# CENSUS OF AGRICULTURE, 1987
# FINAL STATE FILE

User Note No. 1

The following information should clarify some of the differences between the 1982 and 1987 agriculture censuses.

**Flag Fields.** Flag fields indicate whether an item is available at the county level even if the data are not published. All flag fields are the same as in 1982 except field number six. This field indicates that data are not available due to brackets. Brackets occur when data from previous censuses are grouped and matched according to the 1987 Census of Agriculture stubs. When they do not match up, no historical data is available due to the bracketing of the data.

**Index.** The index to data items is a new feature added to the technical documentation this year. The data user can identify all fields where a particular item may be found on the data tapes. It enhances the use of the data dictionary.

**U.S. Data.** The state tape files have U.S. data in the state format. The county tape files have U.S. data in the county format.

**Software**. The addition of new tables and rearrangement of the formats of some tables will account for the change in cell locations on the data tapes for some data items from the 1982 agriculture census data to the 1987 agriculture census data. *Therefore, programs used to process 1982 agriculture census data should not be used with 1987 agriculture census data unless appropriate changes are made.*

# CENSUS OF AGRICULTURE, 1987
# FINAL STATE FILE

User Note No. 2

You will be receiving a revised version of this file shortly. The revised version reflects corrected data in fields 5872-5877, *Livestock and Poultry--Inventory and Sales: (any cattle, hogs, and sheep (1978) items).*

The revised tape will also have corrected data in the following 1987 dollar value fields under *Crops Harvested and Value of Production: 1987 and 1982:* Field names 8900, 8908, 8916, 8924, 8932, 8940, 8948, 8956, 8964, 8972, 8980, 8988, 8996, 9004, 9012, 9020, 9028, 9036, 9044, 9052, 9060, 9068, 9076, 9084, 9092, 9100, 9108, 9116.

# ABSTRACT

*Census of Agriculture, 1987: Final State File [machine-readable data file] / conducted by the Bureau of the Census. - Washington: The Bureau [producer and distributor], 1989.*

**Type of File:**

Summary statistics.

**Universe Description:**

The universe is all farms. A farm is any place from which $1,000 or more of agricultural products were sold, or normally would have been sold, during the census year.

**Subject-Matter Description:**

Data are presented for all farms and for all farms with sales of $10,000 or more. Data include number of farms; land in farms; size of farms; value of land, buildings, value of machinery and equipment; characteristics of operator; selected production expenses; total cropland; irrigation of farm land; value of agricultural products sold; inventory and sale of livestock and poultry; and major crops harvested.

**Geographic Coverage:**

Data are available for each State with 10 farms or more.

**Technical Description:**

File Structure: Rectangular.

File Size: Each State file comprises 98 segments of 9,600 characters each for a total record size of 940,800 characters.

File Sort Sequence: State, then FIPS county code, then segment number.

**Reference Materials:**

*Census of Agriculture, 1987: Final State File Technical Documentation.* The documentation contains an abstract, a glossary, additional information about the file, and a data dictionary. One copy accompanies each file order. When ordered separately, it is available for $50 from Data User Services Division, Customer Services (Order Desk), Bureau of the Census, Washington, D.C. 20233.

**Related Printed Reports and Microfiche:**

*1987 Census of Agriculture, Volume 1, Geographic Area Series, State and County Data* (parts 1 through 51). These reports are published separately for each State and each county. This series provides information on all data items collected in the 1987 census with comparable data from the 1982 census. The reports are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Report prices vary.

**Related Machine-Readable Data Files:**

Files are available from the 1974, 1978 and 1982 Censuses of Agriculture. Each file contains data from the previous Census of Agriculture; for example, the 1978 file contains data for 1978 and 1974. The 1987 file will also be available on compact disk (CD-ROM) in late 1989.

**File Availability:**

Files are available by individual State, groups of States if requested by a user, or as one consolidated file. An individual State file is available on one reel at 1600 or 6250 bpi for $175. The cost for custom-packed multi-State tapes is $175 per reel at 1600 or 6250 bpi. When all State files have been released, they will be consolidated into a single file. For the number of reels required for the consolidated file, contact Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

# OVERVIEW

Census of Agriculture, 1987

## History

The 1987 Census of Agriculture is the 23rd such census. The first agriculture census was taken in 1840 as part of the sixth decennial census of population. From 1840 to 1950, an agriculture census was taken as part of the decennial census. A separate mid-decade census of agriculture was conducted in 1925, 1935, and 1945. From 1954 to 1974, a census of agriculture was taken for the years ending in 4 and 9. In 1976, Congress authorized the census of agriculture to be taken for 1978 and 1982 to adjust the data reference year so that it coincided with the economic censuses covering manufacturing, mining, construction, retail trade, wholesale trade, service industries, and selected transportation activities. This adjustment in timing established the agriculture census on a 5-year cycle collecting data for years ending in 2 and 7.

## Uses of the Census

The census of agriculture is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. Census statistics are used by Congress in developing and changing farm programs and for determining the effects of these programs. Many national and State programs are designed or allocated on the basis of census data, such as funds for extension services, research, and soil conservation projects. Private industry uses census statistics to provide a more effective production and distribution system for the agricultural community.

## Authority and Area Covered

The census of agriculture is required by law under Title 13, United States Code, sections 142(a) and 191, which directs that a census be taken in 1979, in 1983, and in every fifth year after 1983 covering the prior year. The 1987 census includes each State, Puerto Rico, Guam, and the Virgin Islands of the United States. A census of agriculture will be conducted in American Samoa and the Commonwealth of the Northern Mariana Islands in conjunction with the 1990 Census of Population and Housing.

## Farm Definition

Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has been changed nine times. The current definition, first used for the 1974 census, is any place from which $1,000 or more of agricultural products were produced and sold or normally would have been sold during the census year. The farm definition used for outlying areas varies according to area. The report for each area includes a discussion of the farm definition.

