SIZE OF FARM, FOR THE UNITED STATES: CENSUSES OF 1935 TO 1959

Acreage for 1959, for divisions and States, in Table 12; farms reporting for States in Parts 1 to 50 of Volume I

Table with columns: Acres—Continued (1939, 1934), Farms reporting as a percent of all farms in each size group (1959-1934), Percent of all land in farms in each size group (1959-1934), and Percent distribution of acres by size of farm (1959-1934). Rows are categorized by cropland use (harvested, used only for pasture, not harvested and not pastured) and woodland use (pastured, not pastured), with a final 'Other pasture' category. Values range from 0.1 to 100.0, with many 'NA' entries.

² Data for Alaska and Hawaii not included for 1954, 1944, and 1934.

³ Data for Alaska and Hawaii not included except for 1959 and 1949. Cropland used only for pasture, cropland not harvested and not pastured, and total cropland not fully comparable for the various Census years because of differences in definition of cropland pastured. For 1959, 1954, and 1949, the inquiry was for cropland used only for pasture; for 1944, land used only for pasture plowed within 7 years; and for 1934 to 1939, for plowable pasture.

⁴ Data for Alaska and Hawaii not included except 1959 and 1949.

⁵ Irrigation data are not strictly comparable. The 1954 data excluded irrigated cropland not harvested or pastured for 20 States and irrigated pasture for 2 States; the 1939 data are for irrigated cropland harvested and irrigated pasture; the 1934 data are for irrigated cropland harvested.
