Census of Agriculture

AC87-A-55

Volume 1
GEOGRAPHIC AREA SERIES

Part 55

American Samoa

ACKNOWLEDGMENTS

This report was prepared in the Agriculture Division. Many divisions participated in the various activities: Decennial Planning coordinated the agriculture census data collection in conjunction with the 1990 Census of Population and Housing; Economic Programming prepared the computer programs and designed the computer system; Geography developed the field maps; Administrative and Publication Services provided the forms design, publication planning and design, editorial reviews, composition, and printing procurement. The census program was conducted under the direction of **John Faumuina, Jr.**, Deputy Director, Economic Development and Planning Office of the Government

of American Samoa, with the assistance of **Vaitoelau Filiga**, Chief Statistician, under a special agreement with the U.S. Census Bureau. Technical advice and oversight were provided by **Thomas L. Ondra**, Census Advisor, U.S. Bureau of the Census.

Representatives of the Government of American Samoa made significant recommendations which helped establish data content and provided valuable advice during the planning stages of the census.

Special tribute is paid to the many farm operators who furnished the information requested. Only through their cooperation was it possible to collect and publish the data in this report.

If there are any questions concerning the statistics in this report, call:

HISTORY

The 1990 Census of Agriculture for American Samoa is the eighth census to be taken by the U.S. Department of Commerce, Bureau of the Census. The first agriculture census was taken in 1920 as part of the decennial census of population and has continued every 10 years.

USES OF THE CENSUS

The census of agriculture is the recognized source of statistics about American Samoa's agricultural production and the only source of consistent, comparable data at the district level. Census statistics are used to measure agricultural production and to identify trends in an ever changing agricultural sector. Many local programs use census data as a benchmark for designing and evaluating surveys. Private industry uses census statistics to provide a more effective production and distribution system for the agricultural community.

AUTHORITY AND AREA COVERED

The census of agriculture is required by law under Title 13, United States Code, sections 142(a) and 191. The census of agriculture in American Samoa is conducted every 10 years in conjunction with the census of population and housing.

FARM DEFINITION

The statistics presented relate to places qualifying as census farms. Chapter 1 uses the new farm definition, developed by the Census Bureau and the Government of American Samoa, which defines a farm as any place from which \$100 or more of agricultural products were sold or normally would have been sold during the census year. Chapter 2 provides comparable 1990 data according to the

old farm definition used in previous censuses, which defined a farm as having a minimum number of livestock, poultry, fruit or nut trees, or any crops or vegetables harvested for sale.

COMPARABILITY OF DATA

Data comparability has been maintained in chapter 2 which contains the 1980 data along with the comparable 1990 data. Dollar figures shown for agricultural product sales only apply under the new farm definition in chapter 1.

TABULAR PRESENTATION

Island data—Chapter 1, tables 1 through 8 and chapter 2, tables 1 through 7 show detailed data for American Samoa. Chapter 1, tables 22 through 25 show 1990 data cross tabulated by tenure of operator, size of farm, age of operator, and value of agricultural products sold.

District and county data—Data for districts and counties are presented in chapter 1, tables 9 through 21 and in chapter 2, tables 8 through 18.

SPECIAL TABULATIONS

Custom designed tabulations are available to individual user specifications on a programming cost reimbursable basis. Inquiries about special tabulations should be directed to the Chief, Agriculture Division, Bureau of the Census, Washington, DC 20233.

CENSUS DISCLOSURE RULES

In keeping with the provisions of Title 13, United States Code, no data are published that would disclose the operations of an individual farm. However, the number of farms in a given size category or other classification, such as size of farm, is not considered a release of confidential information and is provided even though other information such as crop production, number of livestock, and sales is withheld.

INVENTORIES, PRODUCTION, AND SALES DATA

Inventories of livestock, poultry, and fruit and nut trees or plants are determined by the number on hand on the day of enumeration. Crop production and sales, as well as livestock sales, are for the calendar year.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual farms.

