Table 18.—PERCENT OF ALL FARMS REPORTING SPECIFIED EXPENDITURES; BY DIVISIONS AND STATES: 1949, 1944, AND 1939

[Figures based on data shown in table 17. All 1949 data and data for livestock and poultry purchased, and seeds, bulbs, plants, and trees purchased for 1944 are based on reports for only a sample of farms. See text]

	Region, division, and State	Any specified expenditures, 1949	Machine hire and/or hired labor					Feed for livestock and poultry			Livestock and poultry purchased		Seeds, bulbs, plants, and trees purchased		Gasoline and other petroleum fuel and oil[1]		Farm machinery repairs, 1949[2]		
			Total, 1949	Machine hire, 1949	Hired labor

Table 21.—PERCENT DISTRIBUTION OF FARMS REPORTING CASH EXPENDITURES FOR LABOR BY AMOUNT EXPENDED; BY DIVISIONS AND STATES: 1949 AND 1944

[Figures based on data shown in table 20. All 1949 data are based on reports for only a sample of farms. See text]

	Region, division, and State	Percent distribution of all farms reporting by amount of cash expended												Percent distribution of farms reporting hired workers week preceding the enumeration and expenditures, for hired labor, by amount of cash expended, 1949						Percent distribution of farms with no hired workers reported week preceding the enumeration and expenditures, for hired labor, by amount of cash expended, 1949					
		$1-$99		$100-$199		$200-$499		$500-$999		$1,000-$2,499		$2,500 and over		$1-$99	$100-$199	$200-$499	$500-$999	$1,000-$2,499	$2,500 and over	$1-$99	$100-$199	$200-$499	$500-$999	$1,000-$2,499	$2,500 and over

CHAPTER V

FARM TAXES AND CASH RENT

CONTENTS

Page

Introduction ... 303
Presentation of the statistics ... 303

DEFINITIONS AND EXPLANATIONS

Farm operator ... 303
Land in farms ... 303
Owner-operators and tenants ... 303
Value of land and buildings ... 303

PART 1.—FARM TAXES

DEFINITIONS AND EXPLANATIONS

Inquiries on farm taxes for the 1950 Census ... 305
Tabulation of 1950 Census data on farm taxes ... 305
Other published data ... 305
History of Census data on farm taxes ... 305
Limitations of data on farm taxes ... 306

CHART

Real-estate taxes per acre for all owner-operated farms, full-owner farms, and part-owner farms, for the United States: 1930 to 1950 ... 306

MAP

Real-estate taxes per $100 of value for farms operated by full owners: Census of 1950 ... 304

TABLES FOR THE UNITED STATES

Table—
1.—Farm taxes paid by owner-operators, for the United States: Census of 1950 ... 307
2.—Farm taxes paid by owner-operators, for the United States: Censuses of 1950, 1940, and 1930 ... 308

TABLES FOR GEOGRAPHIC REGIONS, DIVISIONS, AND STATES

3.—Farm taxes paid by full owners, by divisions and States: Census of 1950 ... 310
4.—Percent distribution of full owners not renting land to others, by value of owned land and buildings; by divisions and States: Census of 1950 ... 314
5.—Percent distribution of full owners renting land to others, by value of owned land and buildings; by divisions and States: Census of 1950 ... 316
6.—Number, acreage, value, and amount of farm property taxes for farms operated by full owners not renting land to others; by divisions and States: Censuses of 1950, 1940, and 1930 ... 318
7.—Farm taxes paid by part owners, by divisions and States: Census of 1950 ... 320
8.—Percent distribution of part owners not renting land to others, by value of owned land and buildings; by divisions and States: Census of 1950 ... 324
9.—Percent distribution of part owners renting land to others, by value of owned land and buildings; by divisions and States: Census of 1950 ... 326
10.—Number, acreage, value, and amount of farm property taxes for farms operated by part owners not renting land to others; by divisions and States: Censuses of 1950 and 1940 ... 328

PART 2.—CASH RENT

DEFINITIONS AND EXPLANATIONS

Inquiries on cash rent for the 1950 Census ... 331
Tabulation of 1950 Census data on cash rent ... 331
Other published data ... 332
History of Census data on cash rent paid ... 332
Limitations of data on cash rent ... 332

CHART

Cash-rent per acre for all farms, for part-owner farms, and tenant farms for the United States and regions: 1930 to 1950 ... 331

MAPS

Most frequent method of renting farms, April 1, 1950 ... 330
Cash tenants as a percent of all tenants for commercial farms only, April 1, 1950 ... 330
Average cash rent paid per $100 of value for farms operated by part owners: Census of 1950 ... 332
Average cash rent paid per $100 of value for farms operated by cash tenants: Census of 1950 ... 332

TABLES FOR THE UNITED STATES

Table—
1.—Cash rent paid for farm land and buildings, for the United States: Censuses of 1950, 1940, and 1930 ... 333
2.—Cash rent paid for farm land and buildings, for the United States: Census of 1950 ... 334

TABLES FOR GEOGRAPHIC REGIONS, DIVISIONS, AND STATES

3.—Cash rent paid by part owners reporting both value of land and buildings and amount of cash rent, by divisions and States: Censuses of 1950 and 1940 ... 335
4.—Cash rent paid by part owners reporting both value of land and buildings and amount of cash rent, for commercial and other farms; by divisions and States: Census of 1950 ... 336
5.—Percent distribution of part owners renting land on cash basis, by value of rented land and buildings; by divisions and States: Census of 1950 ... 337
6.—Cash rent paid by cash tenants reporting both value of land and buildings and amount of cash rent, by divisions and States: Censuses of 1950, 1940, and 1930 ... 339
7.—Cash rent paid by cash tenants reporting both value of land and buildings and amount of cash rent, for commercial and other farms; by divisions and States: Census of 1950 ... 342
8.—Percent distribution of cash tenants, by value of rented land and buildings; by divisions and States: Census of 1950 ... 344

CHAPTER V.—FARM TAXES AND CASH RENT

Introduction.—This chapter presents statistics on farm taxes and cash rent, with related information on number of farms, land in farms, owned and rented land, and value of land and buildings. Data on farm taxes are shown only for property owned by owner-operators of farms and data on cash rent are shown only for lands rented from others by farm operators renting land solely on a cash basis.

Early plans provided for the inclusion of data on farm mortgage indebtedness in this chapter. Farm mortgage data will appear as a separate special report and will be incorporated as part 8 of Volume V of the 1950 Census of Agriculture reports.

Presentation of the statistics.—This chapter is presented in two parts—part 1 relating to farm taxes and part 2, to cash rent. The statistics are presented as totals for the United States, for major geographic areas, and for each of the States. An outline map showing the States and the geographic areas for which totals are shown appears in the Introduction to this volume.

Most of the data presented in this chapter represent estimates based on a sample of the farms. Figures based on the sample may not be in exact agreement with those obtained by tabulating the data for all farms. Each table containing data based on reports for only a sample of farms carries a headnote to that effect. For a description of the procedures used in the enumeration and office processing of the enumerated data and of the sampling technique, and for tables giving the reliability of estimates based on the sample, see the Introduction to this volume.

Comparative data for earlier censuses provide a measure of the changes that have occurred from census to census. Charts and maps present graphically some of the more significant data included in the tables.

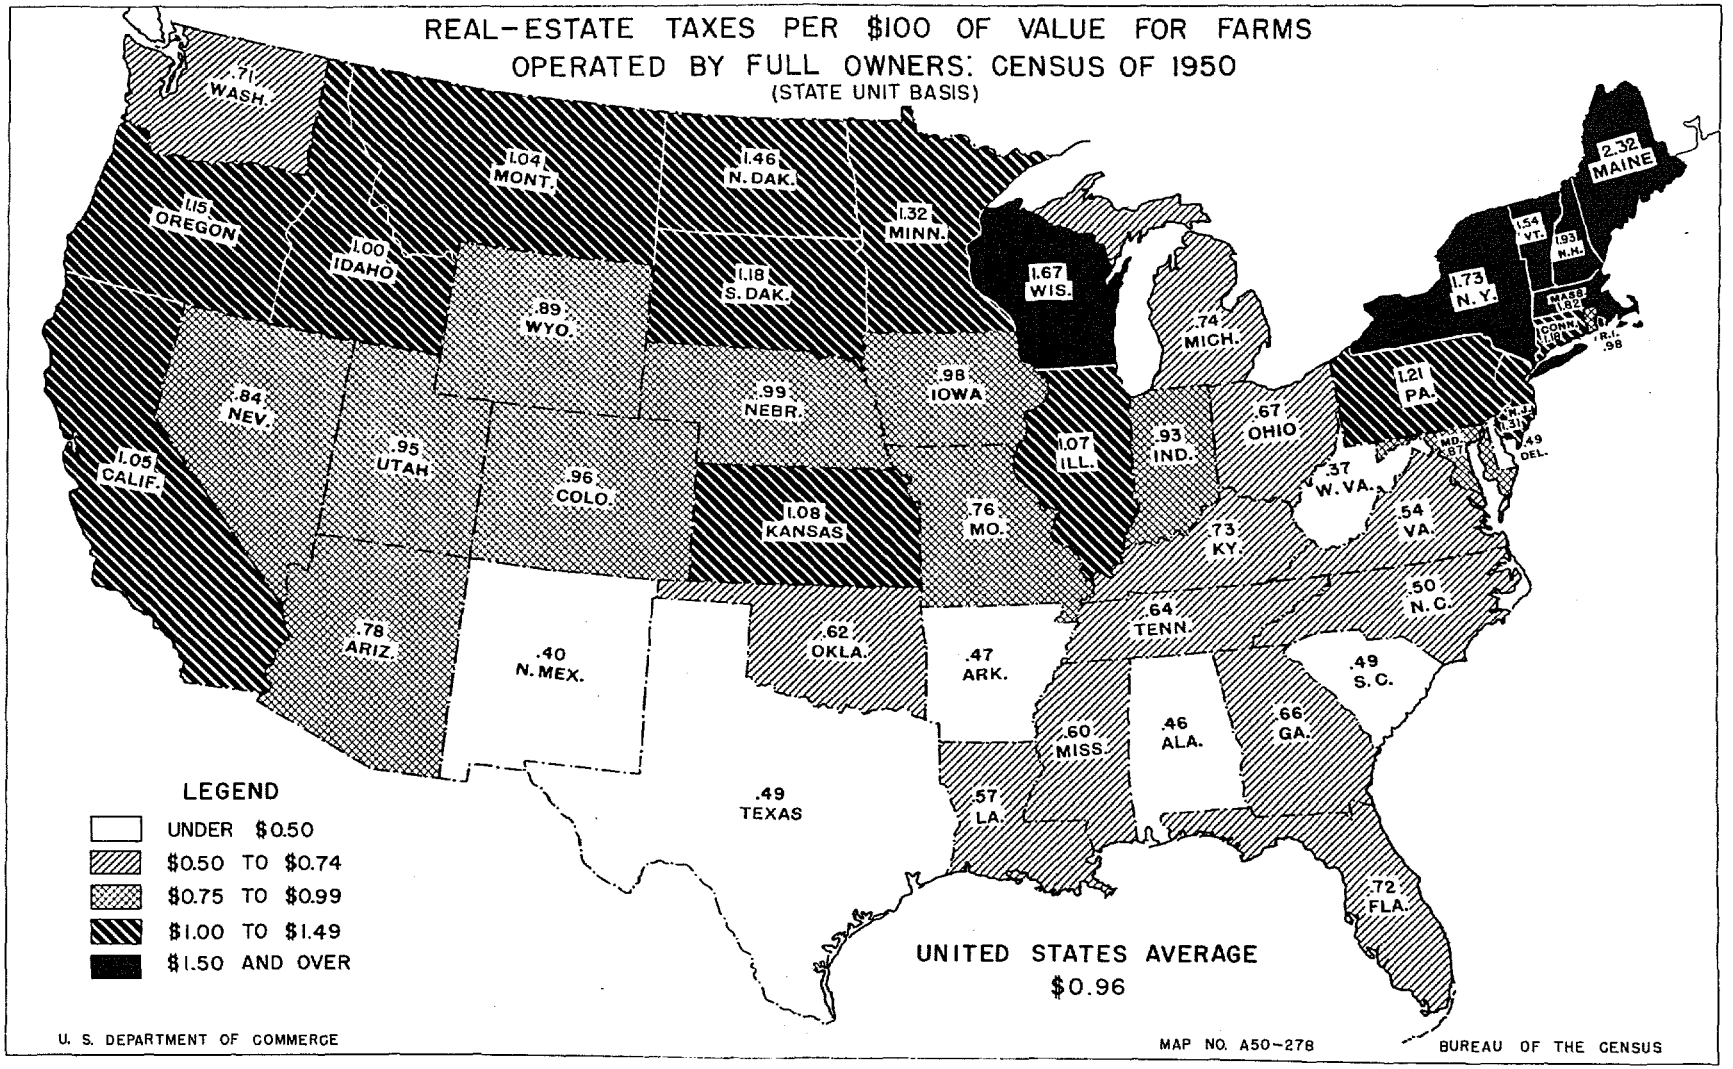
DEFINITIONS AND EXPLANATIONS

Only definitions of particular significance in regard to farm taxes and cash rent are discussed in this chapter. For definitions and explanations of items of general application, refer to the Introduction to this volume. For a more detailed discussion of land in farms, refer to chapter I and for the classifications of farms by tenure of the operator refer to chapter XI.

Farm operator.—A farm operator is a person who operates a farm either performing the labor himself or directly supervising it. He may be an owner, a hired manager, or a tenant. If he rents land to others or has land cropped for him by others, he is considered the operator of only the acreage which he retains. The number of farm operators is considered the same as the number of farms.

Land in farms.—For the 1950 Census, the land to be included in each farm was determined on the basis of the inquiries regarding the number of acres owned, the acres rented from others or worked on shares for others, and the acres rented to or worked on shares by others. The acres in the farm were obtained by adding the acres owned and the acres rented from or worked on shares for others and subtracting the acres rented to or worked on shares by others. In case of a managed farm, the person in charge was asked the total acreage managed for his employer and from this total managed acreage was subtracted any acreage rented to or cropped by others. In earlier censuses, the acreage in each farm was determined by asking directly the acreage in the farm. Enumerators and farm operators were instructed to include any land rented from others and to exclude any land rented to others.

Owner-operators.—Farm operators who own land are owner-operators.



Full owners are farm operators who own land but do not rent land from others.

Part owners are farm operators who own land and also rent land from others.

Tenants.—Tenants are farm operators who rent from others or work on shares for others all the land they operate.

Cash tenants pay cash and cash only as rent, such as $10 an acre or $1,000 for the use of the farm.

Value of land and buildings.—The value of land and buildings to be reported was the approximate amount for which the land and the buildings on it would sell. The value of land and buildings was asked for only a sample of the farms; however, it was not reported for all the farms included in the sample. For the United States, farms for which the value of land and buildings was reported represented 87 percent of the farms and contained 85 percent of the land in the farms included in the sample. The farms for which values were reported are not fully representative of all farms in some States.

CHAPTER V (Part 1.)—FARM TAXES

Inquiries on farm taxes for the 1950 Census.—The inquiries on the questionnaire for the 1950 Census of Agriculture in regard to taxes related only to owner-operators of farms. The inquiries applied to all farm property owned. Therefore, for operators renting land to others, the taxes were not restricted to the land operated. For part owners, the taxes related only to land owned.

The questionnaire carried the following inquiries on farm taxes to be asked only for a sample of the farms enumerated:

What was the total amount of property taxes paid (or payable) in 1949 on *all* property owned by you? . . . . . (Include *only* taxes on real estate and personal property.)	$_____/00 (Dollars only)	☐ None required
(*a*) Of this total, what was the amount of taxes on the land and buildings?	$_____/00 (Dollars only)	☐ Not shown separately on tax bill

The enumerator was instructed to report the amount of taxes represented by a general levy for one full year. Only taxes on real estate and on personal property were to be included. Assessments or taxes for irrigation, drainage, or levee districts were not to be included. The enumerator was further instructed not to include income taxes, sales taxes, poll taxes, or automobile fees and licenses. Also, taxes paid or due for years prior to 1949, or any fines or interest charged for delinquency, were not to be included. If an operator was wholly exempt from property taxes, or if no taxes were levied on his property, provision was made for reporting that no tax was required.

Tax statements do not always show separately the taxes on real estate and personal property. If the respondent did not know what part of the total property taxes represented taxes on land and buildings, and he could not estimate the real-estate taxes readily from his tax statement, the questionnaire provided for reporting the total tax only and for indicating that the taxes on land and buildings were not shown separately.

No personal-property taxes are levied in the States of Delaware and New York. In Pennsylvania, taxes on farm personal property are negligible. Therefore, for these States, the questionnaire carried the inquiry on total property taxes but not the inquiry on taxes on land and buildings. For these three States, the total property tax reported is shown as representing taxes on land and buildings.

Tabulation of 1950 Census data on farm taxes.—The tabulations provided for showing total property taxes, real-estate taxes, and personal-property taxes. Taxes on personal property were obtained by subtracting real-estate taxes from the total property taxes. The tables show total taxes per operator reporting; real-estate taxes per operator, per acre, and per $100 value of land and buildings; and personal-property taxes per operator. The questionnaire made no provision for reporting the value of the personal property taxed. The per-operator averages shown for personal-property taxes have been calculated on the basis of all operators reporting both total taxes and real-estate taxes. The tabulations did not provide for obtaining a count of operators reporting personal-property taxes, that is, total property taxes in excess of the taxes on land and buildings.

The tabulations of tax information were made only for owner-operators who replied to the tax inquiries and also reported the value of the owned land and buildings. For the United States, both the value of the owned land and buildings and tax information were reported for 83.7 percent of the owner-operators and for 84.3 percent of the land owned. The values reported may not always be fully representative of all farm lands owned by farm operators. The tables include no estimates of taxes paid by owner-operators who did not report taxes or who did not report the value of the owned land and buildings.

For farm operators reporting total property taxes and not the taxes on the land and buildings, no attempt was made to estimate the amount of the taxes on the real estate. Totals for such farm operators are shown separately. Data are also shown separately for farm operators for whom no property taxes were collected because of exemptions, not being on the assessment rolls, or for other reasons.

The tax information called for on the questionnaire related to property owned by the farm operator. It was not restricted to property owned and operated by him. Data are shown separately for full owners and for part owners; and, for each of these tenure groups, data are shown separately for those operators who rented land to others. For full owners who rented no land to others, the real-estate taxes relate to the land operated; for full owners who rented land to others, the real-estate taxes relate to the combined acreage of the land operated and the land rented to others; for part owners who rented no land to others, the real-estate taxes relate to the owned portion only of the land operated; and for part owners who rented land to others, the real-estate taxes relate to the owned portion of the farm plus the owned land rented to others.

Other published data.—State totals for farm taxes are also shown in State Table 18 of Volume I of the 1950 Census of Agriculture reports. No data are shown for counties or for State economic areas.

Data on number of farms, land in farms, land use, and value of land and buildings for all farms in the specified tenure classes for which more restricted data appear in this chapter, are presented in chapter XI of this volume.

Inventories of personal property on farms are available in the 1950 Census for numbers of specified kinds of livestock in chapter VI and on numbers of specified farm equipment in chapter III. Some of these data are shown for commercial farms by tenure of the farm operator in chapter XI. Chapter XI also includes data on specified facilities, sales of farm products, and specified farm expenditures.

History of census data on farm taxes.—Farm tax data for previous censuses are available only for 1940 and 1930. For 1940, there was no inquiry on total property taxes as separate questions were asked for real-estate and personal-property taxes. For 1930, the tax inquiries, as for 1950, called for total property taxes and real-estate taxes, the personal-property taxes being obtained by subtraction. The tax inquiries for 1940 and for 1930, as for 1950, were applicable only to owner-operators. The inquiries referred only to property owned by the operator and were limited to the farm operated. Owner-operators who owned additional land were to report only the taxes for the owned land in the farm

237460 O - 53 - 23

operated. However, the data were tabulated separately for owner-operators who reported that they owned no additional land. Data for operators who failed to report as to whether they owned additional land were tabulated with those reporting additional land owned. Tax data for 1930 are available only for full owners.

For 1940 and 1930, the tax inquiries did not determine farms for which no taxes were required. The tables relating to taxes included only reports for those owner-operators who reported taxes paid. The reports for those owner-operators for whom no taxes were required could not be distinguished from those who failed to report taxes paid and are included with the "not reporting" group in the tables.

Limitations of data on farm taxes.—Census data on farm taxes were asked for owner-operators only, and, therefore, cannot be related to all farms. Tax exemptions, and preferential assessments or preferential tax rates that influence tax structure in many States may affect differently the taxes paid by owner-operators and those paid by other owners of farm lands. Many of the tax exemptions, particularly homestead exemptions, apply only to owners residing on their property. On the other hand, farm lands in Indian reservations, farm lands owned by the Federal Government, States, counties, municipalities, or other public agencies, and farm lands owned by tax-exempt institutions are mostly manager-operated or tenant-operated. For owner-operators, the data are restricted to those reporting both tax information and value of the owned land and buildings. The data for such farm lands and the taxes thereon may not be fully representative of the data for all farm lands owned by farm operators.

The tax data for the 1950 Census show separately the number of owner-operators for whom no farm property taxes were required. Data for operators partially exempt from property taxes are included with those for operators having no exemptions. In general, the data shown for operators for whom no property tax was required represent property wholly exempt from taxes. However, the data may include some taxable lands which escaped taxation. For some farms, the reply of "no taxes required" may have been in error especially for owner-operators who had recently acquired the land. In such instances, the property may have been subject to taxation but the 1950 owner may not have been required to pay taxes on the property for 1949. Also, in a few instances, the person furnishing the information was not the owner of the land and the inquiry may have been answered for this person rather than for the owner.

