

2007 CENSUS OF AGRICULTURE

Hispanic Farmers

Farm Operators of Spanish, Hispanic or Latino Origin

The 2007 Census of Agriculture shows that U.S. farmers and ranchers are becoming more diverse and that the number of farm operators of Spanish, Hispanic or Latino origin continues to rise.

The 2007 Census counted a total of 82,462 Hispanic operators on 66,671 farms and ranches across the United States. The number of Hispanic operators grew 14 percent from 2002, significantly outpacing the 7 percent increase in U.S. farm operators overall. A total of 55,570 U.S. farms had a principal operator of Spanish, Hispanic or Latino origin in 2007, up 10 percent from 2002.*

The number of Hispanic farm operators grew 14 percent from 2002.

U.S. Department of Agriculture

National Agricultural Statistics Service

	2007	2002	% Change
All Farm Operators	3,281,534	3,053,801	+7
Hispanic Farm Operators	82,462	72,349	+14
Hispanics as % of Total	2.5%	2.3%	+10
All Principal Farm Operators	2,204,792	2,128,982	+4
Hispanic Principal Operators	55,570	50,592	+10
Hispanics as % of Total	2.5%	2.4%	+6

* Before 2002, the Census of Agriculture collected detailed demographic data on only one operator per farm. Since 2002, the census has taken a more comprehensive approach, counting all operators and collecting detailed demographic information on up to three operators per farm. The principal operator is the person in charge of day-to-day decisions for the farm or ranch.

2007 CENSUS OF AGRICULTURE

The states with the highest percentage of Hispanic principal farm operators are:

1. New Mexico
2. California
3. Texas
4. Florida
5. Hawaii

How Do They Compare?

When compared to all farms nationwide, those with Hispanic or Latino principal operators tend to be smaller both in terms of size and sales. These operations are also less likely to have Internet access.

FARM/RANCH OPERATIONS	All Farms	Hispanic-Operated Farms
Average Size of Farm	418 acres	307 acres
Average Value of Sales	\$134,807	\$119,634
Sales & Government Payments <\$10,000	58%	67%
Farms with Internet Access	57%	44%

Hispanic or Latino principal farm operators themselves are predominantly male, as are principal operators overall. However, the total number of female farm operators of Hispanic or Latino origin grew 20 percent from 2002. Women now comprise 12 percent of Hispanic operators, up from 10 percent in 2002.

Hispanic farmers and ranchers tend to be slightly younger on average than their counterparts nationwide. They are significantly more likely to own all of the land that they operate, rather than renting or leasing land. They are more likely to have worked at least some days in an off-farm job. And, a higher-than-average percentage of Hispanic or Latino operators report that they've been on their present farm or ranch for 4 years or less.

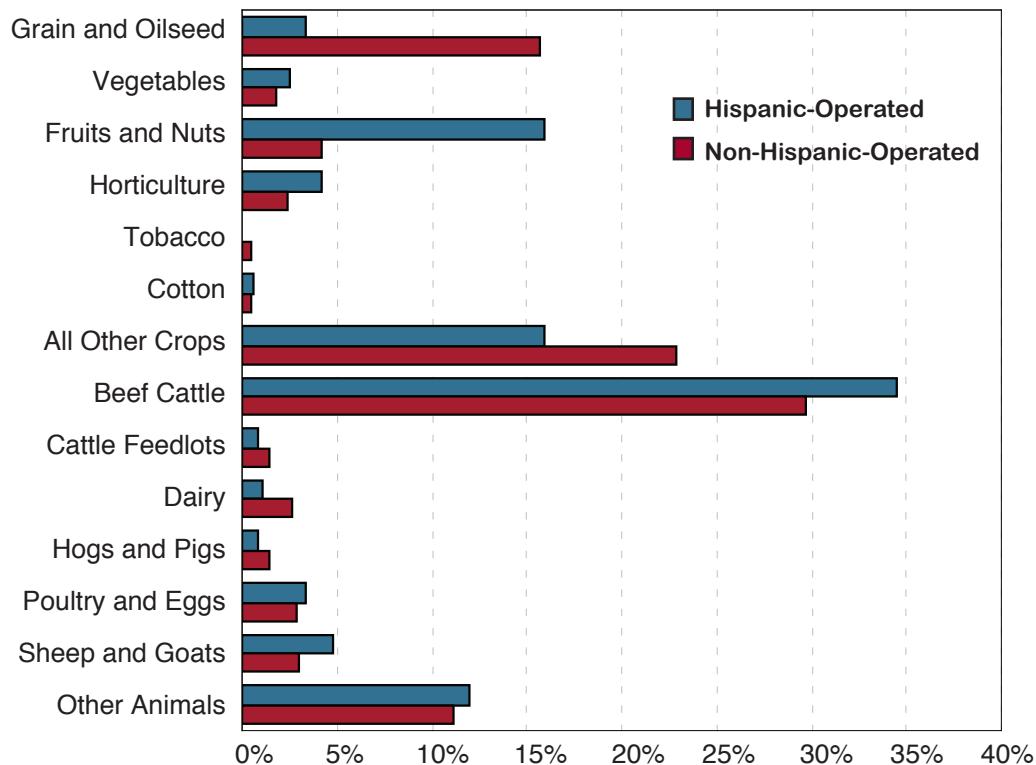

FARM/RANCH OPERATORS	All Operators	Hispanic or Latino Operators
Male	86%	88%
Derive <50% of Income from Farming	80%	87%
Farming as Primary Occupation	45%	45%
Operator Owns All Farm Acres	69%	77%
Worked Off Farm	65%	73%
4 Years or Less on Present Farm	10%	16%
65 Years or Older	30%	27%
Average Age of Operator	57.1	56.0

Hispanic Farmers

What Do They Produce?

