 4.) Machinery and work power required for these two crops have been such that they can be used effectively by croppers. Sometimes the work stock and implements are kept at the cropper farmstead, particularly when no home farm exists, but usually they are kept on the home farm and the cropper goes there to get the work stock and implements needed for each day's work.

The concept of a farm as being a tract of land on which the agricultural operations are performed by one person, either by his own labor or with the assistance of unpaid members of his family or hired labor, must be complied with under the present procedure for the taking of a census of agriculture. Statistics collected in this manner are useful in comparing the contributions of capital, management, and labor to agricultural operations; in comparing the shares of income accruing to the various tenure groups; and in comparing characteristics of farm families. However, it has long been recognized that this concept of a farm is inadequate for comparing information relative to the organization and income for complete operating units when some operating units are comprised of several subunits designated as farms under the Census definition. When subunit operations are combined into complete operating units (multiple-unit operations), comparison may be made with other operating units not only within the same area but also with operating units elsewhere in the United States. It is the operating arrangement, not the size of the land holding, that furnishes the basis for the consolidation of subunits into multiple units in order to obtain over-all statistics on an operating-unit basis.

There are different degrees of management exercised by landlords, or hired managers, over their croppers or other classes of tenants. In most cases, the croppers are closely supervised in such matters as when to plant, fertilize, cultivate, or harvest their crop. In many cases, the wishes of the cropper are ascertained before the landlord sells the crop; and some croppers may have the privilege of marketing their share of the crop when and where they choose. On some plantations "renters" are supervised about as closely as croppers. However, most renters and some croppers are subjected to very little supervision at any time. Between these two extremes—on the one hand, very close supervision and direction on the part of the landlord in all or most phases of crop production and, on the other hand, little or no supervision or consultation coupled with freedom in marketing—are varying degrees of direction, consultation, etc.

DEFINITIONS AND EXPLANATIONS

The descriptive terms and explanations which follow refer principally to multiple units and single units, as used in this report, and to their relation to comparable items shown in volumes I and II of the reports for the 1945 Census of Agriculture. All items for which the table descriptions are considered inadequate are discussed. The exact phrasing of the inquiries and the instructions for enumerating farms and multiple-unit operations appear in the facsimile of the 1945 Farm and Ranch Schedule shown in the Appendix to this volume.

CENSUS OF AGRICULTURE: 1945

FIGURE 1

FIGURE 2

FIGURE 3

FIGURE 4

Multiple-unit operations.—For the Census of 1945, the following definition of a multiple-unit operation was decided upon after consultation of members of the Bureau of the Census with representatives of the United States Department of Agriculture, State agricultural workers, and farm operators:

"A multiple-unit operation is one in which two or more subunits are handled as a single-farm enterprise. It usually involves supervision of cropper or tenant operations and central control of such items as sale of products, work power, machinery and equipment, crop rotation, or purchase of supplies. A multiple-unit operation consists of two or more subunits, one of which must be a cropper or tenant operation under the close supervision of the multiple-unit operator. One of the subunits may consist of land worked by the operator, his family, or wage hands. Plantations should usually be reported as multiple-unit operations."

The facsimile of the schedule and accompanying instructions used in the 1945 Census of Agriculture shows that the book-type schedule contained 20 numbered lines and, at the bottom of each page, 4 lettered lines. The numbered lines were to be used for enumerating farms other than multiple-unit operations and for enumerating the subunits (each cropper, renter, and home farm) of multiple-unit operations. The lettered lines were to be used for enumerating the over-all operations of the multiple units. Under this general plan, provision was made for the enumeration of farms in accordance with the definitions used in previous censuses of agriculture and also for the enumeration of multiple-unit operations in the following States:

Alabama	Louisiana	South Carolina
Arkansas	Mississippi	Tennessee
Florida	Missouri	Texas
Georgia	North Carolina	Virginia
Kentucky	Oklahoma	

Several of the above States were included, not because of the widespread occurrence of multiple-unit operations, but because the Farm and Ranch Schedule for 1945 was regionalized from the standpoint of kinds of crops grown in a general area.

Based on the definition above, the term "multiple unit," as used throughout this report, relates to two or more subunits combined into one operating unit. One of the subunits is usually the "home farm."

Subunit.—The term "subunit" is used to denote a component part of a multiple-unit operation. The component parts of a multiple unit are two or more farms as defined by the Census of which one must be a cropper or tenant farm. One of these Census farms is usually the "home farm."

Home farm.—The term "home farm" refers to that part of the multiple unit handled by the multiple-unit operator with the help of family and/or hired labor. It usually contains the home of the multiple-unit operator or the headquarters where work stock and equipment are kept for the entire operation. The home farm includes all the land associated with the over-all multiple-unit operations not assigned to other subunits.

With croppers often reporting only cropland in their subunits, the home farm often represents the difference between the total land in the multiple unit and the cropland assigned to croppers or other classes of tenants. A home farm, when reported, was included as a subunit of the multiple-unit operation.

Some multiple-unit operators assign all of the land to cropper and tenant subunits. Such multiple units are without a home farm and, in most of such cases, the multiple-unit operator does not live on the farm or multiple unit. The number of home farms, therefore, is less than the number of multiple units.

Single unit.—A "single unit" is a farm which is operated as a complete farm business by the operator, his family, or hired workers.

INTRODUCTION

IX

Single units, as used in this report, represent farms according to the Census definition which are independent of multiple-unit operations. Since the operator of a single unit may be of any tenure, "croppers" who are independent of any multiple-unit operations are counted as single units.

From these definitions and explanations, it should be clear that the number of single units plus the number of multiple units does not equal the Census number of farms for any county or State. However, since a multiple unit consists of a combination of Census farms, the number of single units plus the number of subunits of multiple units equals the number of Census farms in a county or State.

Unit.—The term "unit," as used throughout this report, relates to an operating unit. It is a complete farm business consisting of either a single unit or a multiple unit. Thus, each multiple-unit operation is counted as one unit.

A multiple-unit operator is the person who directs and supervises the multiple-unit operations including the operations of croppers or tenants. He usually has central control of such items as the sale of products, work power, machinery and equipment, crop rotations, or purchase of supplies. If the multiple-unit operator lives on the multiple unit, he has direct supervision of two or more subunit operations, one of which is usually the land he operates with the assistance of his family or hired labor. If the multiple-unit operator does not live on the multiple unit, he must have direct supervision of two or more cropper or tenant subunits that are handled as one operating unit.

In this report, the term "multiple-unit operator" refers to the person, regardless of residence or tenure, who directs the over-all operations of the multiple unit.

A single-unit operator is the person who operates a farm independently of any multiple operation. He directs the operations on the land worked by himself, his family, or hired laborers. This term is identical with the term "farm operator," as defined for Census purposes.

Color of operator.—For Census purposes, farm operators are classified as "white" and "nonwhite." White includes Mexicans; nonwhite includes Negroes, Indians, Chinese, Japanese, and all other nonwhite races. The color of a multiple-unit operator relates to the person in control of the over-all operation. The color of a single-unit operator relates to the person who directs and controls a single-unit operation.

No data are presented in this report concerning the color of subunit operators.

Tenure of operator.—The Census classifies farm operators according to the tenure under which they operate their units or farms. The several tenure classes are defined as follows:

Full owners own all the land they operate.

Part owners own a part and rent from others the remaining part of the land they operate.

Managers operate units or farms for others and are paid wages or salaries for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers.

Tenants operate hired or rented land only.

Cash tenants pay a cash rental, such as \$10 per acre for the crop-land or \$500 for the use of the whole farm.

Share-cash tenants pay a part of their rental in cash and a part as a share of the crop or livestock production.

Share tenants pay a share only of either the crop or the livestock production or both.

Croppers are defined as share tenants to whom their landlords furnish all the work animals, or tractor power in lieu of work animals.

Traditionally, a cropper is a hired worker who is paid a share of the crop in lieu of a cash wage. He differs from a wage hand in that his payment is not fixed but depends upon the quantity of crops he harvests and sells and upon the price he receives for the crops sold. The laws of some States define a share cropper as a tenant, others classify him as a laborer. In most States, questions as to his tenure status are decided by the courts on the basis of whether he has title to the crop and, upon harvest, pays the landlord a share, or whether the landlord retains title to the crop and, upon harvest, pays the cropper his share after deducting any advances in cash, credit, supplies, etc. In order to facilitate the coding procedure, all tenants with work power furnished, except those paying cash rental only, were classified as croppers.

Other and unspecified tenants include those whose rental agreement was unspecified and those who could not be included in one of the other subclasses.

The tenure of multiple- and single-unit operators was based on the above definitions and classifications. Multiple-unit operators are classified according to the tenure under which they handle the over-all multiple-unit operation as a single farm business. To determine the tenure of multiple-unit operators, the answers to several questions were examined from the section of the schedule in which the over-all multiple-unit data were reported. Answers for comparable home-farm questions, if there was a home farm, were considered also. The answers to these principal questions were examined: "Does this person rent land from others?" "Name of landlord," "Acres rented," "Method of rental," and "All work stock and tractor power furnished by the landlord?"

No tenure data for subunits (component parts of multiple units) are presented in the county or type-of-farming area tables. However, a summary of the tenure of the subunit operators, by States, for the area included in the study, is presented in the accompanying table. It should be noted that a subunit is identical with a farm as shown in volumes I and II. The tenure classification shown in the table is the same as that presented in the reports for the 1945 Census of Agriculture. Since a home farm is classified as a subunit, the distribution of subunit operators by tenure includes the operator of the home farm. The tenure of the home-farm operator is the same as that of the multiple-unit operator with one exception: Some multiple-unit operators own all the land in the home farm and rent from others all or a part of the land assigned to croppers or tenants. Fully owned, partly owned, and managed subunits, were generally included in multiple units, only as home farms.

Age of operator.—Figures are shown for four age groups of multiple-unit and single-unit operators. Since the age of some operators was not reported, the total number of operators for these four age groups is less than the number of multiple and single units. The data for multiple units relate only to the multiple-unit operator.

Years on unit.—The schedule question on years on farm called for the year in which the operator began to operate his farm continuously. For multiple units, the figures represent the year in which the operator of the multiple operation began to operate the unit. No figures are shown for subunit operators. The figures given for "Less than 1 year" include all operators reporting 1944 or 1945 as the year they began operations. In reporting the year when the operator began to operate

NUMBER OF SUBUNITS INCLUDED IN MULTIPLE UNITS, CLASSIFIED BY TENURE OF OPERATOR¹, BY STATES: 1945

[The data given in this table relate only to the area included in the multiple-unit study. See page XII for description of area]

¹ The tenure of home-farm operators is included.

CENSUS OF AGRICULTURE: 1945

the multiple unit, there was a noticeable tendency to report the year the operator first lived on the unit, regardless of whether he was the operator at that time or whether he had operated the unit continuously since that date. Insofar as the results of this inquiry are used to reflect the stability of operators on particular units, this tendency has had no appreciable effect on the usefulness of the figures. Data for the number of years on unit for multiple-unit and single-unit operators are presented in four groups.

Residence of operator.—Information was obtained in 1945 as to whether or not the operator of the farm resided on the farm he operated. The question read, "Does the operator live on this farm?—(Yes or No)." This question applied to operators of multiple units as well as to operators of single units.

Work off unit.—Many unit operators supplement their farm income with odd or spare-time jobs or businesses off the farm. In some cases, the operator's principal source of income is off-farm work, with farming activities only a secondary enterprise.

The 1945 Farm and Ranch Schedule called for the number of days the operator worked off his farm in 1944 for pay or profit. The schedule was so designed that the question was applicable to multiple-unit operators as well as to single-unit operators. Enumerators were instructed that this question was intended to obtain a record of all the time spent off the farm in 1944 for pay or profit. Work of the operator in connection with a filling station, store, garage, tourist camp, or other nonfarm business conducted at the farm was considered as work off the farm. Exchange farm work was not to be reported. However, work on another farm for wages was to be reported as work off the farm. The figures on the number of operators reporting off-farm work represent the minimum number of operators working off their farms in 1944. Because a report was not secured for those operators not working off the farm, there is no accurate measure of completeness of the reports for operators reporting off-farm work.

For multiple units, data for days worked off the unit are presented only for multiple-unit operators. Since the number of days worked off the unit is not shown for subunits, days worked off single units plus days worked off multiple units will not equal the totals shown in volumes I and II of the reports for the 1945 Census of Agriculture. However, the number of days worked off the farm by all subunit operators, including the operators of home farms, of multiple units may be obtained by subtracting the data for single units from the comparable totals shown in volumes I and II.

Units reporting.—The term "units reporting," as used in this report, indicates the number of units for which the specified items shown in the particular tables were reported. If there were 250 multiple units in a county and only 175 of these reported tractors, the number of multiple units reporting this item would be 175. In the tables presenting multiple-unit and single-unit data, the term means either "multiple units reporting" or "single units reporting," depending on the column heading. The term "multiple units reporting" refers to the number of operating units for which an item was reported, regardless of the number of subunits reporting.