## Comparability of Data

Data on acreages and inventories for 1987 and 1982 are generally comparable. Dollar figures shown for expenses and agricultural product sales are expressed in current dollars and have not been adjusted for inflation or deflation. In general, data for censuses since 1974 are not fully comparable with data for 1969 and earlier censuses due to changes in the farm definition.

The U.S., region, and State data for 1978 shown in the 1978 Census of Agriculture publications included data for farms on the mail list plus estimates from an area sample for farms not on the mail list. For comparability, the 1978 data in the 1987 publications include only farms on the mail list.

### Advance Reports

Advance reports of 1987 census data have been published separately for each county with 10 farms or more, each State, and the United States. This series provided, at the earliest possible date, final data on major data items together with comparable final data from the 1982 census. Data items are standard across States except for information on selected crops harvested, which vary by State according to their relative importance in the State.

The Volume 1, Geographic Area Series, includes results for all data items collected in the census. The volume 1 appendix provides a detailed description of how the census was taken, pertinent definitions and explanations, and measures of the reliability of the data.

**Definition of farm.** Since the 1974 census, a farm has been defined as any place from which $1,000 or more of agricultural products were produced and sold or normally would have been sold, during the census year.

**Reliability.** The census of agriculture enumerates all identified farm and ranch operations in the United States. Sampling is used to collect data for selected items and to account for nonresponding farm operations. Thus, the results in this report are subject to sampling variability as well as reporting and coverage errors.

**Acknowledgments.** Special tribute is paid to the millions of farm and ranch operators and other agriculture-associated people who furnish the individual reports from which these statistical summaries were compiled. Also acknowledged are the contributions of the U.S. Department of Agriculture and other public and private agencies that gave their support to the census program.

### Electronic Data Dissemination

The Volume 1 data are available on computer tapes and compact disk (CD-ROM). The advance report data are available on computer tapes, computer diskettes, and through electronic data services such as the AGRIDATA network, and the CENDATA™ data base on Dialog and CompuServe on-line services. Computer tapes, diskettes, and compact disks are sold by the Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233. Phone: (301) 763-4100.

### Special Tabulations

Custom designed tabulations can be developed to individual user specifications on a programming cost reimbursable basis. Inquiries about special tabulations should be directed to the Chief, Agriculture Division, Bureau of the Census, Washington, D.C. 20233.

### Census Disclosure Rules

In keeping with the provisions of Title 13, United States Code, no data are published that would disclose the operations of an individual farm. However, the number of farms in a given size category or other classification such as size of farm is not considered a release of confidential information and is provided even though other information is withheld.

### Inventories, Production, and Sales Data

Inventories of livestock, poultry, and machinery and equipment are measured as of December 31 of the census year. Crop and livestock production, sales, and expense data are for the calendar year, except for a few crops (such as citrus) for which the production year overlaps the calendar year.

## THINGS TO KNOW ABOUT THIS FILE

**File Information.** Information for each State is contained on a different file. Each State file contains a State record in FIPS State code sequence.

**Record Information.** The file has a logical record size of 940,800 characters. Because of the large record size, it has been segmented into 98 physical records of 9,600 characters each. Geographic identification information is provided at the beginning of each segment. Tables corresponding to the published reports are split across record segments.

**Cell Information.** Each data cell contains 12 characters. The first character is a flag field followed by an 11-character value field that is right justified. Leftmost digits are zero filled. Negative numbers have the minus sign in the leftmost position.

**Flag Fields.** The flag fields indicate special conditions to be aware of when using the value in the data cell. Flag field codes are as follows:

0 no special conditions associated with the data cell

1 data not applicable

2 data not available

3 less than half of the unit reported

4 data withheld to avoid disclosing information for individual farms

5 data not published for this State/county because it contains less than 10 farms or crop shown is not a major crop; see Appendix, A, page A-16.

6 data not available due to brackets

**Variable Crops.** Major crops vary by State. Appendices B – F list major crops for all farms and farms with sales of $10,000 or more by State. **If a crop shown in the data dictionary is not a major crop for a specific State, the file will contain a "5" in the first cell of that field and zeroes in the remaining cells.**

**Abbreviation and Symbols**

The following abbreviations and symbols are used through the tables:

| | |
|---|---|
| – | Represents zero. |
| (D) | Withheld to avoid disclosing data for individual farms. |
| (X) | Not applicable. |
| (Z) | Less than half of the unit shown. |
| (NA) | Not available. |
| cwt. | Hundredweight. |
| Sq.ft. | Square feet. |

# GLOSSARY

The following definitions and explanations provide a more detailed description of the terms than are available in the tables or on the report form. For an exact wording of the questions see appendix H. Most definitions of terms are the same as those used in earlier censuses. The more important exceptions are also noted here.

**Abnormal Farms.** This category includes institutional farms, experimental and research farms, and Indian reservations. Institutional farms include those operated by hospitals, penitentiaries, churches, schools, grazing associations, and government agencies. In 1987 and 1982, non-governmental units such as church farms and Future Farmers of America camps were classified as abnormal farms only when 50 percent or more of their products produced and intended for human consumption were utilized by the organization.

**Acres and Quantity Harvested.** Crops were reported in whole acres, except for the following crops which were reported in tenths of acres: Irish potatoes, sweet potatoes, tobacco, fruit and nut crops including land in orchards, berries, vegetables, and nursery and greenhouse crops; and in Hawaii, taro, ginger root, and lotus root. Totals for crops reported in tenths of acres were rounded to whole acres at the aggregate level during the tabulation process.

If two or more crops were harvested from the same land during the year, the acres would be counted for each crop. Therefore, the total acres of all crops harvested generally exceeds the acres of cropland harvested. An exception to this procedure is hay crops. When more than one cutting of hay was taken from the same acres, the acres are counted only once but the quantity harvested includes all cuttings. However, hay cut for both dry hay and green chop or silage would be reported for each applicable crop. For interplanted crops or "skip-row" crops, acres were to be reported according to the portion of the field occupied by each crop.

