

APPENDIX

METHODS AND PROCEDURES

DESCRIPTION OF PRELIMINARY REPORTS OF THE 1954 CENSUS OF AGRICULTURE

Series AC54-1.—One 4-page report for each county and for each State in the United States, one summary report for the United States, one each for the North, the South, and the West.

These reports presented preliminary results on number of farms, farm characteristics, acreage in farms, value of land and buildings, uses of land, farm facilities and equipment, specified classes of livestock, specified crops harvested, and fertilizer and lime used. Available comparable data from the 1950 Census of Agriculture were also included.

Series AC54-2.—Value of Farm Products Sold by Source.—This series supplemented Series AC54-1. There was one report for each State with data by counties, and one for the United States with statistics by States. The report presented information on the value of sales of field crops, vegetables, fruits and nuts, and horticultural specialties; the value of sales of dairy products, poultry and poultry products, livestock and livestock products; and the value of sales of forest products.

Series AC54-3.—Consisted of preliminary reports presenting data on selected items from the 1954 Census of Agriculture as follows:

No. 1—Farm Expenditures for Gasoline and Other Petroleum Fuel and Oil.

No. 2—Farm-Mortgage Debt Rises with Increasing Farm Land Values.

No. 3—Summary of selected items from the 1954 Census of Agriculture by Congressional Districts, by States. Data were presented for number of farms, value of products sold, selected facilities, and principal crops, for Congressional Districts with 1,000 or more farms.

Press releases.—Several hundred advance reports, on almost as many subjects, were prepared and issued as press releases. Among these releases were reports on the following:

Statistics for selected items of inventory and agricultural production for the leading 100 counties of the United States.

Sales from farms of different economic classes, for States and for the United States.

Summary reports for the United States on selected items such as farms classified by value of farm products sold in 1954; average age of the American farmer; increase in farm facilities and equipment; expenditures for selected items; etc.

All preliminary and advanced reports or releases were superseded by the final volumes of the 1954 Census of Agriculture. For a description of final reports, see page IV.

APPENDIX

1954 CENSUS OF AGRICULTURE—Preliminary Farms • Farm Characteristics • Farm Products

U. S. DEPARTMENT OF COMMERCE
Bureau of the Census

April 1955

LIBERTY COUNTY, GEORGIA

(57-089) Series AC54-1

This release presents figures from the 1954 Census of Agriculture, together with available comparative data from the 1950 Census of Agriculture. The figures from the 1954 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1954 and 1950 are based upon the tabulation of reports for all farms in the county. However, the 1954 and 1950 data for items followed by a star (*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms. These estimates are subject to sampling errors and hence will not agree exactly with totals obtained by a tabulation of data for all farms.

Inventory items are for October–November for 1954 and for April for 1950; and production items are for the calendar years 1954 and 1949.

1For 1954, does not include acreage for farms with less than 20 bushels harvested.

2For 1949, does not include acreage for farms with less than 15 bushels harvested.

3Reported in small fractions.

4For 1954, does not include acreage for farms reporting less than 20 fruit and nut trees and grapevines.

5For 1950, does not include acreage for farms reporting less than 1/2 acre.

APPENDIX

91

1954 CENSUS OF AGRICULTURE—Preliminary
FARMS • FARM CHARACTERISTICS • FARM PRODUCTS

U. S. DEPARTMENT OF COMMERCE
Bureau of the Census

March 1956

IDAHO

(No. 82) Series AC54-2

VALUE OF FARM PRODUCTS SOLD BY SOURCE

The value of farm products sold in Idaho amounted to \$332,125,790 in 1954, an increase of 18.2 percent from the sales of \$281,025,323 in 1949, according to the results of the 1954 Census of Agriculture released by the Bureau of the Census, U. S. Department of Commerce. The value of farm products sold in 1954 in Idaho, according to source of sales, was as follows: Field crops other than vegetables, fruits, and nuts, \$185,145,886; livestock and live-stock products, other than dairy and poultry products, \$90,654,325; dairy products, \$37,731,469; fruits and nuts, \$6,507,486; poultry and poultry products, \$5,503,846; forest products, \$1,551,888; and horticultural specialties (nursery and greenhouse products), 1,433,936.

A comparison of the value of farm products sold, by source, for 1954 and 1949 follows:

<u>Source</u>	<u>1954</u>	<u>1949</u>
All crops sold, total.....	\$196,684,262	\$153,836,501
Field crops (other than vegetables and fruits and nuts).....	185,145,886	146,027,104
Vegetables.....	3,596,954	3,345,976
Fruits and nuts.....	6,507,486	3,201,619
Horticultural specialties.....	1,433,936	1,261,802
All livestock and livestock products sold, total.....	133,889,640	126,321,394
Dairy products.....	37,731,469	27,817,955
Poultry and poultry products.....	5,503,846	6,134,311
Livestock and livestock products (other than dairy and poultry products).....	90,654,325	92,369,128
Forest products, total.....	1,551,888	867,428

Data for 1954 for individual counties in the State are given on page 2.

DEFINITIONS AND EXPLANATIONS

Total value of farm products sold.—The data given represent the value of farm products sold based on information obtained from farm operators in the 1954 Census of Agriculture. The total value of all farm products sold represents the total of sales from each farm regardless of who shared in the receipts. The landlord's share of the crops and livestock sold and, also, the livestock which the landlord took from the tenant's farm were considered as sales from the tenant's farm. The value of all crops sold represents the value of crops sold from the harvest of 1954 regardless of when sold. The sales of livestock and livestock products represent the sales during 1954 regardless of when the livestock were raised or produced.

In obtaining the value of farm products sold from farm operators, census enumerators were instructed to obtain the gross value of all sales without deductions of any kind. However, in the case of milk, poultry, eggs, etc., deductions were often made by the buyers of farm products for hauling, handling, marketing, etc., before making payments to farmers. In such cases, farmers often considered the amount received after the deductions of marketing cost as the gross value of farm products sold.

The data given for the value of all farm products sold represent totals for all farms regardless of the amount sold. In the case of part-time farms, residential farms, etc., the value of all farm products sold may have been very small. Therefore, the average value of farm products sold per farm, computed on the basis of the data given in the accompanying table, may not indicate accurately the value of all farm products sold by commercial farms. Data on the number of commercial farms and for all farms classified by economic class

are given in the preliminary report, Series AC54-1, issued for each county.

The value of farm products sold does not include income of farm operators from nonfarm sources, government payments for soil conservation, lime and fertilizer furnished, nor subsidy payments, etc.

The value of livestock and livestock products sold, the value of farm products sold, the value of vegetables sold, and the value of horticultural specialties sold were obtained from each farm operator at the time of enumeration during the period October to December 1954. The values of field crops and fruits and nuts sold were calculated by multiplying the quantity sold by State average prices obtained by the Agricultural Marketing Service of the U. S. Department of Agriculture in cooperation with the Bureau of the Census. The value of field crops includes all crops sold except vegetables, fruits and nuts, forest products, and horticultural-specialty crops (nursery and greenhouse crops). The value of vegetables sold does not include the value of Irish potatoes or sweetpotatoes sold. The value of fruits and nuts sold includes the value of berries and small fruits sold. The quantity sold for the principal crops was obtained from each farm operator, while the quantity sold for less important crops and for fruits and nuts was estimated.

The statistics given in this release will be included in Volume I of the reports of the 1954 Census of Agriculture. Detailed data for a large number of items for the 1954 Census of Agriculture have already been published for each county and the State in Series AC54-1.
