

# VALUE OF FARM PRODUCTS, AND TYPE OF FARM

Table 2.—VALUE OF ALL FARM PRODUCTS SOLD OR USED BY FARM HOUSEHOLDS, WITH FARMS REPORTING, CLASSIFIED BY TOTAL VALUE OF PRODUCTS, FOR THE UNITED STATES: CENSUSES OF 1945, 1940, AND 1930

[Figures for regions and States in tables 23 and 25]

VALUE GROUP	FARMS REPORTING						VALUE OF FARM PRODUCTS SOLD OR USED BY FARM HOUSEHOLDS (DOLLARS)					
	Number			Percent of all farms			Total		Average per farm		Percent of total	
	Census of 1945	Census of 1940	Census of 1930	Census of 1945	Census of 1940	Census of 1930	Census of 1945	Census of 1940	Census of 1945	Census of 1940	Census of 1945	Census of 1940

\* Not available.  
<sup>1</sup> Not classified either by total value of farm products or by type. Figures for Census of 1930 include nurseries, greenhouses, and apiaries. See text.  
<sup>2</sup> Includes "0" product farms operated in 1929; excludes "0" product farms not operated in 1929, but to be operated in 1930.  
<sup>3</sup> Classified by total value of farm products, but not classified by type. See text.  
<sup>4</sup> Figures for farms with \$800 to \$749 value of products.  
<sup>5</sup> Figures for farms with \$750 to \$999 value of products.

NUMBER OF FARMS AND VALUE OF ALL FARM PRODUCTS SOLD OR USED BY FARM HOUSEHOLDS BY VALUE GROUPS, FOR THE UNITED STATES: CENSUSES OF 1945 AND 1940

marketed by farmers by the estimated prices farmers received for these products. Cash receipts from farm marketings are for quantities marketed during a calendar year and, hence, include only the value of that particular part of a crop that is marketed during the calendar year. For many crops, such as field crops, citrus fruits, etc., cash receipts from farm marketings may represent values derived from the sales for parts of two crop seasons, and thus comparability with Census totals for a crop year are affected insofar as cash receipts from marketings include or exclude crops that were harvested in a year other than the year covered by the census.

**Calculated versus enumerated or reported values.**— In table 8 of this chapter and in chapters VII, VIII, and IX are given calculated and enumerated values for crop and livestock production on farms. The calculated values were obtained for each county by multiplying the quantity harvested, produced, or sold by county-unit prices. Therefore, the figures for the value of production include not only the value of crops and livestock and livestock products sold, but also the value of crops fed to livestock, crops used for seed, crop wastage after harvest or production, and crops and livestock products consumed by farm households. As has been pointed out, the enumerated and calculated values of sales are presented in table 8, and the values in all other tables in this chapter are a summation of the values reported for individual farms.

Table 8 presents a comparison, by regions, geographic divisions, and States, of the calculated value of production, with the reported or enumerated values of products sold or used. The total calculated value of production for all farm products comprises the value of specified classes of livestock sold alive (cattle and calves, hogs and pigs, and sheep and lambs), specified livestock products (milk, wool, chicken eggs, chickens raised, and turkeys raised), specified fruits and nuts produced
