

Chapter A

CUT FLOWERS AND FLOWERING OR FOLIAGE PLANTS

(including vegetables grown under glass and
propagated mushrooms)

Chapter A

CUT FLOWERS AND FLOWERING OR FOLIAGE PLANTS (including vegetables grown under glass and propagated mushrooms)

Scope of census.—The special census of establishments producing cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms) includes establishments engaged in the production of cut flowers, potted plants, bedding plants, and vegetable plants in greenhouses, vegetables grown under glass, flowers and cut greens grown outdoors or under cloth or lath, and establishments producing mushrooms. While these establishments were included in the general Census of Agriculture, detailed data regarding these establishments and the production of flowers, flowering or foliage plants, propagated mushrooms, and vegetables grown under glass, were obtained only in the special census. Detailed data for these establishments have been obtained by special censuses only in connection with the 1890, 1930, and 1950 Censuses of Agriculture.

Period covered by the census.—This special census covers, in general, operations in the calendar year 1949. However, a small proportion of the establishments, which maintained their records on a fiscal-year basis and which were unable to report on a calendar-year basis, were permitted to report for the fiscal year that included at least one-half of the calendar year 1949. Regardless of the year used, the data on employment and on structures and equipment were to be reported for the period specified on the questionnaires.

Questionnaires used for the 1950 census.—A special questionnaire was used for establishments growing cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms). A facsimile of this questionnaire appears in the appendix to this chapter.

THE ENUMERATION

The enumeration.—The enumeration for the special census of establishments producing cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms) was conducted largely by mail. Reports from establishments from which reports could not be obtained by mail were obtained through the assistance of personnel of State agricultural colleges and State departments of agriculture. Lists of producers were obtained from trade associations, commercial mailing lists, directories, and State departments of agriculture. These lists were checked against the list of producers as reported by the 1950 Census of Agriculture.

PRESENTATION OF STATISTICS

This report presents statistics for the United States, for geographic divisions, States, and for counties. In order to avoid disclosure of information for individual establishments, data for counties having less than 3 establishments have been combined in "All other counties."

Comparability of data for prior censuses.—Comparative data are not presented in this report for prior horticulture censuses

for several reasons: First, in 1950, the data applied only to establishments with total sales of \$1,000 or more; whereas, in prior censuses, all establishments having any sales were included, provided these places qualified as farms under the Census definition. Second, the data on value of crops for the 1950 Census relate to the value of crops sold, calculated on the basis of the value at wholesale prices; whereas, the value of crops reported in prior censuses represents the value of the crops as they were sold, i.e., some at wholesale prices, others at retail prices.

Comparability of data obtained in the 1950 Census of Agriculture.—The data obtained in this special census are not comparable with those obtained in the 1950 Census of Agriculture for several reasons: First, the Census of Agriculture includes data for all establishments producing cut flowers and flowering or foliage plants qualifying as Census farms, whereas this special census includes only those establishments having sales of \$1,000 or more. Second, the Census of Agriculture includes only totals for area and sales for a group of crops, while the special census provides detailed data regarding individual crops. Third, the values reported for the Census of Agriculture represent the amount received by the farm operator when he sold the crops. This amount may represent sales at retail prices or at wholesale prices.

DEFINITIONS AND EXPLANATIONS

Definitions and explanations are presented only for those items for which the table descriptions are considered to be inadequate. The definitions consist primarily of a resumé of the questions in the questionnaire. For the exact phrasing of the inquiries and the instructions included in the questionnaire, reference should be made to the facsimile of the questionnaire shown in the appendix.

Establishment represents the operations of an ownership or proprietorship engaged in the production for sale of cut flowers or flowering or foliage plants, vegetables grown under glass, and propagated mushrooms. Usually if the operations were carried on in more than one State, the operation in each State was considered an establishment.

Type of organization represents types of ownership. Establishments are classified as individual proprietorships, partnerships, and corporations.

