table 26. Percent of Farms Enumerated, by Week of Enumeration: 1964 and 1959
[Census starting date November 9, 1964, and October 7, 1959]

| Week of enuneration | Percent of farms enumerated by week of enumeration | Week of enumeration | Percent of farms enumerated by week or enumeration |
| :---: | :---: | :---: | :---: |
| 1964 |  | 1959 |  |
| Average date of enumeration... | November 22 | Average date or enumeration. | October 23 |
| Farms enumerated during week of: |  | Farms enumerated during week of: |  |
| November 1 to 7... | 5 | October 1 to 10...................................................... | 14 |
| Noverber 8 to 14.. | 21 | October 11 to 17. | 22 |
| November 15 to 21. | 24 | October 18 to 24. | 24 |
| November 22 to 28.. | 18 | Cotober 25 to 31............................ . . . . . . . . . . . . . . . . . . . | 20 |
| November 29 to December 5. | 16 |  | 12 |
| December 6 to 12.... | 9 | November 8 to 14.. | 6 |
| December 13 to 19.... | 3 |  | (1) ${ }^{2}$ |
| December 27 to January 2. | 1 | November 29 to December 5. | ( ${ }^{1}$ |
| January 3 to $9 . .$. | $\left({ }^{1}\right)$ | December 6 to 12. |  |
| January 10 to 16..... | $\left.{ }^{1}\right)$ |  | (2) |
| January 17 or later.. | 2 | Decernber 20 or later............................................. | ( ${ }^{\text {) }}$ |

${ }^{1}$ Less than 0.5 percent.

## table 27. Sampling Reliability for Estimated Totals for Items Estimated on Basis of Reports for a Sample of Farms, by Number of Farms, by Levels: 1964

| If number of farms for item is - | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than- |  |  |  | If number of rarms for item is- | Then the chances are 2 out of 3 that the estimate based on reports for a sample of farms would differ from the total obtained from reports obtained by the enumeration and tabulation of reports for all farms by less than- |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Level $1^{1}$ | Level 2 | Level 3 | Level 4 |  | Level $1^{1}$ | Level 2 | Level 3 | Level 4 |
|  | Percent | Percent | Percent | Percent |  | Percent | Percent | Percent | Percent |
| 25.............................. | 40 | 53 | 71 | 96 | 1,000........................ | 6.3 | 8.4 | 11 | 15 |
| 50........................... | 28 | 37 | 50 | 68 | 2,500........................ | 4.0 | 5.3 | 7.1 | 9.6 |
| 100............................ | 20 | 26 | 35 | 48 | 5,000......................... | 2.8 | 3.7 | 5.0 | 6.8 |
| 250............................ | 13 | 17 | 22 | 30 | 10,000............... . . . . . . . | 2.0 | 2.6 | 3.5 | 4.8 |
| 500............................. | 8.9 | 12 | 16 | 21 | 25,000....................... | 1.3 | 1.7 | 2.2 | 3.0 |

[^0]
[^0]:    ${ }^{1}$ Level 1 should be used in determining the sampling rellability of estimated number of farms and farms reporting.
