

PERCENT DISTRIBUTION OF GROPLAND, LAND PASTURED, AND WOODLAND BY TENURE OF OPERATOR, FOR COMMERCIAL FARMS FOR THE UNITED STATES AND REGIONS: 1954

Figure 30.

farms 73.1 percent of the land was cropland and 17.2 percent, pastureland. Much of the woodland and pastureland of multiple-unit operations is retained in the home farm.

Regional variations.—In the Northeast, the largest proportion of both cropland and pastureland is operated by full owners. This is in contrast with the West where a major share of each

is operated by part owners. In the South and North Central regions, tenants account for a greater share of cropland than in the other two regions. Tenant farms with crop-share leases generally contain a high proportion of cropland in all regions, particularly in the West and South. Livestock-share arrangements are most common in the North Central region.