In the tables presenting data for "home farms" and "other subunits," the term "units reporting" is also used. The meaning of the term is essentially the same as explained above except that it relates to the number of home farms or other subunits (component parts of multiple units) reporting a particular item.

Land in units.—The acreage designated as "All land in units" includes all the land under the control of the operator (cropland, pasture land, woodland, and all other land) that was considered a part of his farming unit. However, large areas of timberland or other nonagricultural land held by an operator as a separate business, and not used for pasture or grazing or for any other farm purpose, were to be excluded. Land neither owned nor leased but from which crops, including wild hay or prairie grasses, were harvested was to be reported as part of the unit. When cattle, sheep, or other livestock was grazed or pastured on land neither owned nor leased by the operator, such land was not to be included as a part of the unit.

For multiple units, "All land in units" includes not only all the land associated with the home farm, but also all the

land assigned to cropper or tenant subunits. In part 3, "Table I.—Multiple Units Only," "Land in subunits" is shown separately for home farms and other subunits.

Cropland harvested.—The land from which cultivated crops were harvested; land from which hay (including wild hay) was cut; and land in small fruits, orchards, vineyards, nurseries, and greenhouses. When two or more crops were harvested in 1944 from the same acreage, such acreage was included only once in the acreage for cropland harvested. However, the acreage and production of each individual crop were reported separately as crops harvested.

Cropland harvested, as shown for multiple units, includes all land from which crops were harvested by the operator, his family, or hired workers plus all the land from which crops were harvested on units that were assigned to croppers or tenants. For single units it includes all the land from which crops were harvested by the operator with the assistance of his family and hired workers. In part 3, "Table I.—Multiple Units Only," "Cropland harvested" is shown separately for home farms and other subunits.

Crop failure.—The land from which no crops were harvested in 1944 because of destruction by wind, hail, drought, floods, insects, disease, or from any cause, or from failure to harvest because of low prices or lack of labor. If a crop was harvested, even though the yield was very low, the land from which the crop was actually harvested was included in the acreage for cropland harvested, not crop failure. The acreage designated as crop failure does not represent the entire acreage of crops which failed, but only that acreage of land in crops that failed which was not successfully replanted to a crop that was harvested in 1944. Correspondence with individual operators indicated that enumerators sometimes included under crop failure land which had not been planted to crops in 1944 because of floods, shortage of labor, or for other reasons.

For multiple units crop failure, as defined above, includes all such land associated with all subunits of the multiple unit.

Cropland, idle or fallow.—Cropland which was lying idle or which was in cultivated summer fallow; or land on which crops were planted for soil improvement or the prevention of erosion, and which was not pastured, or from which no crop of any kind was harvested in 1944.

Cropland, idle or fallow on multiple units, includes all of such land associated with all subunits of the multiple operation.

Cropland used only for pasture.—Cropland used only for pasture in 1944 that was plowed within the last 7 years. Although practically all such pasture is usually associated with the home farm of a multiple unit, the figures presented in this report include cropland pastured for all subunits, i.e., for the entire multiple-unit operation.

All other land.—For this report "All other land" includes all land other than cropland harvested; crop failure; cropland, idle or fallow; and cropland used only for pasture. In this category is included all other land used for pasture or grazing in 1944; all wood lots or timber tracts, natural or planted; cut-over land with young growth whether pastured or grazed or not; and all wasteland, house yards, barnyards, feed lots, lanes, roads, ditches, etc. Such land reported for multiple units includes all that associated with the home farm and all cropper and tenant subunits of a multiple-unit operation.

Farm labor.—The farm labor inquiry asked for separate data for the number of persons 14 years old and over working on the farm the equivalent of 2 or more days during the week ending January 6, 1945, for (a) operators, (b) unpaid members of the operator's family, and (c) hired farm laborers. The enumerators were instructed to report the number of persons working at farm work, including farm chores. Inmates of institutions and persons working at housework and contract construction work were not to be reported.

There was difficulty in securing accurate reports on farm labor. In some cases, enumerators did not secure answers to the inquiries and, in other cases, they included persons engaged in housework, children under 14 years old, the maximum number of persons employed during the year, or the operator with the other family workers in addition to reporting him separately. Although such errors were usually detected during the editing

INTRODUCTION

XI

process, adequate corrections could not always be made; consequently, the data on farm labor, particularly the data on unpaid members of the operator's family, are subject to considerable reporting errors.

Another inquiry on farm labor called for the total cash paid in 1944 for farm labor (wage, contract, and piece-work labor). Expenditures for machine hire and for any labor included in the cost of such machine hire, and expenditures for household and contract construction work were not to be included. The expenditures for farm labor represent the amount paid in cash. For certain types of labor, cash wages are often supplemented with the furnishing of board, housing, products of the farm for the use of the laborer's family, feed, pasture for animals, etc.

For multiple units these data relate to the totals for the labor and wages that were reported for the home farm and other component subunits. In each case, the term "units reporting" refers to the number of multiple units reporting any labor (family or hired) and the total number of persons represents all those on home farms plus all those on other component subunits. The number of unpaid workers, as shown in the tables, was obtained by totaling all those workers reported for the home farm (the operator and members of his family) and all those reported for other component subunits (cropper and tenant operators and members of their families) who did not receive wages. The number of operators shown as a subtotal of unpaid workers in part 1, county table I, relates to multiple-unit operators only; the number of unpaid members of the operator's family includes all members of the multiple-unit operator's family other than the operator and all cropper and tenant operators and members of their families who did not receive wages. Hired workers relate to the number of persons who worked on the home farm for wages during the specified period plus any who worked on component subunits for wages (hired by cropper and tenant subunit operators). The amount of cash wages paid for hired labor includes the total wages paid in 1944 for persons working on the home farm and for all those working for cropper and tenant operators of other component subunits.

Crops and livestock.—For multiple units, information is given for the major crops and classes of livestock. Corresponding information is also given for single units. Data for at least three and a maximum of four crops are presented for every State. The acreage shown in the tables represents that harvested in the crop year 1944. The acreage presented for multiple units represents the total acres harvested for the entire multiple unit. Thus, the acreage reported by the operator of the home farm plus that reported for other component cropper or tenant subunits constitutes the entire acreage harvested for the multiple-unit operation. The production for the various crops represents the quantity harvested during the 1944 crop year.

Data for only three classes of livestock (mules, horses, and all cattle) are presented for multiple units. The numbers represent inventories, as of January 1, 1945, of these classes of livestock on multiple units and single units, regardless of ownership. For multiple units, these totals represent an inventory for each of these classes of livestock on the home farm and on cropper and tenant subunits.

Value of farm products sold or used by unit households.—The total value of farm products sold or used on the farm is a total of the individual reports of farm operators for the nine value-of-products questions on the schedule. (See facsimile of schedule shown in the Appendix.) The total value of farm products, or the sum of the value of farm products sold and the value of farm products used by farm households, gives an approximate measure of gross farm income. For all the value-of-products questions, gross receipts or values were to be reported without deductions for expenses of any kind. The enumerator was also instructed that, if the operator was a tenant, the landlord's share should be included in reporting the value of sales. The value-of-products figures do not include income from nonagricultural sources, such as work off the farm. Also, enumerators were instructed not to include any government payments, such as soil conservation or dairy production payments in the value-of-products figures.

For multiple units, the value of products represents the total for the home farm plus the totals reported for cropper

and tenant subunits. The instructions to enumerators provided for a different procedure (see facsimile of the instructions). In general, enumerators followed the plan of totaling the values for the subunits to arrive at an over-all value for the multiple unit. In constructing totals for multiple units in the editing process, it was impossible to follow a procedure other than that of totaling the values reported for the subunits.

Fruits and nuts sold.—In general, the figures reported for these items cover the value of all fruits and nuts harvested in 1944 that had been, or were to be, sold. The value figures on fruits and nuts cover all tree fruits, nuts, and grapes, as well as small fruits. There was a noticeable tendency, in many commercial fruit areas, for growers to report their net receipts instead of the gross value of all fruit sold or traded.

Vegetables sold.—The values reported for this item represent the total value of vegetable crops harvested in 1944 for sale. Irish potatoes and sweetpotatoes were not included under vegetables, but were included under field crops.

Horticultural specialties sold.—Horticultural specialties included (1) crops grown under glass and propagated mushrooms; (2) nursery products (trees, shrubs, vines, ornamentals, etc.); and (3) flower and vegetable seeds, bulbs, and flowers and plants grown in the open. The inquiry called for the value of sales in 1944.

All other crops (field crops) sold.—This question covers the value of the sales of field crops harvested in 1944, such as corn, sorghums, small grains, annual legumes, hay, clover and grass seeds, Irish potatoes and sweetpotatoes, cotton, tobacco, sugarcane, rice, etc. The enumerator was instructed to include the value of sales of byproducts, such as cottonseed, pea vines, etc., although no provision was made for reporting the production of such byproducts on the schedule. On some schedules, the value of sales of cottonseed apparently was not included in the value of field crops sold or traded.

Dairy products sold.—This question called for the value of all dairy products sold or traded in 1944, including sales of whole milk, buttermilk and skimmed milk, butterfat, and butter. The value of dairy products purchased for resale was to be excluded.

Poultry and poultry products sold.—Sales of ducks, geese, guineas, pigeons, baby chicks, and poult were included, as well as sales of eggs, broilers, fryers, other chickens, and turkeys.

Livestock and livestock products sold (other than dairy and poultry).—This value question included the sale of horses, mules, cattle and calves, hogs and pigs, sheep and lambs, meat (except poultry), goats, goat milk, wool, mohair, fur animals in captivity and pelts, bees, and honey.

Forest products sold.—The sales of firewood, fuel wood, standing timber, sawlogs, veneer logs, pulpwood, mine props, bark, charcoal, fence posts, railroad ties, poles and piling, turpentine, resin, etc.

Farm products used by farm households.—This question called for the value of products of the farm in 1944 that were, or were to be, used by all households on the farm. The following items were to be included in this question if consumed on the farm where produced: meat, milk, cream, butter, poultry, eggs, honey, vegetables, fruit, firewood, fuel wood, and Irish potatoes and sweetpotatoes.

It should be made clear that for multiple units this item included the value of these products that were used by all households on the "home farm" subunit plus the value of these products used by all the households on cropper and tenant subunits.

Units with no farm products sold or used.—These are units for which there were reports of "none" for farm products sold or used by unit households. Such units include (a) new units being operated for the first time in 1945, and (b) units having a complete crop failure in 1944 with no livestock or livestock products sold and no value for farm products used by unit households. Very few multiple units (two or more subunits combined into one unit) reported no income from farm products sold or used by unit households.

Unclassified units.—When information on the farm production and value of farm products sold or used was incomplete or was not reported, the unit was designated as "unclassified."

A few single units could not be classified. However, no multiple units were unclassified, even though some component sub-units were unclassified.

Classification by type of unit.—All units have been classified by type based on the source of income in 1944. The type into which a multiple unit was classified depended upon the source of income in 1944 for the home farm and the cropper and tenant subunits combined into one operating unit.

Multiple and single units were classified by type on the same basis of criteria. After eliminating "units with no farm products sold or used" and "unclassified" units, the remainder was separated into two groups: (1) units producing products primarily for sale and (2) units producing products primarily for home use. If the value of products used by unit households was greater than the total sales, the unit was classified as a "unit producing products primarily for own household use," i.e., for use by households on the multiple unit. If the value of all sales was greater than the value of products for use of the households, the unit was classified as a "unit producing products primarily for sale" and then further classified on the basis of the source of income. The type into which a unit producing products primarily for sale was subclassified was determined upon the basis of the following criteria:

Fruit-and-nut units.....	More than 50% of sales from fruits and nuts.
Vegetable units.....	More than 50% of sales from vegetables, exclusive of Irish and sweet potatoes.
Horticultural-specialty units.....	More than 50% of sales from horticultural products.
All-other-crop (field crop) units.....	More than 50% of sales from field crops, including Irish and sweet potatoes.
Dairy units.....	More than 50% of sales from all dairy products.
Poultry units.....	More than 50% of sales from poultry, eggs, etc.
Livestock units.....	More than 50% of sales from live animals, meat, wool, etc.
Forest-product units.....	More than 50% of sales from forest products.
General units.....	No one source contributing more than 50% of total sales.

Examples: A unit with field crop sales of \$900, livestock sales of \$700, and a value of products used by unit households of \$200 would be classified as a all-other-crop (field-crop) unit. A unit with field crop sales of \$600, livestock sales of \$400, poultry sales of \$600, and a value of products used by unit households of \$200 would be classified as a general unit.

The terms "type of unit" and "type of farm" used in the value-of-products tables are not the same as the term "type-of-farming area" used elsewhere in this report.

Size of unit.—Multiple and single units are classified by size of unit on the basis of all land in the unit. All land in multiple units includes the land in the home farm plus the land assigned to component cropper and tenant subunits.