- (X) Not applicable.
- (Z) Less than half of the unit shown.
- (NA) Not available.
- sq ft Square feet.

DATA COLLECTION

Method of Enumeration

The census of agriculture was conducted by direct enumeration beginning in April 1990, in conjunction with the population and housing censuses. On the last page of the population and housing questionnaire was an agriculture screening section. The enumerator was required to complete an agriculture questionnaire when a "yes" answer was received to any one of the five screening questions.

Questionnaire

The questionnaire for the 1990 Census of Agriculture in American Samoa was prepared by the Agriculture Division, Bureau of the Census, in cooperation with the Government of American Samoa.

The content of the 1990 census questionnaire is similar to the 1980 questionnaire. Quantity sold and value of sales were added to the crops and livestock sections. Other additions and deletions were made based on discussions with the Government of American Samoa and with respect to published tables in the 1980 census.

Followup Procedures

An enumerator was instructed to visit a farm up to three times. If no one was available to complete the questionnaire, the case would then be given to the supervisor. If all attempts to obtain the information from the farm operator failed, the information might then be obtained from a neighbor or by observation of the place.

DATA PROCESSING

The processing was done in the Agriculture Division at the Bureau of the Census. Each questionnaire was edited and coded prior to being keyed and tabulated. The questionnaires were examined for accuracy, consistency, and

completeness. Errors in computations and in units of measure, inconsistencies, and misplaced entries were corrected. Incomplete reports were adjusted on the basis of related information on the same form or on questionnaires for nearby farms of similar type and size.

After all questionnaires had been reviewed, the data were keyed and subjected to a detailed item-by-item computer edit. The edit performed comprehensive checks for completeness and consistency. Inconsistencies identified by the edit were corrected by subject matter specialists, and reedited. The data were then tabulated by the computer for analysis. Following necessary corrections, the data were retabulated for final publication.

MAJOR DATA CHANGES

Prior to each agriculture census, the Bureau of the Census reviews the content of the census forms to eliminate questions no longer needed, identify new items necessary to meet user needs, and to better describe the agriculture situation in American Samoa. Data requests are solicited from government agencies in American Samoa. The following changes were made to the 1990 questionnaire:

- Additions:
 - Information on landlords
 - Green beans
 - Melons
 - Ornamental plants or nursery crops
 - Chicken eggs value
 - Quarts of milk
 - Quantity sold and value of sales in the crops and livestock sections
- Deletions:
 - Green peas
 - Green peppers
 - Fishery section

The word "matai" was changed to "communal" to reflect the cultural change in land holdings.

FOLLOW-ON SURVEYS, SPECIAL CENSUSES, AND RELATED PUBLICATIONS

In addition to the 1990 Census of Agriculture for American Samoa and the Commonwealth of the Northern Mariana Islands, the census of agriculture program includes the 1987 Census of Agriculture for the 50 States, Puerto

Rico, Guam, the U.S. Virgin Islands, the 1988 Farm and Ranch Irrigation Survey, the 1988 Agricultural Economics and Land Ownership Survey, and the 1988 Census of Horticultural Specialties.

Additional publications of the 1987 Census of Agriculture data include the Agricultural Atlas of the United States (previously called the Graphic Summary), Coverage Evaluation, Ranking of States and Counties, Government Payments and Market Value of Agricultural Products Sold, and ZIP Code Tabulations of Selected Items.

DEFINITIONS AND EXPLANATIONS

The following definitions and explanations provide a more detailed description of terms used in this publication than are available in the tables or on the questionnaire. For an exact wording of the questions on the 1990 questionnaire, see appendix B.

In the tables, data for land in farms, land use, fruit and nut trees, and livestock and poultry on hand represent the situation existing at the time of enumeration of each farm. The enumeration for the 1990 Census of Agriculture began in April 1990 and the 1980 census in April 1980. All other data, such as that relating to acres and production, are for the calendar years 1989 and 1979. Sales are for 1989 only.

