REPORTS OF THE 1969 CENSUS OF AGRICULTURE

Individual County Reports

These eight-page reports are issued for each county and State. They also appear as section 2 of volume I for the State to which they pertain. The tables contain totals for farms, land, production, expenses, income and sales, machinery and equipment, livestock, crops, and nursery, greenhouse, and forest products.

Volume I. Area Reports

A separate report is published for each State, American Samoa, Guam, Puerto Rico, Trust Territory, and the Virgin Islands. The report consists of two sections. Section 1 contains the introduction, State summary data, county summary of selected data, miscellaneous items by counties (crops or livestock appearing in relatively few counties and therefore not listed in the county tables on a nationwide basis), and an appendix giving explanations, definitions, and examples of the report forms used. Section 2 contains the detailed county reports.

Volume II. General Report

Statistics by subject will be presented, with totals for the United States, Regions, and States.

Volume III. Agricultural Services

This is a new report which will contain data relating to agricultural services.

Volume IV. Irrigation

Data will be included on drainage basins, land irrigated, crop production on irrigated land, water conveyed, users, and types of organization.

Volume V. Special Reports

Reports will be based on data obtained from supplemental surveys, such as type of farm, horticulture, and farm finance; and other subjects based on information obtained in the census.

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1969 Census of Agriculture. Primary direction of the program was performed by J. Thomas Breen, Chief, Agriculture Division, with the helpful guidance and review of Conrad Taeuber, Associate Director for Demographic Fields. Kenneth R. Norell, Assistant Chief for Special Surveys, Agriculture Division, participated in the overall planning and supervised the preparation of instructions for office processing, training materials, the development of enumeration procedures and the technical review of statistics prior to their publication. Hector Vila, Chief of Outlying Areas Statistical Branch, made significant contributions to the planning and in the preparation of instructions and training materials for the enumeration and in the handling of technical problems in connection with office processing.

Theodore G. Clemence, under the 1970 Census coordinator's staff, worked in the general planning program.

The census data were collected at the direction of the Governor of Guam, Honorable Carlos García Camacho. The actual collection of the data was carried out by census enumerators under the direct responsibility of Frank R. Blass, Director of Commerce, assisted by his Deputy Director, José D. Diego, as census coordinator and Joseph F. Flores, Chief of Census Supervision.

The manual processing of the questionnaires was performed in the Agriculture Division and Systems Division, Bureau of the Census, Washington, D.C.

Introduction

History of the Census

The 1970 Census of Agriculture is the seventh U.S. census of agriculture of Guam. The first census of Agriculture was taken in 1920, in conjunction with the population census. From 1930 to 1960, a census of agriculture was taken in Guam every 10 years, at the same time as the population census. The 1964 Census of Agriculture was the first quinquennial (5 year) census to be taken in Guam. The 1970 Census of Agriculture for Guam was enumerated in conjunction with the 1970 Population Census.

Authority and Area Covered

The Census of Agriculture is authorized by an Act of Congress, "Title 13, United States Code—Census", codified August 31, 1954, as amended. Section 191 provides that the census data for Guam may be collected by the Governor, or highest ranking Federal official, in accordance with plans prescribed or approved by the Secretary of the U.S. Department of Commerce. This census covers agriculture in each of the 50 States, and in Guam, American Samoa, Puerto Rico, U.S. Trust Territory of the Pacific Islands, and the Virgin Islands.

The Agriculture Questionnaire

The questionnaire for the 1970 Census of Agriculture was prepared by the staff of the Census Bureau with the cooperation of the Department of Agriculture of Guam. It contained a total of 71 inquiries, most of which consisted of several parts. Selection of the inquiries was based on current needs for agricultural information as well as on experience gained in earlier censuses.

In most respects, the questionnaire for the 1970 Census of Agriculture was closely comparable with the one used in 1964. Only two new sections were added for 1970, one for workpower and the other for operator characteristics.

Definitions and explanations for selected items are given in appendix A. A facsimile of the 1970 questionnaire is shown in appendix B.