Total sales, for the purpose of this report, represent gross sales excluding returns and allowances. Sales include all wholesale sales and all retail sales of a given establishment. Sales include also the value of products sold on a commission basis and sales taxes.

Wholesale sales represent the total of wholesale sales to wholesale establishments and wholesale sales to retail and other establishments.

Wholesale sales to wholesale establishments represent the wholesale sales to establishments recognized as commission

merchants, wholesale merchants, and other wholesale selling establishments (brokers, agents, assemblers, or others primarily engaged in wholesale trade and not engaged in production or retail trade).

Wholesale sales to retail and other establishments represent sales made directly to those engaged in production or in retail trade.

Retail sales represent all sales other than wholesale sales. This item includes goods and services purchased and resold at retail as well as products grown and sold at retail.

Value at wholesale prices of all crops sold represents the total obtained by adding the wholesale value of all individual crops sold as reported by a respondent. Respondents were asked to report the value at wholesale prices of each crop sold. Inasmuch as a large proportion of these products are sold through wholesale channels, respondents did not have great difficulty in carrying out this instruction.

Proprietors of unincorporated establishments include all those who, in the operation of individual proprietorships or partnerships, devoted in 1949 a major portion of their time to the business.

Unpaid family workers consist of the number of family members (wives, children, relatives, or others of the household of owners or managers) who worked at any time during the first two weeks of March 1949, but were not paid a wage or salary.

Paid officers of corporations consist of officers of incorporated establishments who were paid salaries.

All other paid employees for the pay period ending nearest March 15, 1949, include all hired persons, except paid corporation officers who were on the payroll at that time.

Paid employees in year-round positions include all hired employees who are retained on the payroll throughout the year, with the exception of paid officers of corporations.

Expenditures for wages and salaries include all payments to employees and officers but do not include any allowance for work performed by proprietors of unincorporated establishments, or unpaid family members.

Expenditures for manure and fertilizer include expenditures for commercial fertilizer and manure but do not include expenditures for topsoil.

Expenditures for insecticides and fungicides include those expenditures for such materials used for the production of cut flowers, flowering or foliage plants, vegetables grown under glass, mushrooms, etc., but do not include insecticides and fungicides purchased for resale.

Expenditures for seeds, plants, and bulbs for planting do not include expenditures for those items which were purchased for resale. The questionnaire provided for separation of the purchases for planting and those for resale. Because the question for purchases for resale did not include cut flowers and greens, it was considered inadvisable to tabulate the data for this question.

Expenditures for coal, fuel oil, and gas include only coal, fuel oil, and gas purchased for heating of greenhouses and other production facilities. This item does not include fuel for use in automobiles, trucks, or tractors.

Expenditures for advertising include the usual expenditures for this purpose as well as the cost of catalogues and mailing pieces, dues paid to trade associations, and the amount paid to Allied associations.

Size of establishment refers to the classification of establishments by size of operation on the basis of the total value at wholesale prices of all crops sold.

Value of land, structures, and equipment includes the value of structures directly connected with the business. In some instances, it may include the value of the operator's residence and other structures, not directly connected with the business, on the place where the production and selling operations are performed.

Greenhouse area represents the square feet of land covered by greenhouse structures. It does not include frame area or any area for producing propagated mushrooms. In the average greenhouse establishment two-thirds of the amount reported can be considered as the square footage of bench or bed area.

Greenhouse area used primarily for growing florists' crops includes the area devoted to the production of bedding and vegetable plants while the **greenhouse area used primarily for growing vegetable crops** represents the area used for the production of finished hothouse vegetable crops. In the event that a given area was used during the year for the rotation of flower and vegetable crops, one-half of the area was allotted to each of the two crops.

Area of frames, cloth houses, and lath houses represents the square feet of land area covered.

Storage-house floor area consists of the square feet of floor area regardless of whether there is more than one story in the structure.

Refrigerated storage represents the capacity in cubic feet of such facilities. The floor area of the refrigerated storage space is included in the area for storage-house floor area.

