P Published, UP Unpublished.

with the 1959 census, only farms with agricultural products sales of \$2,500 and over were classified by type. The same set of criteria was used for the 1959 through 1969 censuses. The classification

of farms with sales of \$2,500 and over in 1974 by SIC is only somewhat comparable with the type classification used in 1969, 1964, and 1959. Table 2 contrasts selected SIC classifications of 1974 farms

with the 1969, 1964, 1950, and earlier type classifications.

In some instances, 3-digit SIC industry group codes or 4-digit industry codes correspond directly to 1969 farm type.