Training Program for Enumeration Personnel

Each supervisor, assistant supervisor, and enumerator employed for the 1970 Census of Population and Housing and the 1970 Census of Agriculture in Guam received special training for his job. All training was presented according to procedures prepared by the Bureau of the Census. It included practice interviewing, practice filling of questionnaires, and detailed discussion of the instructions given to enumerators.

Enumeration Period

The enumeration for the census of agriculture was scheduled to begin on April 1, 1970, at the same time and in conjunction with the enumeration for the census of population and housing; however, due to a delay in the starting of the census in Guam most of the agriculture census forms were not completed until the end of May.

Dates to Which Data Relate

The 1970 census figures for land in farms, fruit and nut trees, and livestock and poultry on hand represent the situation existing at the time of enumeration of each individual farm. Data for hectares and production of crops relate to the crops harvested during the crop year 1969. Data for sales relate to calendar year 1969.

The Enumeration

The schedule which enumerators used for taking the 1970 Census of Population and Housing in Guam contained a section at the end where the enumerator was to determine if an agricultural form should also be filled out. Three questions were in this section and a "yes" answer to any one of them meant an agricultural form must be filled out. The three questions were—

Is this house on a farm?

Were any crops or vegetables harvested from this place in 1969; or is there now a combined total of 10 or more fruit and nut trees on this place?

Does this place have any livestock or five or more poultry?

The enumerator was also instructed to ask enough questions about tracts of land on which no one lived to determine whether an agriculture questionnaire was required for the person in charge of the land. This instruction was designed to assure enumeration of all land used for agriculture, whether operated by an individual, a partnership, a corporation, or an institution.

Enumeration Districts

For purposes of enumeration, Guam was divided into Enumeration Districts, or "ED's". The ED's were clearly outlined on special maps prepared for the census. Each enumerator was required to canvas the entire area within his assigned ED.

To avoid enumeration of the same place by two or more enumerators, the Census Bureau established rules whereby each enumerator could determine whether or not he was responsible for obtaining the agriculture questionnaire for a given place. If a place was entirely within the boundaries of one ED, the enumerator for the ED was required to obtain the questionnaire, regardless of where the person in charge of the operation lived. If a place was partly in one ED and partly in another, the enumerator for the ED in which the person in charge lived was responsible for obtaining the questionnaire. In such case, he was to report on the questionnaire all the land that the person in charge operated in Guam, including the land outside his ED.

Census Definition of a Farm

The statistics presented in this report relate to places qualifying as census farms. For the 1970 Census of Agriculture in Guam, a farm was defined as any "place" on which any crops or vegetables were harvested or gathered during 1969, or on which there was a combined total of 10 or more fruit or nut trees or plants, or any livestock, or five or more poultry at the time of enumeration.

For the 1964 Census of Agriculture, a farm was defined as any "place" on which any crops, vegetables, fruits, or nuts, were grown and harvested or gathered during the year November 1, 1963, to October 31, 1964; or on which any livestock, or five or more poultry were kept on or about November 1, 1964. The word "place" was defined to include all land under the control of one person or partnership, exclusive of land used by the U.S. Military Services. Control of the land may have been through ownership, management, lease or other rental agreement, permit or other government arrangement, or by occupation without permit.

Office Processing

Each enumerator's work was examined and checked for completeness by the Agriculture Division, Bureau of the Census, in Washington, D.C. All questionnaires were individually edited prior to tabulation of the data. In the editing process, questionnaires that did not represent farms, according to the census definition, were withdrawn from further processing. The remaining questionnaires were then examined for completeness and consistency. Errors in calculations and units of measure, incons-

sistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same questionnaire or on questionnaires for nearby farms of similar type and size.

After the questionnaires had been edited, the information on them was transferred to tabulation sheets. Subject matter specialists of the Bureau of the Census examined the tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further reappraisal of the original reports before approving the data for publication.

Presentation of Statistics

This report contains data as compiled from the questionnaires used for the 1970 Census of Agriculture in Guam. Totals are given for each election district and for Guam as a whole. Comparable figures for preceding census years are given for those items for which information is available.

Abbreviations and Symbols

The following abbreviations and symbols may occur in the tables:

- Zero
- X Not applicable
- NA Not available
- D Data withheld to avoid disclosing figures for an individual farm or farm operations.

