Certified Organic Highlights

The 2015 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2015, the United States had 12,818 certified organic farms that produced \$6.2 billion in certified organic products. Idaho had 168 certified organic farms with 167,182 acres of certified land that produced \$85.0 million in certified organic products. Of those farms in Idaho, 54 percent were certified organic for 10 years or more.

In Idaho, 136 certified organic farms sold to wholesale markets, 63 farms sold directly to consumers, and 42 farms sold directly to retail markets and institutions. The first point of sales for 70 percent of certified organic farms in Idaho was within 100 miles of the farm and 47 percent was within 100-499 miles of the farm. Over the next five years, 36 percent of certified organic operations in Idaho plan to increase certified organic agricultural production.
