

volume I, Area Reports, tables 28 and 29. In areas where there is a significant number of each type of farm, the State data are shown by value-of-sales class. Table 1 indicates the States with published type-of-farm data by class. A comparison of table 1 and table 16 shows areas that have farms of a specified type but not enough to justify publication of type of farm by value-of-sales class.

In 1969, additional counts by type of farm for all farms appear in volume I, Area Reports, table 9. Data presented in a similar format are also available in chapter 7 of this volume. In the

all-farm tables, classifications, by type, for farms with income less than \$2,500 are based on quantities of the various commodities rather than the reported value of sales used to classify farms with incomes above \$2,500.

Basis of Classification by Type

The classification by type of farms with income from agricultural products above \$2,500 was made on the basis of the relationship of the value of sales from one source to the total

Class 1-5 Farms

Table 1. Type of Farm Data Published by Economic Class: 1969

| | Cash-grain | Tobacco | Cotton | Other field-crop | Vegetable | Fruit and nut | Poultry | Dairy | Livestock other than poultry and dairy | Livestock ranches | General | Miscellaneous |