If a crop was planted but not harvested, the acres were not to be reported as harvested. These acres were to be reported in the "land use" section under the appropriate cropland items – cropland used only for pasture or grazing, cropland used for cover crops, cropland on which all crops failed, or cropland idle.

Corn and sorghum hogged or grazed were to be reported as "cropland harvested" and not as "cropland used only for pasture or grazing." Crop residue left in fields and later hogged or grazed was not reported as cropland pasture.

Quantity harvested was not obtained for crops such as vegetables, nursery and greenhouse crops, corn cut for dry fodder, hogged or grazed, and sorghum hogged or grazed.

Acres of land in bearing and nonbearing fruit orchards, citrus or other groves, vineyards, and nut trees were to be reported as harvested cropland regardless of whether the crop was harvested or failed. However, abandoned orchards were to be reported as cropland idle, not as harvested cropland and the individual abandoned orchard crop acres were not to be reported.

**Agricultural Chemicals Use, Including Fertilizer and Lime.** For each type of agricultural chemical, the acres treated were to be reported only once even if the acres were fertilized or limed more than once. If multipurpose chemicals were used, the acres treated for each purpose were to be reported.

**All Other Races.** This category is primarily limited to persons native to or of ancestry from Mexico, the Caribbean, Central and South America.

**Almonds.** For 1982, the quantity harvested of almonds was reported in pounds of meats. For 1978, the quantity harvested was reported in the shell.

**Black and Other Races.** This category includes Blacks, American Indians, Asian and Pacific Islanders, and all other racial groups other than White.

**Bees and Honey.** Bee and honey production was enumerated and tabulated in the county in which the home farm was located even though hives are often moved from farm to farm over a wide geographic area.

**Cash Grains.** See Grains; Other grains.

**Cherries.** For 1987, cherries were reported as "sweet cherries," "tart cherries," or "cherries" depending on the regional form the respondent completed. On regional forms for States where cherries are an important fruit crop, "sweet cherries" and "tart cherries" were listed separately. On the other regional forms, either "cherries" were listed or could be written in. For publication purposes, "cherries, total" could be shown along with the individual breakdown of "sweet cherries," "tart cherries," or "cherries, not specified." "Cherries, not specified" is used to account for cherries where the "sweet" and "tart" breakdown was not asked or where respondents wrote in "cherries" but did not specify or code the kind of cherry. All the individual cherry items may not be shown. Data for "sweet cherries," "tart cherries," and "cherries, not specified," are not available for 1982.

**Citrus Enumeration.** In the 1987 census, reports for selected citrus caretakers in Arizona, Florida, and Texas were obtained by direct enumeration. A citrus caretaker is an organization or person caring for or managing citrus groves. Often absentee grove owners do not know the information that is needed to adequately complete the census report. Each citrus caretaker was enumerated as a farm operator and requested to complete one report form for all groves cared for and to furnish a list of grove owners' names, addresses, and acres of citrus. The names on the lists were matched to completed grove owners' report forms to eliminate duplication. The caretaker also was requested to inform the grove owner that he had already reported for the citrus under his care and that the grove owner was not to report the citrus again. In the 1987 census, 7 caretakers in Arizona reported 175 grove owners having 12,000 acres of citrus; the 65 caretakers in Florida reported 3,000 grove owners having 170,000 acres of citrus; and 20 caretakers in Texas reported 800 grove owners having 14,500 acres of citrus.

**Commodity Credit Corporations Loans.** This category includes loans for corn, wheat, soybeans, sorghum, barley, oats, cotton, peanuts, rye, rice, tobacco and honey.

**Crop Units of Measure.** The regional report forms allowed the operator to report quantity of field crops harvested in a unit of measure commonly used in the region. When the operator reported in a unit of measure different than the unit of measure published, the quantity harvested was converted to the published unit of measure.

Grapes could be reported in dry weight or fresh weight; plums and prunes in fresh weight or prunes in dry weight; and in Hawaii, coffee in pounds parchment or pounds cherry, and macadamia nuts in pounds husked, unshelled or pounds shelled. For other fruit and nut crops and citrus, the operator was given a choice of units of measure of pounds, tons, or boxes. The quantity harvested for these crops is published in pounds.

**Crop Year or Season Covered.** Acres and quantity harvested are for the calendar year 1987 except for citrus fruits, avocados, olives, vegetables in Florida, sugar cane in Florida and Texas, and pineapples and coffee in Hawaii.

**Citrus Fruits.** The data for Florida relate to the quantity harvested in the September 1986 through July 1987 harvest season, except limes that where harvested in the April 1987 through March 1988 harvest season. The data for Texas relate to the quantity harvested in the September 1986 through May 1987 harvest season. The data for States, other than Florida and Texas, relate to the quantity harvested in the 1986-87 harvest season.

**Avocados.** The data for California relate to the quantity harvested in the November 1986 through November 1987 harvest season and for Florida the April 1987 through March 1988 harvest season.

**Olives.** The data for California relate to the quantity harvested in the September 1986 through March 1987 harvest season.

**Vegetables.** The data for Florida relate to the crop harvested in the September 1986 through August 1987 harvest season.

**Sugar cane for Sugar.** The data for Florida relate to the cuttings from November 1986 through April 1987, and for Texas the cuttings from October 1986 through April 1987.

**Pineapples.** The data for Hawaii relate to the quantity harvested in the year ending May 31, 1987.

**Coffee.** The data for Hawaii relate to the 1986-87 crop.

**Cropland, Harvested.** This category includes land from which crops were harvested or hay was cut, and land in orchards, citrus groves, vineyards, nurseries and greenhouses. Land from which two or more crops were harvested was counted only once, even though there was more than one use of the land.

**Cropland, Other.** This category includes cropland not harvested and not grazed which was used for cover crops, soil improvement crops, land on which all crops failed, cultivated summer fallow, idle cropland, and land planted in crops that were to be harvested after the census year.

