\*Not available.

\*Not available data not comparable.

\*Data for 1945 and earlier do not include land rented to others by farm operators.

\*In the preceding calendar year.

\*Total acreage of crops for which figures are available, except that corn cut for forage was excluded as most of this acreage was probably duplicated in the acreage of corn harvested for grain.

\*Total acreage of crops for which figures are available, except that corn cut for forage was excluded as most of this acreage was probably duplicated in the acreage of corn harvested from the various census years because of differences in definition of cropland used only for pasture. See text.

\*Acreage of irrigated crops including some duplications where 2 or more crops were harvested from the same land.

<sup>\*</sup>Not available.

\*\*Available data not comparable.

<sup>1</sup>For 1920, standing renters (renters paying a fixed quantity of products) were included with cash tenants.

<sup>\*</sup>Not available.

¹For 1940 and 1930 the figures for land rented from others exclude land subrented to others.

²For part owners, the figures for cropland harvested represent not only the cropland rented from others but also cropland owned; for 1950, for operators renting land to others, the figures for cropland harvested represent only the portion retained.

<sup>&</sup>lt;sup>1</sup> Farms not reporting year of newest model were distributed in the same proportions as those for which year of model was reported.

<sup>2</sup> The census inquiry was for "year of newest model" only.

<sup>3</sup> The census inquiry for 1950 and 1945 called for reporting "home-made" tractors in lieu of year of newest model.

<sup>4</sup> Not reported separately in 1940.

<sup>5</sup> Crawler and garden tractors were not classified by year of model in the 1950 and 1945 censuses.

1 Includes farms not reporting as to relation of operator to landlord.

2 For part owners, the figures for cropland harvested represent not only the cropland rented from others but also cropland owned; for operators renting land to others, the figures for cropland harvested represent only the portion retained.

The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county in which the headquarters is located even though a part of the farm may be situated in an adjoining county.
