States accounted for about two-thirds of the total grain sales. Illinois had the largest value, accounting for about 12 percent of the total grain sold for the United States. For farms reporting sales of grain, the average value was \$24,187 per farm.

Of the over 1 million farms with sales of \$2,500 and over reporting grain sales in 1974, one-half reported grain sales of \$10,000 and over which represented over 90 percent of the total grain sales. The top 42,526 farms with grain sales of \$100,000 and over averaged sales of \$182,171 per farm and accounted for \$7.7 billion, almost one-third of the total grain sales (table 7).

Tobacco—The market value of tobacco sold from farms with sales of \$2,500 and

over in 1974 was \$1.7 billion and accounted for 4 percent of the total value of all crops sold, and 2 percent of all agricultural products sold from these farms. North Carolina had the largest value of tobacco sales; Kentucky was second. The combined value of tobacco sold from these two States was 63 percent of the value of all tobacco sold in the United States. For farms reporting sales of tobacco, the average value of sales was \$11,087 per farm.

Of the 150,665 farms with sales of \$2,500 and over reporting tobacco sold in 1974, almost one-half reported sales under \$5,000 and received less than 12 percent of the value of tobacco sold. In comparison, the 7,316 farms which sold \$40,000 and over had almost one-third of the tobacco sales (table 8).