Data on farm taxes are presented only for States and larger geographic areas. Taxes vary greatly within States. The State figures may not be fully representative of the farm operators and farm lands in the State. For example, in an area with relatively low taxes, most of the farms may be owner-operated, while in an area of high taxes most of the farms may be tenant-operated and not included in the tabulations. In one area, most of the owner-operators may have reported both taxes and value of the land and buildings; in another area, many owner-operators may not have reported taxes or the value of the land and buildings and, hence, were not included in the tabulations.

In regard to personal-property taxes, no information was obtained in regard to the property taxed. Data for some of the items of personal property are shown by tenure for commercial farms in Chapter XI, "Color, Race, and Tenure of Farm Operator," of this volume. The amount of personal farm property varies considerably by tenure of the operator. Most owner-operators own considerably more personal farm property than do tenants. Therefore, the personal-property taxes per farm obtained for owner-operators are not representative for all farms.

Notwithstanding the limitations of the tax data, the figures for owner-operators provide some measure of the relative tax burdens on farm property for the various geographic areas.

* Not available.
[1] Based on all operators reporting both total taxes and real-estate taxes.
[2] No personal-property tax levied in Delaware or in New York; farm personal-property tax negligible in Pennsylvania, therefore inquiry was for total property tax only.

Table 4.—PERCENT DISTRIBUTION OF FULL OWNERS NOT RENTING LAND TO OTHERS, BY VALUE

[Data are based on reports for

	Region, division, and State	Reporting value of land and buildings and both total property taxes and real-estate taxes

*Not available.
[1]Based on all operators reporting both total taxes and real-estate taxes.
[2]No personal-property tax levied in Delaware or in New York; farm personal-property tax negligible in Pennsylvania, therefore inquiry was for total property tax only.
[3]$0.50 or less.

OWNERS NOT RENTING LAND TO OTHERS, BY DIVISIONS AND STATES: CENSUSES OF 1950, 1940, AND 1930

tax information are based on reports for only a sample of farms. See text]

Reporting real-estate taxes—Continued																						
Value of owned land and buildings (dollars)						Average of total property taxes per operator (dollars)			Real-estate taxes (dollars)									Personal-property taxes (dollars)				
Average per operator			Average per acre						Average per operator			Average per acre			Average per $100 of value			Average per operator[1]			Average per operator reporting, 1940

Table 7.—FARM TAXES PAID BY PART OWNERS, BY DIVISIONS AND STATES: CENSUS OF 1950—Continued

[All data for value of land and buildings and data relating to taxes are based on reports for only a sample of farms. See text]

	Region, division, and State	Operators renting land to others											
				Reporting value of owned land and buildings and both total property taxes and real-estate taxes									
		Total number	Land rented to others (acres)	Number	Land owned (acres)		Value of owned land and buildings (dollars)		Total property taxes per operator (dollars)	Real-estate taxes (dollars)			Personal-property taxes per operator[1] (dollars)
					Total	Per operator	Per operator	Per acre		Per operator	Per acre	Per $100 of value

CHAPTER V (Part 2).—CASH RENT

Inquiries on cash rent for the 1950 Census.—The arrangement under which land was rented from others was determined from the following inquiry which was asked of all farm operators who rented land from others:

Answer all parts (a) through (d)

(a) Do you pay to your landlord any cash as rent? . . . . . ☐ No ☐ Yes

(b) Do you pay to your landlord any share of the crops? (Such as ¼, ⅓, ½.) . . . . . ☐ No ☐ Yes

(c) Do you pay to your landlord any share of the livestock or livestock products? (Such as ¼, ⅓, ½.) . . ☐ No ☐ Yes

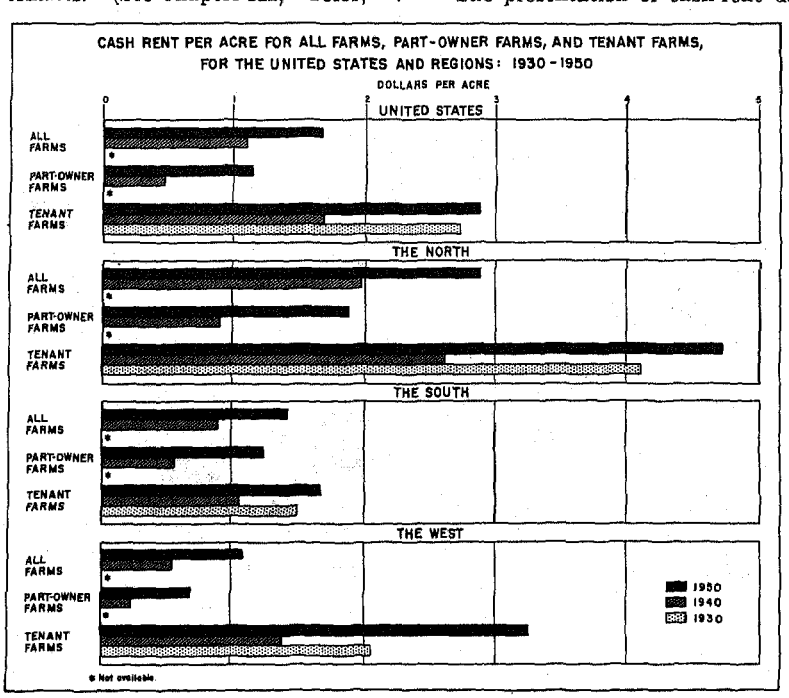
(d) Do you have this land under any other arrangement? . . . . . ☐ No ☐ Yes
(A fixed quantity of any product, upkeep of land and buildings, payment of taxes, keep of landlord, rent free, etc.)

The inquiry on amount of cash rent paid was asked for only a sample of the farms. The inquiry was worded as follows:

If you pay any cash as rent, what is the amount for the year? . . . . . $_____/00
(Dollars only)

The enumerator was instructed to include only the amount of rent paid or payable in cash. If a fixed quantity of any product was paid or was to be paid as rent, the value of the products was not to be included.

Tabulation of 1950 Census data on cash rent.—The data given for cash rent apply only to cash tenants and to part owners for whom both the amount of cash rent and value of rented land and buildings was reported. When the cash rent paid or to be paid represented only a part of the total rental, as in the case where a part of the farm was rented for cash and a part was rented for a share of the crops or livestock or livestock products, the reports were excluded from the tabulations. Tenants renting solely on a cash basis were determined by the subclassification of tenants on the basis of the replies to the inquiry as to the arrangement under which the land was rented. Tenants renting solely on a cash basis were classed as cash tenants. (See Chapter XI, "Color, Race, and Tenure of Farm Operator.") Part owners were not further classified on the basis of the rental arrangement for the land rented. Part owners paying both cash and a share of the products as rent were excluded from the tabulations, and only those part owners for whom both the amount of cash rent and the value of rented land and buildings were reported were included in the tabulations.



For the United States, cash rent data relate to 68.0 percent of the cash tenants and to 67.6 percent of the land rented from others by cash tenants. Cash-rent data for part owners relate to 22.6 percent of all part owners. However, most part owners rent on a share or share-cash basis rather than for cash only and, hence, would have been excluded from the tabulations. No data are available for part owners renting on a cash basis only for whom either the amount of cash rent paid or the value of the land and buildings was not reported.

The tables show the number of operators reporting, the total acres rented from others, the value of the rented land and buildings, the cropland harvested, and the amount of cash rent paid per operator, per acre, and per $100 of value. The data include no estimates of cash rent paid by those cash tenants or part owners renting on a cash basis for whom either the value of the rented land and buildings or the amount of cash rent paid was not reported.

The land rented from others by farm operators includes not only land operated but also any of the rented land which was subrented to others. Of 212,790 cash tenants in the United States in 1950, only 10,238 or 4.9 percent subrented land to others. The land subrented to others represented only 1.7 percent of the total land rented from others by cash tenants.

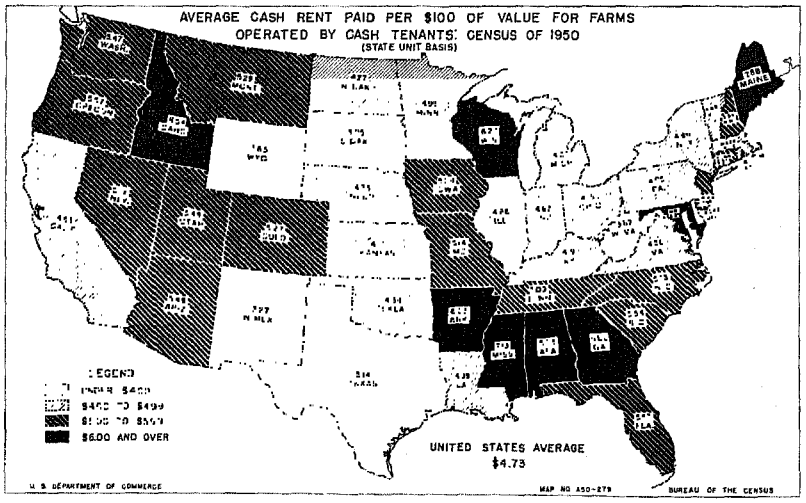
The tables include figures for cropland harvested in order to provide some indication of the use made of the land. For cash tenants, the cropland harvested consists entirely of rented land. For part owners, however, the cropland harvested also includes the owned land in the farm operated. If the cash tenant or part owner rented land to others, the figures for cropland harvested do not include any that was subrented.

The presentation of cash-rent data separately for commercial

and other farms (part-time, residential, and abnormal) tends to separate places rented primarily as residences from those rented for agricultural purposes. "Other farms" include many places occupied primarily as residences, often by persons with nonfarm employment or nonfarm income, and having sufficient agricultural production to qualify as farms.

Cash-rent data for tenants renting from relatives are shown separately to help to segregate the data for tenants for whom the rental arrangement and amount of rent may be affected by personal considerations.

Other published data.—Data for cash rent are also shown by States in Volume I. No data are shown for counties or for State economic areas.



Data are presented in chapter XI for the number of farms, land in farms, land use, and value of land and buildings for all farms by tenure of operator. Data for major crops, principal classes of livestock, sales of farm products, etc., are shown for commercial farms by tenure of the operator in chapter XI.

History of census data on cash rent paid.—The amount of cash rent paid by cash tenants is available only for two prior censuses, viz, 1940 and 1930. As for 1950, data are limited to those cash tenants who reported the amount of rent paid or payable. The data for 1940 and 1930 relate only to the land operated. Land subrented to others was not included.

Data for part owners renting on a cash basis are available for only one prior census, that of 1940. For 1940, as for 1950, cash-rent data were tabulated only for part owners renting land solely on a cash basis and reporting the amount of cash rent paid or payable.

Limitations of data on cash rent.—The amount of cash rent paid may not always represent the entire rental. Cash tenants and part owners paying cash may make payments other than cash or share of products. They may make minor repairs and do other maintenance work, or they may make other contributions which may influence the agreement as to the amount of cash rent paid. In some areas of the West where much of the grazing land is owned and administered by Federal or State agencies, the cash rent is established by the agencies administering the land.

The data presented provide very little information as to the quality of the land rented for cash or the use made of such land. However, value of the land and buildings provides some indication of the quality of the land and the acreage of cropland harvested gives some indication of its use. In the case of part owners, however, the cropland harvested includes land owned as well as land rented. For all cash tenants, considerable data as to land use, major crops, principal classes of livestock, income by source, etc., are available in chapter XI. Many of these data, however, are shown for commercial farms only. Similar data are shown in chapter XI for part owners, but the data relate to both owned and rented land and are for all part owners, rather than for those renting solely on a cash basis.

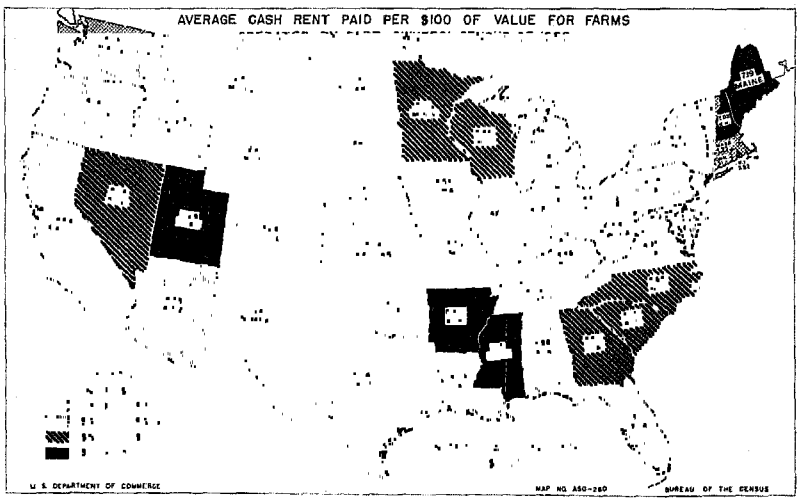


Table 1.—CASH RENT PAID FOR FARM LAND AND BUILDINGS, FOR THE UNITED STATES: CENSUSES OF 1950, 1940, AND 1930

[All 1950 data are based on reports for only a sample of farms. See text]

Table 6.—CASH RENT PAID BY CASH TENANTS REPORTING BOTH VALUE OF LAND AND BUILDINGS AND AMOUNT OF CASH RENT; BY DIVISIONS AND STATES: CENSUSES OF 1950, 1940, AND 1930—Continued

[All 1950 data are based on reports for only a sample of farms. See text]

	Region, division, and State	Cash tenants related to landlord													
		Number of farms		Percent of all tenants related to landlord		Land rented from others (acres)		Cropland harvested, 1949		Value of land and buildings, 1950 (dollars)		Cash rent paid (dollars)				
												Average per operator		Average per acre		Average per $100 of value, 1950
		1950	1930	1950	1930	Total, 1950	Rented and operated, 1930	Farms reporting	Acres	Average per operator	Average per acre	1950	1930	1950	1930

Table 8.—PERCENT DISTRIBUTION OF CASH TENANTS, BY VALUE OF RENTED LAND AND BUILDINGS; BY DIVISIONS AND STATES: CENSUS OF 1950—Continued

[Figures relate to cash tenants reporting both value of land and buildings and amount of cash rent paid. Data are based on reports for only a sample of farms. See text]

	Region, division, and State	Cash tenants related to landlord—Continued																
		$3,000 to $4,999			$5,000 to $9,999			$10,000 to $14,999			$15,000 to $24,999			$25,000 to $49,999			$50,000 and over

32.—Sheep and lambs—All sheep, 1840 to 1935; with distributions by age and sex, 1900 to 1935: by divisions and States 430
33.—Sheep and lambs shorn and wool—Farms reporting, number shorn, and quantity and value of wool shorn, by divisions and States: 1949, 1944, and 1939 433
34.—Classification by number of sheep shorn—Sheep and lambs shorn, wool, total sheep and distribution by age and sex; by States: Census of 1950 434
35.—Farms reporting sheep and lambs shorn, by number shorn, by divisions and States: 1949, 1939, and 1929 441
36.—Sheep and lambs shorn and wool—Farms reporting, number shorn, and pounds of wool, by divisions and States: 1859 to 1949 444
37.—Chickens on hand—Farms reporting, 1910 to 1950; number, 1880 to 1950; and value, 1950, 1945, and 1940: by divisions and States 446
38.—Chickens sold—Farms reporting and number of chickens sold, by divisions and States: 1919 to 1949 448
39.—Chicken eggs sold—Farms reporting and dozens, by divisions and States: 1949, 1929, and 1919 450
40.—Farms reporting chickens on hand, by number reported, by divisions and States: 1930 to 1950 452
41.—Classification by number of chickens on hand—Farms reporting and number of chickens on hand, chickens sold, eggs sold, and value of sales of poultry and poultry products, by States: Census of 1950 454
42.—Turkeys on hand—Farms reporting and number, by divisions and States: 1890 to 1950 461
43.—Turkeys raised and sales of poultry and products other than chickens and chicken eggs—Farms reporting, number, and value of sales; by divisions and States: 1929 to 1949 462
44.—Classification by number of turkeys raised—Farms reporting and number or value for turkeys raised, turkeys on hand, and sales of turkeys, ducks, geese, and their eggs, and farms reporting other poultry raised, by States: Census of 1950 464
45.—Other poultry raised—Farms reporting and number of ducks, geese, and guineas raised; and farms reporting pigeons, pheasants, and quail raised; by divisions and States: 1929 to 1949 468
46.—Livestock sales—Farms reporting and number of specified kinds of animals sold alive, by divisions and States: 1949, 1944, and 1939 470
47.—Farm slaughter—Farms reporting and number of specified kinds of animals butchered, by divisions and States: 1909 to 1949 474
48.—Farms reporting specified kinds of animals butchered, by number reported; by divisions and States: 1949 478
49.—Goats and kids—Farms reporting, number, and value; by divisions and States: 1950, 1945, and 1940 479
50.—Farms reporting goats, rabbits, and fur animals, April 1, 1950 or kept in 1949, with farms reporting specified fur animals on hand April 1, 1940; and farms reporting and value of sales in 1949: by divisions and States 480
51.—Angora and other goats and mohair—Angora and other goats and kids, goats clipped and mohair, 1899 to 1949, and value of sales from goats, 1949: for specified States 481
52.—Goats and kids, by divisions and States: 1900 to 1950 482
53.—Bees and honey—Farms reporting, number of hives, and amount of honey produced, by divisions and States: Censuses of 1890 to 1950 483
54.—Rank in inventory numbers of specified kinds of livestock, by divisions and States: 1950, 1945, and 1940 486
55.—Rank in number or quantity of specified items of livestock production or sale, by divisions and States: 1949, 1944, and 1939 487

CHAPTER VI.—LIVESTOCK AND LIVESTOCK PRODUCTS

Introduction.—This chapter presents data relating to livestock and livestock products collected in the 1950 Census of Agriculture. The data include the numbers of livestock and poultry on farms as of April 1, 1950, the amount and value of each important livestock and poultry product sold in 1949, with the number and value of each principal kind of livestock sold alive, and the number of the principal kinds of livestock slaughtered on farms. A limited amount of data relating to past, current, and potential production was obtained for several livestock items. The information regarding inventory of livestock and poultry includes data by age and sex groups for the more important kinds of livestock. This chapter also presents data on bees and the value of sales of honey, bees, wax, etc.

Sources of data.—The data presented are from the 1950 Census of Agriculture with comparable data from earlier censuses. In 1950, the information regarding livestock and livestock products was obtained for all farms. The 1950 data given in this chapter represent, in most cases, totals obtained by adding reports for all farms. However, for a few items, estimates are presented based upon reports for a sample of farms. A few of the figures from the 1945 Census, which are presented in this chapter, are also based on reports for a sample of farms. Such data appear in table 13, relating to farm work power; and in table 40, relating to farms reporting chickens on hand by size of flock. The 1950 sample data were based on reports for all farms designated as "large farms" and on approximately 20 percent of the remainder. (See Introduction to this volume for a description of large farms.) The 1945 sample data were based on reports for all large farms, classified substantially as in 1950, and on about 5 percent of the remainder. Headnotes for the tables will indicate when the data represent estimates based upon reports for a sample of the farms.

Data regarding the reliability of estimates based on reports for only a sample of farms are given in the Introduction to this volume.

Presentation of statistics.—Statistics are presented for the United States, three major regions, nine geographic divisions, and for individual States for most items. In most cases, comparable data are given for the 1945 and prior censuses.

Other published data.—Not all available data on livestock and livestock products are presented in this chapter. Chapters X, XI, XII, and XIII of this volume present data on livestock and livestock products for farms classified by size of farm, by color and tenure of operator, by economic class of farm, and by type of farm, respectively. Some of the data presented in those chapters represent totals for "commercial farms" and totals for "other farms." Also, data are presented therein for the number of dairy farms, for the number of poultry farms, and for the number of livestock farms other than dairy and poultry (each type representing farms having 50 percent or more of the total sales derived from the sale of the product or products from which the type name was derived).

Most of the data shown by States in this chapter appear also in Volume I either by counties or by State economic areas. State Table 13 of Volume I presents data for large farms. It gives the number of dairy farms, poultry farms, and livestock farms other than dairy and poultry. This table also shows some livestock inventories and sales, with percentages of the totals for all farms represented by the totals for large farms. Data for large farms are presented separately in the Introduction to Volume II.

Totals for the number of cows milked yesterday (the day preceding the enumeration), as presented in table 22 of this chapter, represent a tabulation of the reports for all farms. The correlated totals for farms reporting cows milked yesterday, and for gallons of milk produced yesterday are not presented in this chapter but are shown in Volume I. However, estimated totals, based on a sample of the reports, are shown in table 25 of this chapter for all three items.

Also in table 25 is a count of the farms which did not report milk cows. These totals were derived by subtracting the number of farms reporting milk cows from the total number of farms. These counts of farms reporting no milk cows differ from those shown in Economic Area Table 3 of Volume I in that the totals in volume I represent farms which had no milk cows on hand on the day preceding the enumeration in 1950 but which sold dairy products of some kind in 1949.