Farm operator—The term “operator” designates a person who operates a farm, either by doing the work himself/herself or directly supervising the work. The operator may be the owner, a member of the owner’s household, a tenant or renter, the manager, or the person in charge of an institutional farm. For communal lands, the person in charge is considered as the operator of land used for the benefit of the extended family group. An individual member of the family group who raised crops or kept livestock or poultry for his/her own account on communal land was considered to be the operator of the land so assigned. By definition, the number of farm operators is the same as the number of farms.

Farms or farms reporting—The term “farms” or “farms reporting” in the presentation of data denotes the number of farms reporting the item.

Land in farms—The land in farms was determined from the answers to questions 1 through 4 in section 1 of the questionnaire (see app. B). The amounts of land reported as owned and rented from others were added together, and the amount of land reported as rented to others was subtracted from that sum. The result represents “land in farms.” Although the area designated land in farms consists primarily of agricultural land, i.e.—land used for crops, pasture, or grazing—it also included areas of land not actually under cultivation nor used for pasture or grazing. For example, woodland and wasteland owned or rented from others were included as land in farms unless the report indicated it was being held for nonagricultural purposes, such as recreational or for timber.

Land owned—This includes all land held by the operator or his/her spouse under title, purchase contract, or as heir or trustee of an undivided estate at the time of enumeration. Land managed by a hired manager also was considered owned. Communal land is the land which is owned by the extended family.

Land rented from others—This includes not only land that the operator rented or leased from others, but also land worked on shares for others and land used rent free.

Land rented to others—This includes all land the operator rented or leased to others and all land assigned to others on shares or rent free during the past year. For the most part, the land rented to others represents agricultural land, but it also may include land rented for residential or other purposes. The tenant is considered to be the operator of land leased, rented, or worked on shares, even though the landlord may supervise the operations. The landlord is considered to be the operator of only that portion of the land not assigned to tenants.

Land use—Land in farms is categorized according to the way it was being used on enumeration day. The land uses described in the following paragraphs are mutually exclusive in that each acre of land is counted only once, even though it may have had more than one use during the year.

- **Cropland used for crops**—This includes all land planted in crops at the time of enumeration. Land was to be reported only once, even if two or more crops were planted on the same land. It includes field crops that were grazed when mature or almost mature; land in bearing and nonbearing fruit and nut trees or plants, or any other tree crops; land that had partial but not total crop failure; and land in home gardens.
- **Cropland not used for crops**—This includes all land that the operator considered as cropland but on which no crops were planted. It includes land used for pasture and grazing that the operator feels could have been used for crops; land with total crop failure as a result of drought, flood, insect, fire, or other causes; idle and fallow cropland; and cropland with soil improvement grass, cover crops, etc., for the purpose of improvement.
- **Pasture or grazing land**—This includes all land suitable for pasture or grazing, except land used for crops and cropland pasture whether or not used for grazing livestock. It also includes woodland being used for pasture.
- **Other land**—This includes all land that did not qualify either as cropland or pastureland. It includes land in house and building lots, lanes, roads, ditches, ponds, swamps, steep slopes, wasteland, brushland, and nonpastured woodland.

Type of holding—Agricultural operations were classified according to the response the enumerator obtained from the farm operator as to whether the farm was producing mainly for home consumption or mainly for sale.

- **Holdings producing mainly for home consumption**—This applies to holdings from which more than 50 percent of the agricultural output was consumed by the holder's household.
- **Holdings producing mainly for sale**—This applies to holdings from which 50 percent or more of the agricultural output was for sale. These holdings were further classified by the farm operator according to their most important activity. If 50 percent or more of the value was from one of the following, the holding was named accordingly.
 - Crop holding is one which the value of sales from crops was more than 50 percent.
 - Livestock and/or poultry holding is one which the value of sales from livestock and livestock products and/or poultry and poultry products was more than 50 percent.
 - Mixed holding is one which the value of sales was mainly a combination of sales of crops, livestock and livestock products, and/or poultry and poultry products.
 - Other holding is one which the value of sales was mainly from the sale of agricultural products not listed in the previous groups.