**Cropland, Total.** Total cropland consists of land from which crops were harvested or hay was cut; land in orchards, citrus groves, vineyards, and nursery and greenhouse products; land used only for pasture or grazing; land in cover crops, legumes, and soil improvement grasses; land on which all crops failed; and land in cultivated summer fallow. It also included cropland that is idle.

**Cropland in Annual Commodity Acreage Adjustment Programs.** This category includes land diverted or set aside under the provisions of the Federal Commodity Acreage Program. These data are for the acres of cropland taken out of production by growers of wheat, cotton, rice, corn, sorghum, barley, and oats, and devoted to conservation uses. Information was not obtained as to which crops would have been grown on the acres set aside.

**Cropland in the Conservation Reserve Program (CRP).** This category includes acres of "highly erodible" cropland taken out of agricultural production and planted to protective cover crops or reforested. The CRP was established through the 1985 Food Security Act and provides for annual rental payments and shared costs of conservation practices through a 10-year contract with the USDA. Appendix B of the Volume 1 report presents data on places with all their cropland enrolled in the Conservation Reserve Program and which were not counted as farms in the 1987 census.

**Cropland Used Only for Pasture or Grazing.** This category includes land used only for pasture or grazing that could have been used for crops without additional improvement. Also included was all cropland used for rotation pasture and land in government diversion programs that were pastured. However, cropland that was pastured before or after crops were harvested was to be included as harvested cropland rather than cropland for pasture or grazing.

**Customwork and other agricultural services.** This income includes gross receipts received by farm operators for providing services for others such as planting, plowing, spraying, and harvesting. Income from customwork and other agricultural services is generally included in the agriculture census if it is closely related to the farming operation. However, it is excluded if it constitutes a separate business or is conducted from another location.

**Customwork, Machine Hire, and Rental of Machinery and Equipment.** See selected farm production expenses.

**Data are Based on a Sample of Farms.** For 1987, 1982, and 1978, selected data were collected from only a sample of farms. These data are subject to sampling error. For 1987, the 5-page sample form was mailed to all large and specialized farms (based on expected sales, acres, or standard industrial classification), all farms in

Alaska and Hawaii, and approximately 17 percent of all other farms. Sample sections 23 through 28 of the 1987 census forms include inquiries on production expenses, commercial fertilizer and lime, chemicals, machinery and equipment, value of land and buildings, and income from farm-related sources. Estimates of the reliability of county totals for selected items are shown in table E in the Volume 1 report.

**Farms or Farms Reporting.** The term "farms" or "farms reporting" in the presentation of data denotes the number of farms reporting the item. For example, if there are 3,710 farms in a State and 842 of them had 28,594 cattle and calves, the data for those farms reporting cattle and calves would appear as:

| | | |
|---|---|---|
| Cattle and calves..... | farms: | 842 |
| | number: | 28,594 |

**Farms by Age and Principal Occupation of Operator.** Data on age and principal occupation were requested from all operators in 1987. The principal occupation classifications used were:

**Farming** – The operator spent 50 percent or more of his/her worktime in 1987 in farming or ranching.

**Other** – The operator spent 50 percent or more of his/her worktime in 1987 in occupations other than farming or ranching.

**Farms by Size.** All farms were classified into selected size groups according to the total land area in the farm. The land area of a farm is an operating unit concept and includes land owned and operated as well as land rented from others. Land rented to or assigned to a tenant was considered the tenant's farm and not the owner's.

**Farms by Standard Industrial Classification.** For 1982, all agricultural production establishments (farms, ranches, nurseries, greenhouses, etc.) were classified by type of activity or activities using the standard industrial classification (SIC) system. These classifications, found in the 1987 SIC Manual[1], are used to promote uniformity and comparability in the presentation of statistical data collected by various agencies.

An establishment primarily engaged in crop production (major group 01) or livestock production (major group 02) is classified in the 4-digit industry and 3-digit industry group which accounts for 50 percent or more of the total value of sales of its agricultural products. If the total value of sales of agricultural products of an establishment is less than 50 percent from a single 4-digit industry, but 50 percent or more from the products of two or more 4-digit industries within the same 3-digit industry group, the establishment is classified in the miscellaneous industry group. Otherwise, it is classified as a general crop farm in industry 0191 or a general livestock farm in industry 0291.

Characteristics of all farms by selected SIC groupings are shown in State tables 15 and 50 of the printed report. The SIC groupings, shown in State table 59, together with the associated products (value of sales representing 50 percent or more of the value of agricultural products sold during the year) on which the classification is based, are as follows:

**Cash Grains (011).** Wheat, rice, corn, soybeans, barley, buckwheat, cowpeas, dry field and seed beans and peas, emmer field seeds, flaxseed, lentils, mustard seed, oats, popcorn, rye, safflower, sorghum, and other small grains.

**Cotton (0131).** Cotton and cottonseed.

**Tobacco (0132).** Tobacco.

---

1. Standard Industrial Classification Manual: 1987. For sale by National Technical Information Service, 5825 Port Royal Road, Springfield, VA 22161. Order No. PB 87100012.

**Sugar Crops, Irish Potatoes, Hay, Peanuts, and Other Field Crop (0133, 0134, 0139).** Sugar cane, sugar beets, Irish potatoes, alfalfa, broomcorn, clover, flax, hay, hops, mint, peanuts, sweet potatoes, and timothy.

**Vegetables and Melons (016).** Vegetables and melons grown in the open.

**Fruits and Tree Nuts (017).** Berries, grapes, tree nuts, citrus fruits, deciduous tree fruits, avocados, dates, figs, olives, pineapples, and tropical fruit.

**Horticultural Specialties (018).** Ornamental plants; nursery products, such as bulbs, florists' greens, flowers, shrubbery, flower and vegetable seeds and plants, and sod; mushrooms and vegetables grown under cover.