APPENDIX A. Definitions and Explanations -----	A-1
APPENDIX B. Report Form -----	B-1

Appendix A. Definitions and Explanations

General Information

Descriptive summary and reference—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and instructions included on the questionnaire, see the facsimile of the 1970 agriculture questionnaire in appendix B.

Dates to which data relate—The years shown in the title of each table are for the year of the census enumeration. For the 1970 census and all previous censuses, the land in farms, fruit and nut trees, and livestock and poultry on hand represented the situation existing at the time of enumeration of each individual farm. The enumeration date for these censuses was April 1 of the census year, except for the census of 1964, which was taken in November-December of 1964. Data for hectares and production of crops related to the crops harvested during the crop year preceding the year of the census, except for the 1964 census which included the crop year 1964. Data for sales of chickens and chicken eggs relate to the calendar year preceding the year of the census, except for the 1964 census which refers to the 1964 year.

Farm operator—The term "farm operator" designates a person who operates a farm, either by doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a tenant or renter, the manager or the person in charge of an institutional farm. By definition, the number of farm operators is the same as the number of farms.

Farms reporting or operators reporting—Figures for "farms reporting" represent the number of farms for which the specified item was reported. For example, if there were 150 farms in an election district and only 130 of them reported chickens on hand, the number of farms reporting chickens would be 130. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Where applicable, figures are given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, years on farm.

Land and Land Use

Land in farms—All data relating to land tenure and to land in farms refer only to land located in Guam and operated on

enumeration day. The land to be included in each farm was determined from the answers to questions 2 through 8 of the agriculture questionnaire. (See the facsimile of the questionnaire in appendix B.) The amounts of land reported as owned, rented from others, used under permit, occupied without permit, and furnished by the government were first added together and then the amount of land reported as rented to others was subtracted. The results of these computations represented the land in the farms. Although the area designated "land in farms" consists primarily of "agricultural" land—that is, land used for crops, pasture, or grazing—it also includes areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire area of woodland and wasteland that farm operators owned or rented from others was included as land in farms, unless reports indicated it was being held for nonagricultural purposes.

Land owned—This item includes all land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration. However, the reports for land owned excluded all land used by the U.S. Military Services.

Land rented from others—This item includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free.

Land rented to others—This item includes all land that the operator rented or leased to others and all land that he assigned to others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. For land leased, rented, or worked on shares, the tenant is considered to be the operator even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants.

Land used under permit—Rights to use land owned or controlled by the Government of Guam are in the form of permits rather than lease or rental arrangements. Accordingly, this item included all land for which the operator had a Government of Guam permit.

Land occupied without permit—This item includes all land that the operator occupied as a "borrower" or "nonpermittee," without any ownership rights to the land, or without any kind of permit, lease, or rental agreement.

Land furnished with living quarters—This item includes all land that the Government of Guam furnished to the operator in connection with his living quarters.

Land in farms according to use—Land in farms on enumeration day, has been distributed according to the way in which it was being used on enumeration day. The land uses described in the following paragraphs are mutually exclusive in that each hectare of land is included only once even though it may have had more than one use during the year.

Land in crops refers to all land planted in crops at the time of enumeration. Land was to be reported only once even if two or more crops were planted on the same land. It includes (1) land in bearing and nonbearing fruit and nut trees or plants or any other tree crops; (2) land that had partial, but not total, crop failure; and (3) land in home gardens.

Cropland used for pasture includes all cropland in the place that was used only for pasture at the time of enumeration. Land planted in crops, even though the crops were not to be harvested, were not to be included here.

Cropland not used for pasture refers to all cropland in the place not being used for crops nor for pasture at the time of enumeration. It does not include land so hilly, rocky, or wet that the cost of improving it for cultivation would be more than the operator would pay. Nor does it include any land in roads, streams or swamps. It does include land with total crop failure due to flood, drought, insects, fire, or other causes; cropland lying idle; and cropland with soil improvement grass, cover crops, etc., for the purpose of improvement.

Pastureland used for pasture or grazing includes all land used for grazing of livestock at the time of the enumeration. It does not include any cropland even though cattle or other livestock may have been grazed on it.