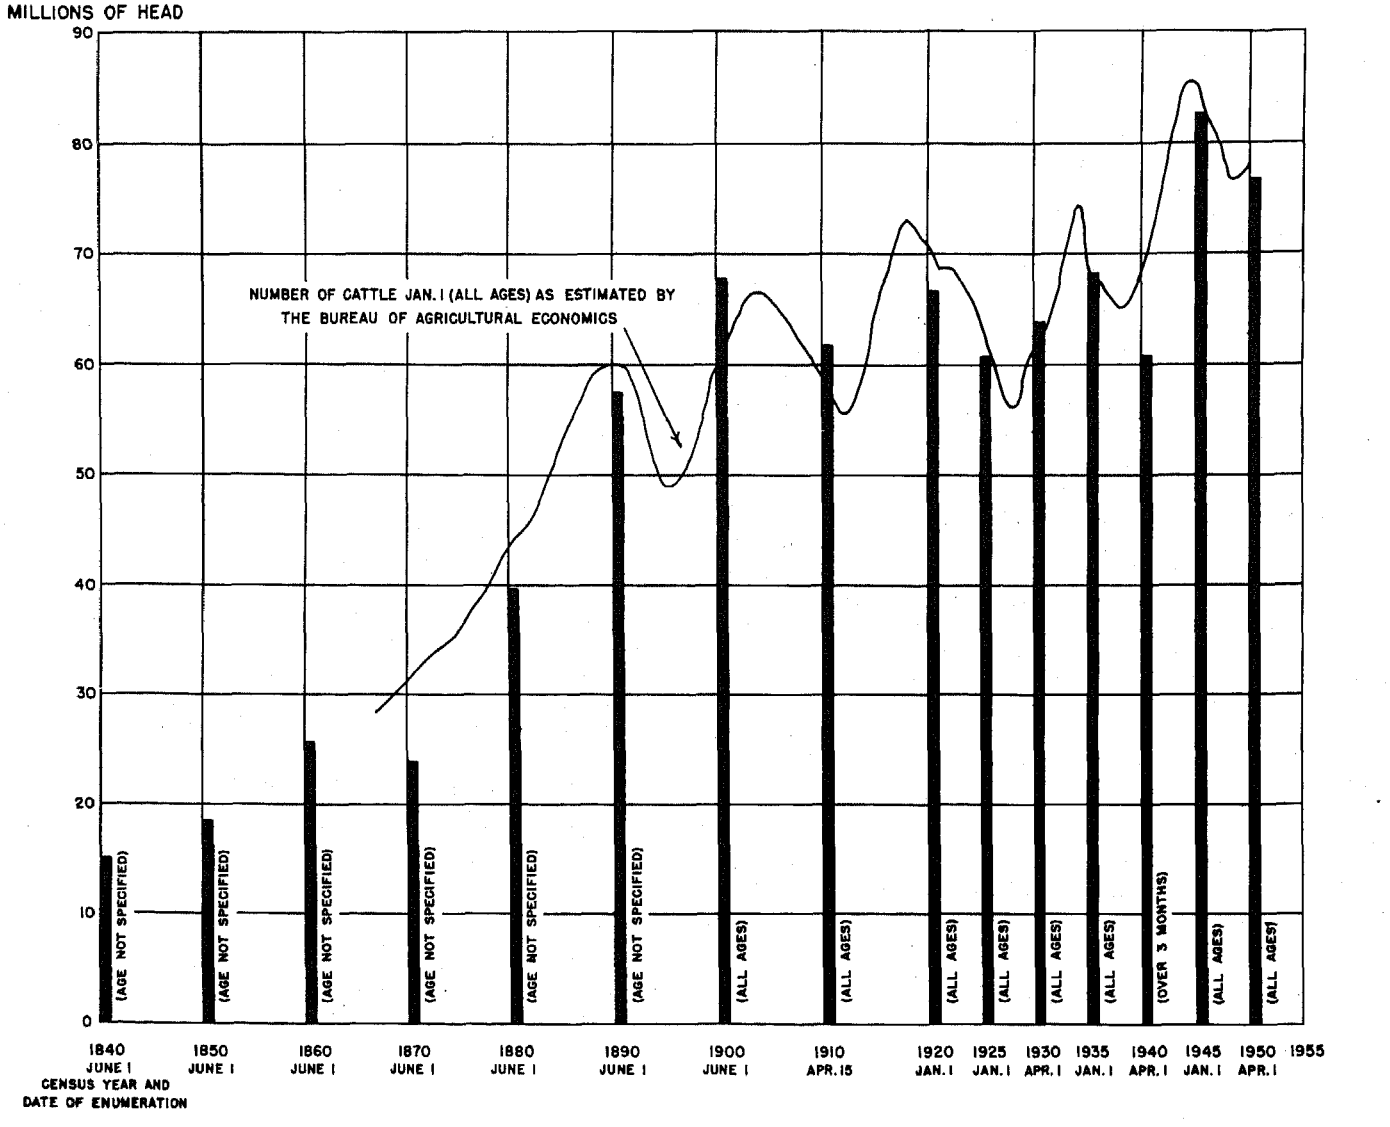
Comparability of statistics.—Differences in the wording of the questions, and in the age and sex classifications for the various censuses, which affect the comparability of the data for livestock, are given in tables 1, 2, and 3. Frequent reference to these tables is recommended in comparing the data for one census against those for another.

Table 1 presents a description of the various livestock inventory items and the number for each census from 1900 to 1950. This table provides a brief description for each inventory item for the 1950 Census and indicates for which items there are available data reasonably comparable with the data for 1950. For some censuses, the inventory, taken in connection with the census, excluded young animals. The exclusion of young animals should be considered when comparing the total number of livestock for the various censuses. Actual figures are shown for items for which data are reasonably comparable with those for 1950.

Table 2 shows, for each livestock item, the number of farms reporting and the inventory number for age and sex groups for which separate data have been published for each census from 1840 to 1950. Table 3 provides a list of all livestock and livestock products for which data are available for each census from 1840 to 1950.

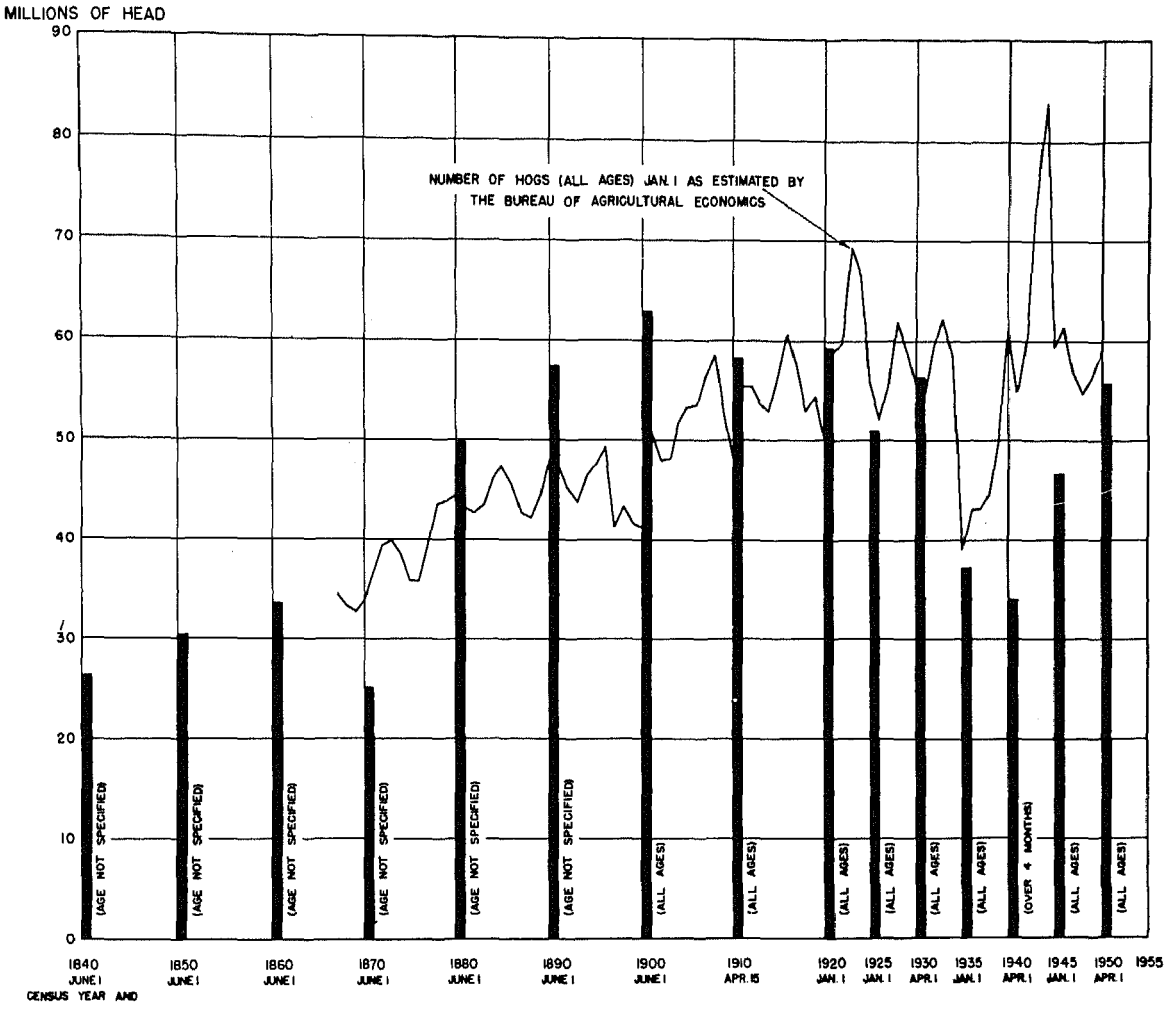
Table 4 presents data for 1950 and for each census for which reasonably comparable data are available for various items relating to livestock production and sales.

Comparability of data for livestock from census to census is affected by the season of the year when the census is taken and also by the relationship of the date of the census to the livestock cycle. Four different months have been used as the census date since 1840. For the censuses from 1840 through 1900, the census was taken as of June 1. The date for the 1910 Census was April 15. The date of the censuses of 1920, 1925, 1935, and 1945, was January 1, and for 1930, 1940, and 1950, April 1. Considerable numbers of livestock are marketed between January and April or June. Likewise, a number of animals die during the period from January to April or June. On the other hand, for some kinds of livestock, a relatively large number of animals are born



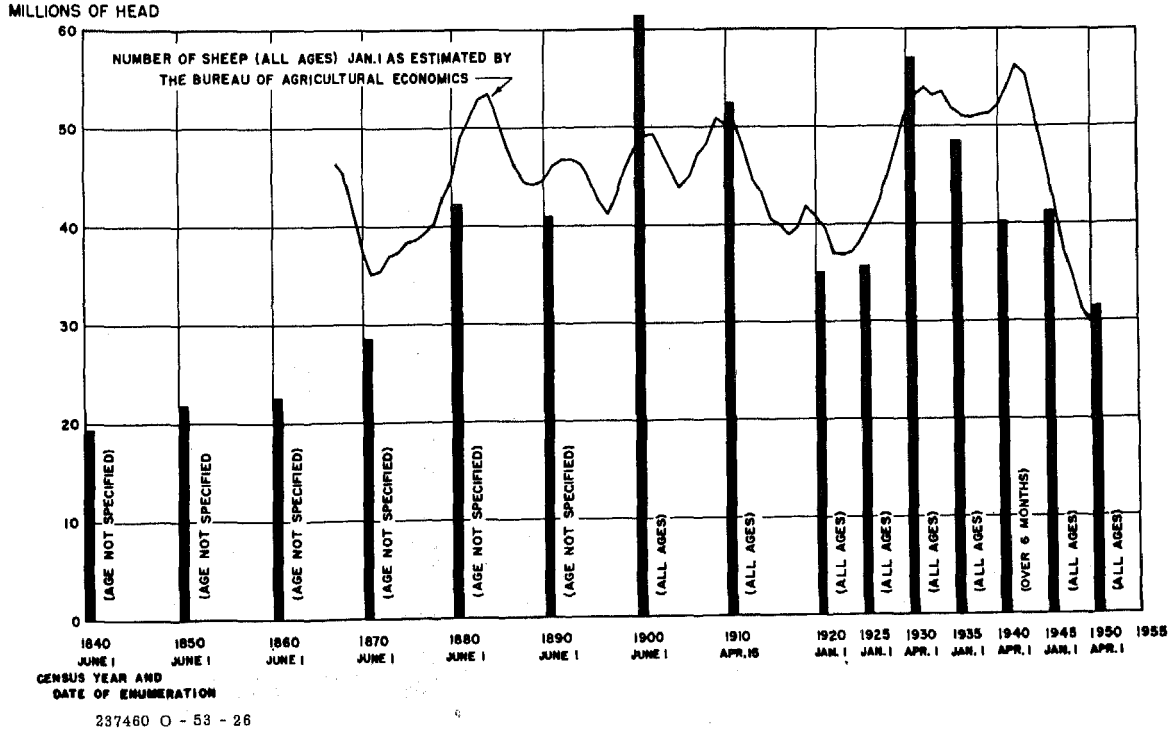
between January and April or June. For many of the censuses, data have been secured on the number of animals on hand at the time of the census that had been born between January 1 and the census date, in order to provide a method for obtaining a more accurate comparison of the number of each kind of livestock for the various censuses.

While the inquiries and instructions indicated that the inventory numbers of livestock were to be reported as of the census date, it is known that there has been a tendency of the farm operator to report the number of livestock on his farm at the time actual enumeration occurs. Therefore, it is necessary to consider the date of actual enumeration when making comparisons between censuses or in comparing data from other sources with those of the census in regard to the numbers of livestock. The average date of enumeration for 1950 is shown in table 27.



The numbers of most kinds of livestock are affected by changes in supply, demand, and other economic conditions. These changes in economic conditions result in increases followed by decreases in the number of livestock in accordance with a rather definite pattern or cycle. The number of livestock shown for a census is affected by the point in the livestock cycle at which the census is taken. The bar charts in this chapter showing the number of cattle, hogs, and sheep indicate graphically the annual changes in the number of each of these three kinds of livestock, as estimated by the Bureau of Agricultural Economics of the U. S. Department of Agriculture. These charts indicate the cyclical change in the number of animals and also the point in the cycle at which the census was taken.

Method of handling problems for the enumeration of livestock and livestock products.—Several problems arise in connection with the enumeration of livestock on farms. Some livestock ranches cover large areas and their operations extend into more than one county. Most of these ranches qualified as large farms and hence were listed on large farm lists prepared in advance of the census. The enumeration of these large farms was checked in the field and again during the office processing in Washington. This procedure helped to insure the complete enumeration of large farms.



CATTLE—NUMBER SHOWN BY THE CENSUS ON SPECIFIED DATES OF ENUMERATION IN RELATION TO CYCLICAL CHANGES INDICATED BY ANNUAL ESTIMATES OF JANUARY 1 INVENTORIES BY BUREAU OF AGRICULTURAL ECONOMICS, FOR THE UNITED STATES

HOGS—NUMBER SHOWN BY THE CENSUS ON SPECIFIED DATES OF ENUMERATION IN RELATION TO CYCLICAL CHANGES INDICATED BY ANNUAL ESTIMATES OF JANUARY 1 INVENTORIES BY BUREAU OF AGRICULTURAL ECONOMICS, FOR THE UNITED STATES

SHEEP—NUMBER SHOWN BY THE CENSUS ON SPECIFIED DATES OF ENUMERATION IN RELATION TO CYCLICAL CHANGES INDICATED BY ANNUAL ESTIMATES OF JANUARY 1 INVENTORIES, BY BUREAU OF AGRICULTURAL ECONOMICS, FOR THE UNITED STATES

237460 O - 53 - 26

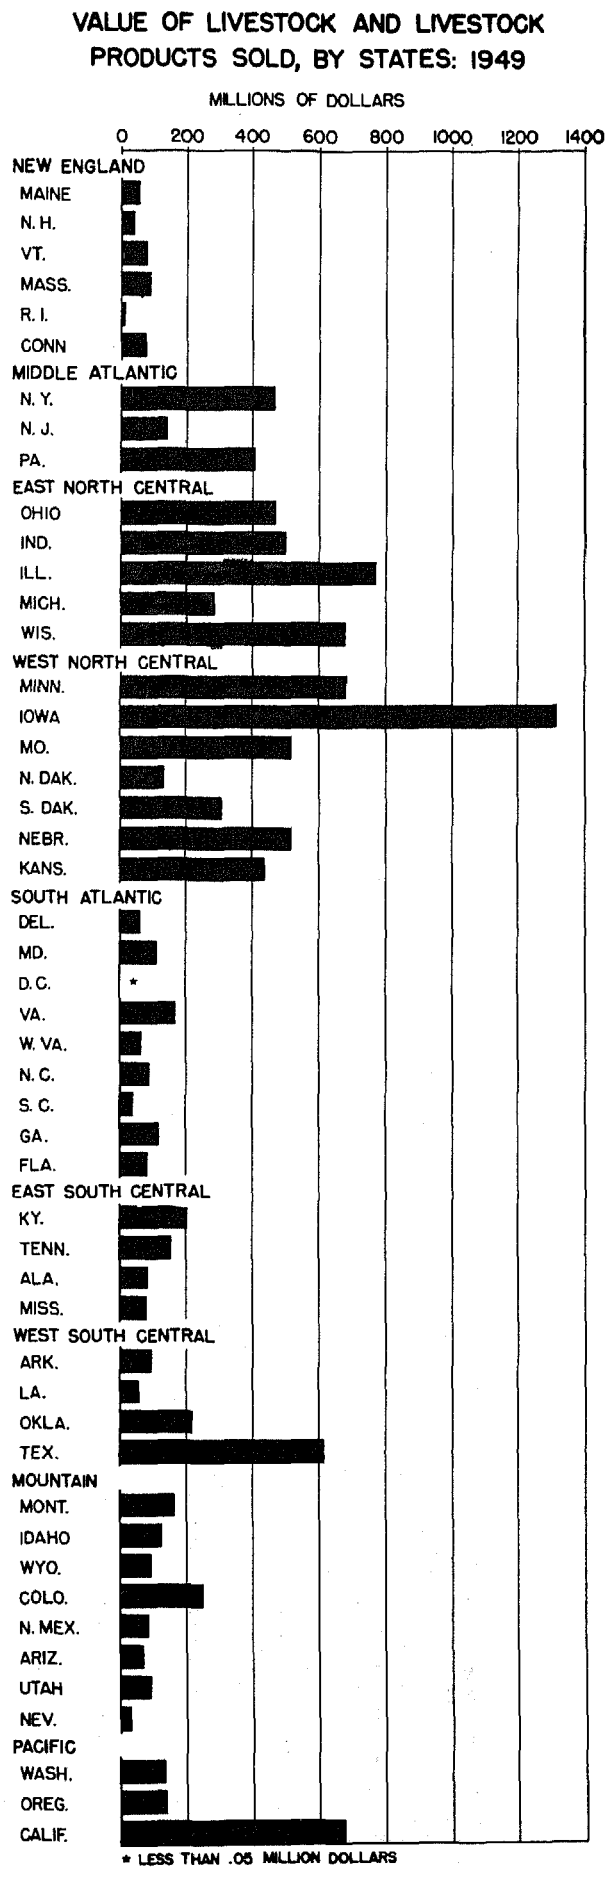
Enumerators and respondents were instructed to enumerate livestock on the farm or ranch on which such livestock was kept at the time of the census. This procedure provided for the counting of livestock on a farm operated by a person other than the owner of the livestock. In general, all livestock sold were to be reported for the farm from which they were sold, regardless of whether sold by the farm operator or by someone else. While these procedures may have resulted in missing some livestock, particularly the sales of some livestock, it is the only practical method of insuring as nearly as possible the complete enumeration of all livestock or sales of livestock.

In case the farm operator in 1950 was not operating the same farm as in 1949, he was asked to report the sales of livestock and livestock products for the farm he operated in 1949, and if he did not operate a farm in 1949, to estimate the sales of livestock and livestock products in 1949 for the farm which he was operating in 1950. While this procedure may have not secured a fully complete enumeration of the sales of livestock and livestock products, it provided for as nearly a complete enumeration of these farm products as possible.

DEFINITIONS AND EXPLANATIONS

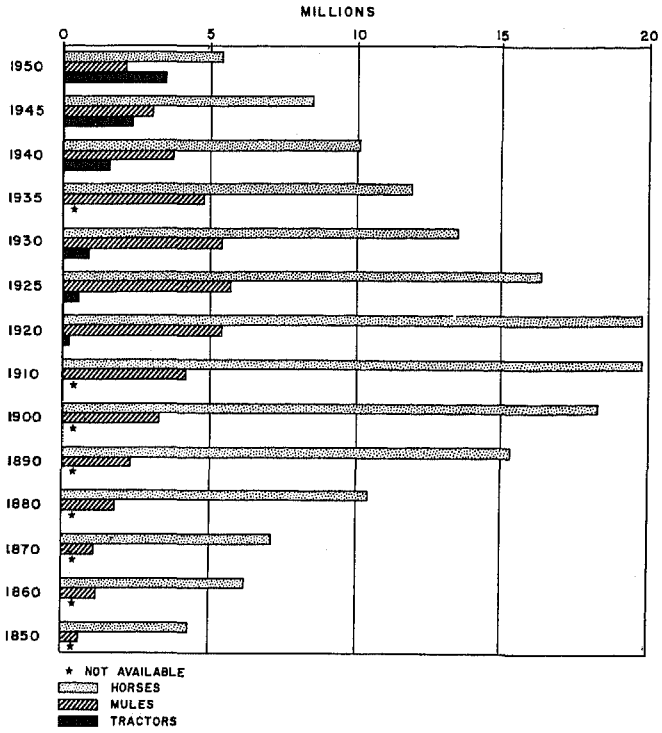
Reference should be made to the Introduction to this volume for definitions of a farm, farms reporting, type of farm, etc. The Introduction also contains an explanation of the methods used in obtaining and compiling the data and an appraisal of the census.