**General Farms, Primarily Crops (019).** Crops, including horticultural specialties, but less than 50 percent of sales from any single 3-digit industry group. Includes farms with no agricultural products sold reporting cropland harvested or cropland on which all crops failed.

**Livestock, Except Dairy, and Poultry (021).** Cattle, calves, hogs, sheep, goats, goat's milk, wool, and mohair.

**Beef Cattle, Except Feedlots (0212).** Production or feeding of beef cattle, except feedlots.

**Dairy Farms (024).** Production of cow's milk and other dairy products and raising of dairy heifer replacements.

**Poultry and Eggs (025).** Chickens, chicken eggs, turkeys, duck, geese, pheasants, pigeons, and quail.

**Animal Specialties (027).** Fur-bearing animals, rabbits, horses, ponies, bees, fish in captivity except fish hatcheries, worms, and laboratory animals.

**General Farms, Primarily Livestock (029).** Livestock and livestock products, including animal specialties, but less than 50 percent of sales from any single 3-digit industry group. Includes farms with no agricultural products sold reporting livestock or pasture.

**Farms by Tenure of Operator.** The classifications of tenure used in the 1987 census were:

**Full owners**, who operate only land they own.
**Part owners**, who operate land they own and also land they rent from others.
**Tenants**, who operate only land they rent from others or work on shares for others.

**Farms by Type of Organization.** All farms were classified by type of organization in the 1987 census. The classifications used were:

**Individual or family (sole proprietorship)**, excluding partnership and corporation.
**Partnership**, including family partnership.
**Corporation**, including family corporation.
**Other, cooperative, estate or trust, institutional, etc.**

Corporations were subclassified by two additional characteristics into:

a. Family held
   Other than family held

b. More than 10 stockholders
10 or less stockholders

**Farms by Value of Agricultural Products Sold or Value of Sales.** In 1987, all farms were tabulated by size based on reported sales. In 1982 and earlier censuses, abnormal farms were not tabulated based on sales size. In the tables on market value of agricultural products sold, the sales of abnormal farms in 1982 and earlier censuses were included in the total sales figure but excluded from the detailed size categories. Abnormal farms include institutional farms, experimental and research farms, and Indian reservations. The category "farms with sales of less than $1,000" included all farms with actual sales of less than $1,000 but having the production potential for sales of $1,000 or more. These farms normally could be expected to sell $1,000 or more of agricultural products.

The sales size categories used in this report are consistent with the standard business size categories issued by the Office of Management and Budget in 1982. In State table 52, data are presented for 4 sales size categories between $10,000 and $49,999. This provides users with bridge data under both the OMB and the 1978 census classifications. For the 1992 census, data will be presented only for the OMB sales size categories of $10,000 to 24,999 and 25,000 to 49,999.

**Farms Operated by Black and Other Races.** This category includes Blacks, American Indians, Asian and Pacific Islanders, and all other racial groups other than White.

**Farm-related Income, Other.** The 1987 report form included a new inquiry on income from farm-related sources. These data consist of gross income in 1987 before taxes and expenses from the sales of farm by-products and other sales and services closely related to the principal functions of the farm business. These data are for income producing activities that are primarily a by-product or supplemental to the farm operation. They exclude income from business activities that are separate from the farm business.

**Farms with Sales Less than $1,000.** This category includes all farms with actual sales of less than $1,000 but having the production potential for sales of $1,000 or more. These farms normally could be expected to sell $1,000 or more of agricultural products.

**Farms with Value of Sales Less than $2,500.** In 1982 and 1978, this category included all farms, except abnormal farms, with actual sales of less than $2,500. In farms reporting sales of less than $2,500 but having the production potential for sales of $2,500 and over were included in the category $2,500 to $4,999.

**Fish and Other Aquacultural Products.** The raising of fish and other aquacultural products in captivity is included in the agriculture census. Production in salt water is considered not to be in captivity and is excluded from the census.

**Government Payments.** This category is limited to direct cash or generic commodity certificate (PIK) payments received by the farm operator in 1987. It includes deficiency and diversion payments; wool payments; payments from the Dairy Termination Program, the Conservation Reserve Program, other conservation programs, and all other federal farm programs under which payments were made directly to farm operators.

**Grains.** Data are for the total market value of cash grains sold, including corn for grain or seed, wheat for grain, soybeans for beans, sorghum for grain or seed, oats for grain, and other grains.

**Grapes.** Farm operators were given the option of reporting the quantity of grapes harvested in dry weight or fresh weight. For publication purposes, all quantities of grapes harvested have been converted to pounds fresh weight. The conversion used was 4 pounds fresh weight to 1 pound dry weight.

**Hay-Alfalfa, Other Tame, Small Grain, Wild Grass Silage, Green Chop, Etc.** Data shown for hay represent all hay crops, including grass silage, haylage, and hay crops cut and fed green (green chop). In production data,

dry tons represent dry tonnage for the various hay categories and dry weight equivalents for grass silage and hay cut and fed green. The conversion used was 3 tons of green wight to 1 ton of dry weight.

**Hay-Tame Hay Other than Alfalfa, Small Grain, and Wild Hay.** Data shown represent dry tons of hay harvested from clover, lespedeza, timothy, Bermuda grass, Sudan grass, and other types of legume and tame grasses.

**Irrigated Land.** This category includes all land watered by any artificial or controlled means, such as sprinklers, furrows or ditches, and spreader dikes. Included are supplemental, partial, and preplant irrigation. Each acre was to be counted only once regardless of the number of times it was irrigated or harvested.

**Land Area.** The approximate land area of counties and States shown represents the total land area as determined by records and calculations as of January 1, 1988. These data are updated periodically; however, the acreages shown for 1987 are essentially the same as in 1982. Any differences between the land area in 1987 and 1982 are due to annexations and other changes affecting county boundaries.