Type-of-farming area.—Preceding the data for each State is a map delineating the type-of-farming areas used for this report. These type-of-farming areas, designated by Roman numerals, are those used by the Land Grant Colleges and the United States Department of Agriculture. The boundaries of the areas were verified by the respective Land Grant Colleges and by the United States Department of Agriculture.

Generally, the term "type-of-farming area" refers to a subdivision within a State in which there is general homogeneity of economic and physical conditions. Usually these conditions include similar characteristics of livestock, crop-production practices normally followed, and of the pattern of natural resources prevailing. For practical purposes, the boundaries for these areas follow county lines, even though natural divisions seldom follow the lines of political subdivisions.

PRESENTATION AND INTERPRETATION OF STATISTICS

Location of multiple-unit operations.—The general area in which multiple-unit operations are important is shown by

figure 5. This area includes the counties in which approximately 5 percent or more of the farm operators, as reported in the 1945 Census, were croppers. While there is a small number of multiple units outside of this area, they are relatively unimportant in relation to total units or farms.

The data presented in this report do not cover the entire area of multiple-unit operations, but, in the main, they are limited to entire States, or parts of States, in which multiple-unit operations are most important. (See figure 7.) Statistics are included for 567 counties in nine States. Data are included for all counties in Alabama, Georgia, Louisiana, Mississippi, and South Carolina, 46 counties in Arkansas, 7 in Missouri, 80 in North Carolina, and 16 in Virginia. In the four States for which some counties were not included in the report, entire type-of-farming areas, with two exceptions, were included. In a few areas in Arkansas and in North Carolina only selected counties were included because of the high percentage of multiple units in these counties.

Presentation of multiple-unit statistics.—This report contains all of the published data on multiple units for the 1945 Census of Agriculture. State and county data are presented in part 1, a series of four county tables. All of these show comparisons for single units and for multiple units. County table I gives the general characteristics of the units. County table II presents the number of operators, all land in multiple units, cropland harvested, and value of units (land and buildings) by color and tenure of operator and also shows the acreage and production of specified crops and inventories of livestock. County table III presents the number, acreage, value, and cropland harvested by size of unit based on the total acreage in the unit. County table IV shows the value of farm products by source of income.

Two groups of tables present statistics by type-of-farming areas. One group of five tables (comprising part 2) shows comparisons for single and multiple units; the other group of three tables (comprising part 3), presents data for multiple units only.

The tables presenting statistics by type-of-farming areas include data for all of the items shown in county tables I to IV except the data for unpaid farm workers. In addition, these tables show data for age, residence, and work off farm for single- and multiple-unit operators. The tables also contain data showing the frequency distributions for various items, such as value of land and buildings, cash wages paid, etc. Such data are not presented by counties because in many counties the number of units was too small to justify the publication of the figures by counties.

Type-of-farming area tables I, II, III, and IV contain the data for general characteristics of the units, tenure of operator, size, type of unit, and value of farm products. Type-of-farming table V presents a distribution of multiple units according to the number of subunits in the multiple unit; i.e., 2, 3, 4, 5-9, 10-19, and 20 and over subunits. The items shown in table V include acreage, value of land and buildings, number of dwellings, number of specified livestock, acreage and production of specified crops, and value of farm products by source of income.

"Table I.—Multiple Units Only" presents a comparison of the data for the "home farm" and "other subunits." Information is given for such items as total acreage, acres of cropland harvested, value of implements and machinery, dwellings, population, hired workers, cash wages, motor equipment, specified livestock and crops, and value of farm products sold or used by households. "Table II.—Multiple Units Only" gives information, by color and tenure of the multiple-unit operator, for tractors, work stock, cattle, acreage and production of specified crops, value of farm products sold or used by households, and value of farm products used by households. "Table III.—Multiple Units Only" presents a distribution, by size, of the same items listed for "Table II.—Multiple Units Only."

Not all the material tabulated for multiple units and the component subunits are presented in this report. For example, data were tabulated separately for the characteristics of the home farm and for the other subunits according to the distribution of the multiple units by the number of subunits as shown in part 2, Type-of-farming area table V. Copies of the available, but unpublished, tabulated material may be obtained from the Bureau of the Census for the cost of preparing the necessary tables and making photostatic copies thereof.

INTRODUCTION

XIII

The distribution of multiple units, according to the number of subunits per multiple unit, is shown by figure 6. The relative importance of multiple units, as reflected by the number of component subunits, is shown by figures 8 and 9. Other measures of the relative importance of multiple-unit operations are portrayed for type-of-farming areas by figures 10 to 17. These maps show the proportion of the total farm land area in multiple units, the proportions of the total corn, cotton, tobacco, and peanut acreages that were harvested on multiple units, and the proportions of the number of tractors, work stock, and cattle on multiple units.

Interpretation of data for multiple units.—In interpreting the data for multiple units, consideration must be given to the definitions used in connection with the 1945 Census of Agriculture; how these definitions were applied by Census enumerators, and to the procedures used in the compilation of the data.

The definition of multiple units was not clearly understood by all Census enumerators in the multiple-unit area. In some areas, enumerators associated multiple units with the size of land holdings rather than with the operating criteria used for determining the existence of multiple units. In other areas, either because of lack of understanding of the definition of a multiple unit or for other reasons, some Census enumerators did not enumerate any multiple units.

In order to insure that data for multiple units were consistent with data for component subunits and that the subunits of multiple units were all properly identified, it was necessary to examine the reports for all farms in the multiple-unit areas. This examination involved the identifying of component parts of multiple units and determining the correct over-all totals for the multiple unit. To determine whether or not a Census farm was a component part of a multiple unit, the answers to several questions on the schedule were examined. These included (1) the multiple-unit questions on page 1, columns a, b, c, and d; (2) the name of the person from whom the land was rented for subunits other than the home farm, as reported on page 1, column 3; (3) the name of the operator of the home farm, page 1, column 1 (which should be the same as the name of the person from whom the subunit operators rented land if there was a home farm); (4) the method of rental (cash, share, share-cash, other), page 2, column 16; and (5) whether all work stock and tractor power were furnished by the landlord, page 2, column 17.

In the editing procedure individual farm reports enumerated as component parts of multiple units were retained or excluded from the multiple-unit operations. Editing clerks identified and combined into multiple units other individual farm reports that had not been listed by the enumerators as component parts of multiple units. These clerks were instructed to adhere to the established definition of a multiple unit and also to consider the answers to the questions listed in the preceding paragraph. Some tenant operations, other than cropper operations, were included in the multiple units. When the components for a multiple unit included such tenant operations, and there was no clear indication that these were independent operating units, they were retained as a part of the multiple unit.

In case the enumerator had not properly identified or had not considered subunits as parts of multiple units, it was necessary first to identify all subunits comprising the multiple units and to prepare a consolidated report for the multiple unit. For two or more Census farms to be consolidated into a multiple unit, it was necessary for at least one of the subunits to represent a cropper operation. If the management conditions for a tenant appeared to be in much the same relationship to the "home farm" as those for a cropper, the tenant operation was included as a part of the multiple unit. Some croppers were not included in multiple units because no such arrangement was evident. If it was evident that a cropper operated a unit which was not a part of a larger operating unit, this cropper farm was considered a single unit. If a landlord had more than one cropper apparently located on separate units, each cropper unit was considered a single operating unit. It is probable that some multiple units, as well as some subunits of other multiple units, were omitted under this procedure.

This procedure resulted in the preparation of reports for 37,827 multiple units not enumerated by Census enumerators. These constructed multiple units represented 27 percent of all multiple units included in the tabulations for this report. The number of multiple units enumerated and constructed is shown by States in the following table:

NUMBER OF MULTIPLE UNITS WITH THE NUMBER FIELD ENUMERATED AND THE NUMBER OFFICE CONSTRUCTED, BY STATES: 1945

ENUMERATED AND CONSTRUCTED	Total	Alabama	Arkansas	Georgia	Louisiana
Total.....	141,316	15,431	9,098	26,510	8,065
Enumerated.....	103,489	8,089	7,201	18,484	6,242
Constructed.....	37,827	7,342	1,897	8,126	1,823

ENUMERATED AND CONSTRUCTED	Mississippi	Missouri	North Carolina	South Carolina	Virginia
Total.....	28,386	2,194	27,579	20,201	3,752
Enumerated.....	25,246	1,788	17,501	18,821	180
Constructed.....	3,139	471	10,078	1,380	3,572

The proportion of all multiple units, that were enumerated, varied among supervisors' districts, counties, and enumeration districts, as well as among States. For the area as a whole, the number of multiple units constructed contained an average of 2.7 subunits as compared with an average of 4.4 subunits for multiple units enumerated and an average of 3.9 subunits for all multiple units.

Caution should be exercised in the interpretation of data in type-of-farming area table V. Averages obtained by dividing totals by the number of subunits may be misleading because home farms are included in the number of subunits. Preliminary analysis of the data indicates that the composition of cropper and tenant subunits does not vary materially, regardless of the number of subunits. However, the size of home farms tends to increase as the number of subunits increases.

While most of the tables in this report show a comparison of the characteristics of single units with those of multiple units, no data are presented for the characteristics of subunits except in "Table I.—Multiple Units Only" which presents limited information on the characteristics of the "home farm" and "other subunits." However, additional information, such as age of subunit operators, years on unit, work off unit, number of subunits reporting specified items, etc., can be obtained for subunits (including the home farm) by subtracting the statistics shown for single units from comparable data published in volumes I and II.

Comparability of multiple-unit statistics with those for prior censuses.—This is the first report of Census data on multiple units based on the definition used herein, i.e., two or more subunits, one or more of which is a cropper or tenant.

Multiple-unit operations have received attention in each census of agriculture. However, the only other published reports are chapter XII, "Plantations in the South" included in volume V of the 1910 Census reports and a monograph based on this and other statistical material issued by the Bureau of the Census in 1916 entitled "Plantation Farming in the United States." In the 1910 report the Bureau of the Census adopted the following definition of a tenant plantation:

"A tenant plantation is a continuous tract of land of considerable area under the general supervision or control of a single individual or firm, all or a part of such tract being divided into at least five smaller tracts, which are leased to tenants."

Since each plantation contained a home farm, the multiple unit included six or more subunits. In view of the definition used at that time there are few, if any, comparisons that can be made with the present report.

For the 1940 Census, a compilation of data for plantations (multiple-farm units) was made. The following definition of a plantation was used:

"A plantation (as here used) comprises a continuous tract or closely adjacent tracts of land on which five or more farm families (including at least one cropper or tenant family) are regularly employed, and which tracts are operated as a single working unit in respect to a central farm headquarters and to the control of labor, cropping systems, and farming operations. Thus, a plantation should include all the land worked from a central farm headquarters with croppers, wage labor or the operator's family labor, plus any additional land, worked by share or other tenants, that may be part of the operation of the unit or plantation as a whole."

The 1940 tabulations for plantations (multiple-farm units) included many of the items covered in the present study. In addition, statistical tables were made for such items as rental agreements, mortgages, taxes and credit and supplies furnished. Photostatic copies of the available, but unpublished, 1940 statistics for plantations may be obtained from the Bureau of the Census by paying the cost of preparing a photostatic copy.