"Livestock" as used in this chapter includes not only domestic animals usually found on farms, but also fur-bearing animals kept in captivity, domestic rabbits, poultry, and bees. When the terms "cattle," "hogs," "sheep," etc., appear in the tables without qualification as to age or sex, the terms refer to animals of all ages.



Value of inventory and value of sales.—Two series of values relating to livestock and livestock products appear in this chapter. One series of values relates to the inventory value of the various kinds of livestock on hand at the time of the census. These values were obtained by multiplying the number of each kind or age group of animals enumerated for a county by an average value per head. The average value per head was compiled for the Bureau of the Census by the Bureau of Agricultural Economics of the U. S. Department of Agriculture. These average values were based upon reports obtained from a sample of farmers, livestock buyers, livestock dealers, etc. The averages were computed for groups of counties, grouped on the basis of crop-reporting or price-reporting districts used by the Bureau of Agricultural Economics. State totals for the value of each kind of livestock were obtained by adding totals for the counties in the State. State average values were computed by dividing the State total value by the number of animals.

The other series of values relates to the value of livestock and livestock products sold. These values were obtained from the operator for each farm for which there were sales of livestock and livestock products.



Horses and mules.—Horses and mules were enumerated separately in the 1950 Census. Ponies were to be included with horses. Horses and mules on places not counted as farms are not included. Asses and burros were not enumerated in 1950.

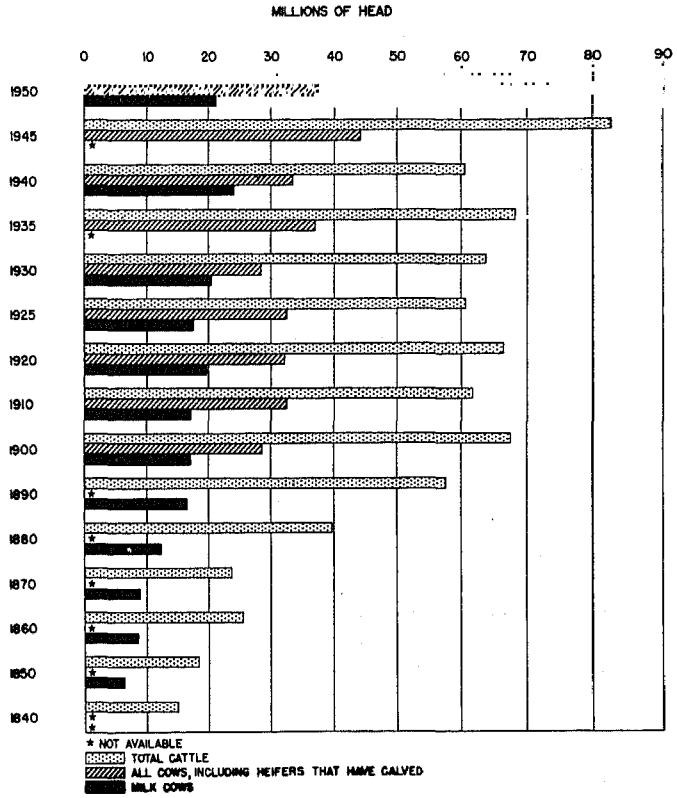
The numbers of horses and mules are rapidly decreasing. The decline in number of horses was first indicated in the 1920 Census and has continued since then. The greatest percentage decrease took place during the 5-year period, 1945–50. During this period, the numbers of horses and mules in the United States dropped from 8,499,204 in 1945 to 5,401,646 in 1950, a decrease of 36.4 percent.

The decline in horse numbers has not been general in all States. In parts of the South, horses are replacing mules, as indicated by data in tables 11 and 12. There were increases in the number of horses in 11 States in the South from 1935 to 1940. From 1940 to 1945, increases occurred in seven States, and during the last 5 years increases occurred in four States.

NUMBER OF HORSES, MULES, AND TRACTORS, FOR THE UNITED STATES: 1850 TO 1950

Cattle.—The 1950 Census Questionnaire contained five inquiries regarding the number of cattle on hand on the census date. One of the inquiries asked for the total number of cattle and calves of all ages while the other four inquiries asked the number for four separate age and sex groups. Instructions on the questionnaire stated that the sum of the replies to the four inquiries must equal the reply to the inquiry regarding the total. Enumerators were required by instructions to make this comparison on each questionnaire.

The questionnaire contained two additional questions regarding milk cows. The first of these questions asked for the number of "Cows and heifers milked yesterday." This was followed by "How many milk cows were on this place yesterday? Include dry milk cows and milk heifers that have calved." The answers to the last question provided data on the number of milk cows. While the number of milk cows was obtained as of the day before each farm was enumerated rather than as of April 1, the figures have been considered comparable to data regarding the number of cattle on the farms as of April 1.



Dairy products sold.—The 1950 Census omitted an inquiry on amount of milk produced during the preceding year, an item included in each census from 1890 to 1945. Current milk production figures were obtained by means of four inquiries immediately following the cattle inventory questions. These inquiries obtained the number of cows milked, number of milk cows on the place, gallons of milk produced on the day preceding the date of filling the questionnaire, and pounds of butter churned during the preceding week.

Three groups of inquiries on dairy products sold were included in the 1950 Census Questionnaire. These inquiries provided for reporting the amount and the value of whole milk sold; the pounds of butterfat in cream sold, and the value of cream and butterfat sold; and the value of butter, buttermilk, skim milk, and cheese sold.

In order to obtain as accurate statistics as possible on the amount of whole milk sold, provision was made on the 1950 Questionnaire for the reporting of the amount sold in any of two or three different units of measure. As units of measure for reporting whole milk sold, pounds and gallons appeared on the questionnaires for all States, and pounds of butterfat appeared as an additional unit of measure on the questionnaire for some States.

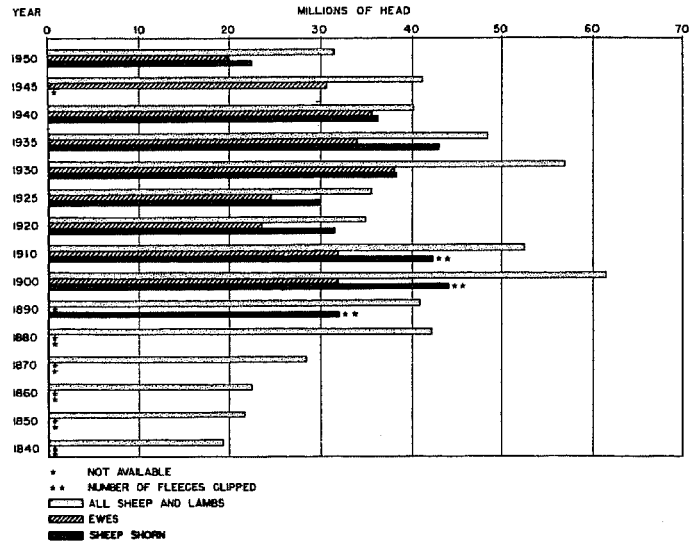
The quantity of whole milk sold was tabulated for each county in the unit of measure in which it was reported on the individual questionnaire. Totals were thus obtained for two, or, for some States, three quantities of milk sold depending on the units of measure reported. The number of farms reporting milk sold was also obtained for each unit of measure. Totals of the farms reporting are given in table 23.

NUMBER OF CATTLE, OF COWS, INCLUDING HEIFERS THAT HAVE CALVED, AND OF MILK COWS, FOR THE UNITED STATES: 1840 TO 1950

The amount of whole milk sold is shown in pounds in this chapter. Conversion of the reports in gallons to pounds was made by multiplying the total gallons by 8.6 pounds. Conversion of pounds of butterfat in whole milk sold to pounds of milk was made on the basis of the average butterfat test of milk. The average test was supplied to the Bureau of the Census by the Bureau of Agricultural Economics of the U. S. Department of Agriculture. In States in which the test varied little over the State, an average test was used for all the counties in the State. In other States, the average test used varied for the individual counties. The average butterfat test used for each State for converting pounds of butterfat in whole milk sold to pounds of whole milk sold is shown in table 23.

For 1944 and 1939, only the total value of all dairy products sold was obtained. Separate figures for the value of whole milk sold, cream sold, and other dairy products (butter, buttermilk, skim milk, cheese) sold were not obtained. The figures given in table 23 for 1944 and 1939, for the value of whole milk sold, cream sold, and other dairy products sold represent estimates. These estimates were prepared by multiplying the quantities of each of the three groups of dairy products sold for each State by the

average estimated price per unit and by adjusting the totals of the three groups of dairy products sold to equal the enumerated value of all dairy products sold.



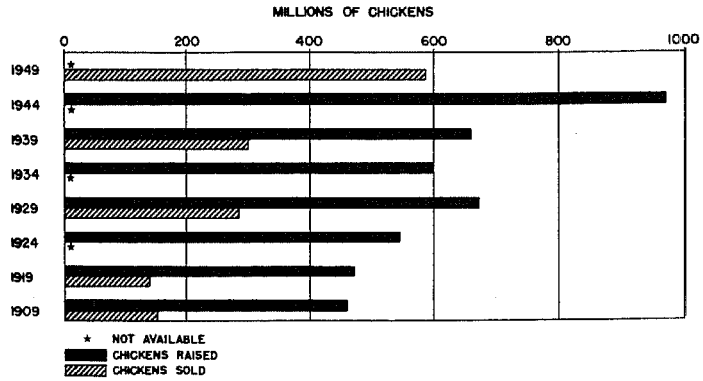
Hogs.—The 1950 Questionnaire contained three inquiries regarding the inventory number of hogs. One inquiry called for the total number of hogs and pigs of all ages, while the other two inquiries asked for the number less than 4 months old, and for the number 4 months old and over.

Data regarding the number of sows and gilts farrowing were obtained by means of two inquiries. The first of these inquiries asked for the number of sows and gilts that had farrowed any time between December 1, 1949, and the date of the enumeration. Sows farrowing during this period were to be reported regardless of whether or not they were on the farm at the time of the enumeration. The second inquiry called for the number of sows and gilts that were expected to farrow between the date of the enumeration and June 1, 1950.

Sheep and wool.—Inquiries on the 1950 Questionnaire relating to sheep numbers were the same, with one exception, in all States. In all States, the total of all ages was obtained, followed by the groups classified by age and sex. However, in the States comprising the Mountain and Pacific Divisions, and the States of Texas, North Dakota, and South Dakota, two additional inquiries were made regarding ewes 6 months old and over. One of these inquiries asked for the number of yearling ewes and the other, the number of older ewes.

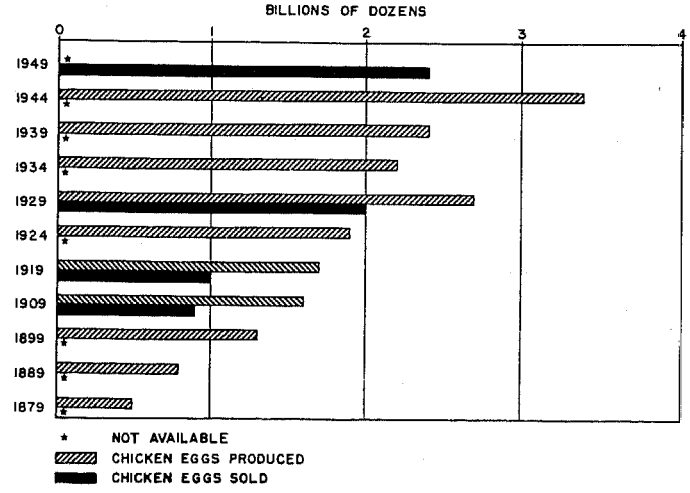
The inquiries regarding sheep shorn and wool were separated from the inventory questions on the 1950 Census Questionnaire. This arrangement of questions was designed for the purpose of securing a more complete enumeration of sheep shorn and wool produced on farms on which sheep were shorn in 1949, but on which there were no sheep at the time of the census.

NUMBER OF SHEEP AND LAMBS, OF EWES, AND OF SHEEP SHORN IN THE UNITED STATES: 1840 TO 1950



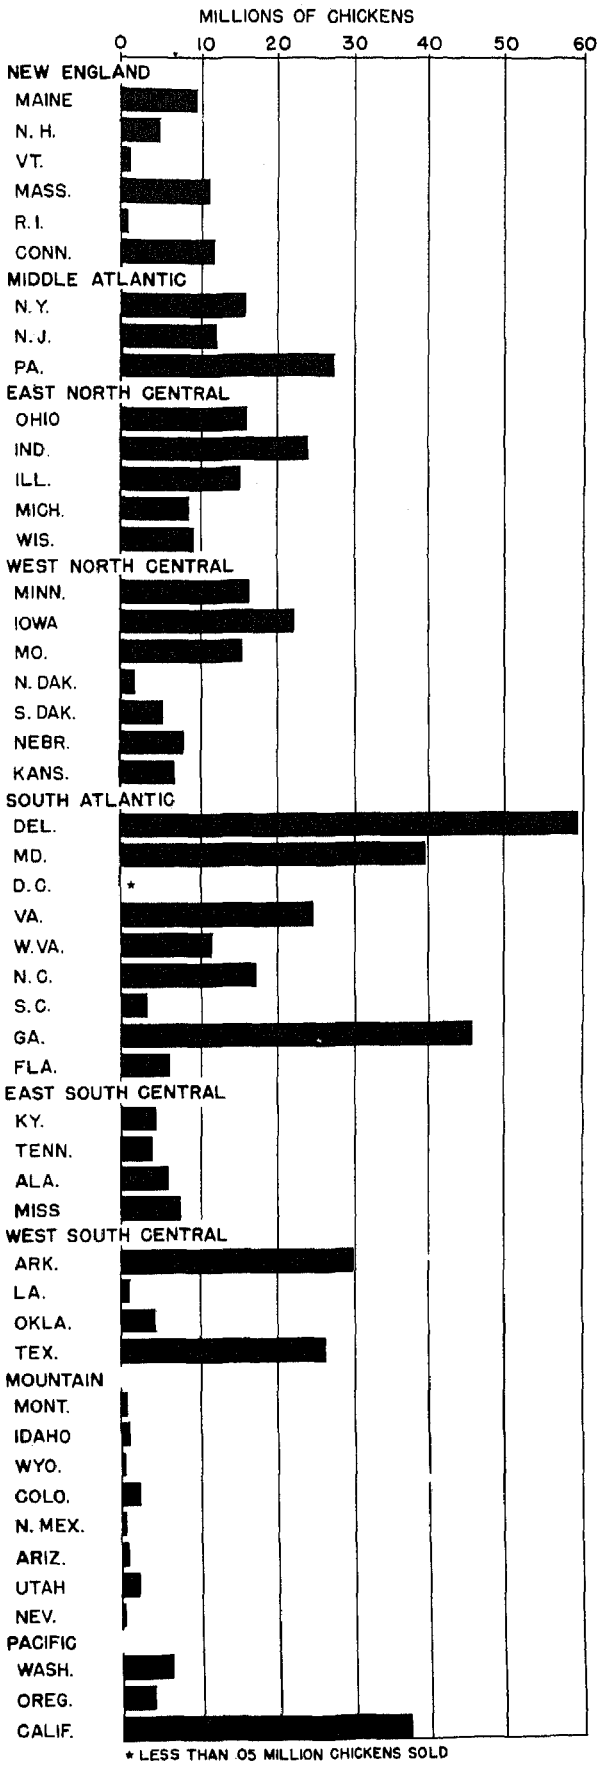
Goats, rabbits, and fur animals.—In 41 States and the District of Columbia, the inquiry on the 1950 Questionnaire regarding goats and kids was combined with those relating to rabbits and fur animals in captivity. The inquiries called for the reporting of any of the following three types of animals that were on the farm or were kept during the year preceding the census: goats, domestic rabbits, and fur animals in captivity. The other inquiry called for the value of mohair clipped and value of sales of goats and kids, goat milk, rabbits, and pelts. For these 41 States, the only data that relate solely to goats are the number of farms reporting goats either on hand or kept the previous year.

Inquiries asking for the number of goats and the production of mohair were carried on the 1950 Questionnaire in only seven States (Arizona, California, Missouri, New Mexico, Oregon, Texas, and Utah). In these States, data were obtained separately for Angora goats and for other goats. Statistics were also obtained for these States for the number of goats clipped, pounds of mohair clipped and a combined value of goats and kids sold, goat milk sold, and mohair clipped in 1949. In these seven States, data were also obtained for farms reporting domestic rabbits, for farms reporting fur animals in captivity, and for the value of rabbits, fur animals, and pelts sold in 1949.



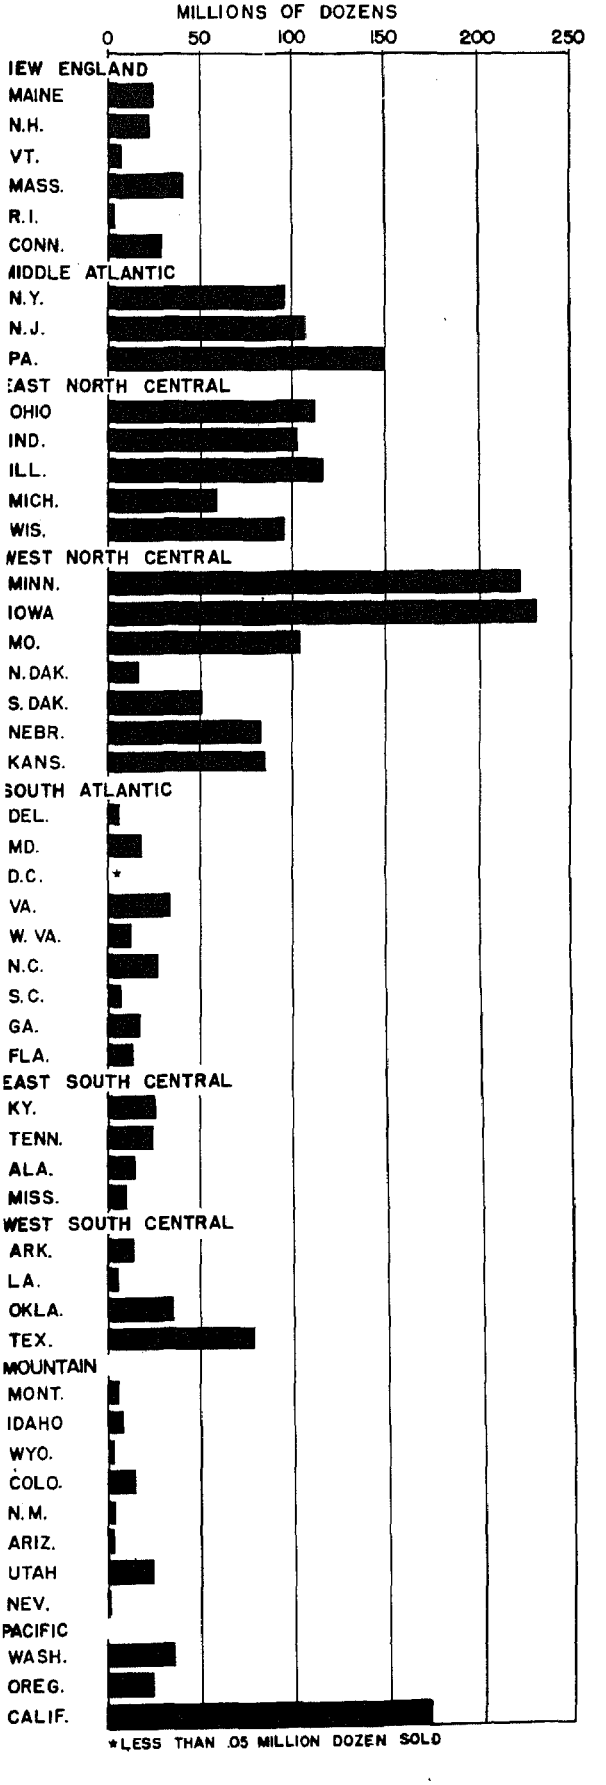
Poultry.—The 1950 inquiries on poultry were the same on the questionnaires for all States. The poultry questions called for the number of chickens and the number of turkeys 4 months old and over on the place; the number and value of chickens sold, and the dozens and value of chicken eggs sold; the number of turkeys raised, and the number of ducks, geese, and other poultry raised; and the combined value of turkeys and turkey eggs, and ducks and geese and their eggs sold in 1949.

The data for the number and value of chickens sold are not fully complete in areas producing a considerable number of broilers. The wide variety of "contract" arrangements for the production of broilers, the raising of broilers on places not considered by the enumerators as farms, and the going out of business by some operators raising broilers in 1949 before the census enumeration, contributed to the incomplete enumeration of chickens sold.



NUMBER OF CHICKENS SOLD AND CHICKENS RAISED, FOR THE UNITED STATES: 1909 TO 1949

DOZENS OF CHICKEN EGGS SOLD AND CHICKEN EGGS PRODUCED, FOR THE UNITED STATES: 1879–1949



NUMBER OF CHICKENS SOLD, BY STATES: 1949

* LESS THAN .05 MILLION CHICKENS SOLD

DOZENS OF CHICKEN EGGS SOLD, BY STATES: 1949

*LESS THAN .05 MILLION DOZEN SOLD

Animals sold alive.—The 1950 Census of Agriculture Questionnaire had separate inquiries for number sold and value of sales in 1949 of cattle excluding calves, calves, hogs and pigs, sheep and lambs, and horses and mules. These inquiries were the same for all States.