**Land in Farms.** The acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Large acreages of woodland or wasteland held for nonagricultural purposes were deleted from individual reports during the processing operations. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve Program for places meeting the farm definition.

Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. Land used rent free was to be reported as land rented from others. All grazing land, except for land used under government permits on a per-head basis, was included as "land in farms" provided it was part of a farm or ranch. Land under the exclusive use of a grazing association was to be reported by the grazing association and included as land in farms. All land in Indian reservations used for growing crops or grazing livestock was to be included as land in farms. Land in Indian reservations not reported by individual Indians or non-Indians was to be reported in the name of the cooperative group that used the land. In some instances, an entire Indian reservation was reported as one farm.

**Land in Orchards.** This category includes land in bearing and nonbearing fruit trees, citrus or other groves, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents were instructed not to report abandoned plantings and plantings of less than 20 total fruit, citrus, or nut trees, or grapevines.

**Land in Two or More Counties.** With few exceptions, the land in each farm was tabulated as being in the operator's principal county. The principal county was defined as the one where the largest value of agricultural products was raised or produced. It was usually the county containing all or the largest proportion of the land in the farm or viewed by the respondent as his/her principal county. For a limited number of Midwest and Western States, this procedure has resulted in the allocation of more land in farms to a county than the total land area of the county. To minimize this distortion, separate reports were required for large farms, identified from the 1982 census as having more than one farm unit. Other reports received showing land in more than one county were separated into two or more reports if the data would substantially affect the county totals.

**Land Used for Vegetables.** Data are for the total land used for vegetable crops. The acres are reported only once, even though two or more harvests of a vegetable or more than one vegetable were harvested from the same acres.

**Market Value of Agricultural Products.** This category represents the gross market value before taxes and production expenses of all agricultural products sold or removed from the place in 1987 regardless of who received the payment. It includes sales by the operator as well as the value of any shares received by partners, landlords, contractors, or others associated with the operation. In addition, it includes receipts from placing commodities in the Commodity Credit Corporation (CCC) loan program in 1987. It does not include payments

received for participation in federal farm programs nor does it include income from farm-related sources such as customwork and other agricultural services, or income from non-farm sources.

The value of crops sold in 1987 does not necessarily represent the sales from crops harvested in 1987. Data may include sales from crops produced in earlier years and exclude some crops produced in 1987, but held in storage and not sold. For commodities, such as sugar beets and wool, sold through a co-op which made payments in several installments, respondents were requested to report the total value received in 1987.

The value of agricultural products sold was requested of all operators. If the operator failed to report this information, estimates were made based on the amount of crops harvested, livestock or poultry inventory or number sold. Extensive estimation was required for operators growing crops or livestock under contract.

Caution should be used when comparing sales in 1987 with sales reported in earlier censuses. Sales figures are expressed in current dollars and have not been adjusted for inflation or deflation.

**Misreported or Miscoded Crops.** In a few instances, tabulated data may be inaccurate because respondents misunderstood or misinterpreted questions on the report form. Data may have been reported on the wrong line or in the wrong section, or the wrong crop code may have been placed beside the name of a write-in crop. Some of these errors as well as some keying errors may not have been identified during processing and therefore were not corrected. Reports with significant acres of unusual crops for the area were examined to minimize the possibility that they were in error.

**Net Cash Return from Agricultural Sales for the Farm Unit.** This category is derived by subtracting total operating expenditures from the gross market value of agricultural products sold. Depreciation and the change in inventory values are excluded from expenditures. Production expenditures may be understated on part owner and tenant farms because property taxes paid by landlords are excluded. Other landlord expenditures, such as insurance or rent paid, which are not readily known to renters may also be omitted or understated. Gross sales include sales by the operator as well as the share of sales received by partners, landlords, and contractors. Consequently, the net cash return is that of the farm unit rather than the net farm income of the operator.

**Nursery and Greenhouse Products Grown for Sale.** These data are a summation of the individual items reported. All of the individual items may not be shown.

**Nursery, Floriculture, Vegetable and Flower Seed Crops, Sod, etc., Grown in the Open, Irrigated.** Data refer to farms reporting irrigated nursery, floriculture, vegetables and flower seeds, sod, bedding plants, etc., grown in the open.

**Operator.** The term "operator" designates a person who operates a farm, either doing the work or making day-to-day decisions about such things as planting, harvesting, feeding, and marketing. The operator may be the owner, a member of the owner's household, a hired manager, a tenant, a renter, or a sharecropper. If a person rents land to others or has land worked on shares by others, he/she is considered the operator only of the land which is retained for his/her own operation. For partnerships, only one partner is counted as the operator. If it is not clear which partner is in charge, then the senior or oldest active partner is considered the operator. For census purposes, the number of operators is the same as the number of farms. In some cases, the operator was not the individual named on the address label of the report form, but another family member, a partner, or a hired manager who was actually in charge of the farm operation.

**Operator Characteristics.** All operators were asked to report place of residence, principal occupation, days of off-farm work, year in which his/her operation of the farm began, age, race, sex, and Spanish origin. If race, age, sex, and principal occupation were not reported, they were imputed based on information reported by farms with similar acreage, tenure, and value of sales. No imputations were made for nonresponse to place of residence, Spanish origin, off-farm work, or year began operation. Operators of Spanish origin were tabulated by reported race.

**Operators of Spanish origin.** No imputation was made for those not responding to the question on Spanish origin.

**Other Cropland.** Other cropland consists of cropland used only for soil improvement crops, land on which all crops failed, cultivated summer fallow, idle cropland, and land planted in crops that were to be harvested after the census year.

**Other Crops.** This is the total market value of all crops not listed such as Irish potatoes, mint for oil, sugar beets, peanuts, sweet potatoes, sugar cane, etc.

**Other farm-related income sources.** This income includes gross receipts from hunting leases, fishing fees, camping, other recreational services, patronage dividends of cooperatives, sales of farm by-products, and other sales and services closely related to the farm business. It excludes income from nonfarm businesses.