Crops harvested—The questionnaire contained individual inquiries for crops commonly grown and space to write in crops less frequently produced for the year 1990.

- **Field crops, melons, and vegetables**—The number of acres harvested, the total quantity of each crop harvested, the quantity sold, and value of sales during 1989 were to have been reported.

When two or more crops or two or more plantings of the same crop were harvested from the same land during the year, the acres were to be reported separately for each crop or planting.

- **Fruits and nuts**—For fruits grown on farms, information was obtained on the total trees both bearing and nonbearing, that were on the place on enumeration day. The total quantity harvested, the quantity sold, and value of sales were for 1989.
- **Nursery and ornamental plants**—Data reflect the number of square feet, acres, and value of sales for 1989.

Livestock and poultry—Data show the number on hand at the time of enumeration. All livestock and poultry on the place were counted at the time of the enumeration regardless of ownership.

Sales data were collected for all livestock and poultry sold from the place during 1989, as well as the dozens of eggs sold.

“Milk cows” were defined as cows that had been on the place on the day of enumeration and were milked at any time during 1989. All other cows were to be included in the data for “Other cattle and calves.”

Equipment—The following types of equipment on the place at the time of enumeration, regardless of ownership, were reported as long as they were in operating condition and used in the farm business.

- **Tractors**—This includes all wheel and tracklaying (crawler) tractors, garden tractors, and homemade tractors, other than motor tillers.
- **Motortrucks**—This includes pickup trucks, truck-trailer combinations, jeeps, and station wagons, if used primarily as trucks.
- **Automobiles**—This includes jeeps and station wagons used primarily as passenger cars.

Facilities—The presence or absence of electricity and/or piped running water on the place was reported.

- **Electricity**—This includes electrical power anywhere on the place including the dwelling of the operator.
- **Piped running water**—This includes water in pipelines by a pressure system or by gravity flow from natural or artificial sources. Water from a hand pump was not considered to be piped running water.

Operator characteristics—Data were obtained to classify the operators according to five characteristics.

1. **Residence of operator**—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated lived on farms operated by others. If all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated if the dwelling was included in the rental agreement. In such cases, the dwelling was not necessarily on the farm operated. Similarly, an operator who did not live on the land being cultivated, but who had some agricultural operations (other than a home garden) at his/her dwelling, was considered to be living on the farm operated.
2. **Year began operating present farm**—Enumerators were instructed to obtain the year an operator began to operate the farm, i.e., the first year the operator took continuous charge of the present farm or any part of it.
3. **Age of operator**—Operators were classified by age into six groups. The average age was obtained by dividing the sum of the ages of all operators reported by the number reported.

4. **Main occupation**—If the operator devoted 50 percent or more of his/her work time to agricultural activities, his/her main occupation was considered to be agriculture, otherwise his/her occupation was considered nonagricultural.
5. **Work off farm**—Only work by the operator for pay was to be reported. Days worked off the place were to include work at another farm or a nonfarm business, such as a store or repair shop; or at a profession such as doctor, lawyer, or teacher. Exchange work or work done by the operator in exchange for comparable work done by someone else was not to be reported.

FARMS CLASSIFIED BY SPECIFIED CHARACTERISTICS

Tables 22 through 25 present detailed data for farms classified by specified characteristics—tenure of operator, size of farm, age of operator, and value of agricultural products sold.

