<sup>2</sup>Data for Hawaii crops only; and includes both acres harvested and acres not harvested.

and liquid fertilizers used for some of the major crops on class 1-5 farms.

Of the 1.2 million class 1-5 farms reporting the use of dry fertilizer, 1.1 million or 94 percent used less than 50 tons in 1969. In comparison for liquid fertilizer, 287 thousand of the 426 thousand farms reporting or 67 percent used less than 50

Table 7. Tons of Dry and Liquid Fertilizer Used for Selected Crops: 1969

	Tons of fertilizer			Percent distribution	
	Total	Dry	Liquid	Dry	Liquid
Total.....	22,018,416	16,886,104	5,132,312	76.7	23.3
Cropland pasture.....	1,734,660	1,601,059	133,601	92.3	7.7
Improved pasture.....	983,421	919,154	64,267	93.5	6.5
Corn for all purposes.....	9,558,348	6,573,523	2,984,825	68.8	31.2
Sorghums for all purposes.....	1,061,694	524,592	537,102	49.4	50.6
Wheat.....	1,893,560	1,453,273	440,287	76.8	23.3
Oats.....	675,185	629,313	45,872	93.2	6.8
Barley.....	456,567	356,762	99,805	78.1	21.9
Rice.....	418,696	392,377	26,319	93.7	6.3
Soybeans for beans.....	1,103,715	1,014,552	89,163	91.9	8.1
Cotton.....	1,551,625	1,096,838	454,787	70.7	29.3
Vegetables.....	1,223,264	1,049,525	173,739	85.8	14.2
Land in orchards.....	1,257,681	1,275,136	82,545	93.9	6.1

tons. Table 8 shows the distribution of farms reporting dry and liquid fertilizer on class 1-5 farms.

Table 8. Farms Reporting Use of Dry and Liquid Fertilizer by Amount Used: 1969

	Farms reporting		Percent distribution	
	Dry fertilizer	Liquid fertilizer	Dry	Liquid
Total.....	1,209,250	425,709	100.0	100.0
1 to 49 tons.....	1,134,815	286,893	93.8	67.4
50 to 99 tons.....	50,619	119,971	4.2	28.2
100 to 199 tons.....	16,948	13,040	1.4	3.1
200 to 499 tons.....	5,612	4,333	.5	1.0
500 to 999 tons.....	812	1,228	.1	.3
1,000 tons and over.....	444	244	( <sup>1</sup> )	.1

<sup>1</sup>Less than .05 percent.

Data by class of farm show that the larger and more productive farms fertilize a higher proportion of the crops harvested than less productive farms. The more productive farms also applied a higher rate of fertilizer per acre than did the farms with less sales. A similar pattern can be found in the average yield per acre for most crops among the various classes of farms. (See table 9.)