CENSUS OF AGRICULTURE: 1945

County Table I.—SINGLE UNITS AND MULTIPLE

ITEM	JEFFERSON		LAFAYETTE		INE	
	Single units	Multiple units	Single units	Multiple units	Single units	Multiple units
UNITS AND ACREAGE						
1 Units..... number.	2,383	\$11	988	162	1,808	395
2 Percentage of total units..... percent.	88.4	11.6	85.9	14.1	80.3	19.7
3 Subunits in multiple units..... number.	xxxxxxxxxxxx	3,537	xxxxxxxxxxxx	837	xxxxxxxxxxxx	2,500
4 Land in units..... acres.	91,408	232,382	69,574	63,156	110,095	153,871
5 Owned by operator ¹ acres.	87,185	(*)	42,949	(*)	64,930	(*)
6 Rented by operator ¹ acres.	24,245	(*)	26,625	(*)	45,165	(*)
7 Average size of unit..... acres.	58.7	747.2	70.4	369.9	68.4	389.5
Land in units according to use: ²						
8 Cropland harvested..... units reporting..... acres.	2,062	511	915	162	1,592	395
9 Units reporting by acres harvested:	40,316	128,886	19,998	51,672	57,004	91,214
10 1 to 9 acres..... number.	858	1	286	1	108	1
11 10 to 19 acres..... number.	378	4	187	4	313	5
12 20 to 29 acres..... number.	281	7	184	6	417	9
13 30 to 49 acres..... number.	354	26	181	18	484	44
14 50 to 99 acres..... number.	107	56	68	47	216	126
15 100 to 199 acres..... number.	20	59	4	49	35	100
16 200 acres and over..... number.	8	158	3	57	19	110
17 200 to 499 acres..... number.	4	80	2	21	14	60
18 500 to 999 acres..... number.	1	47	1	11	5	34
19 1,000 acres and over..... number.	1	31	—	5	—	16
20 Crop failure..... units reporting..... acres.	69	54	78	40	99	55

	Single units	Multiple units	Single units	Multiple units	Single units	Multiple units	Single units	Multiple units
Units—								
1 Under 3 acres (see text).....number..	18	-----	12	-----	2	-----	38	-----
2 3 to 9 acres.....number..	22	47	48	48	1	105	2	105
3 10 to 29 acres.....number..	40	118	2	97	4	157	17	180
4 30 to 49 acres.....number..	41	111	2	97	4	160	26	162
5 50 to 69 acres.....number..	53	154	7	94	17	162	54	177
6 70 to 99 acres.....number..	34	95	8	69	18	113	21	134
7 100 to 139 acres.....number..	124	179	17	87	29	95	65	95
8 140 to 179 acres.....number..	38	11	54	25	19	60	30	62
9 180 to 219 acres.....number..	90	24	77	20	17	39	20	74
10 220 to 259 acres.....number..	26	16	20	13	6	23	28	26
11 260 to 379 acres.....number..	35	21	27	20	11	24	10	24
12 380 to 499 acres.....number..	95	23	7	13	8	32	8	21
13 500 to 699 acres.....number..	19	22	9	8	3	18	7	10
14 700 to 999 acres.....number..	8	13	2	8	2	29	2	25
15 1,000 to 4,999 acres.....number..	10	14	9	15	2	29	2	25
16 5,000 acres and over.....number..	-----	1	-----	-----	-----	-----	1	-----
All land in units—								
17 Under 3 acres.....acres..	28	-----	17	-----	2	-----	48	-----
18 3 to 9 acres.....acres..	117	256	214	214	505	505	15	15
19 10 to 29 acres.....acres..	776	2,498	97	929	28	3,069	343	343
20 30 to 49 acres.....acres..	1,519	4,221	76	8,271	156	6,889	1,056	1,056
21 50 to 69 acres.....acres..	2,893	133	8,624	415	5,032	9,236	8,231	8,231
22 70 to 99 acres.....acres..	2,759	721	7,718	645	5,102	1,496	9,168	6,402
23 100 to 139 acres.....acres..	18,510	1,618	19,456	1,965	9,866	4,598	14,872	10,899
24 140 to 179 acres.....acres..	5,927	1,747	8,429	2,267	3,918	2,996	9,256	10,038
25 180 to 219 acres.....acres..	18,017	4,850	15,837	6,376	3,943	9,347	5,907	12,351
26 220 to 259 acres.....acres..	6,277	3,890	4,736	8,114	1,460	5,588	6,688	6,091
27 260 to 379 acres.....acres..	10,697	6,879	8,448	6,116	4,957	12,085	6,075	23,060
28 380 to 499 acres.....acres..	14,300	9,975	2,778	5,535	4,609	10,440	4,180	10,304
29 500 to 699 acres.....acres..	10,741	12,980	5,113	4,406	1,720	18,293	4,378	11,804
30 700 to 999 acres.....acres..	6,487	10,076	1,500	6,738	1,520	14,958	5,511	8,288
31 1,000 to 4,999 acres.....acres..	16,808	20,852	14,914	24,502	2,564	44,515	2,701	52,540
32 5,000 acres and over.....acres..	-----	6,200	-----	-----	-----	-----	12,085	-----
Cropland harvested for units—								
33 Under 3 acres.....units reporting..	1	-----	2	-----	2	-----	3	-----

APPENDIX
Facsimile of the Region 4
FARM AND RANCH SCHEDULE AND INSTRUCTIONS

INSTRUCTIONS

Purpose of the Census of Agriculture.—An Act of Congress provides that a census of agriculture be taken every 5 years, for the purpose of obtaining basic information on farm acreage, land values, crops, livestock, and other general items relating to agriculture. The census of January 1, 1945, will consist of an enumeration of every farm in the United States.

Each enumerator will be assigned an enumeration district. In each such district he must enumerate every tract of land which might be classified as a farm under the Census definition. The information is to be obtained by a personal visit. He must secure for each farm all the information requested in order that totals may be obtained which will represent a complete and accurate picture of the agriculture within the area.

Census Schedules Are Confidential.—During the war emergency census returns are accorded confidential treatment as heretofore, subject to existing law. Under the Census Act heavy penalties are prescribed for revealing information to unauthorized persons. The enumerator should make it clear, in dealing with persons who seem unwilling to give the information requested, that he is not allowed to give any information from the schedule to their neighbors or other persons; that only sworn Census employees will have access to the farm schedules; and that those records for individual farms cannot be used for purposes of taxation, regulation, or investigation.

DEFINITION OF A FARM

A farm, for Census purposes, is all the land on which some agricultural operations are performed by one person, either by his own labor alone or with the assistance of members of his household, or hired employees. The land operated by a partnership is likewise considered a farm. A "farm" may consist of a single tract of land, or a number of separate tracts, and the several tracts may be held under different tenures, as when one tract is owned by the farmer and another tract is rented by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a farm. Thus, on a plantation the land operated by each cropper, renter, or tenant should be reported as a separate farm, and the land operated by the owner or manager by means of wage hands should likewise be reported as a separate farm.

Include dry-lot or barn dairies, nurseries, greenhouses, hatcheries, fur farms, mushroom cellars, apiaries, cranberry bogs, etc.

Do not include "fish farms," "fish hatcheries," "oyster farms," and "frog farms." Do not report as a farm any tract of land of less than 3 acres, unless its agricultural products in 1944 were valued at \$250 or more.

Farming, or agricultural operations, consists of the production of crops or plants, vines, and trees (excluding forestry operations) or of the keeping, grazing, or feeding of livestock for animal products (including serums), animal increase, or value increase. Livestock, as here used, includes poultry of all kinds, rabbits, bees, and fur-bearing animals in captivity—in addition to mules, asses, burros, horses, cattle, sheep, goats, and hogs. Frequently, certain operations are not generally recognized as farming. This is especially true where no crops are grown or where the establishments are not commonly considered as farms.

Following is a partial list of types of specialized agriculture and of operations not generally recognized as farms or farming, for which returns on the Farm and Ranch Schedule are required, provided the area is 3 acres or more or, if less than 3 acres, the value of the products in 1944 was \$250 or more:

Apiaries (bee farms).
Community or cooperative gardens.
Country estates and country homes (if there is production of vegetables, eggs, milk, or other agricultural products either for home use or for sale).
Cranberry bogs.

Dry-lot or barn dairies.
Feed lots.
Fur farms (fox, mink, skunk, etc., in captivity).
Garbage-feeding hog yards.
Greenhouses.
Hatcheries (baby chicks, poultts, etc.).
Institutional farms (connected with schools, prisons, hospitals, etc.).
Mushroom cellars.
Nurseries (except for reforestation projects, or in connection with parks).
Part-time farms (agricultural operations incidental to other occupation).
Victory gardens.
Blueberry production from wild plants where the land is used primarily for their production.
Cutting of hay (even though this is the only farming operation).
Grazing or pasturing of livestock.
Harvesting of grass seed.
Keeping of chickens and the production of broilers (including battery-laying and battery-broiler plants).
Production of medicinal or drug plants and herbs.
Production of flowers and bulbs for sale.
Production of vegetables under glass.
Production of vegetable and flower seeds, plants, bulbs, tubers, etc.
Production, in captivity, of pheasants, quail, etc.
Production of mint, spices, or other special crops.
Raising of Shetland or other ponies.
Rabbit raising.
Squab raising.

If any specialized or unusual types of agriculture such as those mentioned above are reported, list type under Supplemental Information on page 12.

Although columns are not provided on the schedule for obtaining reports for all the above-mentioned specialized operations in detail, be sure to report on all items that are applicable, making use of inquiries for "other crops" (cols. 140-141, 191, and 202). Note that value of land and buildings and value of sales of products should be reported in all cases.

Include in one report all land which the operator uses for agricultural purposes, as previously defined, also all outlying or separate fields, meadows, pastures, woodland, and waste lands. A farm may consist of two or more separate tracts not necessarily adjacent. Do not include public or open range neither owned nor leased by the operator (see Livestock on Open Range). If the operator cuts hay from land that he does not own and for which he pays no rent, include such acreage under Wild Hay Cut (col. 114) and explain under Supplemental Information on page 12. Large areas of timber land or other nonagricultural land held as a separate business and not used for pasture or grazing should not be included.

The following types of establishments and operations do not require returns on the Farm and Ranch Schedules unless there are also agricultural operations:

Canneries.
Cheese factories.
Creameries.
Deer parks.
Fish, frog, alligator, or snake "farms."
Fish hatcheries.
Game preserves.
Kennels.
Livestock dealers (except feed lots or other farming operations).
Ostrich "farms."
Oyster "farms."
Parks.
Riding academies with no farming operations.
Shipping pens.
Turpentine "farms" or turpentine "orchards."
Distilleries, gins, dryers, mills, refineries, or packing plants.
Establishments of 3 acres or more, even though locally known as "farms" on which there are no agricultural operations.
Idle or abandoned farms which were not operated in 1944 and will not be operated in 1945.
Cutting or gathering of forest products with no farming operations.
Landscaping, or maintaining grounds, and growing of flowers, shrubs, and ornamentals for home use only.
Picking or gathering of wild nuts, wild fruits, or wild plants (medicinal, ornamental, etc.) except where the land is maintained primarily for their production.
Production of maple syrup or sugar with no farming operations.
Raising canaries, guinea pigs, white rats, or white mice.
Stock yards and auction yards or barns.
Trapping of wild animals.

One Farm Return for Each Operator.—As a rule, one (and only one) return should be prepared for each operation. But to this

rule there is one rare exception. If a person operates two separate tracts of land as hired manager for two different owners (except for collectively developed unit farms), or one tract of land as owner (or tenant) and another as manager, a separate return should be prepared for each, as each represents a separate enterprise. Only one return should be prepared if a farm operator owns a tract of land and also rents a tract from another person.

ENUMERATOR'S RECORD AND CERTIFICATE

Enumerator's Record.—The enumerator's record on the front cover of every book must be filled out carefully. It is by means of this record that the information for the farms enumerated is properly classified as to geographic location.

If an enumerator is assigned more than one enumeration district, separate books must be used for each. Under no circumstances is the same book to be used for more than one enumeration district.

Number the books for each enumeration district in the order in which you use them.

The name of the minor civil division (M. C. D.)—known by various names in the different States, such as township, town, ward, precinct, district, beat, etc.—should be entered with any numerical identification usually employed; for example, Precinct No. 1, Hawkinsville.

Enumerator's Certificate.—When you start a book, enter the time and date you begin and when you have completed the book enter the time and date of completion and your signature. Be sure to make the checks listed opposite the Enumerator's Certificate before signing your name. These checks should be kept in mind throughout the enumeration.

GENERAL INFORMATION

Who Should Supply the Information?—The enumerator must obtain information in regard to a farm or establishment from the actual operator if possible. If unable to locate the operator, statements by members of his family, his employees, or other qualified persons may be accepted. Neighboring farmers may be able to supply the information. If obtained from other than the farm operator, note under Supplemental Information from whom obtained.

In case the land was farmed by some other person last year, the present operator should, from the stubble or other evidence, be able to give the approximate acreages and productions for the crops harvested in 1944 on this particular farm. Do not permit an operator who has recently taken possession to report the crops which he harvested in 1944 on some other farm.

Effort should be made to obtain figures from the farmer's records, if such are kept. It is imperative, however, that you secure a complete return for every farm in your district.

How to Fill Out a Schedule.—Use blue or black ink only. Never use ink of any other color or a pencil.

Write legibly.

Make your entries in the lower part of the space provided rather than in the center of the space between lines.

If a mistake is made, draw a line through the entry in error in such manner that it can still be read and rewrite the new figure within the proper space.

Do not use an eraser or ink eradicator.

Where no entries are required, leave the spaces blank; do not insert dashes, ciphers, or check marks.

Do not use ditto marks.

In reporting values enter dollars only; omit cents.

Report all numerical data in whole numbers unless a separate column is provided for fractions. Report fractions in tenths.

Use the space under Supplemental Information on page 12 for making notes.

On all doubtful points consult your supervisor.

Remember that you are enumerating the farm as of January 1, 1945, for all items except crop production, livestock products, and value of products, which are for the year 1944.

Obtain the best possible information.

Report in the units specified in the headings.

Be sure to read explanations of questions appearing at the bottom of the pages each time you ask the questions until you become thoroughly familiar with them. It is very important that the questions be interpreted according to these explanations.

Use one line (and only one) for each farm (see definition). Be sure that the entries for a particular farm are on the same line on all pages. To assist in keeping on the line, line numbers appear on both the right and left margins of each page. Each farm is to be listed in the order of visitation. When no one is at home to supply the information, the name of the operator should be obtained from a neighbor and entered in the space in which it should appear. Then when the line for the next farm is filled in, the preceding line will stand out as blank across all pages, thus serving as a reminder that here is a farm for which the information must be obtained on a repeat visit. Be sure to fill all such blank lines before turning in your book. Your enumeration must include all going farms in your district.

