<sup>1</sup> Not available. <sup>2</sup> 0.05 percent or less. <sup>3</sup> Farm garden vegetables for home use, exclusive of Irish potatoes and sweetpotatoes, except for 1919. <sup>4</sup> For 1909, vegetables other than Irish and sweet potatoes were reported by 4,969,539 farms. Vegetables were not classified as raised for sale or home use. Of the farms reporting, 707,763 had no report of acreage or value, and of those reporting value, 4,220,045 had less than \$500 each, with a total value of \$156,152,564. Data for vegetables raised on tracts of 1 acre or more are given under "Vegetables harvested for sale." The figures shown do not include all vegetables raised for sale, since the aggregate of market vegetables produced on tracts less than 1 acre must have been considerable. <sup>5</sup> In 1934, only 5 vegetables were specified on the schedule, viz., green beans, cabbage, sweet corn, tomatoes, and watermelons. In 1924, cantaloupes and muskmelons, lettuce, and onions (dry) were harvested for sale from 278,550 acres. Vegetables other than those for which data are given were not reported. <sup>6</sup> Excludes anise and herbs which were included with medicinal crops in 1929. <sup>7</sup> Includes honeydews, honeyballs, etc. <sup>8</sup> Totals and derived figures are for States for which separate inquiry was carried on questionnaire. <sup>9</sup> Does not include farms reporting green cowpeas only. <sup>10</sup> Lettuce and romaine reported separately in 1939; includes 102 farms reporting 381 acres of romaine. <sup>11</sup> Includes data for celery, sweet corn, and lettuce reported in States where separate inquiries were not on the questionnaire. <sup>12</sup> Includes mixed vegetables.