Units of measurement reported for specified crops sold have been reduced to single units, with the exception of pompon chrysanthemums, which are reported as bunches, although the questionnaire permitted the respondent to report sales in units commonly used in trade practice, such as tens, dozens, twenty-fives, hundreds, thousands, cubic volume, or weight.

RELIABILITY OF DATA

There are no reliable data with which statistics secured in the special Census of Horticultural Specialties can be compared. The enumeration of general data for greenhouses and similar establishments in the 1950 Census of Agriculture provided an independent source for checking the list of establishments compiled from other sources.

The information obtained from the individual establishments was examined during the office processing. Questionable entries were examined by technical personnel and, in case of important items, questionable information was verified or corrected on the basis of correspondence with the establishment.

It is believed that the coverage of establishments is at least 97 percent complete. The limiting of this special census to establishments having sales of \$1,000 or more, made it possible to obtain relatively complete reports for all establishments as the very small establishments with inadequate records were excluded from the census. For establishments having about 2 percent of the total sales of all establishments, it was necessary to estimate detailed data for the quantity of crops sold, the value of crops at wholesale prices, etc. These estimates were based upon data obtained in the 1950 Census of Agriculture, State certification reports, and reports for establishments producing similar crops or products.

SUMMARY OF DATA

There were 12,427 establishments engaged in the production for sale of cut flowers and flowering or foliage plants (including propagated mushrooms and vegetables grown under glass). The 4,238 establishments having a value of crops calculated at wholesale prices of \$10,000 or more, represented only 34.1 percent of the establishments but reported 73.7 percent of the total sales, 90.1 percent of all wholesale sales, 50.3 percent of all retail sales, and 85.5 percent of the

CUT FLOWERS AND FLOWERING OR FOLIAGE PLANTS (INCLUDING VEGETABLES UNDER GLASS AND PROPAGATED MUSHROOMS)-PERCENT DISTRIBUTION OF THE VALUE OF CROPS AT WHOLESALE PRICES BY GROUPS OF CROPS, BY STATES, 1949

- PLANTS, ROOTED CUTTINGS, ETC., SOLD FOR GROWING ON
- CUT FLOWERS GROWN UNDER GLASS
- POTTED PLANTS GROWN UNDER GLASS
- PROPAGATED MUSHROOMS AND VEGETABLES GROWN UNDER GLASS
- CUT FLOWERS GROWN UNDER CLOTH
- CROPS GROWN OUTDOORS AND UNDER LATH

value of all crops sold, calculated at wholesale prices. A large part of the production of cut flowers and flowering or foliage plants is concentrated in a relatively few counties. The 100 leading counties in the value of crops at wholesale prices represented more than 70 percent of the total value of all crops at wholesale prices.

Employment in establishments producing cut flowers and flowering or foliage plants totaled 77,954 persons. Of the total, 30.0 percent were proprietors of unincorporated establishments and unpaid family workers, 2.2 percent were paid officers of corporations, and 67.8 percent were other paid employees. Of the paid employees, 61.5 percent held year-round positions.

Specified expenditures totaled \$139,162,990 and represented 43.2 percent of total sales. Of this total, wages and salaries represented 67.0 percent; manure and fertilizer, 4.9 percent; insecticides and fungicides, 1.5 percent; seeds, plants, and bulbs for planting, 12.4 percent; fuel, 11.9 percent; and advertising, 2.2 percent.

The wholesale value of crops sold in 1949 by establishments growing cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms) was \$218,521,723. Of this total, plants, rooted cuttings for growing on, bedding and vegetable plants, etc., represented \$30,591,286, or 14.0 percent; cut flowers grown under glass, \$93,478,944, or 42.8 percent; potted plants grown under glass, \$36,743,696, or 16.8 percent; vegetables grown under glass and propagated mushrooms, \$27,612,267, or 12.6 percent; cut flowers grown under cloth, \$3,893,708, or 1.8 percent; and crops grown outdoors and under lath, \$26,201,822, or 12.0 percent.