Order of Enumeration.—In filling out the schedule, you may find it helpful to secure reports for the various crops (cols. 49 to 204) before entering the acreages by land use (cols. 19-26). This procedure will help you in determining the acreage in the farm by use, especially land from which crops were harvested (col. 19). Before leaving a farm, be sure to make vertical and horizontal checks for each page of the schedule; that is, check to see that you have not made entries in the wrong columns or on the wrong lines and that you have not omitted entries for any inquiries which are applicable. Also make the checks listed on page 12. By making these checks, you may avoid the necessity of a return visit.

Operator Not Living On the Farm.—If a person living in a city operates a farm outside the city limits, going to the farm day by day as necessary, and he keeps livestock at his place in the city or carries on some farming operations (not merely a home garden) there, the residence should be included as part of the farm and the value included in the value of land and buildings. In such cases, the farm should be enumerated in the minor civil division where located, although the residence may be in another.

Farms with No Operator.—Infrequently a farm operated in 1944 will not have an operator at the time of the enumeration. In such cases, secure a return from the previous operator or from the owner or his representative. In column 1 write "No operator at present" and enter all other pertinent information. Report as owned or rented on basis of intentions for 1945. If it will not be operated in 1945, report on the basis of 1944 operations.

If a farm was operated in 1944, but will not be operated in 1945, fill in all information the same as you would for any other farm, except that pertaining to the operator and his household. In this case, since there will be no operator, write on the line for this farm on the first page in the columns for name and address of operator, "Will not be operated in 1945," and give, under Supplemental Information on page 12, the reason why it will not be operated. Report as owned or rented on basis of 1944 operations.

If the farm was not operated by anyone in 1944, but will be operated in 1945, there will, of course, be no crop entries for 1944, but there should be entries on pages 1 and 2 concerning the farm and the operator, and on pages 10 and 11 for livestock and poultry. On page 4 write, on the line for this farm, "Not operated in 1944, but will be in 1945."

Farms abandoned or idle in both 1944 and in 1945 are not to be enumerated on this schedule.

Farms Extending Across Boundaries of Enumeration District.—Include entire acreage of all farms whose headquarters are

within the enumeration district. The farm headquarters should be determined as follows:

1. If there is only one dwelling on the farm, this dwelling is the farm headquarters, regardless of whether it is occupied or unoccupied.
 2. If there are two or more dwellings on the farm, and the farm operator lives on the farm, the farm headquarters is the dwelling in which the farm operator lives.
 3. If there are two or more dwellings on the farm, and the farm operator does not live on the farm, the farm headquarters is the dwelling of greatest value.
 4. If there is no dwelling on the farm, but there is a building on the farm, this building is the farm headquarters.
 - If there are two or more such buildings, the farm headquarters is the building of greatest value.
 5. If there are no buildings on the farm, the farm headquarters is the main farm entrance. The main farm entrance is the point where the farm operator usually turns off a public road, private road, trail, or path, on to the farm he operates.
- If a farm with no buildings is composed of two or more separate tracts of land, the main entrance to the farm is the main entrance to the tract of land of greatest value.

In enumerating farms extending into another minor civil division or county, enter on the appropriate line in the spaces provided on page 12 the name or names of the additional minor civil divisions, the county in which each is located, and the acres in each.

If the headquarters of a farm is located in another enumeration district, the entire farm is to be enumerated in that district.

It will be helpful to indicate on your map farms for which the headquarters are in an adjoining enumeration district. If you inform the enumerator in the adjoining district, or your supervisor, of such farms it will insure that all such farm lands are included in the census enumeration and that none are duplicated.

Partnerships.—For a farm operated by two or more partners enter only one of the partners as the operator, preferably the senior partner, unless the junior partner is actually conducting the operations.

Farming Combined With Nonfarm Activities.—If manufacturing or processing is carried on primarily for the disposal of raw materials produced on the farm where the plant is located, or for putting them into a marketable form, such a plant should be included as part of the farm. If, on the other hand, the operations represent mainly custom work, or an independent enterprise, then such a plant is not to be considered a part of the farm. Report only the acreage and value of land and buildings actually used for farming purposes, and include only the products from the farming operations and their value before processing.

Institution and Corporate Farms.—Farms operated by or for institutions (schools, hospitals, prisons, reformatories, etc.) or by corporations should be recorded in the name of the person in charge of all the farming operations, even though submanagers may be employed. For such farms be sure to enter a "Yes" in column 11. Reports for such farms should include only the portions used for farming purposes. Do not include acreage and value for institutional and other nonfarm buildings (see definition of farm). In columns 27-40 the inquiries relate only to persons and dwellings connected with the farming operations. Inmates of institutions who work on the farm for pay should be classed as hired laborers; unpaid inmates should not be included. Products of the farm consumed by inmates should be considered as sold.

Agricultural Operations by Other Than the Operator of the Farm.—On some farms, members of the operator's family or other persons living on the farm (not croppers or tenants) will grow small acreages of crops or will keep some livestock, or both. For example, a 4-H Club member may have a crop or livestock project, or a hired man may have a garden or some livestock. Include all such crop operations and livestock on the return for the farm operator.

Indian Reservations and Allotted Indian Land.—Where land has been allotted to Indians, an individual return should be secured for each Indian, the use of whose land would bring it under the classification of a farm. The word "allotted" is to be construed as covering allotment in fee, allotment in trust, and the simple designation of a certain acreage as the place of residence or agricultural activity of an individual Indian. Also, a separate return should

be made for each Indian having no allotted land, but having livestock pastured on unallotted reservation, national forest, or public domain, if the value of the natural increase in his livestock and the value of his livestock products in 1944 amounted to \$250 or more. In the latter case, write in columns 18-26 "No land owned or leased."

Any acreage belonging to an Indian reservation that has not been allotted or assigned to Indians and that is not leased to corporations or individuals, if used for agricultural purposes, constitutes a single farm for which a return is to be secured from the Indian agent. The Indian agent is to be reported as manager and the name of the reservation is to be reported in column 3. The reservation return should include only such acreage as is usually devoted to crops, any fenced lands on which livestock is grazed, also unfenced grazing land over which reservation livestock is herded, and land occupied by farm buildings. Any vast acreage of wild land not utilized to an appreciable extent should not be included. All livestock belonging to the reservation must be reported on the reservation return.

Livestock on Open Range.—A flock of sheep or a herd of cattle being pastured on open range or in a national forest by a person who does not own or rent any land used for that purpose should be enumerated as a farm with "None" entered in column 18. However, public lands used under a lease are to be included as a part of the farm, but land used under a grazing permit is not to be included.

Plantations.—See special instructions on page VII for enumerating multiple-unit operations (including plantations) in regions 2, 3, and 4.

Collectively Developed or Unit Farms.—If agricultural land is being developed and sold in small tracts to nonresidents and the original tract is farmed essentially as a unit, such development should be returned as one farm in the name of the person managing it.

Citrus Groves With Various Operations Handled Under Separate Contracts.—Citrus groves are often handled by having the various operations, such as pruning, cultivating, irrigating, spraying or dusting, harvesting, etc., performed on a contract basis. If one person performs practically all of these operations, except possibly the harvesting of the fruit, this person should be listed as the operator. If the various operations are handled separately, one person contracting to do the pruning, another the cultivating, etc., the person directing all these services is the operator. This person may be a nonresident owner or he may be a local representative of the owner.

In such cases it will often be necessary to obtain the required information from a number of different sources depending upon the local persons responsible for the various operations.

Obtain complete information from as reliable sources as possible.

Acres Owned and Acres Rented.—Acres owned and acres rented must account for all the land in the farm. Consider as owned the land which the operator or his wife holds under title, homestead law, purchase contract, or as one of the heirs or as trustee of an undivided estate.

Under Supplemental Information, on the lines provided on page 12, briefly explain any unusual entries. Comment on unusual yields, acreages, values, etc.

Land Irrigated in 1944.—Consider as irrigated any land which had water supplied to it by artificial means in 1944 for agricultural purposes.

For all regions enter in column 236 the total acreage of land in each farm irrigated in 1944, including both irrigated cropland and irrigated pasture.

In regions 4, 5, 6, and 7, where a check column for irrigation is carried for the individual crops, enter a check mark (✓) in the box provided for each crop which was harvested from land irrigated in 1944. If only a part of the acreage of a crop was irri-

CENSUS OF AGRICULTURE: 1945

gated, report separately, within the same block, the acreage and production of the portion irrigated and that grown on dry land, entering the nonirrigated portion directly above the irrigated portion, bracketing the two entries as a further indication that they are for the same farm. Be sure to check the irrigated portion.

CROPS HARVESTED ON THIS FARM IN 1944

Include under the various crop questions only those acreages harvested by cutting, digging, picking, etc., and by grazing or hogging off. In reporting crops which were harvested by grazing or hogging off, include only the crops which were allowed to mature, or to approach maturity, before they were grazed or hogged off. Except for orchards, do not include crops which were complete failures. Do not include as harvested any crops used solely for soil improvement or any grown solely for pasture and utilized as such.

Omitted Column Numbers.—In preparing the schedule, the more important crops grown in all regions were included and were assigned column numbers. However, in order to shorten the schedule for each region, questions for crops which are grown infrequently in a particular region were omitted. Whenever you find that a crop has been harvested for which there is not a specific inquiry on the schedule for your region, report such crop in columns 140-141, except for fruits, vegetables, and horticultural specialties which are to be reported in columns 191, 202, or 204, whichever is applicable.

Unit of Measure.—Frequently the unit of measure common to your locality will not be that called for on the schedule. In such cases, convert to the unit specified and, under Supplemental Information, name and describe the unit commonly used in the locality, giving its approximate cubic content or net weight and the conversion factor used. The conversion tables on pages V and VI may be helpful, in some instances, in making the conversion to the unit called for on the schedule.

Two or More Crops From Same Land.—Where two or more crops were harvested from the same land in 1944, be sure to report all crops.

(1) **Succession Crops.**—Where two or more crops were harvested from the same land in 1944 but were grown in succession, i. e., one crop planted and harvested, then another crop planted and harvested, the acreage should be reported under the inquiry for each crop.

(2) **Interplanted Crops.**—Where a row crop is planted at approximately normal planting distance and some other crop is grown between or in the rows of the first crop, the acreage should be reported under the inquiry for the row crop and also under the inquiry for the interplanted crop.

(3) **Mixed Crops.**—As noted on the schedule, where flax and wheat are grown together, one-half of the acreage is to be reported under each crop. The schedule provides for reporting other mixed grains in columns 57-58 and for reporting a mixture of clover and timothy hay in columns 106-107. A mixture of grains for hay should be reported in columns 110-111. Crops grown and harvested as a mixture, for which the schedule makes no provision, should be reported under the crop which predominates. A notation should be made under Supplemental Information, such as "mixed with," giving the name of the secondary crop.

(4) **Contour Farming.**—In contour farming where different crops are alternated on different levels, the acreage should be fairly allocated among the several crops. Do not confuse with interplanting.

(5) **Strip Cropping.**—Allocate the acreage among the several crops as for contour farming.

LIVESTOCK, JANUARY 1, 1945, AND LIVESTOCK PRODUCTS, 1944

In the enumeration of livestock, include all animals and poultry on the farm or ranch on January 1, 1945, whether or not all are owned by the operator, but do not include any belonging to the operator and being kept on another farm or ranch. Also include livestock belonging to the farm or ranch but grazing in national forests or on open range.

In areas where livestock are grazed in national forests or on open range, secure the report from the ranch operator for all his herds or bands and not from the herder who happens to be in

charge of a particular herd or band. Every effort should be made to enumerate all livestock for which the ranch headquarters are in your enumeration district. To insure complete enumeration, any information concerning the grazing of livestock in national forests or on open range in your district, when the ranch headquarters are located elsewhere, should be given to your supervisor along with the location of the headquarters, the name and address of the owner, and any other pertinent information, such as the location of the animals during the four main seasons of the year.

Livestock sold and livestock production in 1944 should be reported for the farm even though some of these items may represent operations for someone else or under some arrangement whereby the title may be held wholly or partly by other persons. For example, broilers raised "on shares" or on a "per-head basis" are to be reported for the farm on which they were produced and not for the hatchery or feed dealer for whom they were produced.

Livestock Dealers.—Animals purchased for immediate resale and not for feeding or grazing to increase their value should not be reported under Livestock Sold Alive in 1944. Such operations are not considered "farming" and are largely duplications of sales reported for other farms. However, if the place qualifies in other respects as a farm, a report should be made of the farming operations and of the livestock on hand.

