Value of land and buildings and livestock per farm.....	90,595	337,837	114,283	63,223	43,555	28,467	24,148
Value of all farm products sold per farm.....	13,027	61,326	16,046	7,282	3,720	1,853	796
Livestock and livestock products sales as a percent of value of all farm products sold.....	93.9	95.4	92.2	90.9	91.7	94.3	96.9

Economic subregion 113.—This is the largest subregion in the country and it contains most of what has been characterized as the intermountain region. It has a high proportion of public land,

and except for local irrigation developments, is devoted almost entirely to stock ranching that may be characterized as desert and semidesert ranching.

Livestock ranching operations have a relatively high average size but have considerable range in size. They are generally adequate for reasonably high efficiency of operation. The average size for the Class I ranches is extremely large; 12 percent of the ranching units have approximately 51 percent of the livestock (see Table 21). The earliest of the ranchers here were able to obtain control and use of large acreages of public lands through selection of land located near water supplies—a very important factor in ranch operations and particularly in this subregion.

Because year-long grazing is possible in most of this subregion, labor requirements are low. The number of animal units per man-year is high, especially for the Class I ranches.

Because the ranchers use much public land, their investment in land and buildings per animal unit is low. Also contributing to this is the low feed crop requirement.

Pacific Coast Region

Economic subregion 116.—The Central Valley of California makes up this economic subregion. It includes the lower foothills of the Sierras and some of the coastal mountain ranges. Stock ranches comprise a minor part of the agriculture here.

Class I stock ranches have a large average size and a very high efficiency in the use of labor (see Table 22). Probably operations of many of the small livestock units are affected by outside work by the operators. This probably explains the employment of considerably more hired labor on the smaller ranches than on the small ranches in most of the other subregions.

For all except Class I ranches the investment in land and buildings per animal unit of livestock is much above the average of that of the western subregion.

TABLE 22.—LIVESTOCK FARMS IN SUBREGION 116, BY ECONOMIC CLASS OF FARM: 1954

Item	Total	Economic class of farm