More than half the value of the group of crops, "plants, rooted cuttings, etc., sold for growing on," was represented by the value of bedding and vegetable plants. Other important crops in this group included unfinished geranium plants and cuttings and finished geranium plants, with a total value of \$5,154,518; unfinished foliage or green plants, with a value of \$3,315,505; chrysanthemums, with a value of \$1,437,673; and azaleas, with a value of \$1,113,107.

Of the wholesale value of \$93,478,944 for cut flowers grown under glass, almost one-third, or \$30,582,022, was for roses. After roses, the four most important cut-flower crops, based on the value of crops at wholesale prices, were carnations, with a value of \$19,908,968; pompon chrysanthemums, with a value of \$7,897,649; Cattleya orchids, with a value of \$7,169,354; and standard chrysanthemums, with a value of \$5,878,749.

Sales of potted plants grown under glass were valued at wholesale prices at \$36,743,696. More than four-fifths of this total is comprised of the six most important crops included in this group, namely, foliage or green plants, with a value of \$9,842,266; poinsettias, with a value of \$4,715,209; azaleas, with a value of \$4,315,222; hydrangeas, with a value of \$4,197,117; lilies, with a value of \$3,555,517; and other bulb crops, with a value of \$3,293,236.

The value at wholesale prices of vegetables grown under glass and propagated mushrooms was \$27,612,267. Over half of this total was represented by propagated mushrooms, with a value of \$14,565,807. Vegetables grown under glass totaled \$13,046,460 and represented 2.2 percent of the value of vegetables grown outdoors in 1949.

Tomatoes were the most important vegetable crop grown under glass, representing 77.2 percent of the value of all vegetables grown under glass.

The value of cut flowers grown under cloth represented less than 2 percent of the total value of all crops at wholesale prices for establishments engaged in the production of cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms). Pompon chrysanthemums and standard chrysanthemums comprised almost four-fifths of the total value for this group of crops.

Crops grown outdoors and under lath represented approximately one-eighth of the value of all crops at wholesale prices grown by

establishments producing cut flowers and flowering or foliage plants (including vegetables grown under glass and propagated mushrooms). Only two crops, gladiola with a value of \$14,868,387 and asparagus plumosus with a value of \$2,902,865, were valued at more than \$1,000,000.

The value of land, structures, and equipment amounted to \$339,235,021 or an average of \$27,298 per establishment. A total of 187,324,139 square feet was reported for greenhouse area. Of this total, 85.4 percent was used primarily for florists' crops and 14.6 percent was used primarily for vegetable crops.

The average value of crops at wholesale prices produced per square foot of the greenhouse area used primarily for florists' crops was more than double the corresponding average for the greenhouse area used primarily for vegetable crops.

CUT FLOWERS AND FLOWERING OR FOLIAGE PLANTS (INCLUDING VEGETABLES UNDER GLASS AND PROPAGATED MUSHROOMS) - NUMBER OF ESTABLISHMENTS, 1950, AND VALUE OF CROPS AT WHOLESALE PRICES, 1949, BY SIZE OF ESTABLISHMENT, FOR THE UNITED STATES

There is some greenhouse area not in establishments producing cut flowers and flowering or foliage plants. The following table gives greenhouse area by kind of establishment, together with comparable data for 1929.

Table A.—GREENHOUSE AREA, 1949 AND 1929

Kind of establishment	Greenhouse area (square feet)	
	1949	1929
Total.....	191,400,495	178,500,370
Cut flowers and flowering or foliage plants (including vegetables grown under glass).....	187,324,139	173,371,536
Nurseries.....	3,828,419	4,786,092
Bulb farms.....	158,332	342,742
Flower-seed farms.....	89,605	(¹)

¹Not available.

The total frame area for establishments producing cut flowers and flowering or foliage plants was 10,937,716 square feet in 1949 and represented 51.6 percent of the frame area of all horticultural-specialty establishments.