**Other Land.** This category includes land in house lots, barn lots, ponds, roads, wasteland, etc. For 1974 farms with sales of less than $2,500, "other land" included pastureland and rangeland other than cropland and woodland pasture in addition to land in house lots, barn lots, ponds, roads, and wasteland.

**Other Fruits and Nuts.** Data shown for other fruits and nuts relate to any fruits and nuts not having a specific code on the 1987 report form.

**Other Grains.** These data are for the total market value of other grains sold including dry edible beans, dry lima beans, buckwheat, dry southern peas (cowpeas), emmer and spelt, flaxseed, mixed grains, lentils, mustard seed, dry edible peas, popcorn, proso millet, rice, rye for grain, safflower, sunflower seed, triticale, and wild rice.

**Other Livestock and Livestock Products.** This category includes all livestock and livestock products not listed separately.

**Poultry Hatched.** This category includes all poultry hatched on the place during the year and placed or sold. Incubator egg capacity on December 31, 1987, is tabulated under heading *Inventory* and the number of poultry hatched and placed or sold is under *Sales*.

**Plums and Prunes.** Farm operators were given the option of reporting the quantity of plums and prunes harvested in dry weight or fresh weight. For publication purposes, all quantities of plums and prunes harvested have been converted to pounds fresh weight. The conversion used was 3 pounds fresh weight to 1 pound dry weight.

**Principal Source of Irrigation Water.** The acres irrigated by principal source of irrigation water were derived based on reported percentages of water obtained by source. When irrigation water was obtained from two or more sources, the acres irrigated were included only once under the source from which the largest percentage of water was obtained.

**Production Expenses, Total.** In 1987, additional specific expense items and a category for all other farm production expenses were added to the selected farm production expenses collected in 1982. Consequently, we are publishing total farm production expenses in 1987. The expenses are limited to those incurred in the operation of the farm business. Expenses include the share of the expenditures provided by landlords, contractors, and partners in the operation of the farm business. Property taxes paid by landlords are excluded. Expenditures for non-farm activities; farm-related activities such as providing customwork for others, the production and harvest of forest products, and recreational services; and household expenses are excluded. In 1987, as in other recent censuses, operators producing crops, livestock, or poultry under contract often were unable or unwilling to estimate the cost of production inputs furnished by the contractors. As a consequence, extensive estimation was required for contract producers.

**Livestock and poultry purchased.** These expenses include the total amount spent by the operator, his/her landlord, and by others for all livestock and poultry bought during 1987 for production on the farm or ranch. The total include amounts spent for cattle, calves, hogs, pigs, sheep, hatchery eggs, etc. The value of livestock or poultry grown under contract or fed on a custom basis were made at the time they arrived on the farm or ranch.

**Feed for livestock and poultry**. These expenses include the cost of all feed for livestock and poultry during 1987. The cost included grain, hay, silage, mixed feeds, concentrates, etc.

**Seed Cost**. These expenses include the cost of all seeds, bulbs, plants and trees, or the estimated cost of these items if provided by contractors. Seed cost does not include the value of seed grown on this place.

**Commercial Fertilizer.** The expense for commercial fertilizer is the amount spent on fertilizer during 1987 including the cost of custom application. The cost of custom application was excluded from the 1982 and 1978 data.

**Agricultural Chemicals.** These expenses include the cost of all insecticides, herbicides, fungicides, and other pesticides, including costs of custom application. Data exclude commercial fertilizer purchased. The cost of custom application was excluded from the 1982 and 1978 data. The cost of lime was excluded from the 1987 and 1982 data, but included in 1978.

**Customwork, Machine Hire, and Rental of Machinery and Equipment.** These expenses include costs incurred for having customwork done on the place and for renting machines to perform agricultural operations. The cost of cotton ginning is excluded. The cost of labor involved in the customwork service is included in the customwork expense. The cost of custom application of fertilizer and chemicals was included in the 1982 and 1978 customwork data, but is now included in expenditures for these items in 1987. The cost of hired labor for operating rented or hired machinery is included as a hired farm and ranch labor expense.

**Hired Farm and** Ranch Labor. These expenses include the total amount paid for farm or ranch labor including regular workers, part-time workers, and members of the operator's family if they received payments for labor. It includes social security taxes, State taxes, unemployment tax, and payment for sick leave or vacation pay.

**Repairs and Maintenance**. These expenses include all expenses for the upkeep of buildings, motor vehicles, and farm equipment used for the farm business.

**Interest.** In 1987, separate data were collected for interest paid on debts secured by real estate and interest paid on debts not secured by real estate. In 1982, only total interest expenses were collected.

**Race.** See all other races; Black and other races.

**Rental of farmland.** This income includes gross cash rent or share payments received from renting out farmland; payments received from the lease or sale of allotments for crops such as tobacco; and payments received for livestock pastured on a per-head, per-month or per-pound basis. It excludes rental income from nonfarm property.

**Sales of forest products.** This income includes gross receipts from the sales of Christmas trees, standing timber, maple products, gum for naval stores, firewood, and their other products from the farm business. It excludes income from nonfarm timer tracts and sawmill business.

**Total Sales.** This item represents the gross market value of all agricultural products sold before taxes and expenses in the census year including livestock, poultry, and their products; and crops, including nursery crops, and hay. Respondents were asked to include landlords' and contractors' shares. The value of commodities

placed in CCC loans are included as sold. In 1987, all farms including abnormal farms were tabulated by size based on reported sales. In 1982 and 1978, abnormal farms were included in the total sales figure but excluded from the detailed size breakdowns. Abnormal farms include institutional farms, experimental and research farms, and Indian reservations.

**Total Woodland.** This category includes natural or planted woodlots or timber tracts, cutover and deforested land with young growth which has or will have value for wood products, land planted for Christmas tree production, and woodland pastured.. Land covered by sagebrush or mesquite was to be reported as other pastureland and rangeland or other land.