Farms by tenure of operator—Farms were classified by tenure of operator on the basis of information reported for land owned, rented from others, or worked on shares for others. During the processing operations, each questionnaire was coded to indicate whether the farm operator was a full owner, a part owner, or a tenant. The various classifications of tenure are:

- Full owners operate only land they own.
- Part owners operate land they own plus land they rent from others.
- Tenants only operate the land they rent from others or work on shares for others.

Farms by size—Farms were classified by size on the basis of the total land area determined for each farm. According to the census definition, a farm is essentially an operating unit, not an ownership tract. All land operated or managed by one person or partnership represents one farm. In the case of tenants, the land assigned to each

tenant is considered a separate farm even though the landlord may consider his/her entire land holding to be one unit rather than several separate units.

Farms by age of operator—Farms were classified by age of operator on the basis of information reported to the enumerator that was entered on the report form. The operator's age was classified into one of the age groups found in table 24.

Farms by value of agricultural products sold—Farms were classified on the basis of the total value of agricultural products sold. The total was obtained by adding the reported values of all products sold from the farm. The value of vegetables, field crops, fruits and nuts, nursery and ornamental plants, livestock, poultry, and eggs was obtained from the operator at the time of enumeration. These values were classified into one of the groups found in table 25.

CENSUS NONSAMPLING ERROR

All data originated from a complete enumeration and, therefore, are not subject to sampling variability. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources:

- Inability to identify all cases in the actual universe.
- Inability or unwillingness on the part of respondents to provide correct information.
- Definition and classification difficulties.
- Differences in the interpretation of questions.
- Errors in recording or coding the data obtained.
- Other errors of collection, response, coverage, and estimation for missing or misreported data.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measures of these effects have been obtained; however, precautionary steps were taken in all phases of data collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

APPENDIX B. Report Form

OMB No. 0607-0667: Approval Expires 09/30/90

<p>NOTICE — Response to this inquiry is required by law (title 13, U.S. Code). By the same law YOUR REPORT TO THE CENSUS BUREAU IS CONFIDENTIAL. It may be seen only by persons who have sworn to uphold the confidentiality of the census and may be used only for statistical purposes. Your report CANNOT be used for purposes of taxation, investigation, or regulation.</p> <p>FORM 90-A1(AS) (10-4-89) U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS</p> <h2 style="text-align: center;">1990 CENSUS OF AGRICULTURE</h2> <h3 style="text-align: center;">AMERICAN SAMOA</h3>	<p>Part A — QUESTIONNAIRE IDENTIFICATION</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <th rowspan="2">County number</th> <th colspan="3">FARM SERIAL NUMBER</th> <th rowspan="2">CENSUS USE ONLY</th> </tr> <tr> <th>ARA</th> <th>Block</th> <th>Map Spot</th> </tr> <tr> <td> </td> <td> </td> <td> </td> <td> </td> <td> </td> </tr> </table> <p>Island/District</p> <p>County</p> <p>Part B — OPERATOR'S NAME AND PHYSICAL LOCATION</p> <p>Full name (First name, middle initial, last name)</p> <p>Physical location (Describe)</p>	County number	FARM SERIAL NUMBER			CENSUS USE ONLY	ARA	Block	Map Spot

READ TO RESPONDENT — We estimate that it will take from 10 to 20 minutes to complete this report, with 15 minutes being the average time. If you have any comments regarding these estimates or any other aspect of the census, refer to the information on Form D-31.

INSTRUCTIONS

1. Communal lands

- a. Any land used in owner-like possession for the benefit of the extended family should be reported as land owned under section 1, question 1. If the land is used for the sole benefit of the operator rather than the extended family, report the land under section 1, question 2 on a separate questionnaire.
- b. Any land used to which title or right of ownership is not held, should be reported as land rented FROM OTHERS under section 1, question 2. Do this even though no rent is paid to the owner of this land.
- c. Any land to which the title is held or ownership claimed, which is used by a nonmember of the extended family, should be reported as land rented TO OTHERS under section 1, question 3. Do this even though no rent is paid by the nonmember. In such cases, a separate agriculture questionnaire should be completed for the lands reported under section 1, question 3 in the name of the person in charge.

