General farms, primarily livestock (0191).....	.8	.8	1.1	.5	.3
All other farms.....	7.2	7.6	10.0	5.2	9.3

any duration during the census year; therefore, a seasonal worker can be included in the total more than one time if he or she worked on several farms during

the year. Hired labor expenditures as a proportion of total expenditures vary greatly by the standard industrial classification

Table 10. Petroleum Products Expenditures: 1974

Farms With Sales of \$2,500 and Over	Farms		Expenditures	
	Number (1,000)	Per cent	Total (million dollars)	Per cent
Total.....	1,654.2	100.0	2,974.9	100.0
Gasoline.....	1,564.6	94.6	1,538.0	51.7
Diesel.....	847.8	51.3	806.5	27.1

Motor oil, grease, etc.....	1,650.3	99.8	344.5	11.6

of a farm. Farms that predominately use hand labor to harvest crops account for the highest proportion of expenditures for hired labor. Fruit and tree nut farms and vegetable and melon farms reported spending 28 and 26 percent respectively of total production expenses on hired labor. Farms with the smallest proportion of total production expenditures for hired labor were livestock farms, except dairy, and poultry and egg farms. They reported spending only 3 and 4 percent, respectively, of total expenditures on hired labor.

As shown in table 12, for farms with sales of \$2,500 and over, those farms with sales of \$100,000 and over accounted for over 70 percent of the expenditure for labor. Farms with sales of under \$10,000 had 3 percent of the total.

Contract labor—Fewer farms reported contract labor than any other expenditure item. Less than 1 percent of all farm production costs were for contract labor. Farms reporting contract labor decreased from 139,000 in 1969 to 99,000 in 1974; however, expenditures in dollars rose from \$463 million to \$505 million. Contract labor in 1974 was concentrated at a higher level than in 1969. In 1974, nearly 16 percent of the farms reported contract labor in excess of \$5,000 per farm in comparison with only 11 percent in 1969. For farms with sales of \$2,500 and over, fruit and tree nut farms led all other standard industrial classifications with 23.9 percent of these farms having expenditures for contract labor. These farms accounted for one-third of the expenditure.