Enumerators were instructed that livestock sold by livestock dealers was not to be reported. No instructions or definitions were provided to the enumerator or to the farmer in regard to age, weight, etc., of cattle to be reported as calves.

The sales of horses and mules were reported together. Most horses and mules reported sold were draft animals but in some States the high average value reported per animal sold indicates that the horses sold included considerable numbers of race horses.

Farm butchering.—Reports for inquiries under this heading were to be limited to animals butchered in 1949 for use on the farm or for sale as farm-butchered meat. These animals need not have been butchered on the operator's farm. Separate inquiries appeared on the 1950 Questionnaires for all States for the numbers of cattle excluding calves, calves, and hogs and pigs butchered. In Texas, and the States of the Mountain and Pacific Divisions, the questionnaires included an additional inquiry on the number of sheep and lambs butchered. A combined value of sales in 1949 of meat, lard, hides, and other products from animals butchered was obtained for all States.

Bees and honey.—The four inquiries on the 1950 Questionnaire regarding bees and honey were the same for all States. The first inquiry asked the operator, "Were any bees owned by you last year?" The second inquiry called for the number of hives of bees owned in 1949. Enumerators were instructed to report the largest number owned at any time in 1949 wherever they may have been kept. Therefore, the number of hives of bees reported for 1950 does not represent the number of hives at the time the census was taken in April 1950.

The number of hives of bees reported for censuses prior to 1950, represents the number on hand at the date of the census. Prior to 1930, hives were enumerated on the place on which they were located. The plans for the 1930 Census recognized that bees owned by a farm operator may not be located on the farm he operated and the inquiry regarding the number of hives was "Hives of bees owned by you on this farm or elsewhere" (as of April 1, 1930). For the 1940 Census, the inquiry regarding the number of hives was changed to "Hives of bees, April 1, 1940: (a) owned by others, but kept on this farm; (b) owned by you, on this farm and on nonfarm land such as deserts, hills, swamps, etc." Because of the changes in the inquiries the data on the number of hives of bees for the 1950 Census may not be fully comparable with the data for prior censuses.

A considerable number of hives of bees are kept on places not included in the census as farms and also a considerable number of hives of bees are owned by persons who live on places that are not enumerated as farms. In planning for the 1950 Census, it was recognized that the census would not provide for the complete enumeration of the hives of bees and honey production. The purpose of including inquiries on bees in the 1950 Census was to obtain reliable data on the average production of honey per hive as a basis of the preparation of estimates by the U. S. Department of Agriculture for the number of hives and for the total production of honey.

The third inquiry in 1950 called for the amount of honey produced in 1949 by the bees owned. The fourth inquiry called for the value of the 1949 crop of honey and wax sold or to be sold and of bees sold in 1949. Enumerators were instructed to include with this value receipts from fruit growers, producers of seed crops, etc., for the use of bees for pollination purposes.

Table 1.—BRIEF DESCRIPTION OF INVENTORY ITEMS FOR THE VARIOUS CLASSES OF LIVESTOCK, 1950, AND AN INDICATION OF THE COMPARABILITY OF DATA FOR THE CENSUSES OF 1900 TO 1950

1935 (Jan. 1)		
Chickens over 3 months old	5,833,079	371,603,136
Turkeys over 3 months old	676,114	5,381,912
1930 (Apr. 1)		
Chickens over 3 months old	5,372,597	378,878,281
1925 (Jan. 1)		
Chickens	5,505,617	409,290,849
1920 (Jan. 1)		
Chickens	5,837,367	359,537,127
Turkeys	670,834	3,627,028
Ducks	461,363	2,817,624
Geese	527,836	2,939,203
Guinea fowls	383,632	2,410,421
Pigeons	77,769	1,493,630
1910 (Apr. 15)		
Chickens over 3 months old	5,578,425	280,340,959
Turkeys over 3 months	871,123	3,688,708
Ducks over 3 months	503,704	2,906,525
Geese over 3 months old	662,324	4,431,980
Guinea fowls over 3 months old	339,538	1,765,031
Pigeons over 3 months old	109,407	2,730,994
Peafowls over 3 months old	1,807	6,458
Ostriches over 3 months old	29	5,361
Pheasants over 3 months old	99	4,171
India jungle fowls	1	3
1900 (June 1)		
Chickens, including guinea fowls, over 3 months old	(*)	233,566,021
Turkeys over 3 months old	(*)	6,594,695
Geese over 3 months old	(*)	5,676,788
Ducks over 3 months old	(*)	4,785,850
Other and unspecified	(*)	684
1890 (June 1)		
Chickens on hand, June 1	(*)	258,871,125
Turkeys on hand, June 1	(*)	10,754,060
Geese on hand, June 1	(*)	8,440,175
Ducks on hand, June 1	(*)	7,544,080
1880 (June 1)		
Barnyard poultry, excluding spring hatch	(*)	102,272,135
Other poultry, excluding spring hatch	(*)	23,235,187
BEES		
1950 (Apr. 1)		
Hives of bees owned last year	258,159	2,395,089
1940 (Apr. 1)		
Total	265,158	2,276,681
Owned by farm operator	254,417	1,929,976
Owned by others	13,614	346,705
1930 (Apr. 1)		
Hives of bees owned on farms or elsewhere	459,688	3,107,755
1920 (Jan. 1)		
Hives of bees	540,917	3,467,396
1910 (Apr. 15)		
Swarms, hives, or colonies	585,955	3,445,006
1900 (June 1)		
Swarms or hives of bees	707,215	4,108,239
OTHER LIVESTOCK		
1950 (Apr. 1)		
Domestic rabbits on hand or kept in 1949	132,953	(*)
Fur animals in captivity on hand or kept in 1949	10,421	(*)
1940 (Apr. 1)		
Silver fox females over 3 months	2,655	103,301
Mink females over 3 months	2,754	161,457

*Not available.

Table 3.—ITEMS FOR LIVESTOCK AND LIVESTOCK PRODUCTS FOR WHICH DATA WERE OBTAINED: CENSUSES OF 1840 TO 1950

Subject	Date of census and item
	CENSUS OF 1950 (Apr. 1)
Horses	Total, all ages, including ponies.
Mules	Total, all ages.
Cattle	Total, all ages; cows, including heifers that have calved; milk cows; calves born after Jan. 1, 1950; heifers and heifer calves born before Jan. 1, 1950 (not including any that have calved); and bulls, bull calves, steers and steer calves born before Jan. 1, 1950; and numbers of cattle and of calves butchered, and sold alive, 1949.
Dairy products	Cows milked yesterday, gallons of milk produced yesterday; and pounds of butter churned last week; amount of whole milk sold in 1949 in pounds of butterfat (in certain States) in pounds of milk, and in gallons; cream sold (butterfat content) in 1949; and value only of butter, buttermilk, skim milk, and cheese sold in 1949.
Hogs and pigs	Total, all ages; number less than 4 months old, and number 4 months old and over; sows and gilts that have farrowed since Dec. 1, 1949, and sows and gilts expected to farrow between now and June 1, 1950; and numbers butchered, and sold alive.
Sheep and wool	Total, all ages; lambs born since Oct. 1, 1949, rams and wethers born before Oct. 1, 1949, and ewes (in range States—yearling ewes, and older ewes) born before Oct. 1, 1949; sheep and lambs shorn and pounds of wool produced, 1949; sheep sold alive, and (in range States) sheep and lambs butchered.
Goats and mohair	In 7 States—total, all ages; numbers Angora and of other goats clipped and pounds mohair produced in 1949. In other States—farms reporting goats on hand or kept last year.
Poultry	Numbers, 4 months old and over of chickens and turkeys; numbers raised in 1949 of turkeys, ducks, geese, guineas, pigeons, pheasants, quail, etc.; number of chickens sold, and dozens of chicken eggs sold in 1949.
Bees and honey	Hives of bees owned last year, and pounds of honey produced in 1949.
Miscellaneous items	Number of horses and mules sold in 1949; farms reporting domestic rabbits on hand or kept last year; farms reporting fur animals in captivity on hand or kept last year; and (in range States) farms reporting grazing permits.
Value of livestock and products.	Values of sales were obtained in 15 inquiries in 41 States and in 16 inquiries in the 7 States in which the number of goats was enumerated. Separate values were obtained for cattle sold, calves sold, hogs and pigs sold; sheep and lambs sold, and horses and mules sold; whole milk sold, cream sold, and butter, buttermilk, skim milk, and cheese sold; wool shorn, chickens sold, and chicken eggs sold. Other inquiries included the value of sales of groups of related items— meat, lard, hides and other products from animals butchered; turkeys, turkey eggs, ducks, geese, and their eggs sold; honey, wax and bees sold; mohair clipped and goats and kids and goat milk sold; and rabbits, fur animals, and pelts sold. In 41 States, the last 2 inquiries are combined. Values of inventories, 1950, are based on county-unit prices obtained in cooperation with the Department of Agriculture.
	CENSUS OF 1945 (Jan. 1)
Horses	Total, all ages, including ponies.
Mules	Total, all ages.
Cattle	Total, all ages; cows and heifers 2 years old and over; total cattle and calves sold alive, 1944; cattle butchered, and calves butchered, 1944.
Dairy products	Cows and heifers milked during any part of 1944; milk produced, 1944, and whole milk, cream (butterfat content), and butter sold, 1944.
Hogs and pigs	Total, all ages; sows and gilts for spring farrowing (farrowed since Dec. 1, 1944, or to farrow before June 1, 1945); total hogs and pigs sold alive, 1944; and total hogs and pigs butchered, 1944.
Sheep and wool	Total sheep and lambs all ages; ewes and ewe lambs kept for breeding ewes (excluding 1944 fall lambs); wool shorn, 1944; total sheep and lambs sold alive, 1944.
Goats	Total, all ages.
Poultry	Chickens over 4 months old on hand; chicken eggs produced, 1944; chickens raised (including broilers and fryers); and turkeys raised, 1944.
Value of livestock and products.	Values of sales were obtained in 3 groups on the Farm and Ranch Schedule: All dairy products, all poultry and poultry products, and livestock and livestock products other than dairy and poultry, sold or traded in 1944. Values of inventories, 1945, and livestock products, 1944, are based on county-unit prices obtained in cooperation with the Department of Agriculture.
	CENSUS OF 1940 (Apr. 1)
Horses	Total, including ponies, over 3 months; and colts, 3 to 27 months.
Mules	Total, over 3 months; and mule colts, 3 to 27 months.
Cattle	Total, over 3 months; cows and heifers (2 years old and over on Jan. 1) which were (a) kept mainly for milk production and (b) kept mainly for beef production; and numbers of cattle and of calves butchered, purchased, and sold alive, 1939.
Dairy products	Cows and heifers milked during any part of 1939; milk produced, 1939; butter churned on farms, 1939, and whole milk, cream (butterfat content), and butter sold, 1939.
Hogs and pigs	Total, over 4 months; sows and gilts that farrowed since Dec. 1, 1939, or were to farrow before June 1, 1940; and numbers butchered, purchased, and sold alive, 1939.
Sheep and wool	Total sheep and lambs over 6 months; yearling ewes (by instruction, 6 to 18 months); other ewes over 18 months; sheep and lambs shorn, 1939; wool produced, 1939; and numbers butchered, purchased, and sold alive, 1939.
Goats and mohair	Numbers of Angora and of other goats and kids, over 4 months; mohair and kid hair clipped, 1939; and goats milked during any part of 1939.
Poultry	Numbers, over 4 months, on hand, and numbers raised, 1939, for chickens, turkeys, ducks, geese, guineas, pigeons, quail, pheasants, etc.; chickens sold alive or dressed, 1939 (any sold as baby chicks omitted); and chicken eggs produced, 1939.
Bees and honey	Hives of bees owned by others, but kept on operator's farm, and hives of bees owned by the operator, on his farm and on nonfarm land such as deserts, hills, swamps, etc.; and honey produced by operator's bees.
Miscellaneous items	Numbers of silver fox and of mink females, over 3 months, kept in captivity; and numbers of silver fox and of mink pelts taken, 1939.
Value of livestock and products.	Values were obtained for dairy products, livestock, poultry and poultry products, and other livestock products, sold or traded in 1939, in 4 questions on the Farm and Ranch Schedule. Values of inventories, 1940, and livestock products (except milk produced), 1939, are based on county-unit prices obtained in cooperation with the Department of Agriculture.
	CENSUS OF 1935 (Jan. 1)
Horses	Total (all types), all ages; and colts, under 2 years.
Mules	Total, all ages; and mule colts, under 2 years.
Cattle	Total, all ages; calves, under 1 year; heifers, 1 year and under 2; steers and bulls, 1 year and over, and cows and heifers, 2 years and over.
Dairy products	Cows and heifers of all kinds milked during any part of 1934; and milk produced and butter churned on farms, 1934.
Hogs and pigs	Total, all ages; and sows and gilts which were bred, or were to be bred to farrow before June 1, 1935.
Sheep and wool	Total sheep and lambs, all ages; ewes, 1 year and over; and sheep and lambs shorn and wool produced, 1934.
Goats and mohair	Total goats and kids, all ages; and mohair produced, 1934.
Poultry	Numbers, over 3 months, on hand, for chickens and turkeys; chicken eggs produced, 1934; and chickens raised (any sold by the operator as baby chicks omitted), 1934.
Bees and honey	No inquiry.
Miscellaneous items	No inquiry.
Value of livestock and products.	No inquiry on the Farm and Ranch Schedule. Values of inventories, 1935, and livestock products (except milk produced), 1934, are based on State-unit prices obtained in cooperation with the Department of Agriculture.

Table 3.—ITEMS FOR LIVESTOCK AND LIVESTOCK PRODUCTS FOR WHICH DATA WERE OBTAINED: CENSUSES OF 1840 TO 1950—Continued

Subject	Date of census and item
	CENSUS OF 1930 (Apr. 1)
Horses	Colts born after Jan. 1, 1930; colts born, 1929; colts born, 1928; and horses born before 1928. Breed and number of registered purebred mares and mare colts; and stallions and stallion colts. Numbers purchased and sold alive, and hides sold, 1929.
Mules	Mule colts born after Jan. 1, 1930; mule colts born, 1929; mule colts born, 1928; and mules born before 1928. Numbers purchased and sold alive, and hides sold, 1929.
Cattle	Calves born after Jan. 1, 1930; steers and bulls born, 1929; heifers born, 1929; bulls born before 1929; steers born, 1928; steers born before 1928; heifers born, 1928, which were (a) kept mainly for milk cows and (b) kept mainly for beef cows or beef production; cows and heifers born before 1928, which were (a) kept mainly for milk production and (b) kept mainly for beef production. Breed and number of registered purebred cows, heifers, and heifer calves; and bulls and bull calves. Numbers of cattle and of calves slaughtered, purchased, and sold alive, 1929; and hides of cattle and of calves sold, 1929.
Dairy products	Cows and heifers (both beef and dairy) milked during any part of 1929; of these, the number mainly of beef or of dual-purpose breeding; cows and heifers being milked daily and daily production of milk at time of enumeration; milk produced, butter churned, milk sold as whole milk, cream sold as butterfat, cream sold not as butterfat, and butter sold, 1929.
Hogs and pigs	Pigs born after Jan. 1, 1930; sows and gilts that had farrowed since Jan. 1 or were to farrow before June 1, 1930; and other hogs and pigs born before Jan. 1, 1930. Breed and number of registered purebred hogs and pigs. Numbers slaughtered, purchased, and sold alive, 1929.
Sheep and wool	Lambs born after Oct. 1, 1929; rams and wethers born before Oct. 1, 1929; yearling ewes born between Oct. 1, 1928, and Oct. 1, 1929; and ewes born before Oct. 1, 1928. Breed and number of registered purebred sheep and lambs. Numbers of sheep and lambs slaughtered, purchased, sold alive, and skins sold, 1929. Sheep and lambs shorn, 1929; and wool produced, 1929.
Goats and mohair	Angora goats and kids, all ages; other goats and kids, all ages; Angora goats and kids clipped, 1929; and mohair and kid hair produced, 1929.
Poultry	Chickens, over 3 months, on hand; numbers raised, 1929, for chickens, geese, ducks, and turkeys; chicken eggs produced, chicken eggs sold, chickens sold, and baby chicks bought, 1929; and daily production of chicken eggs at the time of enumeration.
Bees and honey	Hives of bees, owned by operator, on his farm or elsewhere; and honey produced, 1929.
Miscellaneous items	Asses and burros, all ages.
Value of livestock and products.	Values were obtained in a lump sum on the schedule, for: (a) All livestock sold or traded in 1929; and (b) all milk, cream, butter, butterfat, meat, poultry, eggs, honey, wool, mohair, and other livestock products sold or traded, 1929. Values were obtained on the schedule separately for: (a) Milk sold as whole milk; (b) cream sold as butterfat; (c) cream sold not as butterfat; and (d) butter sold (churned on this farm). Values of inventories, 1930, and of livestock products (except milk produced), 1929, are based on county-unit prices obtained in cooperation with Department of Agriculture.
	CENSUS OF 1925 (Jan. 1)
Horses	Under 2 years; and 2 years and over.
Mules	Under 2 years; and 2 years and over.
Cattle	Beef cattle (cattle kept mainly for beef production): Calves under 1 year; heifers, 1 year and under 2; cows and heifers, 2 years and over; steers (of dairy and beef stock), 1 year and over; and bulls, 1 year and over. Dairy cattle (cattle kept mainly for milk production): Bulls, 1 year and over; calves, under 1 year; heifers, 1 year and under 2; and cows and heifers, 2 years and over. Calves born and raised, 1924; numbers of calves and of other cattle slaughtered for food, 1924.
	CENSUS OF 1925 (Jan. 1)—Continued
Dairy products	Cows milked (dairy cows and beef cows) during any part of 1924; milk produced, butter made, butterfat sold, cream sold (not on a butterfat basis), and whole milk sold (not on a butterfat basis), 1924.
Hogs and pigs	Pigs, under 6 months; sows and gilts for breeding purposes, 6 months and over; and all other hogs, 6 months and over; pigs born and raised, 1924; hogs and pigs slaughtered for food, 1924.
Sheep and wool	Lambs, under 1 year; ewes, 1 year and over; and rams and wethers, 1 year and over; lambs born and raised, 1924; sheep and lambs slaughtered for food, 1924; sheep shorn and wool produced, 1924.
Goats and mohair	Goats and kids, all ages; and number shorn and mohair produced, 1924.
Poultry	Total chickens and total turkeys (ages not specified); chicken eggs produced and chickens raised, 1924.
Bees and honey	No inquiry.
Miscellaneous items	No inquiry.
Value of livestock and products.	No inquiry on the Farm Schedule. Values of inventories, 1925, and livestock products (except milk produced), 1924, are based on county-unit prices, obtained in cooperation with the Department of Agriculture.
	CENSUS OF 1920 (Jan. 1)
Horses	On farms: Colts, under 1 year; colts, 1 year and under 2; mares, 2 years and over; geldings, 2 years and over; and stallions, 2 years and over. Breed and number of registered purebred mares and mare colts, and stallions and stallion colts. Not on farms: Colts under 1 year; colts, 1 year and under 2; mares, 2 years and over; geldings, 2 years and over; and stallions, 2 years and over.
Mules	On farms: Mule colts, under 1 year; mule colts, 1 year and under 2; and mules, 2 years and over. Not on farms: Mule colts, under 1 year; mule colts, 1 year and under 2; and mules, 2 years and over.
Cattle	On farms: (a) Beef cattle (cattle kept mainly for beef production)—calves, under 1 year; heifers, 1 year and under 2; cows and heifers, 2 years and over; steers, 1 year and under 2; steers, 2 years and over; and bulls, 1 year and over; (b) dairy cattle (cattle kept mainly for milk production)—calves, under 1 year; heifers, 1 year and under 2; cows and heifers, 2 years and over; and bulls, 1 year and over. Breed and number of registered purebred cows and heifers of all ages, and bulls and bull calves. Calves born and raised, 1919. Cattle and calves slaughtered and pounds of meat and meat products sold, 1919. Not on farms: (a) Beef cattle (cattle kept mainly for beef production)—calves, under 1 year; heifers, 1 year and under 2; cows and heifers, 2 years and over; steers, 1 year and under 2; steers, 2 years and over; and bulls, 1 year and over; (b) dairy cattle (cattle kept mainly for milk production)—calves, under 1 year; heifers, 1 year and under 2; cows and heifers, 2 years and over; and bulls, 1 year and over.
Dairy products	On farms: Milk produced, butter and cheese made on farms, milk sold, cream sold, butterfat sold, and butter sold, 1919.
Hogs and pigs	On farms: Pigs, under 6 months; sows and gilts for breeding purposes, 6 months and over; boars for breeding purposes, 6 months and over; and all other hogs, 6 months and over. Breed and number of registered purebred hogs and pigs. Pigs born and raised, 1919. Hogs and pigs slaughtered and pounds of meat and meat products sold, 1919. Not on farms: Pigs, under 6 months; sows and gilts for breeding purposes, 6 months and over; boars for breeding purposes, 6 months and over; and all other hogs, 6 months and over.
Sheep and wool	On farms: Lambs, under 1 year; ewes, 1 year and over; rams, 1 year and over; and wethers, 1 year and over. Breed and number of registered purebred sheep and lambs. Sheep shorn and wool produced, 1919. Lambs born and raised, 1919. Sheep and lambs slaughtered and pounds of meat and meat products sold, 1919. Not on farms: Lambs, under 1 year; ewes, 1 year and over; rams, 1 year and over; and wethers, 1 year and over.

