¹There were 22,713 enumerators. Some enumerators handled more than one enumerator assignment (EA).

²Included with Massachusetts.

³Included with New Hampshire.

⁴Number of crew leaders for Illinois includes 5 used in test counties.

⁵Number of crew leaders for Indiana includes 5 used in test counties.

⁶Included with New Jersey.

⁷Included in Seattle AFA.

Training of Personnel

The training of field personnel was accomplished at the following five levels:

1. Regional supervisors
2. Regional assistants
3. Agriculture field assistants (AFA's)
4. Crew leaders
5. Enumerators

The basic item of training, common to all five groups, was the enumerator self-study package. This package was designed to supply all the concepts and procedural instructions required for the conduct of the enumeration. From 12 to 16 hours were required to complete the self-study course and to take a test. The self-study approach to training at all levels was an innovation in major census training.

Nearly 2 calendar years and about 8 man-years were spent in developing the field training materials, including the following:

Record Book (form A9): The Record Book contained the A2 listing form for every dwelling