VALUE OF FARM PRODUCTS

In reporting the value of farm products sold or traded in columns 142, 193, 203, 204, 221, 227, 232, and 234, the value of vegetables for farm household use in column 194, and the value of all farm products used by households on the farm in column 235, observe the following rules:

- (1) There must be an entry of either dollars or "None" in every one of these columns for every farm.
- (2) "None" is to be entered for the value of farm products sold or traded whenever the farm did not produce any of the products; or, if such products were produced, none were or are to be sold or traded. "None" is to be entered for value of vegetables grown for farm household use, and for value of farm products used by farm households only if none of these products on the farm in 1944 were or are to be used by households on that farm.
- (3) The value-of-products questions apply to the farm and not to the farm operator. Hence, for tenants and croppers, include the value of the landlord's share. That is, any products of the farm, which were or are to be paid as rent, are to be considered as sold. However, if the landlord's share of the products was purchased by the tenant and used on the farm where produced, such products should not be considered as sold.
- (4) Since the value-of-products questions apply to the farm and not to the farm operator, do not include the value of any products which were received by the farm operator as rent from land rented to others.
- (5) Report gross value of sales without deductions for expenses of any kind.
- (6) Include the value of byproducts sold or traded, such as cottonseed, straw, skimmed milk, buttermilk, hides, poultry manure, etc.
- (7) For columns 142, 193, and 203, crops harvested in 1944, which will be sold after the enumeration date, should be valued on the basis of market quotations at the time of the enumeration.
- (8) Do not include the value of crops used for seed or fed to livestock, on the farm where produced.
- (9) Do not include government payments, such as soil-conservation and dairy-feed payments.
- (10) Note that the values reported in column 194 must always be included in column 235. In no other instance are any value-of-products figures to be included in more than one column.
- (11) The value of farm products used by households on the farm where produced (col. 235) frequently represents a considerable part of the total value of farm products. A special effort should be made to avoid underestimating the value of such consumption. Products used by farm households should be valued at local farm prices.
- (12) Products of institutional farms, consumed by inmates of the institution, should be considered as sold, and the values of such products should be reported in columns 142, 193, 203, 204, 221, 227, 232, and 234. For institutional farms, enter in columns 194 and 235 the value of products consumed by households of full-time farm employees (other than inmates) living on the farm.
- (13) Many farmers do not keep records and will not be able to answer the value-of-products questions accurately. Nevertheless, they should be able to give an approximation. The enumerator should secure an estimate in every case where exact figures are not available, and should enter any necessary explanations under Supplemental Information on page 12.

CONVERSION TABLES

Caution.—Many of the weights and ratios given are approximations and should be used only in the absence of more accurate figures. Weights per unit for many commodities vary greatly depending upon variety, season, locality, etc.; therefore, those given may not be accurate for your community and may not be in agreement with the legal requirements in your State. However, the tables and conversion factors which follow may assist in making calculations when records are not available in terms of units given on the schedule.

The paragraph numbers refer to the column (or columns) to which the conversion relates.

CROPS

EQUIVALENT BUSHELS PER CWT. AND PER TON FOR COMMODITIES OF VARIOUS WEIGHTS

WEIGHT PER BUSHEL (pounds)	NUMBER OF BUSHELS	
	PER 100 POUNDS	PER TON
14	7½	143½
24	44	88½
32	32	68½
45	22	44½
48	21½	41½
50	21	40
56	14½	35½
60	12½	33½
70	11½	28½

CORN AND SORGHUMS

51.—Corn (bushels):

Shelled corn, 56 pounds.

Ear corn, 70 pounds, or 2 bushel baskets level or $1\frac{1}{2}$ heaped.

Corn with husks, 6 bushel baskets level or 4 heaped.

For converting barrels to bushels, multiply by local equivalent in bushels of ear corn (not baskets).

Corn in crib: 1 bushel of ear corn (70 pounds) occupies about $2\frac{1}{2}$ cubic feet. Bushels of corn in crib equal length by width by average depth by $\frac{1}{2}$.

54.—Grain Sorghums (bushels). 56 pounds. 1 ton of heads=25 bushels.

56.—Sorghum Hay (tons). Convert green to dry weight by dividing by 3.

SMALL GRAINS

Grain in bin: 1 bushel of grain occupies about $1\frac{1}{4}$ cubic feet. Bushels of grain in a bin equal length by width by average depth by $\frac{1}{2}$.

58.—Mixed Grains (bushels). Use weights based on approximate proportion of each grain in the mixture.

60.—Oats for Grain (bushels), 32 pounds.

63.—Barley (bushels), 48 pounds.

65.—Rye (bushels), 56 pounds.

67.—Flax (bushels), 56 pounds.

69, 71, 73.—Wheat (bushels), 60 pounds.

75.—Rice:

1 bushel weighs 45 pounds.

1 barrel, 162 pounds.

1 barrel, about $3\frac{1}{2}$ bushels.

1 bag (Southern States), 162 to 200 pounds or 1 to $1\frac{1}{2}$ barrel.

ANNUAL LEGUMES

81.—Soybeans and Mungbeans (bushels), 60 pounds.

Dry Field and Seed Beans:

85.—Lima (dry), 1 bushel=56 pounds.

119.—Vetch Seed, 1 bushel=60 pounds.

83, 87.—Other Beans and Lentils (dry), 1 bushel=60 pounds.

90.—Cowpeas (bushels), 60 pounds.

94, 96.—Dry Field and Seed Peas, 1 bushel=60 pounds.

100.—Peanuts (pounds). 1 bushel of unshelled: Virginia, 22 pounds; runners, 28 pounds; and Spanish, 30 pounds.

HAY

92, 101–165.—Report tons of cured hay; 3 tons green weight equal approximately 1 ton cured hay.

CLOVER AND GRASS SEEDS

117.—Lespedeza Seed (pounds). In some States the weight is 25 pounds per bushel; in others common seed will weight 28 pounds; Kobe seed, 30 pounds; and Korean seed as high as 44 pounds.

121.—Alfalfa Seed (bushels), 60 pounds.

123.—Clover Seed (bushels), 60 pounds.

MISCELLANEOUS CROPS

125.—Irish Potatoes:

1 bushel=60 pounds.

1 barrel= $2\frac{1}{4}$ bushels.

127.—Cotton (running square bales):

2 round bales=1 square bale.

1,500-pound seed cotton=approximately 1 square bale.

129.—Sweetpotatoes. 1 bushel weighs about 55 pounds.

131.—Hops. 1 bale=about 200 pounds.

SMALL FRUITS

1 quart weighs about $1\frac{1}{2}$ pound.

1 gallon=4 quarts.

2 pints=1 quart.

Convert crates to quarts on basis of capacity in quarts or pints.

TREE FRUITS, NUTS, AND GRAPES

154.—Apples:

1 bushel weighs about 48 pounds.

1 western box is considered the equivalent of 1 bushel.

1 pound dried fruit is equivalent to about 7 pounds of fresh fruit.

156.—Cherries:

1 bushel, unstemmed=about 56 pounds.

1 quart, unstemmed= $1\frac{1}{4}$ pound.

1 bushel, stemmed=about 64 pounds.

1 quart, stemmed=about 2 pounds.

158.—Peaches:

1 bushel=about 48 pounds.

1 western crate=20 pounds.

1 pound dried peaches is equivalent to about: 7 pounds fresh fruit for clingings, or $6\frac{1}{2}$ pounds fresh fruit for freestones.

160.—Pears:

1 bushel=about 50 pounds.

1 box, western=46 pounds.

1 crate, western ($4\frac{1}{2}$ by 16 by $16\frac{1}{2}$)=22 pounds.

1 pound dried fruit is equivalent to about $5\frac{1}{2}$ pounds fresh fruit.

162.—Plums and Prunes:

1 bushel=about 56 pounds.

1 box, western=20 pounds.

1 box, N. W. suitcase=16 pounds.

1 pound dried fruit is equivalent to about $2\frac{1}{2}$ pounds fresh fruit for California, and $3\frac{1}{2}$ pounds fresh fruit for Washington and Oregon.

(Reduced facsimile)

CENSUS OF AGRICULTURE: 1945

164.—Grapes:

1 bushel=about 48 pounds.
 1 western lug box=28 pounds.
 1 eastern 12-quart basket=18 pounds.
 1 pound dried fruit is equivalent to about 4 pounds fresh fruit.

166.—Apricots:

1 bushel weighs about 48 pounds.
 1 crate, western=22 pounds.
 1 pound dried fruit is equivalent to about 5½ pounds fresh fruit.

171-184.—Citrus Fruits:

20	169	60	12

223-225.—Milk and Cream:

1 gallon milk=8.6 pounds.

1 hundredweight milk=11.6 gallons.

Average cream, 2 to 2½ pounds butterfat per gallon of cream.

Double or whipping cream, about 3 to 3½ pounds per gallon of cream.

ILLUSTRATIVE EXAMPLE OF ENUMERATOR'S MAP PROPERLY MARKED FOR IDENTIFICATION

An enlarged map (or set of maps) will be furnished each enumerator. The enumeration district will be delineated on the map. You will be expected to identify on the map every farm you enumerate. Alongside the dwelling symbol on the map, mark the book number and the line number on which is recorded the report of each farm visited. Draw a square in the proper location for each farm you may record which is not shown on the map. Mark a cross through symbols on the map which are found to represent abandoned or idle farms, or which, for any reason, do not represent a farm. There will be instances when you may enumerate more than one farm operated from a single dwelling unit. Show the book number and line number for each such report.

The illustrative example on the right represents a small section of an enumerator's map. The map has been properly marked so that enumerated farms may be identified.

A properly marked map is an important check upon the completeness of the enumeration, and is required from each enumerator.

(Reduced facsimile)

**INSTRUCTIONS FOR ENUMERATION OF MULTIPLE-UNIT OPERATIONS
(INCLUDING PLANTATIONS)**

Definition of Multiple-Unit Operations.—A multiple-unit operation is one in which two or more subunits are handled as a single-farm enterprise. It usually involves supervision of cropper or tenant operations and central control of such items as sale of products, work power, machinery and equipment, crop rotation, or purchase of supplies. A multiple-unit operation consists of two or more subunits, one of which must be a cropper or tenant operation under the close supervision of the multiple-unit operator. One of the subunits may consist of land worked by the operator, his family, or wage hands. Plantations should usually be reported as multiple-unit operations.

Plan of Enumeration.—For multiple-unit operations, including plantations, information is desired for the entire enterprise as a unit, also for each cropper and tenant now on the multiple unit and for the "home farm." This will permit the tabulation of multiple units as operating units as well as the tabulation of the operations of each cropper or tenant, and of the "home farm." Obtaining separate totals for the multiple unit as a whole and for each cropper, tenant, and "home farm" will also help to prevent omissions and duplications.

In regions 2, 3, and 4, which include the plantation areas, the schedule is set up to provide for this plan of enumeration. Each schedule contains 20 numbered lines and, at the bottom, 4 lettered lines. The numbered lines are to be used for enumerating farms other than multiple-unit operations, also for enumerating the subunits (each cropper, tenant, and "home farm") of multiple-unit operations. The lettered lines are to be used for enumerating the over-all operations of the multiple units.

The information is required not only for those operations which concern the multiple-unit operator, but also for operations and items which pertain only to the individual croppers and tenants. The multiple-unit operator may have little or incomplete information concerning these operations of croppers and tenants; therefore, it will always be necessary to visit both the multiple-unit operator and each cropper and tenant. Always visit the multiple-unit operator first.

Identifying Multiple-Unit Operations.—Generally no difficulty will be encountered in recognizing multiple-unit operations. Your supervisor may be able to provide you with a list of multiple-unit operators to assist you in identifying such operations in your district. However, these lists may not be complete and some of the farms represented on the lists may no longer be operated as multiple units. Therefore, 4 questions are provided on the

schedule to insure that no multiple-unit operations will be overlooked. These questions appear in columns a, b, c, and d of page 1. The questions in columns a and b will determine whether or not a respondent is a multiple-unit operator, while questions in columns c and d will determine whether a tenant operation might represent part of a multiple unit. Until you have asked these questions you will not know whether to record the replies in one of the lettered lines at the bottom of the schedule, in one of the numbered lines, or whether you may need to terminate your visit and locate the multiple-unit operator before continuing with the enumeration. Therefore, these questions should be asked before making any entries on the schedule.

Having determined that a respondent is a farm operator, ask whether he has any croppers or tenants (col. a). If the answer is "yes," ask whether any of these croppers are a part of a multiple-unit operation (col. b) defining such an operation. If the answers for both columns a and b are "yes," the respondent is a multiple-unit operator and you should obtain a multiple-unit report as explained in these instructions. If the answer for column a is "yes" and the answer for column b is "no," the respondent is not a multiple-unit operator. In this case obtain from him a report covering only the land which he worked either with his own labor, or with the assistance of members of his household or wage hands. Do not include in his report any land which he rents to others. Use a numbered line for this report.