Table 3.—ITEMS FOR LIVESTOCK AND LIVESTOCK PRODUCTS FOR WHICH DATA WERE OBTAINED: CENSUSES OF 1840 TO 1950—Continued

Subject	Date of census and item
	CENSUS OF 1920 (Jan. 1)—Continued
Goats and mohair	On farms: Kids, under 1 year, and goats, 1 year and over, raised for fleeces; and all other goats and kids. Goats shorn and mohair produced, 1919. Not on farms: Kids, under 1 year, and goats, 1 year and over, raised for fleeces; and all other goats and kids.
Poultry	On farms: Numbers on hand (ages not specified) for chickens, turkeys, ducks, geese, guinea fowls, and pigeons. Chicken eggs produced and eggs sold; and chickens raised, and chickens sold, 1919.
Bees and honey	On farms: Hives of bees; honey produced, 1919; and beeswax produced, 1919.
Miscellaneous items	On farms: Asses and burros, all ages. Not on farms: Asses and burros, all ages.
Value of livestock and products.	On farms: Values were enumerated for all items except: Milk produced, butter and cheese made on farms; numbers of sheep shorn and of goats shorn; chickens raised; eggs produced; honey and beeswax produced; young animals raised; purebred animals, 1920; and domestic animals slaughtered for food, 1919. Not on farms: No values were enumerated for livestock or livestock products.
	CENSUS OF 1910 (Apr. 15)
Horses	On farms: Mares, stallions, and geldings born before Jan. 1, 1909; colts born, 1909; and colts born after Jan. 1, 1910. Colts born on the farm, 1909 (if number born not known, number raised). Number and breed of purebred horses registered or eligible for register. Horses and colts purchased, 1909; and sold alive, 1909. Not on farms: Colts born after Jan. 1, 1910; colts born, 1909, and horses born before Jan. 1, 1909.
Mules	On farms: Mules born before Jan. 1, 1909; mule colts born, 1909; and mule colts born after Jan. 1, 1910. Mule colts born on the farm, 1909 (if number born not shown, number raised). Mules purchased, 1909 and sold alive, 1909. Not on farms: Mule colts born after Jan. 1, 1910; mule colts born, 1909; and mules born before Jan. 1, 1909.
Cattle	On farms: Cows and heifers born before Jan. 1, 1909, which were—(a) kept for milk and (b) not kept for milk; heifers born, 1909; calves born after Jan. 1, 1910; steers and bulls born, 1909; and steers and bulls born before Jan. 1, 1909, which were (a) kept for work and (b) not kept for work. Calves born on the farm, 1909 (if number born not known, number raised). Number and breed of purebred cattle registered or eligible for register. Numbers of cattle and of calves purchased, sold alive, and slaughtered on farms, 1909. Not on farms: Calves born after Jan. 1, 1910; steers and bulls born 1909; steers and bulls born before Jan. 1, 1909, which were (a) kept for work and (b) not kept for work; cows and heifers born, 1909; cows and heifers born before Jan. 1, 1909, which were (a) kept for milk and (b) not kept for milk.
Dairy products	On farms: Milk, butter, and cheese produced; and milk, butter, cream, butterfat, and cheese sold, 1909.
Hogs and pigs	On farms: Born before Jan. 1, 1910; and pigs born after Jan. 1, 1910. Pigs born on the farm, 1909. Number and breed of purebred hogs registered or eligible for register. Hogs and pigs purchased, sold alive, and slaughtered on farms, 1909. Not on farms: Pigs born after Jan. 1, 1910; and hogs and pigs born before Jan. 1, 1910.
Sheep and wool	On farms: Ewes born before Jan. 1, 1910; rams and wethers born before Jan. 1, 1910; and lambs born after Jan. 1, 1910. Lambs born on the farm, 1909. Number and breed of purebred sheep registered or eligible for register. Sheep purchased, sold alive, and slaughtered, 1909. Number of fleeces shorn and pounds of wool produced, 1909. Not on farms: Lambs born after Jan. 1, 1910; ewes born before Jan. 1, 1910; and rams and wethers born before Jan. 1, 1910.

Subject	Date of census and item
	CENSUS OF 1910 (Apr. 15)—Continued
Goats and mohair	On farms: Goats and kids, all ages. Kids born on the farm, 1909. Number and breed of purebred goats registered or eligible for register. Goats purchased, sold alive, and slaughtered, 1909. Number of fleeces and pounds of mohair (goat hair) produced, 1909. Not on farms: Goats and kids, all ages.
Poultry	On farms: Numbers, over 3 months, for chickens, turkeys, ducks, geese, guinea fowls, and pigeons. Fowls (all kinds) raised, fowls sold, eggs produced and eggs sold, 1909.
Bees and honey	On farms: Swarms, hives, or colonies on hand; honey produced, 1909; and beeswax produced, 1909.
Miscellaneous items	On farms: Asses and burros, all ages. Number and breed of purebred asses registered or eligible for register. Asses and burros purchased, 1909; and sold alive, 1909. Total amount (dollars) received for boarding or pasturing domestic animals not owned by operator, 1909. Not on farms: Asses and burros, all ages.
Value of livestock and products.	On farms: Values were enumerated for all livestock inventory and livestock production items, except animals born on the farm, 1909, and purebred animals. Not on farms: Values were enumerated for all livestock inventory items on the schedule.
	CENSUS OF 1900 (June 1)
Horses	On farms: Colts, under 1 year; horses, 1 year and under 2; and horses, 2 years and over. Pure-blooded horses, recorded or eligible to record. Not on farms: Colts, under 1 year; horses, 1 year and under 2; and horses over 2 years.
Mules	On farms: Mule colts, under 1 year; 1 year and under 2; and mules, 2 years and over. Not on farms: Mule colts, under 1 year; mules, 1 year and under 2; and mules, over 2 years.
Cattle	On farms: Calves, under 1 year; steers, 1 year and under 2; steers, 2 years and under 3; steers, 3 years and over; bulls, 1 year and over; heifers, 1 year and under 2; cows, 2 years and over which were (a) kept for milk, and (b) not kept for milk. Pure-blooded cattle, recorded or eligible to record. Not on farms: Calves, under 1 year; steers, 1 year and under 2; steers, 2 years and under 3; steers, over 3 years; bulls, over 1 year; and heifers, 1 year and under 2; and cows over 2 years which were (a) kept for milk and (b) not kept for milk.
Dairy products	On farms: Milk, butter, and cheese produced; and milk, cream, butter, and cheese sold, 1899.
Hogs and pigs	On farms: Total, all ages. Pure-blooded swine, recorded or eligible to record. Not on farms: Total, all ages.
Sheep and wool	On farms: Lambs, under 1 year; ewes, 1 year and over; and rams and wethers, 1 year and over. Pure-blooded sheep, recorded or eligible to record. Number of fleeces and weight of wool produced, fall of 1899 and spring of 1900. Not on farms: Lambs, under 1 year; ewes, over 1 year; and rams and wethers, over 1 year.
Goats and mohair	On farms: Goats, all ages. Pure-blooded Angora goats, recorded or eligible to record. Number of fleeces of mohair and of goat hair and weight of mohair and of goat hair produced, fall of 1899 and spring of 1900. Not on farms: Goats, all ages.
Poultry	On farms: Numbers, over 3 months, for chickens (guinea fowl included with chickens), turkeys, geese, and ducks; and eggs of all kinds produced, 1899.
Bees and honey	On farms: Number of swarms or hives; honey produced, 1899, and wax produced, 1899.
Miscellaneous items	On farms: Asses and burros, all ages. Not on farms: Asses and burros, all ages.

Table 3.—ITEMS FOR LIVESTOCK AND LIVESTOCK PRODUCTS FOR WHICH DATA WERE OBTAINED: CENSUSES OF 1840 TO 1950—Continued

Subject	Date of census and item
	CENSUS OF 1900 (June 1)—Continued
Value of livestock and products.	On farms: Values enumerated for all inventory items except pure-blooded animals. The following values for livestock products were enumerated: Value of sales of live animals raised on farm; market value of meat and byproducts from animals that were slaughtered or that died on farm, 1899; total value of milk, cream, butter, and cheese produced, 1899, and used on farm; amounts received from sale of milk, of cream, of butter, and of cheese, 1899; value of wool, of mohair, and of goat hair produced, fall of 1899 and spring of 1900; total value of all kinds of poultry on hand (all ages), and of all kinds of poultry raised, 1899; total value of all eggs produced, 1899; and total values of honey and wax produced, 1899. Not on farms: Values were not enumerated. On ranches: A special schedule was used on which were included all livestock questions asked on the General Farm Schedule with the following variations: (a) Number and kind of live animals purchased for the ranch and range during 1899; (b) amount paid, during 1899, for live animals on the ranch or range for breeding or feeding purposes; (c) number and kind of live animals sold from the ranch or range during 1899; (d) amount received, during 1899, from sale of live animals; (e) number and kind of animals slaughtered on the ranch or range during 1899; (f) market value of meat and other animal products of all animals slaughtered on the ranch or range, for home use or for sale; and (g) amount received, during 1899, from the sale of hides and pelts of animals dying from disease or accident. (Figures for livestock items enumerated on this schedule are included with figures for livestock on farms.)
	CENSUS OF 1890 (June 1)
Horses	Total on hand (age not specified). Foaled, 1889; and sold, 1889. Horses, mules, and asses died, 1889.
Mules	Total on hand (age not specified). Foaled, 1889; and sold, 1889. Died, 1889 (included with horses and asses).
Cattle	Numbers on hand (age not specified) for working oxen, milk cows, and for other cattle. Purebred (recorded); grade (one-half blood or higher); common or native (less than one-half blood). Calves dropped, 1889; cattle sold, alive or slaughtered, 1889; cattle slaughtered for use on the farm, 1889; cattle died, 1889.
Dairy products	Milk, butter, and cheese produced, 1889. Milk disposed of by sale for family consumption; sent to creamery or factory; used on farm, including for butter and cheese; used for raising cream for sale. Cream sent to creamery or factory; sold elsewhere. Butter sold. Cheese sold.
Hogs and pigs	Total on hand (age not specified). Sold, 1889; consumed on operator's farm, 1889; and died, 1889.
Sheep and wool	Numbers on hand (age and sex not specified) for Merino; for English breeds; and for all other sheep. Lambs dropped, 1889. "Spring lambs" sold for consumption in 1889; and "other than spring lambs" sold, 1889. Slaughtered for farm use, 1889; killed by dogs, 1889; and died from disease or weather, 1889. Fleeces shorn and weight of wool, spring of 1890 and fall of 1889.
Goats and mohair	Numbers (age not specified) for Angora and grades above half blood, and for common and grades below half blood.
Poultry	Numbers on hand (age not specified) for chickens, for turkeys, for geese, and for ducks. Eggs of all kinds produced, 1889, and eggs sold, 1889.
Bees and honey	Stands of bees. Honey produced, 1889, and wax produced, 1889.
Miscellaneous items	Asses (age not specified), number on hand; number foaled, 1889; and number sold, 1889. Number of asses that died, 1889, included with horses and mules. Number of dogs.
Value of livestock and products.	Value of all livestock enumerated in a lump sum. Values were enumerated for all poultry sold, for all eggs sold, and for honey and wax sold, 1889.
	CENSUS OF 1880 (June 1)
Horses	Total, all ages.
Mules	Total, mules and asses, all ages.
Cattle	Numbers on hand (age not specified), for working oxen, milk cows, and other cattle. Calves dropped, 1879. Numbers, of all ages, purchased, sold living, slaughtered, died, strayed, and stolen, 1879.
Dairy products	Milk sold or sent to butter or cheese factories, 1879. Butter made on farms and cheese made on farms, 1879.
Hogs and pigs	Total (age not specified).
Sheep and wool	Total sheep (age not specified). Lambs dropped, 1879. Sheep and lambs purchased, sold living, slaughtered, killed by dogs, died of disease, and died of stress of weather, 1879. Wool clip, spring of 1880, shorn or to be shorn: Number of fleeces, and weight of wool.
Goats and mohair	No inquiry.
Poultry	Numbers of poultry on hand, exclusive of spring hatching, "for barnyard," and for "other" poultry. Eggs produced, 1879.
Bees and honey	Honey produced and beeswax produced, 1879.
Miscellaneous items	Asses, all ages, included with mules.
Value of livestock and products.	Value of inventory for livestock enumerated in a lump sum.
	CENSUS OF 1870 (June 1)
Horses	Total (age not specified).
Mules	Total, mules and asses (age not specified).
Cattle	Numbers for milk cows, working oxen, and other cattle (calves excluded by instruction).
Dairy products	Butter and cheese made on farms and milk sold during the year ending June 1, 1870.
Hogs and pigs	Number ("sucking" pigs excluded by instruction).
Sheep and wool	Number (spring lambs excluded by instruction). Wool produced during the year ending June 1, 1870.
Goats and mohair	No inquiry.
Poultry	No inquiry.
Bees and honey	Honey and beeswax produced during the year ending June 1, 1870.
Miscellaneous items	Asses (age not specified), included with mules. Pounds of silk cocoons produced during the year ending June 1, 1870.
Value of livestock and products.	Value of livestock of every description (whether enumerated or not) was obtained in a lump sum. Value of animals slaughtered or sold for slaughter, during the year ending June 1, 1870, was also obtained.
	CENSUS OF 1860 (June 1)
Horses	Total (age not specified).
Mules	Total, mules and asses (age not specified).
Cattle	Numbers (ages not specified), for milk cows, working oxen, and other cattle.
Dairy products	Butter and cheese produced during the year ending June 1, 1860.
Hogs and pigs	Total (age not specified).
Sheep and wool	Total sheep (age not specified). Wool produced during the year ending June 1, 1860.
Goats and mohair	No inquiry.
Poultry	No inquiry.
Bees and honey	Honey and beeswax produced during the year ending June 1, 1860.
Miscellaneous items	Asses (age not specified), included with mules. Pounds of silk cocoons produced during the year ending June 1, 1860.
Value of livestock and products.	The value of all livestock on hand was enumerated in a lump sum. A value of animals slaughtered (no limiting dates) was enumerated.
	CENSUS OF 1850 (June 1)
Horses	Total (age not specified).
Mules	Total, mules and asses (age not specified).
Cattle	Numbers for milk cows, working oxen, and other cattle (1 year and over, by instruction).

Table 3.—ITEMS FOR LIVESTOCK AND LIVESTOCK PRODUCTS FOR WHICH DATA WERE OBTAINED: CENSUSES OF 1840 TO 1950—Continued

Subject	Date of census and item
	CENSUS OF 1850 (June 1)—Continued
Dairy products	Production of butter and of cheese during the year ending June 1, 1850.
Hogs and pigs	Total (age not specified).
Sheep and wool	Number (1 year and over, by instruction). Production of wool during the year ending June 1, 1850.
Goats and mohair	No inquiry.
Poultry	No inquiry.
Bees and honey	Honey and beeswax produced during the year ending June 1, 1850.
Miscellaneous items	Asses included with mules. Pounds of silk cocoons produced during the year ending June 1, 1850.
Value of livestock and products.	The value of all livestock on hand was enumerated in a lump sum. A value of animals slaughtered during the year ending June 1, 1850, was enumerated.
	CENSUS OF 1840 (June 1)
Horses	Total, horses and mules (ages not specified).
Mules	Included with horses.
Cattle	Total neat cattle (age not specified).
Dairy products	(See below, Value of livestock and products.)
Hogs and pigs	Total (age not specified).
Sheep and wool	Total sheep (age not specified). Pounds of wool, no mention of year or clips included.
Goats and mohair	No inquiry.
Poultry	(See below, Value of livestock and products.)
Bees and honey	Pounds of wax, no mention of year.
Miscellaneous items	Pounds of cocoons, no mention of year.
Value of livestock and products.	No total value for livestock inventory was enumerated. However, a value for products of the dairy and an estimated value of all poultry were enumerated.

Table 4.—SPECIFIED LIVESTOCK PRODUCTS OF FARMS—FARMS REPORTING, QUANTITY, AND VALUE, 1839 TO 1949: FOR THE UNITED STATES

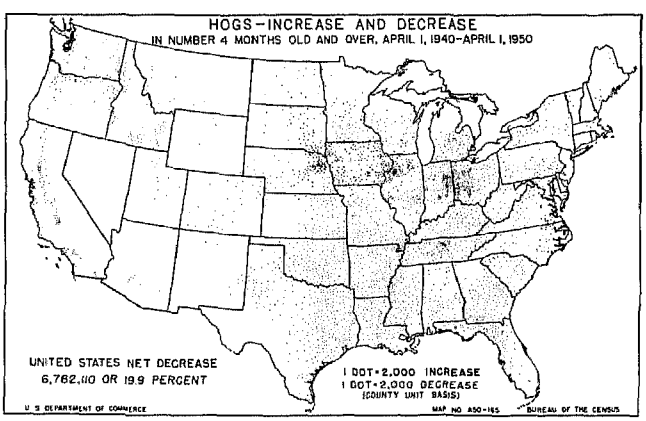
Sale of goats and kids, goat milk, and mohair, and of rabbits and fur animals and their pelts	1949	(*)	(*)	(*)	(*)	29,943,819	(*)



*Not available.
[1] Born before Jan. 1, 1909.
[2] Estimated on the basis of age distribution of dairy cows and heifers reported in the 1920 Census.
[3] Average value of sales per farm reporting.
[4] Fleeces clipped fall of 1899 and spring of 1900.
[5] Fleeces clipped fall of 1889 and spring of 1890. Wool includes 25,828,845 pounds from sheep on ranges for which number of fleeces was not available.
[6] Excludes 34,000,000 pounds of wool from other (ranch) sheep and 13,000,000 pounds from the fall clip in Texas and California.
[7] Figures for censuses prior to 1880 exclude range livestock and products.
[8] Enumerated only in 7 States—Arizona, California, Missouri, New Mexico, Oregon, Texas, and Utah.
[9] Value of sale of goats and kids, goat milk, and mohair reported from 11,379 farms in the 7 States in which goats were enumerated.
[10] Fowls of all kinds.
[11] 0.05 percent or less.
[12] Enumerated only in the 11 States comprising the Mountain and Pacific Divisions.
[13] Includes honey and wax.

*** Not available; separate inquiry not on questionnaire for all States. See text. [1] For 1950, excludes value of goats except for 7 States; for 1945, excludes value of turkeys on hand; and for 1940, excludes the value of young animals. For 1940, includes value of turkeys on hand, not shown separately in this table. [2] Total for States for which data are available. [3] 0.05 percent or less.

BY DIVISIONS AND STATES: 1950, 1945, AND 1940

included and for comparability of statistics]

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 and 1860 figures are for Dakota Territory. [2] In 1860, 1850, and 1840, Virginia included the area now known as West Virginia. [3] Figures for 1900 and 1890 include Indian Territory.

AND NUMBER, 1840 TO 1950; BY DIVISIONS AND STATES

for comparability of statistics]

Number of horses and colts														Number of horses and mules, 1840 (June 1)

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 and 1860 figures are for Dakota Territory. [2] In 1860 and 1850, Virginia included the area now known as West Virginia. [3] Figures for 1900 and 1890 include Indian Territory.

AND NUMBER, 1850 TO 1950; BY DIVISIONS AND STATES

for comparability of statistics]

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 and 1860 figures are for Dakota Territory.
[2] In 1860 and 1850, Virginia included the area now known as West Virginia.
[3] Figures for 1900 and 1890 include Indian Territory; those for 1880 are for Indian Territory.

NUMBER, 1850 TO 1950; BY DIVISIONS AND STATES

[1] Estimated on the basis of age distribution of dairy cows and heifers reported in the 1920 Census. [2] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota respectively. The 1870 and 1860 figures are for Dakota territory. [3] In 1860 and 1850 Virginia included the area now known as West Virginia. [4] Figures for 1900 include Indian Territory; those for 1890 are for Oklahoma Territory alone; no data for earlier years.

Table 22.—ALL COWS, MILK COWS, AND COWS MILKED—RELATIONSHIPS BETWEEN ITEMS

[See table 2 for description of inventory

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Butter only for 1944 and 1939. [2]Reports in gallons and in pounds of butterfat were converted to pounds. Conversion of pounds of butterfat in milk sold to pounds of milk made on basis of estimated test of milk in each State. Conversion of gallons to pounds made at 8.6 pounds per gallon. [3]Estimates furnished by the Bureau of Agricultural Economics for use in converting reports of whole milk sold on a butterfat basis to pounds of whole milk sold. Where leaders appear factors were not necessary for conversion. See text. [4]Published values for these years were computed on the basis of average prices. For publication in the 1950 Census, these values have been adjusted to equal the enumerated value of all dairy products sold. See text. [5]0.05 percent or less.

