table 26. Percent of Farms Enumerated, by Week of Enumeration: 1964 and 1959
[Census starting date November 9 and November 23, 1964; October 7 and November 18, 1959].

## table 27. Sampling Reliability for Estimated Totals for Items Estimated on Basis of Reports for a Sample of Farms, by Number of Farms, by Levels: 1964

| If number of farms for item 1s- | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than- |  |  |  | If number of farms for item is- | Then the chances are 2 out of 3 that the eatimate based on reports for a sample of farme would differ from the total obtained from reporta obtained by the enumeration and tabulation of reports for all farms by leas than- |  |  |  |