If the respondent has no croppers or tenants ("no" for col. a), ask if he rents land from others (col. c). If the answer is "no," then no multiple unit is involved and you may proceed to enumerate the farm, using a numbered line for the report. If the answer is "yes," ask if the person from whom he rents operates other farm land in the vicinity, either through his own labor, that of his family, or wage hands, or through croppers or tenants (col. d). If the answers for both columns c and d are "yes," then there is considerable possibility that a multiple-unit operation is involved. In such case, you should find out from whom the land is rented, terminate your visit, and contact the landlord or his local representative.

Recording the Information.—In enumerating a multiple-unit operation, keep in mind that complete information is required not only for the multiple unit as a whole but also for each cropper or tenant on the multiple unit on January 1, 1945, and the "home farm." Enter in column 1, on one of the lettered lines in the lower part of the schedule, the names of the multiple-unit operator. Obtain from him the names of the croppers and tenants on the

(Reduced facsimile)

CENSUS OF AGRICULTURE: 1945

multiple unit on January 1, 1945, and list these in the upper part of the schedule, one name on each line. If any of the land in the multiple unit is not assigned croppers and tenants, consider such acreage as the "home farm" and list the name of the multiple-unit operator in the upper portion of the schedule also. You will use the "home farm" line for reporting any items not definitely assigned specific croppers or tenants, and those items which cannot be readily distributed.

When listing the cropper, tenant, and "home farm" operations for a given multiple unit, you should begin on a line immediately below one of the heavy rules (lines 1, 6, 11, and 16) even though this may mean leaving some lines blank. Also leave blank any lines below the last subunit listed (usually the "home farm") and the next heavy rule.

It is essential that the reports for all croppers and tenants of a multiple unit and the report for the "home farm" be entered on consecutive lines in order properly to identify such operations in their relation to the multiple unit of which they are a part and to facilitate adding the data to obtain or check the totals for the multiple unit as a whole.

To identify the subunits comprising a multiple unit you should bracket, to the left of the names, all the numbered lines representing the reports for a multiple-unit operation and enter, opposite the bracket, the letter corresponding to the line used for reporting the over-all operations of the multiple unit. See illustration on preceding page.

If possible, list in one book all the subunits comprising a multiple-unit operation. If too few lines are left in a book for enumerating an entire plantation, start a new book. If the multiple unit consists of more than 20 subunits, it will be necessary to use 2 or more books. When 2 or more books are required, report the over-all operations of the multiple unit in the first book only. In each book identify the plantation by carrying, opposite the bracketed names, the book number, the line designation (letter), and the word "part." The word "part" will indicate that the entries represent only a part of the subunits included in the multiple unit.

Information From Multiple-Unit Operator.—Obtain from the multiple-unit operator information for the multiple unit as a whole for all items which are of direct concern to him. He should be able to provide you with complete information for such items as total acreage, value of land and buildings, mortgage debt on land in the multiple unit which he owns, and acreage and production of principal crops.

As a general rule, for items such as crops which may be grown also by croppers or tenants on their own account, and for livestock, poultry, and machinery and equipment, obtain from the multiple-unit operator information for only those portions which are of direct concern to him. It will be necessary to visit the croppers or tenants to secure information for crops grown on the multiple unit strictly on their own account and for livestock, poultry, and machinery and equipment not provided them by the multiple-unit operator.

In recording the figures for items which require information from both the multiple-unit operator and the croppers and tenants, enter, in the lower half of the spaces provided, the figures which represent items in which the multiple-unit operator had an interest. Leave the upper half for recording the information for items in which the multiple-unit operator has no direct interest. For convenience the spaces provided for many of these items are divided by a broken rule.

For a few of the items, such as numbers of persons living in the occupied dwellings on the multiple unit and land from which crops were harvested, etc., totals for the multiple unit as a whole should not be entered at this time but should be obtained by addition after visiting the croppers and tenants.

After obtaining from the multiple-unit operator figures for the multiple unit as a whole, with the exceptions noted above, also obtain from him, for each cropper and tenant, the acreage assigned for 1945; the value of the land and buildings; the acreage and production of principal crops; livestock and machinery provided by him and definitely assigned to specific croppers or tenants; and any other items concerning which the multiple-unit operator has definite information.

In recording for each cropper or tenant the total acreage assigned and the crops harvested in 1944, it will be permissible to enter this information on the basis of the 1944 operations as outlined below:

(1) For a 1945 cropper or tenant who was on the multiple unit in 1944, you may report the land rented (col. 14), the total acreage in farm (col. 18), the land use in 1944 (cols. 19-26), and the acreages and production of crops harvested in 1944 on the basis of his 1944 operations.

(2) For each cropper or tenant who replaces a 1944 cropper or tenant on the multiple unit, you may report the above items on the basis of the 1944 tenant who was replaced.

(3) If a 1945 cropper or tenant does not replace a 1944 cropper or tenant, report these items on the basis of the land assigned in 1945. This may mean the reporting for such cropper or tenant crops which were harvested on the "home farm" in 1944.

(4) If a 1944 cropper or tenant has moved off the multiple unit, or is now a wage hand, and he has not been replaced by a new cropper or tenant, include the land assigned him in 1944 and the operations thereon in the report for the "home farm."

In all cases the totals of these items, as reported for the croppers and tenants, plus those reported for the "home farm" must equal the totals reported for the multiple unit as a whole. Remember that the report for the "home farm" includes items not reported for specific croppers or tenants and may

not conform exactly to what is generally considered the "home farm."

In entering the information for each cropper and tenant for items for which additional information must be obtained from them, record those portions which are of direct concern to the multiple-unit operator in the lower half of the spaces provided. You will use the upper half of these spaces for recording the additional information representing operations of croppers and tenants in which the multiple-unit operator has no direct interest.

If the cropper or tenant lives on the multiple unit, the value of the dwelling should be included with the value of the land and buildings allotted the cropper or tenant, even though the dwelling may not be on the particular plot assigned him.

Also enter figures for the "home farm." Remember that the "home farm" should include not only what is ordinarily considered as the "home farm," but all items not definitely assigned specific croppers or tenants on this schedule. In reporting the amount of mortgage debt for the "home farm," allocate, on a value basis, a proportionate share of the total mortgage.

Before leaving the multiple-unit operator, add the entries for the items reported for the croppers and tenants and the "home farm" and check the totals with the corresponding entries for the multiple unit as a whole. In checking the entries for the subunits to the total, keep in mind that the acres and value of land and buildings owned and rented as reported for each subunit should check to the sum of the acres and value of the owned and rented land for the multiple unit as a whole, although the separate columns cannot be expected to check except where all the land in the multiple unit is rented from others. Also see instructions for enumeration of value of products for multiple-unit operations.

Information From Croppers and Tenants.—Visit each cropper and tenant in order to obtain information regarding his family, crops, livestock, or other items which were not reported by the multiple-unit operator, paying particular attention to minor items which would otherwise be omitted, such as sweetpotatoes, cane patches, gardens, pigs, chickens, and the like. Report the residence of the cropper or tenant as on the farm operated if he resides on the multiple unit. As previously mentioned, the dwelling, if on the multiple unit, is to be considered a part of the cropper's or tenant's "farm," even though it may not be located on the particular tract assigned him. For the year in which the operator began to operate this farm, report the year the cropper or tenant began as cropper or tenant on this multiple unit. Report, as work off this farm, work for wages on other parts of the multiple unit.

If new croppers or tenants replace croppers or tenants who were on the multiple unit in 1944, obtain from the multiple-unit operator information for crops grown by the replaced cropper or tenant on his own account rather than depend upon the new cropper or tenant for this information.

If a cropper or tenant operates land in addition to that in the multiple unit, report such operations on a separate numbered line and not as a part of the multiple unit and explain under Supplemental Information on page 12.

Revisit Multiple-Unit Operator.—After completing the enumeration of all croppers and tenants, add the entries for the croppers, tenants, and "home farm," entering the multiple-unit totals where they have not already been entered and checking those which have been entered. Before leaving the multiple unit, revisit the multiple-unit operator so that he may review these totals with you and determine whether or not there have been any omissions or duplications. Be sure that you have obtained complete information for the multiple unit as a whole, also for each cropper, tenant, and the "home farm." There should be entries for all lines in all columns which are applicable.

Value of Farm Products.—Instructions 1 to 13, inclusive, on value of farm products should be followed in filling out the value-of-products questions for multiple-unit operations as a whole, as well as in filling out these value questions for each cropper, tenant, and "home farm" of the multiple unit. This will sometimes result, and properly so, in a report of value of products sold or traded for the multiple unit as a whole which is less than the sum of the value of products sold or traded reported for the croppers, tenants, and "home farm." This will occur if the share rent, paid by the croppers and tenants, includes feed crops, such as corn and hay, or other products which are not sold but are used elsewhere on the multiple unit. Thus, the reports for each cropper and tenant should include the value of the multiple-unit operator's share of the products (Instruction 3). In the report for the "home farm," the value of the multiple-unit operator's share of the croppers' and tenants' production should not be included (Instruction 4). In the report for the multiple unit as a whole, the value of the multiple-unit operator's share of the croppers' and tenants' production is not to be included, if it is not sold but is used on the multiple unit where produced (Instruction 8).

Enumeration of Multiple Units Extending Across Boundaries of Enumeration Districts.—If a multiple unit lies in two or more enumeration districts the entire multiple unit (including each of its subunits) should be enumerated where the "home farm" or the multiple-unit headquarters is located. For such cross-line multiple units, be sure to report, for the multiple unit as a whole and also for each subunit, the location and acreage of land located in other minor civil divisions, using the columns provided on page 12 (see Instructions on page II, Farms Extending Across Boundaries of Enumeration Districts).

The enumerators in each district should advise their supervisor of such multiple units in order that he may work out plans whereby omissions and duplications may be prevented. Unless the enumerators of the two or more districts work in close harmony, there will be considerable danger of omitting the multiple unit or some of its subunits or of enumerating them in more than one district. Sometimes farms which are not a part of a multiple unit will be intermingled with some of the subunits of a multiple-unit operation. If the multiple unit is enumerated in another district, be sure that these farms are not overlooked.

SCHEDULE

627

[This inquiry is conducted under authority contained in section 10 of the Act of Congress, approved June 18, 1928. During the war emergency your census returns are accorded confidential treatment subject to existing law.]

MULTIPLE-UNIT OPERATION? (See definition, page VII)				FARM OPERATOR, JANUARY 1, 1945		If land is rented from or managed for others FROM WHOM IS LAND RENTED OR FOR WHOM IS LAND MANAGED? (Indicate if an institution or corporation)	
Does this person have croppers or tenants?	Are any of these croppers or tenants a part of a multiple-unit operation?	Does this person rent land from others?	If "Yes" in Col. c, does the person from whom he rents operate other farm land in the vicinity?	NAME	ADDRESS (Rural route or street, post office and State)	NAME	ADDRESS (Rural route or street, post office and State)

				2	THIS LINE FOR OFFICE USE ONLY		

MULTIPLE-UNIT OPERATIONS (see instructions, page VII):

D							D
C							C
B							B
A							A

Questions a, b, c, and d should be asked before any entries are made on the schedule.

Use numbered lines for enumerating farms other than multiple-unit operations and for each cropper, tenant, and "home farm" of a multiple-unit operation.

Use lettered lines for enumerating multiple-unit operations as a whole.

If answers to both questions a and b are "Yes," a multiple-unit operation is involved. Enumerate the multiple unit on one of the lettered lines and each cropper and tenant operation and the "home farm" on numbered lines. See instructions, page VII, for enumerating multiple-unit operations.

If "Yes" for column a and "No" for column b, then no multiple unit is involved. Use a numbered line for enumerating the farm.

If answers to both questions c and d are "Yes," there is considerable possibility that a multiple-unit operation is involved. In such case the enumerator should visit the person from whom the land is rented and from questions a and b determine if the tenants' operations are parts of a multiple unit.

If "Yes" for column c and "No" for column d, then no multiple unit is involved. Use a numbered line for enumerating the farm.

The farm operator is the person who works the farm, performing the labor himself, or directly supervising it. When land is rented or cropped, the tenant, renter, or cropper is the operator even though the owner may exercise some supervision. If the farming operations are performed by a caretaker who merely carries out the instructions of his employer, report the employer as operator. However, report as operator a paid manager responsible for the farming operations. If the farm is operated for a corporation or institution, report as operator the superintendent, manager, supervisor, or other person directly responsible for the farming operations.

MULTIPLE-UNIT OPERATIONS (see Instructions on page VII):

D																					D
C																					C
B																					B
A																					A

5 If farm is located in E. D. Segment, enter segment number shown on E. D. map. See instructions on supplemental schedule.

6 W for white. O for other. Include Mexicans with "white." Include Negroes, Indians, Chinese, Japanese, and other nonwhite races with "other."

9 In case of operator who has returned to a farm which he had previously operated, report year in which he returned to begin operations anew.

10 Report nonfarm work and work on other farms for pay. Include work in connection with filling station, garage, store, tourist camp, or other non-farm business conducted at this farm. Do not include exchange work.

12 Do not include in this farm any land now rented to or cropped by others.

13 and 15 Report present market value. Do not report the assessed value unless it conforms to the market value.