2. Private land

Privately owned lands, not held or operated under the communal system — If crops were raised or livestock or poultry are kept, complete this agriculture questionnaire in the name of the person in charge. The person in charge is the one responsible for making the decisions. The person in charge will usually be the head of the family which plants or gathers the crops.

3. All other land

Experimental farms, schools, churches, and other institutions — If crops were raised or livestock or poultry are kept, complete this agriculture questionnaire in the name of the institution. Also, give the name of the manager or superintendent in part B, above.

SECTION 2 FIELD CROPS, MELONS, AND VEGETABLES

Did you harvest any **FIELD CROPS, MELONS, or VEGETABLES** in 1989 — such as cabbage, cassava, taro, yams, etc.?

- 002 1 Yes — Complete this section
 2 No — GO to section 3

None

- 1. Cabbage
- 2. Cassava
- 3. Corn
- 4. Cucumbers
- 5. Giant taro
- 6. Green beans
- 7. Melons (watermelons, honeydews, muskmelons, etc.)
- 8. Sugarcane
- 9. Taro
- 10. Yams
- 11. Other field crops and vegetables (kava, sweetpotatoes, tobacco, etc.) — Specify ↴

How many acres were harvested in 1989?		What quantity was harvested in 1989?	What quantity was sold in 1989?	What was the value of sales in 1989? (Dollars)
Acres	Tenths			
080	/10	081 Pounds	082 Pounds	083 \$
084	/10	085 Roots	086 Roots	087 \$
088	/10	089 Pounds	070 Pounds	071 \$
072	/10	073 Pounds	074 Pounds	075 \$
076	/10	077 Roots	078 Roots	079 \$
080	/10	081 Pounds	082 Pounds	083 \$
084	/10	085 Pounds	086 Pounds	087 \$
088	/10	089 Pounds	090 Pounds	091 \$
092	/10	093 Roots	094 Roots	095 \$
096	/10	097 Roots	098 Roots	099 \$
100	/10	101 Pounds	102 Pounds	103 \$

SECTION 3 FRUITS AND NUTS

Do you have any **FRUIT and NUT** trees or plants on this place — such as bananas, coconuts, mangoes, pineapples, etc.? (Quantity harvested in 1989 and number of trees and plants on enumeration day.)

- 003 1 Yes — Complete this section
 2 No — GO to question 14

None

- 1. Avocados
- 2. Bananas
- 3. Breadfruits
- 4. Cacao
- 5. Coconuts
- 6. Grapefruits
- 7. Lemons
- 8. Limes
- 9. Mangoes
- 10. Oranges
- 11. Papayas
- 12. Pineapples
- 13. Other fruits, nuts, and tree crops (pandanus, kopak, citrons, coffee, etc.) — Specify ↴

How many trees or plants are on this place?	What quantity was harvested in 1989?	What quantity was sold in 1989?	What was the value of sales in 1989? (Dollars)
(a)	(b)	(c)	(d)
120	121 Pounds	122 Pounds	123 \$
124 Clusters	125 Pounds	126 Pounds	127 \$
128	129 Pounds	130 Pounds	131 \$
132	133 Pounds	134 Pounds	135 \$
136	137 Pounds	138 Pounds	139 \$
140	141 Pounds	142 Pounds	143 \$
144	145 Pounds	146 Pounds	147 \$
148	149 Pounds	150 Pounds	151 \$
152	153 Pounds	154 Pounds	155 \$
156	157 Pounds	158 Pounds	159 \$
160	161 Pounds	162 Pounds	163 \$
164	165 Fruits	166 Fruits	167 \$
168	169 Pounds	170 Pounds	171 \$

14. How many square feet under cover and/or acres did you have planted in **ORNAMENTAL PLANTS** or in any other **NURSERY CROPS**?