More than one-third of all Hispanic-operated farms and ranches are classified as beef cattle operations. Another 16 percent are classified as fruit and nut farms, compared to 4 percent of farms overall. And, while 15 percent of farms overall are classified as grain and oilseed farms, only 3 percent of Hispanic-operated farms fall into this category.

Every Voice Counts

In conducting the 2007 Census of Agriculture, the National Agricultural Statistics Service (NASS) placed a special emphasis on outreach to traditionally under-represented populations, including small, minority, female and limited-resource farm operators.

Working in partnership with community-based organizations nationwide, NASS engaged in an extensive effort to make sure the 2007 Census mailing list included all farms and ranches, regardless of size, location or type of operation. NASS also partnered with these groups to provide hands-on assistance and support to local producers — including non-English speakers — in filling out their Census forms. In addition, NASS targeted its media outreach efforts towards publications and broadcast outlets that reach small, minority and non-English-speaking producers.

The 2007 Census of Agriculture marked the first time NASS attempted to collect a Census report from individual farm operators on American Indian reservations in all states. In 2002, reservations were counted as a single farm and reservation officials supplied counts of individual operators. NASS will issue a follow-up report about agricultural activity on American Indian reservations in the spring of 2009.

NASS is committed to continuing its outreach to all underserved populations.

2007 CENSUS OF AGRICULTURE

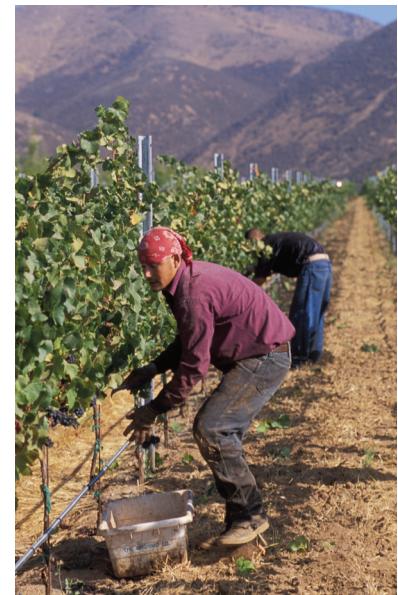

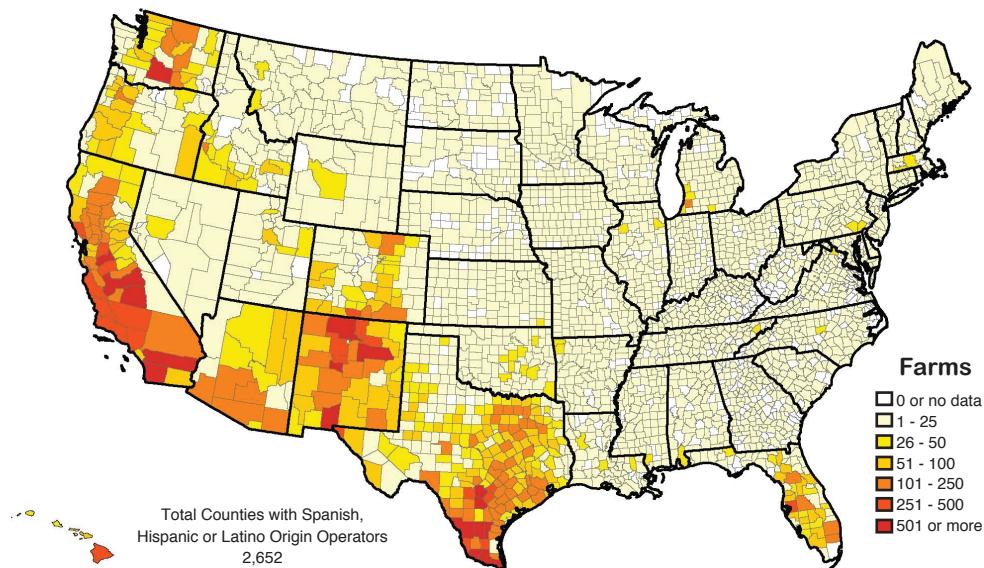

Where Do They Farm?

Texas, New Mexico and the Pacific Coast states saw the largest increases in Hispanic or Latino farm operators from 2002 to 2007. Overall, the percentage of Hispanic principal operators is highest in the Western United States. The states with the highest percentage of Hispanic principal operators are New Mexico (30.9 percent), California (11.3 percent), Texas (8.2 percent), Florida (6.7 percent) and Hawaii (5.9 percent).

In 29 states, people of Hispanic or Latino origin comprise less than 1 percent of all principal operators.