Pastureland not used for pasture or grazing refers to all land suitable for pasture or grazing that was not being utilized for the grazing of livestock at the time of enumeration. Includes land that, in the opinion of the operator, could support enough plant growth—either native or planted—for grazing provided the clearing and grazing of the land would not seriously damage it.

Other land—Includes all land that does not qualify either as cropland or pastureland as defined above. It includes land in house lots, barn lots, ponds, ditches, swamps, steep slopes, roads, brushland, wasteland, and forest areas.

Holdings

Type of holding—The purpose of the items under this heading was to classify holdings according to whether their production was mainly for home consumption or mainly for sale; and then, to classify the holdings belonging to the latter category by the most important types of agricultural production.

The first classification is based on the destination of the agricultural output of the holding during the year in question. Agricultural output refers to that which is left over after rent has been paid to the landlord and/or that which remains after deduction of the produce used on the holdings for further agricultural production, for example, forage or seed.

Holding with production mainly for home consumption—This applies to holdings which produce mainly for home consumption. By "mainly" is meant that 50 percent or more of the agricultural output of the holding is consumed by the holder's household.

Holding with production mainly for sale—This applies to holdings where more than 50 percent of the agricultural output of the holding is produced for sale. Holdings which produce mainly for sale were classified further according to the most important activity of the holding.

- a. **Crop holding**—More than 50 percent of the value of the sales of the holding was from the sale of crops.
- b. **Livestock and/or poultry holding**—More than 50 percent of the value of the sales of the holding was from the sale of livestock, livestock products, poultry, or poultry products.
- c. **Mixed holding**—No one of the above items accounts for more than 50 percent of the value of sales of the holding.
- d. **Other**—This group includes holdings not belonging to any of the previous groups.

Crops

Crops harvested—The 1970 agriculture questionnaire contained individual inquiries for crops commonly grown. Space was also provided for the reporting of any additional crops that were harvested during 1969.

Field crops and vegetables—The total quantity of each field crop and vegetables harvested during 1969 was always to be reported even in cases where the area harvested amounted to less than 10 ares.

In cases where two or more crops, or two or more plantings of the same crop were harvested from the same land during the year, the area was to be reported for each separate crop or planting.

Fruits and nuts—For fruits grown on farms, information was obtained for the total quantity harvested during the year, and also for the number of trees or plants, both bearing and nonbearing, that were on the place on enumeration day. For breadfruit, betel-nuts, coconuts, guavas, soursops, starfruits, anonas, and other wild or cultivated fruits, nuts, or crops, the reported data represent total quantities harvested or gathered during the year by all members of the operator's household, both from land in the farm, and from other land.

Unit of measure—On both the 1970 and 1964 questionnaires, all quantities harvested were to be reported in pounds.

Livestock and Poultry

Inventories—Data for livestock and poultry relate to the number on hand at the time of enumeration. All livestock and poultry were to be enumerated on the place where they were at the time of the enumeration regardless of who owned them.

Cattle and calves—"Milk cows" were defined as cows that had been milked at any time during the preceding 12 months. All other cows were to be included in the report for "Other cattle and calves."

Sales of chickens and chicken eggs—Data on sales of chickens of all ages and of chicken eggs were obtained for the first time in the 1964 census. Consequently, comparable data for earlier years are not available. Only the quantities of these products sold were to be reported. No questions were asked about the value of the sales.

Workpower

Source and ownership of horsepower—Sources of horsepower refers to those sources used only for agricultural activities on the place in 1969, whether or not the animal or mechanical power used belonged to the operator.

Operator Characteristics

Residence of operator—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Year began operating present farm—Enumerators were instructed to report the year during which a farm operator began to operate his present farm. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it.

Work off farm—Data for work off farm were collected for 1964 and 1969. Off farm work was enumerated to provide information on the extent of part-time farming in Guam. Farm operators reporting off-farm work in 1969 varied from those who worked full time for the military installations to those who supplement their income with odd or sparetetime jobs.

Only work for pay by the farm operator was to be reported. Days worked off the place were to include work at a job such as clerk, salesman, laborer, or truck driver; at a nonfarm business such as operating a store or repair shop; or at a profession such as doctor, lawyer, or teacher. Exchange work was not to be reported.