Table B.—FRAME AREA, 1949 AND 1929

Kind of establishment	Frame area (square feet)	
	1949	1929
Total.....	21,180,377	19,344,631
Cut flowers and flowering or foliage plants (including vegetables grown under glass).....	10,937,716	15,315,838

HORTICULTURAL SPECIALTIES

United States Summary Table 4.—STRUCTURES AND EQUIPMENT, APRIL 1, 1950, BY SIZE OF ESTABLISHMENT IN 1949

Item	Total	Establishments with value of crops at wholesale prices of—	
		Less than \$10,000	\$10,000 and over
Value of land, structures, and equipment.....	12,427	8,189	4,238
establishments reporting..	100.0	65.9	34.1
percent distribution..			
Value.....dollars..	339,235,021	105,541,599	233,693,422
average per establishment reporting..dollars..	27,298	12,888	55,142
percent distribution..	100.0	31.1	68.9
Greenhouse area, total.....	9,875	6,417	3,458
establishments reporting..	100.0	65.0	35.0
percent distribution..			
Area.....square feet..	187,324,139	41,032,926	146,291,213
average per establishment reporting..square feet..	18,970	6,394	42,305
crop value per square foot..dollars..	0.93	0.59	1.02
percent distribution..	100.0	21.9	78.1
Used primarily for florists' crops.....	9,396	6,189	3,207
establishments reporting..	100.0	65.9	34.1
percent distribution..			
Area.....square feet..	159,917,237	36,922,198	122,995,039
crop value per square foot..dollars..	1.01	0.62	1.12
percent distribution..	100.0	23.1	76.9
Used primarily for vegetable crops.....	768	374	394
establishments reporting..	100.0	48.7	51.3
percent distribution..			
Area.....square feet..	27,406,902	4,110,728	23,296,174
crop value per square foot..dollars..	0.48	0.35	0.50
percent distribution..	100.0	15.0	85.0
Greenhouse bench or bed area—			
With gravel culture in 1949.....	191	120	71
establishments reporting..	100.0	62.8	37.2
percent distribution..			
Area.....square feet..	605,220	87,365	517,855
percent distribution..	100.0	14.4	85.6
With automatic watering or subirrigation in 1949.....	458	163	295
establishments reporting..	100.0	35.6	64.4
percent distribution..			
Area.....square feet..	6,982,802	741,134	6,241,668
percent distribution..	100.0	10.6	89.4
With black cloth treatment in 1949.....	1,129	399	730
establishments reporting..	100.0	35.3	64.7
percent distribution..			
Area.....square feet..	3,604,365	376,344	3,228,021
percent distribution..	100.0	10.4	89.6
With artificial lighting in 1949.....	668	252	416
establishments reporting..	100.0	37.7	62.3
percent distribution..			
Area.....square feet..	2,158,724	203,288	1,955,436
percent distribution..	100.0	9.4	90.6
With soil sterilization in 1949.....	2,549	1,098	1,451
establishments reporting..	100.0	43.1	56.9
percent distribution..			
Area.....square feet..	42,814,422	5,646,714	37,167,708
percent distribution..	100.0	13.2	86.8
Frame area.....	3,116	2,175	941
establishments reporting..	100.0	69.8	30.2
percent distribution..			
Area.....square feet..	10,937,716	4,463,027	6,474,689
percent distribution..	100.0	40.8	59.2
Cloth-house area.....	1,117	458	659
establishments reporting..	100.0	41.0	59.0
percent distribution..			
Area.....square feet..	17,218,835	2,464,145	14,754,690
percent distribution..	100.0	14.3	85.7
With black cloth treatment in 1949.....	336	133	203
establishments reporting..	100.0	39.6	60.4
percent distribution..			
Area.....square feet..	3,517,584	656,834	2,860,750
percent distribution..	100.0	18.7	81.3
Lath-house area.....	917	534	383
establishments reporting..	100.0	58.2	41.8
percent distribution..			
Area.....square feet..	50,887,990	14,601,412	36,286,578
