NA Not available.

Z Less than 0.05 percent.

<sup>1</sup>Data for the United States except Alaska for 1964, 1959, 1954, and 1949, and for Alaska for 1964 and 1959, are for acreage harvested for sale only; for other years, data are for all acreage harvested, comparable data for farms reporting and value only for Alaska in 1909.

<sup>2</sup>Values available for Alaska and Hawaii for 1964, 1959, 1919, 1909, and 1899, and Hawaii only for 1949.

<sup>3</sup>Where acres of cropland harvested are not available, percentages are based on the total acres of crops for which figures are available.

<sup>4</sup>Totals for States for which data are available. Data not fully comparable with other years.

<sup>5</sup>Loganberries included with raspberries in 1909 and 1899.

<sup>6</sup>Total of tame blueberries and wild blueberries for specified States. For 1964, 1959, and 1954, figures include wild blueberries for New England States only. For 1929, data for some States appear to include wild blueberries though enumerators were instructed to omit such acreages.

<sup>7</sup>Sum of farms reporting wild blueberries and tame blueberries. Data for 1940 indicate little duplication, by making this summation.

<sup>8</sup>Includes minor acreage in 18 States enumerated as "blueberries." Instructions provided for exclusion of wild berries in these States.

<sup>9</sup>Mainly gooseberries.