CLASSIFICATION OF FARMS

This report presents detailed data for farms classified by size of farm and tenure of farm operator.

Farms by size—Farms were classified by size on the basis of the total land area established for each farm. According to the census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In case of share-tenants, the land assigned to each share-tenant is considered a separate farm, even though the landlord may consider his entire landholding to be one unit, rather than several separate units.

Farms by tenure of operator—Farms were classified by tenure of operator on the basis of information reported for land owned, rented from others, used by government permit, occupied without any permit (nonpermittee), or land furnished by the Government of Guam in connection with the operator's living quarters. During the processing operations, each questionnaire was coded to indicate whether the farm operator was a full owner, part owner, tenant, permittee, nonpermittee, or "other" operator. The various classifications of tenure are defined:

- a. *Full owners* operate only land they own or land they own plus land they operate under a permit, without a permit, or use in connection with their living quarters furnished by the Government of Guam.
- b. *Part owners* operate land they own plus land they rent from others. They also may operate land under a permit, without a permit, or have land furnished by the Government of Guam in connection with their living quarters.
- c. *Tenants* operate only land they rent from others, plus any land they may have under permit, occupy without a permit, or use land furnished by the Government of Guam in connection with their living quarters.
- d. *Permittees* have a land permit from the Government of Guam for all the land they operate, or they may have a permit for some of the land and occupy the remainder of the land without a permit.
- e. *Nonpermittees* "borrow" all the land they operate, and have no rental agreement with the owner. They neither own nor rent any land; they do not occupy any land by permit nor use any land under any arrangement with the Government of Guam.
- f. *"Others"* are operators who did not qualify for any of the foregoing groups. All the land they operate has been furnished by the Government of Guam in connection with their living quarters; or part of the land operated was occupied without a permit; or part was furnished by the Government of Guam in connection with their living quarters.

Report Form

Budget Bureau No. 41-S69059; Approval Expires December 1970

FORM 69-A1 (G) <small>(10-6-69)</small>	U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS	Response to this inquiry is required by law (Title 13, U.S. Code). By the same law your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes.
CENSUS OF AGRICULTURE - 1970 GUAM		
		Questionnaire number →

Fill this questionnaire if any member of the household harvested (or gathered) any crops or vegetables during 1969, or now has 10 or more fruit or nut trees or plants, or any livestock or 5 or more poultry.

Section 1 – OPERATOR

1. What is your name (the operator)? . . .	Full name Address
2. What is your mailing address? . . . <small>(Give the address where the operator receives correspondence)</small>	

Section 2 – LAND IN AGRICULTURE

3. How many hectares do you own? . . .	<input type="checkbox"/> None	Hectares	Acres
4. How many hectares do you rent from others? . . .	<input type="checkbox"/>		
5. For how many hectares do you have a government land permit? . . .	<input type="checkbox"/>		
6. How many hectares do you occupy without a land permit? . . .	<input type="checkbox"/>		
7. How many hectares are furnished to you in connection with your living quarters by the government? . . .	<input type="checkbox"/>		
8. How many hectares do you rent to others? — Do not include land used by U.S. military services. . . .	<input type="checkbox"/>		
9. TOTAL AREA IN THIS PLACE (<i>To obtain the total area of this place, add questions 3, 4, 5, 6, and 7. Subtract from this total the entry in question 8.</i>)	<input type="checkbox"/>		
		Number of pieces	
10. How many separate tracts or pieces of land or plantations are represented in the "Total area in this place?" . . .	<input type="checkbox"/>		
11. Is this holding producing mainly for — (Mark one)	a. <input type="checkbox"/> Home consumption? — (Go to Section 3) b. <input type="checkbox"/> Sale?		
12. If producing mainly for sale, is it a — (Mark one)	a. <input type="checkbox"/> Crop holding? c. <input type="checkbox"/> Mixed holding? b. <input type="checkbox"/> Livestock and/or poultry holding? d. <input type="checkbox"/> Other?		