**Value of Agricultural Products Sold Directly to Individuals for Human Consumption.** This item represents the value of agricultural products produced and sold directly to individuals for human consumption from roadside stands, farmers' markets, pick-your-own sites, etc. It excludes nonedible products such as nursery products, cut flowers, wool, etc. Sales of agricultural products by vertically integrated operations through their own processing and marketing operations were excluded.

**Value of Crop Production.** This item represents the estimated value of all crops harvested during the 1987 crop year. Data for the value of crops harvested were obtained by multiplying the average estimated value per unit by the reported acres or quantity harvested. Generally, harvested units of production (pounds, bushels, bales, etc.) were multiplied by State estimates of prices per unit. If only acres harvested were reported, State estimates for value of production per acre were used. The State average production price and production value per acre used in these calculations were obtained usually from publications of the National Agricultural Statistics Service, USDA. When USDA estimates were not available, Bureau of the Census statisticians made estimates using available sources such as data from adjacent States, respondent report forms, county extension agents, and other persons knowledgeable about specific crops.

**Value of Land and Buildings.** Respondents were asked to report their estimate of the current market value of land and buildings owned, rented or leased from others, and rented or leased to others. Market value refers to the value the land and building would sell for under current market conditions. If the value of land and buildings was not reported, it was estimated using the average value of land and buildings from a similar farm in the same geographic area.

**Value of Livestock and Poultry on Farms.** Data for the value of livestock and poultry on farms were obtained by multiplying the inventory of each major age and sex group by State average prices. The State average prices for cattle, hogs, sheep, Angora goats, hens and pullets of laying age, and turkeys were obtained primarily from data published by the National Agricultural Statistics Service, USDA. Prices applied to other livestock and poultry were census-derived averages based primarily on reported value of sales in the census.

**Vegetables Harvested for Sale.** The acres of vegetables harvested is the summation of the acres of individual vegetables harvested. All of the individual vegetable items may not be shown.

**Woodland Pastured.** This category includes all woodland used for pasture or grazing during the census year. Woodland or forest land pastured under a per-head grazing permit was not counted as land in farms and, therefore, was not included in woodland pastured.

**Write-in Crops.** To reduce the length of the report form, only the major crops for the region were prelisted. For other crops, the respondent was requested to look at a list of crops in each section and write in the crop name and its code. For crops that had no individual code listed on the report form, the respondent was to write in the crop name and code the crop into the appropriate "all other" category for that section. Write-in crops coded as "all other" were reviewed and assigned a specific code when possible. Crops not assigned a specific code were left in the appropriate "all other" category.

In some cases, the reviewers were unable to determine the specific crop reported by the respondent because of incomplete or generalized crop names. To ensure proper coding, most of these respondents were telephoned. Reports for those not telephoned were changed on the basis of other reports for the area.

# HOW TO USE THE DATA DICTIONARY

This computer-generated report documents the data contents and the record layout of the file. Below is a brief description of the information provided for each data item.

The first line of each data item description gives the name, size/scale, begin position, field width, data type, and the variable label. Following these items, on subsequent lines, are any applicable notes and value codes. Each of the items is defined below.

1. **Name.** This is an arbitrarily assigned 8 character identifier. It may be mnemonic such as "STATE" or "EDNUMBER", or a sequential identifier such as "TAB1", "TAB2", etc.

2. **Size/Scale.** The size of a data item is given in characters. The scale of a data item is given in integer powers of 10. Implied decimals or multipliers (in integer powers of ten only) are indicated by a "-" or a "+" followed by a number. For example, 123.45 would appear on the data tape as 12345, and the size/scale value would be 5/-2. A number recorded in thousands (12,345,000 for example) would appear on the data tape as 12345 and the size/scale value would be 5/+3. Scale factors which are not an integer power of ten are identified in the notes following the label, and in the footnotes.

3. **Begin Position.** This is the location in the data record of the first character of the data item.

4. **Field Width.** Space allotted for the data item.

5. **Data Type.** The data type indicates whether the data item is alphanumeric (A) or numeric (N).

6. **Description** (not labeled on the data dictionary).

   **Label.** This is a single 40 character line or a set of 40 character lines which describes the data item.

   **Notes and Value Codes.** This section provides any relevant notes or footnote references. In addition, any value codes necessary for the data item are listed and labeled here.

## MACHINE READABLE DATA DICTIONARY LAYOUT

The *Census of Agriculture, 1987: Final State File* machine readable dictionary is available on the data tape under Data Set Name (DSN): AG87STAT-TXT.

The final State data dictionary contains 79,073 fixed-length records totaling 25,145,312 bytes. Each record is 316 characters long and contains the following information.

| Field Name | Field Type | Field Width | Decimal | Description |
|---|---|---|---|---|
| SEGMENT | N | 2 | 0 | Identifies the tape segment. This number ranges from 1 - 98. |
| FIELD_NAME | C | 8 | 0 | Data item name. Because of the large number of data items in this file, data items are identified by their sequence number. This sequence number ranges from 1 - 77449. |
| TEXT40 | C | 40 | 0 | Contains an abbreviated description of the data item. |
| ITEM_DESC | C | 255 | 0 | Defines the contents of the data field. |
| START_POS | C | 5 | 0 | Beginning character location for data field within its respective data segment. |
| FIELD_LEN | N | 4 | 0 | Provides width of field. |
| FIELD_TYPE | C | 1 | 0 | Defines the data field as either alphabetic "A" or numeric "N". |
| FIELD_DEC | N | 1 | 0 | For numeric fields, indicates the number of implied decimal places. |

# 1987 CENSUS OF AGRICULTURE FINAL STATE FILE
# INDEX FOR DATA ITEMS

| Item | Field Name |
|---|---|
| Abnormal farms | 5704-5705 |
| Acres irrigated | 3156-3197 |
| Agricultural chemicals | 145-147 |
| Agricultural chemicals | 693-700 |