CREAM, AND OTHER DAIRY PRODUCTS SOLD; BY DIVISIONS AND STATES: 1949, 1944, AND 1939—Continued

Cream sold (pounds of butterfat)—Continued			Butter, buttermilk, skim milk, and cheese sold[1]						Percent of total value of sales represented by—									
Dollars—Continued			Farms reporting			Dollars			Whole milk sold			Cream sold			Other dairy products sold

Table 25.—CLASSIFICATION BY NUMBER OF MILK COWS IN HERD—MILK, CREAM, AND OTHER DAIRY PRODUCTS SOLD, COWS MILKED YESTERDAY, AND BUTTER CHURNED LAST WEEK, BY STATES: CENSUS OF 1950

[Data are based on reports for only a sample of farms. See text]

	Number of milk cows in herd	Milk cows, 1950				All cows, 1950 (number)	Any dairy products sold in 1949			Whole milk sold				
								Value of sales				Value of sales		
		Farms reporting	Number	Average per farm reporting	Percent of all cows		Farms reporting any sales	Dollars	Average per milk cow	Farms reporting	Pounds	Dollars	Average per cwt. (dollars)	Percent of total sales
1	United States, total	3,681,627	21,367,470	5.8	56.9	37,567,618	2,031,411	3,139,529,000	147	1,116,142	69,594,390,390	2,773,439,556	3.98	88.3
2	1 milk cow	1,058,457	1,058,457	1.0	30.1	3,515,956	179,968	27,162,966	26	61,154	442,439,478	17,351,548	3.92	63.9

[1] Butter, buttermilk, skim milk, and cheese. For individual States value of sales may be obtained by subtracting from total the values shown for whole milk and cream sold.
[2] Number of farms having no milk cows on hand on Census date.
[3] 0.05 percent or less.

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 and 1860 figures are for Dakota Territory. [2] In 1860, 1850, and 1840, Virginia included the area now known as West Virginia. [3] Figures for 1900 and 1890 include Indian Territory; those for 1880 are for Indian Territory.

DIVISIONS AND STATES: 1840 TO 1950

[1] Includes any farms reporting sheep shorn with no sheep on hand. [2] North Dakota and South Dakota were admitted as States in 1889. Figures for 1880 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 and 1860 figures are for Dakota Territory. [3] In 1860, 1850, and 1840, Virginia included the area now known as West Virginia. [4] Figures for 1900 include Indian Territory; those for 1890 are for Oklahoma Territory alone; those for 1880 are for Indian Territory.

Table 33.—SHEEP AND LAMBS SHORN AND WOOL—FARMS REPORTING, NUMBER SHORN, AND QUANTITY AND VALUE OF WOOL SHORN, BY DIVISIONS AND STATES: 1949, 1944, AND 1939

[Number of sheep shorn not enumerated in 1945 Census. Value of wool shorn as shown for 1949 was enumerated; for 1944 and 1939 value shown was computed using county unit prices]

	Region, division, and State	Farms reporting						Number shorn		Wool shorn (pounds)					Value of wool (dollars)				
		1949	1944	1939	Percent of all farms			1949	1939	1949	1944	1939	Average per sheep shorn		1949	1944	1939	Average per pound

[1] Farms reporting wool shorn; number shorn not enumerated in 1945 Census. [2] Excludes fleeces from sheep on ranges in Texas, Colorado, Montana, South Dakota, Utah, California, Arizona, and New Mexico. [3] Including estimates for incomplete reports. [4] Excludes 34,000,000 pounds of wool from other (ranch) sheep and 13,000,000 pounds from the fall clip in Texas and California. [5] North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 figures are for Dakota Territory. [6] In 1859, Virginia included the area now known as West Virginia. [7] Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone.

SHORN, AND POUNDS OF WOOL, BY DIVISIONS AND STATES: 1859 TO 1949

comparability of statistics]

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. [2] 0.05 percent or less. [3] Figures for 1900 include Indian Territory; those for 1890 are for Oklahoma Territory alone.

1880 TO 1950; AND VALUE, 1950, 1945, AND 1940: BY DIVISIONS AND STATES

[1]For 1949, value of butter, buttermilk, skim milk, and cheese sold; for 1944 and 1939, pounds of butter sold.

CHAPTER VII

FIELD CROPS AND VEGETABLES

CONTENTS

Introduction ... 493
Presentation of statistics ... 493
Other published data ... 493

DEFINITIONS AND EXPLANATIONS

Acreage ... 494
Production ... 494
Regional variation in inquiries regarding crops ... 494
Units of measure ... 494
Values ... 494
Corn ... 508
Sorghums ... 509
Small grains ... 509
Wheat ... 509
Oats ... 511
Barley ... 512
Rye ... 512
Buckwheat ... 512

DEFINITIONS AND EXPLANATIONS—Continued

Flaxseed ... 512
Grains grown together and threshed as a mixture ... 512
Rice ... 513
Other grain ... 513
Annual legumes ... 513
Hay ... 514
Clover seed, alfalfa, grass, and other field seed crops ... 515
Cotton ... 515
Tobacco ... 516
Irish potatoes and sweetpotatoes ... 517
Sugarcane and sweet sorghum for sirup ... 517
Sugar beets for sugar ... 517
Popcorn ... 517
Minor crops ... 517
Vegetables harvested for sale ... 518
Home gardens ... 518

CHARTS

Acreage of specified field crops and vegetables harvested, for the United States: 1949, 1944, and 1939 ... 508
Corn for all purposes and corn harvested for grain—Acreage for all purposes, 1924 to 1949; and acreage for grain, 1879 to 1949; for the United States ... 508
Corn harvested for grain—Production, for the United States: 1839 to 1949 ... 508
Wheat threshed—Acreage of all wheat, with supplemental data for winter wheat and spring wheat, for the United States: 1879 to 1949 ... 510
Wheat threshed—Production of all wheat, with supplemental data for winter wheat and spring wheat, for the United States: 1839 to 1949 ... 510
Oats for grain—Acreage of oats threshed, 1879 to 1949, and of oats cut for feeding unthreshed, 1924 to 1949; and production of oats threshed, 1839 to 1949; for the United States ... 511
Barley threshed—Acreage, 1879 to 1949; and production, 1839 to 1949; for the United States ... 511
Flaxseed threshed—Acreage, 1889 to 1949; and production, 1849 to 1949; for the United States ... 512
Rice threshed—Acreage, 1879 to 1949; and production, 1839 to 1949; for the United States ... 512
Soybeans—Acreage for all purposes and for beans, for the United States: 1909 to 1949 ... 513
Peanuts—Acreage for all purposes and for nuts, for the United States: 1889 to 1949 ... 514
All hay, excluding specified annual legumes and sorghum hay—Acreage, 1879 to 1949; and production, 1839 to 1949; for the United States ... 515
Cotton harvested—Acreage, 1879 to 1949; and production, 1839 to 1949; for the United States ... 516
Tobacco harvested—Acreage, 1879 to 1949; and production, 1839 to 1949; for the United States ... 516
Irish potatoes—Acreage, 1889 to 1949; and production, 1849 to 1949; for the United States ... 517
Acreage of specified vegetable crops harvested for sale for the United States: 1949, 1944, and 1939 ... 518

MAPS

All land in farms—Increase and decrease in acreage, April 1, 1940-April 1, 1950 ... 522
Corn for all purposes—Increase and decrease in acreage, 1939-1949 ... 522
Sorghums for all purposes except for sirup—Increase and decrease in acreage, 1939-1949 ... 522
All wheat threshed—Increase and decrease in acreage, 1939-1949 ... 522
Soybeans for all purposes except plowed under for green manure—Increase and decrease in acreage, 1939-1949 ... 522
Cowpeas for all purposes except plowed under for green manure—Increase and decrease in acreage, 1939-1949 ... 522
Cotton harvested—Increase and decrease in acreage, 1939-1949 ... 522
Land in fruit orchards, groves, vineyards, and planted nut trees—Increase and decrease in acreage, 1940-1950 ... 522
Corn for all purposes, acreage, 1949 ... 523
Corn harvested for grain, acreage, 1949 ... 523
Corn cut for silage, acreage, 1949 ... 523
Sorghums for all purposes, except for sirup, acreage, 1949 ... 523
All wheat threshed, acreage, 1949 ... 523
Sorghums harvested for grain or for seed, acreage, 1949 ... 523
Winter wheat threshed, acreage, 1949 ... 523
Spring wheat threshed, acreage, 1949 ... 523
Oats threshed, acreage, 1949 ... 524
Barley threshed, acreage, 1949 ... 524
Rye threshed, acreage, 1949 ... 524
Rice threshed, acreage, 1949 ... 524
Cotton harvested, acreage, 1949 ... 524
Tobacco harvested, acreage, 1949 ... 524
Sugar beets harvested for sugar, acreage, 1949 ... 524
Sugarcane cut for sugar or for sale to mills, acreage, 1949 ... 524
Soybeans grown for all purposes, acreage, 1949 ... 525
Soybeans harvested for beans, acreage, 1949 ... 525
Cowpeas grown for all purposes, acreage, 1949 ... 525
Flax threshed, acreage, 1949 ... 525
Peanuts grown for all purposes, acreage, 1949 ... 525
Peanuts harvested for picking or threshing, acreage, 1949 ... 525
Dry field and seed beans harvested for beans, acreage, 1949 ... 525
Dry field and seed peas, other than Austrian winter peas, harvested for peas, acreage, 1949 ... 525
Land from which hay was cut, acreage, 1949 ... 526
Alfalfa cut for hay, acreage, 1949 ... 526
Clover or timothy cut for hay, acreage, 1949 ... 526
Oats, wheat, barley, rye, or other small grain cut for hay, acreage, 1949 ... 526
Lespedeza cut for hay, acreage, 1949 ... 526
Wild hay cut, acreage, 1949 ... 526
Irish potatoes, acreage, 1949 ... 526
Sweetpotatoes, acreage, 1949 ... 526
Cash-grain farms, number, Census of 1950 ... 527
Other field-crop farms, number, Census of 1950 ... 527
Vegetable farms, number, Census of 1950 ... 527
Vegetables harvested for sale, acreage, 1949 ... 527
Sweet corn harvested for sale, acreage, 1949 ... 527
Tomatoes harvested for sale, acreage, 1949 ... 527
Watermelons harvested for sale, acreage, 1949 ... 527
Green peas (English) harvested for sale, acreage, 1949 ... 527
Green beans (snap, string, or wax) harvested for sale, acreage, 1949 ... 528
Green lima beans harvested for sale, acreage, 1949 ... 528
Lettuce and romaine harvested for sale, acreage, 1949 ... 528
Cabbage harvested for sale, acreage, 1949 ... 528
Cantaloups and muskmelons harvested for sale, acreage, 1949 ... 528
Cucumbers harvested for sale, acreage, 1949 ... 528
Asparagus harvested for sale, acreage, 1949 ... 528
Dry onions harvested for sale, acreage, 1949 ... 528
Total value of all crops harvested, 1949 ... 529
Value of all crops sold, dollars, 1949 ... 529
Value of field crops, other than vegetables and fruits and nuts sold, dollars, 1949 ... 529
Value of vegetables harvested for sale, dollars, 1949 ... 529

TABLES FOR THE UNITED STATES

Table—
1.—All crops—Acreage and value, for the United States: 1879 to 1949 ... 495
2.—Specified field crops harvested—Farms reporting, acreage, production, and value for the United States: 1839 to 1949 ... 496
3.—Specified vegetables—Farms reporting and acreage, for the United States: 1909 to 1949 ... 519
4.—Specified crops—Total value and percent of total represented by the several crops, for the United States: 1949 and 1944 ... 521

TABLES FOR GEOGRAPHIC REGIONS, DIVISIONS, AND STATES

Table—
5.—Value of all crops sold, by source, by divisions and States: 1949 ... 530
6.—Corn for all purposes—Farms reporting, 1924 to 1949; acreage, 1919 to 1949; and value, 1949: by divisions and States ... 532
7.—Corn—Farms reporting corn for all purposes by acres harvested, 1949 and 1939; and farms reporting corn for grain by acres harvested, 1949; by divisions and States ... 534
8.—Corn utilization—Farms reporting, acreage, production, and value; by divisions and States: 1949, 1944, and 1939 ... 536
9.—Corn harvested for grain—Farms reporting, 1899 to 1949; and acreage, 1879 to 1949: by divisions and States ... 538
10.—Corn harvested for grain—Production, 1839 to 1949; and yield per acre, 1879 to 1949: by divisions and States ... 540
11.—Sorghum for all purposes except sirup—Farms reporting, 1929 to 1949; acreage, 1924 to 1949; and value of crop and value of sales, 1949: by divisions and States ... 542
12.—Sorghum utilization—Farms reporting, acreage, production, and value; by divisions and States: 1949, 1944, and 1939 ... 544
13.—Sorghum—Farms reporting sorghum for all purposes except sirup by acres harvested, 1949; and farms reporting sorghum for grain by acres harvested, 1949 and 1939: by divisions and States ... 546
14.—Sorghum harvested for grain or for seed—Farms reporting, acreage, and production; by divisions and States: 1899 to 1934 ... 547
15.—Wheat threshed—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value and quantity sold, 1949: by divisions and States ... 548
16.—Winter and spring wheat threshed—Acreage and production, 1949, 1944, and 1939; and value of crop and quantity sold, 1949: by divisions and States ... 550
17.—Winter and spring wheat threshed—Farms reporting by acres harvested and by quantity sold; by divisions and States: 1949 ... 552
18.—Durum or macaroni and other spring wheat threshed—Farms reporting, acreage, and production, 1909 and 1929 to 1949; and value of crop and quantity sold, 1949: by divisions and States ... 554
19.—Durum or macaroni and other spring wheat threshed—Farms reporting by acres harvested and by quantity sold, by States: 1949 ... 555
20.—Wheat threshed—Farms reporting any wheat threshed, 1899 to 1934; and acreage, 1879 to 1934; with supplemental data for winter and spring wheat: by divisions and States ... 556

CONTENTS

TABLES FOR GEOGRAPHIC REGIONS, DIVISIONS, AND STATES—Continued

Table— Page

21.—Wheat threshed—Production of all wheat, 1839 to 1934; and of winter wheat, 1869, 1909 to 1934: by divisions and States ... 558
22.—Oats for grain and oats threshed—Acreage of oats for grain, 1949, 1944, and 1939; and value, 1949; with farms reporting, acreage, and production of oats threshed, 1949, 1944, and 1939; and value, 1949: by divisions and States ... 560
23.—Oats cut for feeding unthreshed and oats threshed—Farms reporting and acreage of oats cut for feeding unthreshed, 1949, 1944, and 1939; and value, 1949; and farms reporting oats threshed, 1949; by acres harvested and by quantity sold: by divisions and States ... 562
24.—Oats threshed and oats cut for feeding unthreshed—Farms reporting and acreage of oats threshed, 1879 to 1949; and farms reporting and acreage of oats cut for feeding unthreshed, 1924 to 1949: by divisions and States ... 564
25.—Oats threshed—Production, 1839 to 1949; and yield per acre, 1879 to 1934: by divisions and States ... 566
26.—Barley threshed—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value and quantity sold, 1949: by divisions and States ... 568
27.—Barley threshed—Farms reporting by acres harvested and by quantity sold, by divisions and States: 1949 ... 569
28.—Barley threshed—Farms reporting, 1899 to 1934; acreage, 1879 to 1934; and production, 1839 to 1949: by divisions and States ... 570
29.—Rye threshed—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value and quantity sold, 1949: by divisions and States ... 572
30.—Rye threshed—Farms reporting by acres harvested and by quantity sold, by divisions and States: 1949 ... 573
31.—Rye threshed—Farms reporting, 1919 to 1939; acreage, 1879 to 1939; and production, 1839 to 1949: by divisions and States ... 574
32.—Buckwheat threshed—Farms reporting, 1899 to 1949; acreage, 1879 to 1949; production, 1849 to 1949; and value of crop and quantity sold, 1949: by States ... 576
33.—Buckwheat threshed—Farms reporting by acres harvested and by quantity sold, by States: 1949 ... 577
34.—Emmer and spelt threshed—Farms reporting, acreage, and production, 1909 to 1949; and value of crop and quantity sold, 1949: by States ... 577
35.—Flaxseed threshed—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop and quantity sold, 1949: by States ... 578
36.—Flaxseed threshed—Farms reporting by acres harvested and by quantity sold, by States: 1949 ... 578
37.—Flaxseed threshed—Farms reporting, 1899 to 1934; acreage, 1889 to 1934; and production, 1849 to 1934: by States ... 579
38.—Mixed grains threshed—Farms reporting, acreage, and production, 1919 to 1949; and value of crop and quantity sold, 1949: by divisions and States ... 580
39.—Rice threshed—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop and quantity sold, 1949; with farms reporting by acres harvested and by quantity sold, 1949: by States ... 582
40.—Rice threshed—Farms reporting, 1899 to 1934; acreage, 1879 to 1934; and production, 1839 to 1934: by States ... 582
41.—Other grain threshed—Farms reporting, acreage, production, value of crop, and quantity sold, by divisions and States: 1949 ... 583
42.—Soybeans for all purposes—Farms reporting and acreage, 1929 to 1949; with farms reporting by acres grown alone, 1949: by divisions and States ... 584
43.—Soybeans harvested for beans—Farms reporting, acreage, and production, 1909 to 1949; and value, 1949; with farms reporting by acres harvested, 1949: by divisions and States ... 586
44.—Cowpeas for all purposes—Farms reporting and acreage, 1929 to 1949; with farms reporting by acres grown alone, 1949: by divisions and States ... 588
45.—Cowpeas for dry peas—Farms reporting, acreage, and production, 1879 to 1949; and value, 1949; with farms reporting by acres harvested, 1949: by divisions and States ... 590
46.—Soybeans cut for hay, hogged or grazed, or cut for silage, and plowed under for green manure—Farms reporting, acreage, and value; by divisions and States: 1949 ... 592
47.—Cowpeas cut for hay, hogged or grazed, or cut for silage, and plowed under for green manure—Farms reporting, acreage, and value; by divisions and States: 1949 ... 593
48.—Peanuts for all purposes—Farms reporting and acreage, 1929 to 1949; with farms reporting by acres grown alone, 1949: by divisions and States ... 594
49.—Peanuts harvested for picking or threshing—Farms reporting, acreage, and production, 1889 to 1949; and value, 1949: by divisions and States ... 596
50.—Peanut vines or tops saved for hay or forage—Farms reporting and production, 1949 and 1944; and acreage and value of crop, 1949; with farms reporting by number of acres (grown alone) harvested, 1949: by States ... 598
51.—Peanuts harvested for picking or threshing—Farms reporting by number of acres (grown alone) harvested, by States: 1949 ... 599
52.—Velvetbeans for all purposes—Farms reporting, 1919, 1929, and 1949; acreage, 1909, 1919, 1929, and 1949; production, 1909, 1929, and 1949; and value, 1949: by States ... 599
53.—Dry field and seed beans harvested for beans—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 600
54.—Dry field and seed beans harvested for beans—Farms reporting and acreage, 1899, 1909, and 1919; and production, 1879 to 1934: by divisions and States ... 601
55.—Dry field and seed peas harvested for peas (other than cowpeas and Austrian winter peas)—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 602
56.—Dry field and seed peas—Farms reporting and acreage, 1919, 1909, and 1899; and production, 1879 to 1929: by divisions and States ... 603
57.—All hay, excluding specified annual legumes and sorghum hay—Farms reporting, 1949; acreage and production, 1949, 1944, and 1939; and value of crop and amount and value of hay sold, 1949: by divisions and States ... 604
58.—All hay, excluding specified annual legume and sorghum hay—Farms reporting by acres harvested and by tons of hay sold, by divisions and States: 1949 ... 606
59.—Alfalfa cut for hay or for dehydrating—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 607
60.—Clover or timothy (alone or mixed) cut for hay—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 608
61.—Lespedeza cut for hay—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 609
62.—Small grains cut for hay—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 610
63.—Other hay—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, 1949; with farms reporting by acres harvested, 1949: by divisions and States ... 611
64.—Wild hay—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop, and farms reporting by acres harvested, 1949: by divisions and States ... 612
65.—Hay or grass silage and pasture receipts—Farms reporting, acreage, production, and value of hay or grass silage, 1949 and 1939; with data on receipts from sale of pasture and grazing privileges, 1949: by divisions and States ... 613
66.—All hay, excluding specified annual legume and sorghum hay—Farms reporting, 1949; acreage, 1879 to 1949; and production, 1849 to 1949: by divisions and States ... 614
67.—Alfalfa cut for hay—Farms reporting, acreage, and production; by divisions and States: 1899 to 1934 ... 616
68.—Clover or timothy (alone or mixed) cut for hay—Farms reporting, 1934; and acreage and production, 1909 to 1934: by divisions and States ... 617
69.—Small grains cut for hay—Farms reporting, acreage, and production; by divisions and States: 1899 to 1934 ... 618
70.—Wild hay cut—Farms reporting, acreage, and production; by divisions and States: 1899 to 1929 ... 619
71.—Alfalfa seed—Farms reporting, acreage, and production, 1909 to 1949; and value of crop, 1949: by divisions and States ... 620
72.—Lespedeza and sweetclover seed—Farms reporting, acreage, and production of lespedeza seed, 1949, 1944, and 1939; and value of crop, 1949; and farms reporting, acreage, and production of sweetclover seed, 1949 and 1939: by divisions and States ... 621
73.—Red clover seed and timothy seed—Farms reporting, acreage, and production of red clover seed, 1899 to 1949, and value of crop, 1949; and farms reporting, acreage, and production of timothy seed, 1919 to 1949, and value of crop, 1949: by divisions and States ... 622
74.—Miscellaneous clover, grass, and other field seed crops—Farms reporting, acreage, production, and value of crop; by States: 1949 ... 624
75.—Cotton—Farms reporting, acreage, and production of lint cotton, 1839 to 1949; and value of crop and value of sales, 1949; with supplemental data on cottonseed: by divisions and States ... 628
76.—Cotton—Farms reporting by acres harvested, by divisions and States: 1949 ... 630
77.—Cotton—Farms reporting by bales of cotton produced, by divisions and States: 1949 ... 631
78.—Tobacco—Farms reporting, acreage, and production, 1949 and 1944; and value of crop and value of sales, 1949; with farms reporting by acres harvested, 1949: by divisions and States ... 632
79.—Tobacco—Farms reporting, acreage, and production; by divisions and States: 1849 to 1939 ... 634
80.—Popcorn—Farms reporting, acreage, and production, 1919 to 1949; and value of crop and value of sales, 1949: by divisions and States ... 636
81.—Broomcorn—Farms reporting, acreage, and production, 1879 to 1949; and value of crop and value of sales, 1949: by States ... 637
82.—Sugarcane or sorghum for sirup—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop and value of sales, 1949; with data on sugarcane for sirup, 1929: by divisions and States ... 638
83.—Sweet sorghum for sirup—Farms reporting, acreage, and production; by divisions and States: 1859 to 1929 ... 640
84.—Sugar beets harvested for sugar—Farms reporting, acreage, and production, 1899 to 1949; and value of crop and value of sales, 1949: by States ... 642
85.—Sugarcane for sugar and for seed—Farms reporting, acreage, and production of sugarcane for sugar, 1929 to 1949; and value of crop and value of sales, 1949; with data on sugarcane for seed, 1949 and 1939: by States ... 643
86.—Irish potatoes—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop and value of sales, 1949: by divisions and States ... 644
87.—Sweetpotatoes—Farms reporting, acreage, and production, 1949, 1944, and 1939; and value of crop and value of sales, 1949: by divisions and States ... 645
88.—Irish potatoes—Farms reporting, acreage, and production by number of acres harvested; by divisions and States: 1949 and 1944 ... 646
89.—Sweetpotatoes—Farms reporting, acreage, and production by number of acres harvested; by divisions and States: 1949 ... 648
90.—Irish potatoes—Farms reporting, acreage, and production; by divisions and States: 1859 to 1949 ... 650
91.—Sweetpotatoes—Farms reporting, acreage, and production; by divisions and States: 1849 to 1949 ... 652
92.—Root and grain crops hogged or grazed; root crops for feed; and pumpkins for feed—Farms reporting, acreage, and production, 1949 and 1939; and value, 1949: by divisions and States ... 654
93.—Miscellaneous field crops—Farms reporting, acreage, production, and value of crop; by States: 1949 ... 655
94.—Vegetables grown for home use (other than Irish and sweet potatoes)—Farms reporting, 1909 to 1949; and value of crop, 1944: by divisions and States ... 657
95.—Vegetables harvested for sale (other than Irish and sweet potatoes)—Farms reporting, acreage, and value; by divisions and States: 1909 to 1949 ... 658
96.—Specified vegetables harvested for sale—Farms reporting and acreage, by divisions and States: 1949, 1944, and 1939 ... 660
97.—Miscellaneous vegetables harvested for sale—Farms reporting and acreage, by divisions and States: 1949 ... 667