Section 3 – CROPS HARVESTED IN 1969

VEGETABLES AND FIELD CROPS <i>Were any of these crops harvested last year?</i>	<input type="checkbox"/> None	How much was harvested in 1969?	How many hectares were harvested in 1969?
		Pounds	Hectares
13. Taro. . . .	<input type="checkbox"/>		
14. Yams	<input type="checkbox"/>		
15. Sweet potatoes. . . .	<input type="checkbox"/>		
16. Cassava. . . .	<input type="checkbox"/>		
17. Radishes. . . .	<input type="checkbox"/>		
18. Tomatoes. . . .	<input type="checkbox"/>		
19. Chinese cabbage. . . .	<input type="checkbox"/>		
20. Green beans. . . .	<input type="checkbox"/>		
21. Green onions	<input type="checkbox"/>		
22. Corn. . . .	<input type="checkbox"/>		
23. Cucumbers. . . .	<input type="checkbox"/>		
24. Eggplant. . . .	<input type="checkbox"/>		
25. Peppers	<input type="checkbox"/>		
26. Pumpkins and squash. . . .	<input type="checkbox"/>		
27. Watermelons, cantaloupes, muskmelons, and pepinos	<input type="checkbox"/>		
28. Other crops — Specify →	<input type="checkbox"/>		

Report Form—Continued

Section 3 – CROPS HARVESTED IN 1969 – Continued			
▶ FRUITS AND NUTS <i>(Quantity harvested in 1969 and number of trees or plants on the enumeration day.)</i> Were any of the following fruits or nuts harvested or gathered by you or your family from this place and from any other land?	None	How much was harvested in 1969?	How many trees or plants (all ages) are on this place?
		Pounds	Number
29. Avocados	<input type="checkbox"/>		
30. Bananas	<input type="checkbox"/>	Hills	
31. Grapefruit	<input type="checkbox"/>		
32. Oranges	<input type="checkbox"/>		
33. Tangerines	<input type="checkbox"/>		
34. Lemon and limes	<input type="checkbox"/>		
35. Mangos	<input type="checkbox"/>		
36. Papayas	<input type="checkbox"/>		
37. Pineapples	<input type="checkbox"/>		
38. Breadfruit	<input type="checkbox"/>		
39. Coconuts	<input type="checkbox"/>		
40. Betelnuts	<input type="checkbox"/>		
41. Starfruit	<input type="checkbox"/>		
42. Gado and other wild root crops	<input type="checkbox"/>		
43. Guavas	<input type="checkbox"/>		
44. Soursops	<input type="checkbox"/>		
45. Other fruits (anonas, etc.) – <i>Specify</i> → _____	<input type="checkbox"/>		
	<input type="checkbox"/>		
Section 4 – LAND USE			
Of the total hectares in this place (question 9) –		None	Hectares
			Ares
46. How many hectares of land are in crops?	<input type="checkbox"/>		
47. How much cropland is used for pasture?	<input type="checkbox"/>		
48. How much cropland is not used for pasture?	<input type="checkbox"/>		
49. How much pastureland is used for pasture or grazing?	<input type="checkbox"/>		
50. How much pastureland is not used for pasture or grazing?	<input type="checkbox"/>		
51. How many hectares are in other land?	<input type="checkbox"/>		
52. TOTAL LAND <i>(Add entries in questions 46 through 51. This total should be equal to the entry in question 9.)</i> → _____	<input type="checkbox"/>		
Section 5 – LIVESTOCK AND POULTRY			
How many of the following livestock and poultry are on this place on enumeration day?		None	Number
53. Carabaos of all ages	<input type="checkbox"/>		
54. Cattle and calves of all ages	<input type="checkbox"/>		
55. Of this total, how many are –	None	Number	
a. Milk cows?		<input type="checkbox"/>	
b. All other cattle and calves? <i>(The sum of questions "a" and "b" must equal the total for question 54.)</i>	<input type="checkbox"/>		
56. Hogs and pigs of all ages	<input type="checkbox"/>		
57. Goats and kids of all ages	<input type="checkbox"/>		
58. Horses and colts of all ages	<input type="checkbox"/>		
59. Chickens 4 months old and over	<input type="checkbox"/>		
60. Other poultry of all ages (ducks, pigeons, guineas, geese, etc.) – <i>Specify</i> → _____	<input type="checkbox"/>
