

OPERATORS: CENSUSES OF 1954 AND 1950-Continued

reports for only a sample of farms. See text]

Table with 15 columns representing Florida counties: Indian River, Jackson, Jefferson, Lafayette, Lake, Lee, Leon, Levy, Liberty, Madison, Manatee, Marion, Martin, and Monroe. Each column contains numerical data for various rows, likely representing different census categories or farm types. The data is organized in a grid format with rows numbered 1 through 83 on the right side.

STATISTICS FOR COUNTIES

County Table 1.—FARMS, ACREAGE, VALUE, AND FARM

[Data for items shown in italics are based on

Table with columns for counties (Nassau, Okaloosa, Okeechobee, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk) and rows for various farm statistics (Farms, Land area, Average size of farm, etc.).

1The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated as in the county in which the headquarters is located, even though a part of the farm may be situated in an adjoining county.