Square feet under cover	Acres	Tenths	What was the value of sales in 1989? (Dollars)
176	177	/10	178 \$

SECTION 4 LAND USE

004

Of the total acres in this place (section 1, question 4) —

1. How many acres are in crops? None
2. How many acres are in other cropland (cropland pasture, crop failure, idle cropland, and cropland used for soil improvement)?
3. How many acres are in other pasture or grazing land? (Include woodland pasture. Do not include cropland pasture.)
4. How many acres are in other land? (Include houselots, roads, woodland not pastured, wasteland, etc.)
5. **TOTAL LAND** (Add entries in questions 1 through 4. Total should be equal to entry in section 1, question 4.)

Acres	Tenths
201	/10
202	/10
203	/10
204	/10
205	/10

SECTION 5 LIVESTOCK AND POULTRY

005

How many of the following livestock and/or poultry are on this place today or were sold from this place in 1989?

1. Total cattle and calves of all ages (Total of "a" and "b" below) None
- Of this total, how many are —
- a. Milk cows
- b. All other cattle and calves
2. Hogs and pigs of all ages
3. Horses, mules, and colts of all ages
4. Other livestock — Specify
5. Chickens
6. Other poultry (ducks, pigeons, guineas, geese, etc.) — Specify

How many are on this place today? (a)	How many were sold in 1989? (b)	What was the value of sales in 1989? (Dollars) (c)
251	252	253
254	255	256
257	258	259
260	261	262
263	264	265
266	267	268
269	270	271
272	273	274

7. How many dozens of chicken eggs were sold during 1989? None
8. How many quarts of milk were sold during 1989?

What was the quantity sold in 1989? (a)	What was the value of sales in 1989? (Dollars) (b)
301	302
303	304

SECTION 6 SELECTED EQUIPMENT AND SPECIFIED FACILITIES USED ON THIS PLACE

1. How many of the following are on this place? (Include all specified equipment on this place today, regardless of ownership, provided it is in operating condition.)

- a. Tractors of all kinds None
- b. Motortrucks
- c. Automobiles

Number
315
316
317

2. Do you have the following on this place?
- a. Electricity 318 1 Yes 2 No
- b. Piped running water 319 1 Yes 2 No

Census of Agriculture

Statistical Data for all Counties, States, and the United States.

(Printed Reports, Computer Tapes,
Compact Disc-Read Only Memory (CD-ROM)
Diskettes)

For further information call (301) 763-1113

PUBLICATION PROGRAM

1987 CENSUS OF AGRICULTURE

Results of the 1987 Census of Agriculture are being published in a series of reports which provide data for each county (or equivalent), each State, the United States, Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the Northern Mariana Islands. The publications include statistics on the number of farms; land in farms; farm and operator characteristics; livestock, poultry, and their products; crop production and value; operating expenditures; irrigation; and other characteristics of farms.

Publication order forms may be obtained from Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233, any U.S. Department of Commerce district office, or by calling (301) 763-1113.

ADVANCE REPORTS (AC87-A-01-000(A) TO 56-000(A))

Advance Reports are published separately for each county (or equivalent) in the United States with 10 farms or more, for each State, and the United States. The reports contain data for all agricultural operations with \$1,000 or more in actual or potential sales of agricultural products in the census year. The Advance Reports contain final data for major data items together with comparable data from the 1982 census. Included in the reports are data on number of farms, land in farms, size of farms, land use practices, farm operator characteristics, sales expenditures, machinery and equipment, livestock, poultry, dairy products sold, and major crops harvested (which vary by State). No advance reports are available for Puerto Rico, Guam, or the U.S. Virgin Islands.

VOLUME 1. GEOGRAPHIC AREA SERIES (AC87-A-1 TO 56)

State and County Data (A-1 to 50) are published showing detailed data in national and State tables for the United States, and in county and State tables separately for each State. These reports include data on number and size of farms; crop production; livestock, poultry, and their products; tenure, age, and occupation of operators; types of organization; value of products sold; and standard industrial classification of farms.