18 Include all outlying or separate fields, meadows, pastures, woodland, or waste lands.

19 Report acres in this farm from which one or more crops were cut, dug, picked, or otherwise harvested in 1944; all land in orchards and small fruits (bearing or nonbearing); and acreage in nurseries and greenhouses. Do not count same land twice, even though two crops were harvested from it. Suggestion to Enumerator: It may be helpful to fill in the information for columns 49 to 204 before proceeding with columns 19 to 26.

20 Land on which all crops (except orchards) were destroyed by drought, hail, flood, insects, disease, etc.; also acreage not harvested on account of labor shortage, poor stand, etc. Do not report as failure any crops which were grazed, hove off, or otherwise harvested for any purpose, or any land replanted to a crop that was harvested.

21 Do not report here cropland pastured; report it in column 22.

22 Do not report here land from which crops were harvested; report in column 19.

23 and 25 Include as woodland all farm wood lots or timber tracts, natural or planted, and cut-over land with young growth which has or will have value as wood or timber. Do not report here chaparral and woody shrubs; report such acreage in column 24 or 25.

(Reduced facsimile)

SCHEDULE

In reporting values enter dollars only; omit cents. In reporting value of products if none, enter "None." Do not use ditto marks. Report all numerical data in whole numbers unless a separate column is provided for fractions. Report fractions in tenths: $\frac{1}{2} = \frac{5}{10}$, $\frac{1}{3} = \frac{3}{10}$, $\frac{2}{3} = \frac{7}{10}$, $\frac{1}{4} = \frac{5}{10}$, $\frac{3}{4} = \frac{15}{10}$, $\frac{1}{5} = \frac{2}{10}$, $\frac{2}{5} = \frac{4}{10}$, $\frac{3}{5} = \frac{6}{10}$, $\frac{4}{5} = \frac{8}{10}$.

MULTIPLE-UNIT OPERATIONS (see instructions on page VII):

D																						D
C																						C
B																						B
A																						A

27-28 → Omit dwellings rented to others and tourist camps or institutional buildings.

29-32 → Omit inmates of institutions.

33-35 → Report number working at farm work, including farm chores; omit housework and contract construction work. Omit unpaid inmates of institutions. If partnership, report in column 34 partners other than one listed as operator.

36 → Omit expenditures for machine hire and for any labor included in cost of such machine hire; and expenditures for housework and for contract construction work.

41 → Or if no farm dwelling, electric distribution line within $\frac{1}{2}$ mile of farm buildings? If no farm buildings, within $\frac{1}{2}$ mile of main farm entrance? Main farm entrance is point where operator usually turns off public road (or off private road giving access to farm).

42 → If main farm entrance is on all-weather road, report "0" miles; if not, give distance along highway to nearest road that is passable at all times and all seasons. Hard-surfaced roads occasionally snow-bound or flooded are considered "all-weather" roads.

43-44 → Report only those used in the operation of the farm. Do not include trailers. If used or owned jointly, report for farm where usually kept. Report truck-trailer combinations (road tractor with trailer) under motortrucks, counting only number of power units.

45 → Report present market value. If machinery is used or owned jointly, report only for farm where usually kept. Include all farm implements and farm machinery (except automobiles), such as tractors; trucks; tools; wagons; harnesses; dairy equipment; threshing machines; combines; etc. Do not include machinery and equipment used primarily for non-farm purposes. Report permanently installed irrigation and drainage equipment under value of land and buildings.

46 → Include any owned by hired help living on farm.

48 → If mortgage covers larger acreage than reported in column 12, prorate share of mortgage on value basis.

(Reduced facsimile)

66-67 → Where flax and wheat were grown together, report one-half of the acreage under each crop. Where flax is grown for fiber and threshed, report the acreage and the flax seed produced. Report in columns 140-141 the acreage and value of fiber flax grown.

75 → Approximately 3.6 bushels=1 barrel.

78-79 → Include mung beans. Report total acreage harvested for beans, hay, or silage; hogged off or grazed. If harvested for beans, also report in column 81; if cut for hay, also report in columns 91-92.

82-83 → Include navy, pea bean, Great Northern, kidney, lima, pinto, etc.

88-89 → Total acreage harvested for peas, hay, or silage; hogged off or grazed. If harvested for peas, also report in column 90; if cut for hay also report in columns 91-92.

91-92 → Also include this acreage in column 78, 79, 88, or 89. Omit byproduct straw (stalks and leaves) of soybeans or cowpeas which have been threshed.

97 → Total acreage picked or threshed, used for hay; hogged off or grazed. If harvested for nuts, also report in columns 99-100; if the vines were saved for hay, also report tons in column 101.

(Reduced facsimile)

CENSUS OF AGRICULTURE: 1945

This inquiry is conducted under authority contained in section 16 of the Act of Congress; approved June 18, 1928. During the war emergency your census returns are accorded confidential treatment subject to existing law.

106-107 → Clover or timothy, alone or mixed.
Do not report sweetclover here;
report in columns 112-113.

110-111 → Hay from wheat, oats, barley, rye, etc.
Do not report here cuts cut when
ripe or nearly ripe (milk stage) for feeding un-
threshed; report in column 61.

112-113 → Include sweetclover, old meadows,
millet, Sudan, Johnson grass, orchard
grass, Redtop, crested wheatgrass, velvetbeans, vetches,
etc. Sorghums cut for hay should be reported in
columns 55-56.

114-115 → Include marsh, prairie, or prairie
grasses. Do not include volunteer
grasses following a cultivated crop; report such
grasses cut for hay in columns 112-113.

117 → Country or thresher run.

HAY CROPS → Report for each kind of hay the total production of all cuttings, counting only once acres of land on which
grown. Report mixtures in the columns in which the predominating hay would be classified. Do not in-
clude any hay crops cut for silage.

If seed was harvested from the same acreage from which hay was cut, report in columns 116 to 121 or 140-141, where
applicable.

(Reduced facsimile)

SCHEDULE

In reporting values enter dollars only; omit cents. In reporting value of products if none, enter "None." Do not use ditto marks. Report all numerical data in whole numbers unless a separate column is provided for fractions. Report fractions in tenths: $\frac{1}{10}$, $\frac{2}{10}$, $\frac{3}{10}$, $\frac{4}{10}$, $\frac{5}{10}$, $\frac{6}{10}$, $\frac{7}{10}$, $\frac{8}{10}$, $\frac{9}{10}$.

121 Country or threshing run.

127 If sold in seed, estimate square bales of lint. Approximately 1,500 pounds seed cotton = 1 bale. Convert round bales to square (2 round bales = 1 square).

138-139 Indicate the unit used for each book by placing a (1) mark in one of the boxes at the top of column 139. Sugarcane harvested for sugar or for sale to mills should be reported in tons. Sugarcane for syrup should be reported in gallons.

140-141 Some of the crops to be included are listed below with an identification number. Each crop reported should be identified by entering its number in the column headed "Ident. No."

Ident. No. Crop No. Crop No.

Broomcorn.....	1	Sunflower seed.....	9
Buckwheat.....	2	Sweetclover seed.....	10
Dry field and seed peas.....	3	Sweet sorghums for other than cowpeas.....	11
Emmer and spelt.....	4	Vetch seed.....	12
Popcorn.....	5	Velvetbeans for beans.....	13
Red clover seed.....	6	14
Sudan grass seed.....	7	15
Sugar beet seed.....	8	16

If more than one such crop for an individual farm, report the combined acreage and value in columns 140-141 and give the name, acreage, and value of each crop under Supplemental Information, page 12.

In column 141 report the actual or estimated value of production; whether it has been or is to be sold, traded, or used on the farm.

Do not include crops covered in columns 49 to 139 or fruits, vegetables, and horticultural specialties, columns 143 to 284.

142 If none, enter "None." Include value of products sold or traded, such as cottonseed and straw. For tenants and croppers include the value of the landlord's share.

Do not include value of field crops received by the farm operator as rent from land rented to others. Do not include value of crops fed to livestock, used for seed, or consumed by households on farm where produced.

MULTIPLE-UNIT OPERATIONS (see instructions on page VII):

D																				D
C																				C
B																				B
A																				A

215-217 Report animals sold alive from this farm whether produced on this farm or purchased from others. See instructions on page IV regarding livestock dealers.

218-220 Report animals butchered for use on this farm or for sale as dressed meat from this farm.

221 If none, enter "None." Include value of sales of horses and mules, wool, goats, mohair, goat milk, meat, fur animals in captivity and pets, bees, honey, etc., as well as value of sales for columns 215-217. Do not include here value of sales of dairy products or poultry and poultry products. Report the former in column 227, the latter in column 231.

222 Include cows and heifers of all kinds milked during all or any part of 1944.

223 8.6 pounds=1 gallon. Report all milk produced, whether consumed, sold, fed to stock, or otherwise disposed of.

225 Report pounds of butterfat, not pounds of cream.

227 If none, enter "None." Include value of sales of cheese, buttermilk, and skimmed milk, as well as value of sales for columns 224-226. Report gross value of sales without deductions for expenses of any kind. Do not include value of dairy products purchased and resold.

230 Include all raised all broilers, fryers, and roasters, as well as chickens raised for this year's flock, whether chicks were hatched on this farm or purchased as baby chicks.

232 If none, enter "None." Include value of sales of ducks, geese, guineas, pigeons, baby chicks, poulets, etc., as well as value of sales of eggs, broilers, fryers, other chickens, and turkeys.

233 Hay, grain, mill feed, tankage, mixed feeds, oyster shells, etc., purchased. Do not include expenditures for feed crops grown on this farm and purchased from elsewhere.

234 If none, enter "None." Include value of sales in 1944 of firewood, fuel wood, standing timber, sawlogs, veneer logs, pulpwood, mine props, bark, charcoal, fence posts, railroad ties, poles and piling, turpentine, resin, maple syrup and sugar, etc.

235 If none, enter "None." Include value of vegetables for farm households' use (column 194), as well as value of meat, milk, cream, butter, poultry, eggs, honey, fruits, firewood, fuel wood, lard and sweet potatoes, etc., used by households on farm where produced.

236 Include both cropland and pasture irrigated in 1944.

LIVESTOCK → Include animals on farm or ranch whether belonging to the farm operator or not, also animals belonging to farm but grazing in national forests or on open range.

CENSUS OF AGRICULTURE: 1945

[In reporting values enter dollars only; omit cents. In reporting value of products if none, enter "None." Do not use ditto marks. Report all numerical data in whole numbers unless a separate column is provided for fractions. Report fractions in tenths $\frac{1}{2} = \frac{5}{10}$, $\frac{1}{3} = \frac{3}{10}$, $\frac{3}{4} = \frac{15}{16}$, $\frac{1}{4} = \frac{2}{10}$, $\frac{3}{5} = \frac{6}{10}$, $\frac{1}{5} = \frac{2}{10}$, $\frac{3}{8} = \frac{15}{16}$, $\frac{1}{8} = \frac{2}{10}$, $\frac{7}{8} = \frac{35}{16}$.]

SUPPLEMENTAL INFORMATION AND CERTIFICATE			
			REMARKS
If any part of this farm is in another Minor Civil Division, give name of the M. C. D., also class, as township, town, ward, precinct, district, beat, etc.	Give name of county in which the Minor Civil Division named in column 237 is located	How many acres of this farm are located in the Minor Civil Division named in column 237?	Clarify any unusual entries in this report by adequate explanations below. Comment on unusual crops, yields, values, acreages, location and ownership of livestock, etc.

MULTIPLE-UNIT OPERATIONS (see instructions on page VII):

D			D
C			C
B			B
A			A

Make these checks before signing the adjoining certificate:

Each line should contain the entries for one farm according to the Census definition.

The report for each farm must be complete.

There must be entries in columns 1, 6, 11, 12 or 14, 13 or 15, 18, 41, and 42.

Check each line used to make sure that you have entries of either dollars or "None" in all of the value-of-products columns (columns 142, 193, 194, 203, 204, 221, 227, 232, 234, and 235).

The entry in column 18 should equal the sum of the entries in columns 19 to 26, inclusive; also the sum of columns 12 and 14.

The sum of the acres in columns 49 to 204, after subtracting duplicated acreages, should approximately check to the entry in column 19.

If there is an entry in column 27 or 28, there should be entries in columns 37-40.

Examine carefully any infrequent reports to make sure you have not made entries in the wrong column.

Check to see that you have obtained answers to all inquiries which are applicable in your area.

Check to see that both acreage and production are reported where called for.

Check to see that production is reported in the units of measure called for on the schedule.

Check production of each crop with the acreage harvested to see that the yield per acre is reasonable for your locality.

All entries should be legible.

All numerical data should be in whole numbers except where a separate column is provided for fractions. Fractions should be in tenths.

All values should be reported in dollars only, not dollars and cents.

ENUMERATOR'S CERTIFICATE

Enumeration of this book—

Begun by me at { a. m.
p. m.

on the day of , 1945

Completed by me at { a. m.
