Certified Organic Highlights

The 2015 Certified Organic Survey is a survey of all operations identified as having certified organic production. Certified organic farms must meet the standards set out by USDA’s Agricultural Marketing Service’s (AMS) National Organic Program (NOP) and be certified compliant by an approved agent of NOP. Results from the survey provide acreage, production, and sales data for a variety of certified organic crops and certified organic livestock.

In 2015, the United States had 12,818 certified organic farms that produced \$6.2 billion in certified organic products. Rhode Island had 19 certified organic farms that produced \$474,000 in certified organic products. Of those farms in Rhode Island, 47 percent were certified organic for 10 years or more.

In Rhode Island, 9 certified organic farms sold to wholesale markets, 14 farms sold directly to consumers, and 7 farms sold directly to retail markets and institutions. The first point of sales for 100 percent of certified organic farms in Rhode Island was within 100 miles of the farm. Over the next five years, 58 percent of certified organic operations in Rhode Island plan to increase certified organic agricultural production.
