*Available data not comparable.

*Data for 1945 and earlier do not include land rented to others by farm operators.

*In the preceding calendar year.

*Total acreage of crops for which figures are available, except that corn cut for forage was excluded as most of this acreage was probably duplicated in the acreage of corn harvested for grain.

*Total cropland, cropland used only for pasture, and other pasture not strictly comparable for the various census years because of differences in definition of cropland used only for pasture. See text.

¹For 1920, standing renters (renters paying a fixed quantity of products) were included with cash tenants.

^{*}Not available.

1 For 1940 and 1930, the figures for land rented from others exclude land subrented to others.

2 For part owners, the figures for cropland harvested represent not only the cropland rented from others but also cropland owned; for 1950, for operators renting land to others, the figures for cropland harvested represent only the portion retained.

¹ Farms not reporting year of newest model were distributed in the same proportions as those for which year of model was reported.

2 The census inquiry was for "year of newest model" only.

3 The census inquiry for 1950 and 1945 called for reporting "home-made" tractors in lieu of year of newest model.

4 Not reported separately in 1940.

5 Crawler and garden tractors were not classified by year of model in the 1950 and 1945 censuses.

1 For 1940 and 1930, figures for land owned and taxes do not include land rented to others. Also, owner-operators not reporting as to land rented to others are included with owner-operators renting land to others.

2 Total property taxes represent only real-estate taxes as taxes on farm personal property are negligible.

I Figures for cropland harvested and specified crops relate to the crop years 1949, 1944, 1939, 1934, 1929, 1924, and 1919.

Total acres of crops for which figures are available, except that corn cut for forage was excluded being largely duplicated in acres harvested for grain.

*Calculated value of corn harvested for grain, corn cut for silage, and corn hogged or grazed or cut for green or dry fodder.

*Calculated value of corn harvested for grain, corn cut for green manure. The 1944 figures are for acres grown alone.

*The 1944 and 1939 figures do not include acres plowed under for green manure. The 1944 figures are for acres grown alone.

*The 1944, soybeans and cowpeas harvested for hay. Prior to 1944, annual legumes saved for hay, but excluding vetches in 1924.

*For censuses prior to 1950, obtained by adding the individual hay crops, exclusive of sorghums and annual legumes.

*Clover seed except sweetclover.

10Clover seed.

*Ares harvested for beans or peas not available.

Silage crops other than corn and sorgnums.

*Silage crops sueetclover.

Oclover seed.

Oclover seed.

**IFOO 1949, does not include acres for farms with less than 15 bushels harvested. See text.

**IFOO 1949, does not include acres grown for all purposes, with no production. Acres harvested for beans or peas not available.

State Table 28.—SAMPLING RELIABILITY OF ESTIMATED NUMBER OF FARMS AND FARMS REPORTING: CENSUS OF 1950

If the estimated number of farms or farms reporting is—	Then the chances are about 2 in 3 that the estimated number would differ from the results of a complete tabu- lation by less than 1.

In the case of items for which the estimated number of farms or farms reporting constitutes more than 50 percent of all farms in the universe, more precise limits may be obtained by multiplying the percent difference given in the table by an approximate factor as follows:
