## TABLE 26. Percent of Farms Enumerated, by Week of Enumeration: 1964 and 1959

[Census starting date November 23, 1964; October 28 and November 18, 1959]

| Week of enumeration  | Percent of farms<br>enumerated by<br>week of<br>enumeration | Week of enumeration  | Percent of farms<br>enumerated by<br>week of<br>enumeration |  |
|--|---|--|---|--|
| 1964   |   | 1959   |   |  |
| Average date of enumeration  | December 16   | Average date of enumeration  | December 6  |  |
| Farms enumerated during week of: November 1 to 7. November 8 to 14. November 15 to 21. November 22 to 28. November 29 to December 5. December 6 to 12. December 13 to 19. December 13 to 19. December 20 to 26. December 27 to January 2. January 3 to 9. January 10 to 16. January 17 or later. | 11 18 16 13 9 9 5 5 5                                       | Farms enumerated during week of:     October 1 to 10.     October 11 to 17.     October 18 to 24.     October 25 to 31.     November 1 to 7.     November 8 to 14.     November 15 to 21.     November 15 to 21.     November 20 to 20.     November 20 to December 5.     December 13 to 19.     December 13 to 19.     December 20 or later. | (1)<br>(1)<br>(1)<br>1<br>2<br>6<br>7<br>19<br>19<br>18     |  |

Less than 0.5 percent.

## TABLE 27. Sampling Reliability for Estimated Totals for Items Estimated on Basis of Reports for a Sample of Farms, by Number of Farms, by Levels: 1964

|                                    |  | <del>-</del> |         |         |  | i <b>.</b>           |         |         |         |
|------------------------------------|--|--------------|---------|---------|--|----------------------|---------|---------|---------|
| If number of farms<br>for item is— | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than— |              |         |         | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than— |                      |         |         |         |
|                                    | Level 11   | Level 2      | Level 3 | Level 4 |  | Level l <sup>1</sup> | Level 2 | Level 3 | Level 4 |
|                                    | Percent  | Percent      | Percent | Percent |  | Percent              | Percent | Percent | Percent |
| 25                                 | 40   | 53           | 71      | 96      | 1,000  | 6,3                  | 8.4     | 17.     | 15      |
| 50                                 | 28   | 37           | 50      | 68      | 2,500  | 4.0                  | 5.3     | 7.1     | 9.6     |
| 100                                | 20   | 26           | 35      | 48      | 5,000  | 2.8                  | 3.7     | 5,0     | 6.8     |
| 250                                | 13   | 17           | 22      | 30      | 10,000   | 2.0                  | 2.6     | 3.5     | 4,8     |
| 500                                | 8.9  | 12           | 16      | 21      | 25,000   | 1.3                  | 1.7     | 2.2     | 3,0     |

<sup>&</sup>lt;sup>1</sup>Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting.