Summary and State Data (A-51)

- Chapter 1. National level data
- Chapter 2. State level data

Outlying Areas (A-52 to 56) provide detailed data for the regions and municipios of Puerto Rico; the election districts of Guam; the U.S. Virgin Islands; American Samoa; and Northern Mariana Islands.

VOLUME 2. SUBJECT SERIES (AC87-S-1 TO 6)

Agricultural Atlas of the United States (AC87-S-1), formerly the *Graphic Summary*, presents a profile of the Nation's agriculture in a series of dot and multicolor pattern maps. The maps provide displays on size and type of farm, land use, farm tenure, market value of products sold, crops harvested, livestock inventories, and other characteristics of farms.

Coverage Evaluation (AC87-S-2) provides national and regional level estimates on the completeness of the census, in terms of both the number of farms missed and selected characteristics of those farms.

Ranking of States and Counties (AC87-S-3) presents the ranking of the top 20 States and the top 100 counties of importance of selected items from the 1987 census. Comparative data from the 1982 census are included in most tables. Tables also show cumulative totals for States and counties.

History (AC87-S-4) is a concise description of the major census operations together with facsimiles of selected data tables. It explains the history of the agriculture census, farm definition, data collection and processing, and dissemination of census data.

Government Payments and Market Value of Agricultural Products Sold (AC87-S-5) shows detailed data for farms cross-tabulated by combined market value of agricultural products sold and Government payments received, including detailed national data and selected data for each State.

ZIP Code Tabulations of Selected Items From the 1987 Census of Agriculture (AC87-S-6) provides tabulations by five-digit ZIP Code for selected items from the 1987 census. Data items include number of farms, land in farms, farms by size, market value of agricultural products sold by size of sale, livestock inventory, cropland harvested, and selected crops.

VOLUME 3. RELATED SURVEYS (AC87-RS-1 AND 2)

The Farm and Ranch Irrigation Survey (AC87-RS-1) provides statistical data collected from a sample of farm operations from the 1987 Census of Agriculture. The publication offers information on acres irrigated, land use, yields of specified crops, methods of water distribution, quantity of water used by its source, and other irrigation practices.

Agricultural Economics and Land Ownership Survey (AC87-RS-2) provides data on indebtedness, expenditures, income and assets for both farm operators and landlords. This report also includes measures of credit used for purchases and expenditures, debt by type of lender, assets, off-farm income, and other land ownership data.

VOLUME 4. CENSUS OF HORTICULTURAL SPECIALTIES (AC87-HOR-1)

This report includes detailed information on the horticultural establishments with production and sales of \$2,000 or more. It provides data on number of establishments, value of sales of horticultural products, type of horticultural products, and kinds of horticultural businesses, for the United States, States, and counties.

ELECTRONIC MEDIA

Flexible Diskette—The Advance Reports of the 1987 Census of Agriculture are available on flexible diskettes. The files can be used with any compatible microcomputer employing the PC-DOS 2.0 or higher operating system. Diskettes can be obtained by calling (301) 763-4100.

Computer Tapes—Public-use computer tapes contain the same summary statistics that are found in the published reports. Two files are available for each State: data for counties and the aggregated State-level data. Order forms may be obtained from the Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233 (or call (301) 763-4100).

Compact Disc-Read Only Memory (CD-ROM)—Data for the conterminous United States and Puerto Rico are available on CD-ROM. The CD-ROM can be obtained from the Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233 (or call (301) 763-4100).

Online Access—National and State level data from the 1987 Census of Agriculture are available on CENDATA through two information vendors—CompuServe and DIALOG. In addition, the advance reports, highlights of the Subject Series, and Related Surveys reports, are available online from AGRIDATA. For information on these services call (301) 763-4100.
