table 26. Percent of Farms Enumerated, by Week of Enumeration: 1964 and 1959
[Census starting date November 16, 1964, and November 11, 1959]

| Week or enumeration | Percent of rarms enumerated by week of enumeration | Week of enumeration | Percent of farms enumerated by week of enumeration |
| :---: | :---: | :---: | :---: |
| 1964 | November 30 | 1959 |  |
| Average ante of enumeration, |  | Average date of enumeration. | November $24 \times 1$ |
| Fayms enunerated during week of: |  | Farms enumerated during week of: |  |
|  |  | October 11 to 17.................. |  |
| Hovember 15 to 21.... |  | October 18 to 24.... |  |
| November 22 to $28 .$. |  | October 25 to 31... |  |
| Hoverber 29 to Decemiber 5. |  | November 1 to $7 .$. |  |
| Secember 6 to $12 . .$. |  | November 8 to 14.... |  |
| December 13 to $19 \ldots$ December 20 to $26 \ldots$ |  | November 15 to $21 . \ldots \ldots$. Novenber 22 to $28 . \ldots$ |  |
| December 27 to January 2. |  | November 29 to Jecember 5 . |  |
| January 3 to $9 .$. |  | December 6 to 12. |  |
| Jenuary 10 to $16 .$. |  | December 13 to 19. |  |
| January 17 or later. |  | December 20 or late |  |

${ }^{1}$ Less then 0.5 percent.

## TABLE 27. Sampling Reliability for Estimated Totals for Items Estimated on Basis of Reports for a Sample of Farms, by Number of Farms, by Levels: 1964

| If number of faxms for itell is- | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less then- |  |  |  | If number of farzos for iter is- | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than- |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Level $1^{1}$ | Level 2 | Level 3 | Level 4 |  | Level $1^{2}$ | Level 2 | Level 3 | Level 4 |
|  | Percent | Percent | Percent | Percent |  | Percent | Percent | Percent | Percent |
| 25. | 40 | 53 | 71 | 96 | 1,000......................... | 6.3 | 8.4 | 11 | 15 |
| 50. | 28 | 37 | 50 | 68 | 2,500. | 4.0 | 5.3 | 7.1 | 9.6 |
| 100. | 20 | 26 | 35 | 48 | 5,000......................... | 2.8 | 3.7 | 5.0 | 6.8 |
| 250...................... | 13 | 17 | 22 | 30 | 10,000........................ . | 2.0 | 2.6 | 3.5 | 4.8 |
| 500............... | 8.9 | 12 | 16 | 21 | 25,000.................... | 1.3 | 1.7 | 2.2 | 3.0 |

[^0]
[^0]:    ${ }^{1}$ Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting,
