Italics indicate States identified in 1950 as "county-drain" States. The other States were designated "drainage-district" States. See footnote 6 and text.
 Boldface indicates States, other than "county-drain," for which the 1950 drainage data included drained lands in "irrigation enterprises." See footnote 4 and text.
¹Land in two or more projects included in each project. Areas shown equal the sum of areas of individual projects with no deduction for land included in more than one project.
²In 1960, only projects of 500 or more acres were included. See footnote 6 and text.
³For 1940, 1930, and 1920, number refers to the total reports including projects wholly superseded by later projects. For 1920, data for number of projects, by size of project, were not available from the 1920 report. The counts presented for that year are those carried in the 1940 report (see Summary Table 6) and differ from the total count of projects reported in 1920.
⁴For 1950, projects under 500 acres include "irrigation enterprises" with drainage enumerated in the Census of Irrigation (see Summary Table 12) and 3 "county-drain" counties representing portions of intercounty drains (see footnote 6). The enumeration for the 1950 Census of Drainage included only drainage projects of 500 or more acres.
⁵Revised.

⁶In 1960, all drains under county management were enumerated as a unit with each portion of intercounty projects credited to the county where located. In 1950, the procedure was similar for "county-drain" States but the county report included all projects in the county, including those not under county management. The 1960 data (500-999 acres) include reports for county-drains for two counties (Benton, Iowa, and Jerauld, S. Dak.) with less than 500 acres due to intercounty projects. The 1950 data (under 500 acres) include 3 such counties (Benton, Iowa, Fulton, Ky., and Jerauld, S. Dak.). In 1940, 1930, and 1920, each drain was considered a separate project.

⁷Totals for 30 States shown for 1950 were based on interstate projects divided on State lines. The 1950 report also shows totals, by size of project, for 30 States based on interstate projects not divided on State lines.

⁸In 1960, for Delaware, the area within each county