CHAPTER VII.—FIELD CROPS AND VEGETABLES

Introduction.—This chapter resents statistics for field crops and vegetables harvested in 1949, as collected in the 1950 Census of Agriculture. The data presented herein for each individual field crop are totals for the entire crop, while those for vegetables, in the main, are totals for the portion harvested for sale. In regard to vegetables harvested for home use, only a count of the farms which had home gardens was obtained. Statistics for Irish potatoes and sweetpotatoes are shown with field crops, not with vegetables.

The data for each individual crop always includes the number of farms on which the crop was produced and the area harvested. For most crops other than vegetables, data are also given for the production and the value of the crop. Vegetables are marketed in a wide variety of ways; for example, in bunches, baskets, lugs, and crates—all of varying sizes—as well as by weight. For that reason, no attempt has been made to gather production statistics for vegetable crops, either in a common unit or in the variable units for office conversion into a common unit. The production was not obtained for a few other crops, particularly those which were grazed or hogged off as mature crops.

For many of the principal crops, totals are presented for the quantity sold and/or for the value of sales. Such information is sometimes presented for groups of similar crops, such as small grains, hays, etc. Some supplementary information is given for many of the individual crops. For example, the numbers of farms reporting some of the principal crops have been arrayed according to the number of acres harvested and also according to the quantity sold. A presentation is made of the farms reporting cotton arrayed according to the bales harvested. Separate data are presented in this chapter showing the utilization according to different methods of harvesting for a few of the crops, such as corn, sorghums, soybeans, cowpeas, and peanuts.

The value-of-crop figures for the individual crops were not obtained by enumeration. They are computed values based on reports obtained by the Bureau of Agricultural Economics, U. S. Department of Agriculture, from a sample of farmers and dealers in farm products. (See a later discussion of "Values" for the method of computation.)

Presentation of statistics.—Totals are shown in this chapter for the United States; for the North, the South, and the West; for nine geographic divisions; and for all States. An outline map showing the States and other geographic areas for which totals are shown appears in the Introduction to this volume. Usually, comparative data from recent censuses are given for all areas to provide a measure of the changes that have occurred from census to census. Comparative data for the earlier censuses are given for the United States for nearly all crops, whereas, for other areas they are shown only for the principal crops.

For some crops, separate data have not been obtained for all States during each census. In such cases, totals are presented for the specified States for which figures are available. Often, these totals approximate full coverage from a national or regional viewpoint.

The tables presenting statistics for earlier census years, and those presenting totals for specified States only, contain headnotes, footnotes, or special wording of columns or stub headings to indicate any significant lack of comparability because of changes in wording of the inquiries, instructions to enumerators, or in definitions and procedures used for collecting and compiling the data. The text also presents information regarding the comparability of data for the various censuses.

Chapter VIII, of this volume, entitled "Fruits and Nuts, Horticultural Specialties, Forest Products," gives detailed data for berry crops; tree fruits, nuts, and grapes; and for nursery and greenhouse crops, and other horticultural specialties. An overall picture of crop production in the United States is presented in the first summary table in this chapter on field crops and vegetables. Separate totals are given in that table for the acreage and value of all field crops combined and for all vegetables combined.

Other published data.—County totals for practically all of the important crops are shown in County Table 5 of Volume I of the reports for the 1950 Census of Agriculture. County Table 6 of that volume gives, for a few crops, totals for "commercial" and "other" farms. (See the Introduction to this volume for a description of these two groups of farms.) County Table 7 in the same volume presents totals for the value of all crops sold and for the major groups of crops comprising the totals, among which are field crops and vegetables. All of these county data are enumerated totals, except those for the value of the crop.

State economic area totals are given in Economic Area Tables 9, 10, 11, and 12 of Volume I for several of the principal crops and for the value of sales of all crops, field crops, vegetables, etc. Economic Area Table 4 gives counts of farms reporting corn and other selected principal crops according to the number of acres harvested and also according to the number of bushels or other units sold. These data for State economic areas are mainly based on reports for a sample of farms. The totals estimated from the sample do not always correspond exactly to the totals shown in the county tables. (See the Introduction to this volume for the sampling procedure used in 1950 and for reliability of the estimated totals.)

A sample of the farms enumerated in the 1950 Census has been classified by type of farm. The value of sales of various farm products or groups of farm products was used, in large part, in making the classification. Among the types of farms are cash-grain farms, cotton farms, other field-crop farms, and vegetable farms. Part of the value data for delineating these types is shown in this chapter. The number of farms by type of farm are given by counties in County Table 7 of Volume I. Adjustments have been made in the count of all types in the county totals so as to equal the enumerated count for all farms. Economic Area Table 7 of Volume I shows some characteristics for farms of the various types. Economic Area Table 9 shows basic totals for several of the principal crops and for the value of sales of all crops, field crops, vegetables, etc., for farms classified by size of farm. Economic Area Tables 10, 11, and 12 show the same kind of data by tenure of farm operator, by type of farm, and by economic class of farm, respectively.

The composition of the total value of farm products sold and the proportions represented by all crops, by field crops, and by vegetables are presented in Chapter IX, "Value of Farm Products," of this volume. Other data related to those shown herein are given in Chapter X, "Size of Farm"; in Chapter XI, "Color, Race, and Tenure of Farm Operator"; in Chapter XII, "Economic Class of Farm"; and in Chapter XIII, "Type of Farm."

State Table 13 of Volume I presents data on the number of field-crop farms and vegetable farms for those farms classified as "large farms." Totals are also shown therein for specified crops harvested on such large farms and for the value of sales of field crops, vegetables, etc. (See the Introduction to this volume for a description of "Large farms" and for the classification of farms by type.)

For the 17 Western States (Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming) and for Arkansas, Louisiana, and Florida, statistics are given by counties, in County Table 5a of Volume I, for farms reporting, acreage, and production of the most important crops harvested on irrigated land. The figures given in that table represent totals for only those crops for which the acreage harvested was completely irrigated on the farm on which such crops were produced. The figures do not include the irrigated portion of those crops grown on the farm for which only a part of the area of a particular crop was irrigated; for example, if 80 acres of corn were harvested on a given farm and only 20 acres were irrigated, the 20 irrigated acres of corn would not appear as a part of the irrigated acreage in County Table 5a. In most States, the acreage of these partly irrigated crops represents only a small proportion of the total acreage of irrigated crops. Data on crops harvested from irrigated land also appear for States and geographic divisions in Volume III, "Irrigation of Agricultural Lands," of the reports for the 1950 Census of Agriculture.

DEFINITIONS AND EXPLANATIONS

Definitions having general application such as those for "a farm," "farms reporting," etc., are given in the Introduction to this volume. A description of the procedures used for collecting and compiling the information found in this chapter and a statement of the completeness of the census are also given in the Introduction.

The definitions and explanations are limited to those considered necessary for the use and appraisal of the 1950 data. These are generally applicable to earlier censuses also. The facsimile of the questionnaire, given in the Appendix, shows the inquiries used to obtain the information on field crops and vegetables in the 1950 Census of Agriculture.

Acreage.—The data given for the acreage of field crops represent the acreage harvested during the crop year 1949, either for sale or for use on the farm where grown. For those States for which separate inquiries were on the questionnaire for soybeans, cowpeas, peanuts, and velvetbeans, information was obtained for the total acreage grown for all purposes. This was intended to include the acreage plowed under for green manure. The area for vegetable crops represents the acreage harvested for sale during the calendar year preceding the census.

The acreage of a crop harvested is sometimes less than the acreage planted because of losses due to drouth, hail, or other causes. Crops planted for one purpose may have been harvested for another purpose because of change in plans, prices, weather, etc.

The sum of the acreages of the crops harvested in a given area may not exactly equal the acreage of cropland harvested. Such totals are compared in table 1, for the United States. The total acreage for crops harvested will be greater than that for cropland harvested when two or more crops are harvested from the same land during a crop year. The opposite effect is caused by the lack of information for the acreage occupied by farm gardens, small orchards, etc.

For most field crops, the acres harvested were reported as whole acres. However, provision was made on the questionnaire for the reporting of fractional acreages in tenths for Irish potatoes, sweetpotatoes, tobacco, sweet sorghums, and sugarcane for sirup, and for vegetables harvested for sale.

Production.—Production refers to the quantity harvested during the crop year preceding the census. The production includes the portion sold as well as that portion used on the farm. It includes the part of the crop retained by a tenant as well as the landlord's share.

Data on production were not obtained for vegetables harvested for sale because of the wide variety of units of measure, containers, etc., used for measuring the harvest of vegetable crops. Some mature crops are harvested by hogging or grazing and no attempt was made to obtain the production of such crops.

Regional variation in inquiries regarding crops.—For the Censuses of 1950, 1945, and 1940, the inquiries regarding crops harvested have been varied according to region. In each census, separate inquiries were on the questionnaire for the crops of importance in a State or region and no separate inquiry was on the questionnaire for crops of little importance or for those not grown in the State or region. State or regional questionnaires also permitted the use of the most common unit of measure in each area for reporting the production of each crop. The approach to a State questionnaire was more nearly realized in the 1950 Census, when 41 different questionnaires were used, thus permitting a closer adaptation of the crop inquiries to the kinds of crops harvested in nearly every State. (See "Organization of Questionnaire" in the Introduction to this volume.) In 1950 and in 1940, provision was made on the questionnaire and in the tabulation procedures for securing information for those crops for which a separate question did not appear on the questionnaire.

Units of measure.—The unit of measure for each field crop on the 1950 Questionnaires was varied according to the unit most commonly used in each State or group of States. Production figures given in the tables of Volume I are shown in the same units in which the crops were enumerated. For the tables in this chapter, production figures for each crop are shown in a common unit for all States. Standard weights and measures were used for converting production when this was necessary. In some instances, the contents of containers or weight of the units of measure used in earlier censuses are not available. Production figures for some earlier years have not been converted to the units used in the 1950 Census.

Values.—Data for two types of values are shown in this chapter, viz, value of the crop harvested and value of sales or value of the amount sold. The value of the total crop harvested was computed for all individual field crops except root crops grazed or hogged off, some grain crops grazed or hogged off, and crops plowed under for green manure. The figures shown for value of crop for the individual crops were not obtained during the enumeration. They were secured by multiplying the quantity harvested for each crop, county by county, by unit prices. Unit prices were obtained cooperatively by the Bureau of Agricultural Economics, U. S. Department of Agriculture, and the Bureau of the Census. They were based on reports obtained by the Bureau of Agricultural Economics from a sample of farmers and dealers in farm products. Average prices were computed for groups of counties comprising price-reporting or crop-reporting districts used by the Bureau of Agricultural Economics, and the same average was generally used for each county in such district. State totals for the value of each crop were obtained by adding totals for the counties in the State. The average values of crops shown in the various tables of this chapter represent weighted averages. They were computed by dividing the total value of the crop for State, or larger geographic area, by the total quantity harvested.

The value of the amount sold or value of sales of crops was obtained for each farm in the enumeration. Value of sales were obtained for some of the crops individually, for example, cotton, tobacco, Irish potatoes, sweetpotatoes, etc. For other crops, the value of sales was obtained in a combined total for a group

Table 1.–ALL CROPS–ACREAGE AND VALUE, FOR THE UNITED STATES: 1879 TO 1949

[The first agricultural census was in 1840. Total acreage of crops not secured prior to 1879, and total value of crops not secured prior to 1899]

*Not available.
**Available data not comparable.
[1]For Census of 1920, cropland harvested was obtained by adding the acres of individual crops harvested. See note 6.
[2]Total acreage of crops harvested for which figures are available. Includes any acreage of alfalfa seed and clover and grass seeds enumerated, some of which was harvested from land also cut for hay.
[3]Total for specified crops.
[4]Irish and sweet potatoes included with "Field Crops," not with "Vegetables."
[5]Only strawberries included in small fruits; other small fruits included in field crops.
[6]14,502,932 acres of corn cut for fodder were excluded as most of this acreage was probably duplicated in the acreage of corn harvested for grain. The value of this fodder, $206,934,650, was also excluded.
[7]Irish and sweet potatoes included with "Field Crops," not with "Vegetables." Acres of vegetables represent acres of vegetables harvested for sale only; acreage in farm gardens not available. Value includes both vegetables for home use and for sale, except as noted.
[8]Vegetables harvested for sale.
[9]Farm garden vegetables for home use only.
[10]Excludes acreage of land in fruits and nuts on farms reporting less than 1/2 acre in orchards, vineyards, and planted nut trees. See text.
[11]Acreage of horticultural specialties not included.
[12]Acreage in fruit orchards, vineyards, and planted nut trees not secured prior to the 1930 Census.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available. **Available data not comparable. [1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2]Excludes sweet corn, popcorn, "Egyptian corn," kafir, and milo maize. [3]Total of corn harvested for grain and corn for silage; 14,502,932 acres of corn cut for fodder were excluded, as most of this acreage was probably duplicated in the acreage of corn harvested for grain. The value of this fodder, $206,934,650, was also excluded. [4]Corn cut for forage. [5]Totals of sorghum harvested for grain and sorghum cut for forage or fodder. The acreage of the latter probably duplicated a part of the acreage for grain. [6]Farms reporting sorghum for grain only. Acreage, production, and value for sorghum for grain and seed. [7]Schedule inquiry was for kafir corn and milo maize with instructions to include all Jerusalem or "Egyptian corn" and kindred crops not specifically mentioned. [8]Schedule called for kafir corn with production in tons. Inquiry was listed under grains and seeds. Instructions on schedule called for reporting with kafir corn, all Jerusalem corn, milo maize, and durra corn harvested after ripening for the grain. [9]0.05 percent or less. [10]Excludes hogged or grazed. [11]Kafir, milo maize, durra, sweet sorghum, and sugarcane cut for forage or fodder which duplicated a part of the acreage for grain.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available.
[1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available.
[2]Prior to 1909, production of rice was reported in pounds. In the 1910 publication, production for earlier years was converted to bushels by using 27.8 as a divisor, on the assumption that a bushel of rough rice (45 pounds) was equivalent to 27.8 pounds of hulled rice.
[3]Totals are for States for which data are available. See text discussion.
[4]The 1944, 1939, and 1929 figures do not include acres plowed under for green manure.
[5]0.05 percent or less.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available. [1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2]For 1879, the schedule inquiry for field peas was "Canada peas." Although no separate totals were given in the 1880 publication, the production in Alabama, Florida, Georgia, Arkansas, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and a portion of Missouri was considered as cowpeas and the production in all other States as "Canada peas." In the 1890 publication, 4,740,240 bushels of cowpeas and 1,774,737 bushels of "Canada peas" were given as the production of dry peas for 1879, the entire production of Missouri being included as cowpeas. [3]0.05 percent or less. [4]Totals are for States for which data are available. See text discussion. [5]Soybeans, cowpeas, and peanuts. [6]283,284 farms reported soybeans for either beans or hay, or both; 407,441 farms reported cowpeas for either peas or hay, or both; and 250,847 farms reported peanuts for either nuts or hay, or both. [7]Soybeans, cowpeas, peanuts, and vetches.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available. [1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2]Excludes soybeans, cowpeas, and peanut vines for hay, 1949; and annual legume hay in 1939. See text. [3]Totals are for States for which data are available. See text discussion. [4]Production and value includes an undetermined tonnage of sorghums cut for hay. [5]Includes value of forage. [6]Includes coarse forage. [7]In 1929 and 1924, crimson clover was included with sweetclover and lespedeza. [8]1,491,287 farms reported either timothy or timothy and clover mixed, or both; 341,546 reported 1 or more of the following clovers—red, alsike, or mammoth. [9]672,701 farms reported timothy; 1,264,283 reported clover and timothy mixed; and 315,572 reported 1 or more of the following clovers—red, alsike, or mammoth. [10]Includes lespedeza. [11]840,567 farms reported timothy; 1,203,376 timothy and clover, mixed; and 328,878 clover alone. [12]1,024,670 farms reported timothy; 1,184,826, timothy and clover mixed; and 262,892, clover alone. [13]Clover only; timothy was included under "Other tame grasses." [14]Data may not be fully comparable with other years. Some small grain hay apparently enumerated as oats cut for feeding unthreshed. [15]Includes soybeans and cowpeas cut for hay. [16]Excludes specified annual legumes and sorghum hay. For 1949 and 1934 includes wild hay and lespedeza in those States where separate inquiries were not on the questionnaire. [17]Silage crops other than corn and sorghums. [18]0.05 percent or less.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available. [1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2]Totals are for States for which data are available. See text discussion. [3]Clover seed except sweetclover. [4]Includes sweetclover. [5]Red clover, including medium and mammoth. [6]0.05 percent or less. [7]Farms reporting represents the sum of farms reporting hairy vetch and farms reporting other vetch in Oregon and involves some duplication. [8]Excludes proso or hog millet, which is included in "Other grain."

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

(*) Not available. [1] For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2] Production computed for all years except 1929, which was reported. See text. [3] Totals are for States for which data are available. See text discussion. [4] Farms reporting the three types of tobacco in Kentucky and Tennessee have been added and involve some duplication. See text. [5] Totals for Kentucky and Tennessee only. [6] 0.05 percent or less. [7] Total of farms reporting sugarcane or sorghum for sirup and farms reporting sweet sorghum for sirup. See table 82. [8] Includes data for sugarcane for feed for 1939, as follows: 8 farms reporting 13 acres and 91 tons, valued at $616. [9] Prior to 1930, nominally sugarcane for sugar or sirup, or both. Data prior to 1879 limited to production only. However, statistics for production from 1839 to 1899 are not available in tons, but as pounds of sugar and gallons of sirup as follows: 1889—301,284,395 pounds of sugar and 25,409,228 gallons of sirup; 1879—178,872,000 pounds of sugar and 16,573,273 gallons of sirup; 1869—87,043,000 pounds of sugar and 6,589,694 gallons of sirup; 1859—230,982,000 pounds of sugar and 14,954,005 gallons of sirup; 1849—247,577,000 pounds of sugar and 12,060,230 gallons of sirup; 1839—155,100,809 pounds of sugar of all kinds (separate figures for cane sugar and for sirup not available). [10] In 1929, the figures shown for farms reporting is a total of 196,423 farms reporting sugarcane for sirup and 6,717 farms reporting sugarcane for sugar, or for sale to mills, of which number not more than 1,217 reported sugarcane for both uses. [11] Not available for the United States. Louisiana produced 1,664,018 tons valued at $9,504,962 from 265,157 acres in 1924.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

*Not available. [1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available. [2]Totals are for States for which data are available. See text discussion. [3]0.05 percent or less. [4]108,298,060 bushels of potatoes in 1839, Irish or sweet not specified. [5]Does not include acreage for farms with less than 15 bushels harvested. See text. [6]Acreage not completely reported. 13 States had a total of 911,325 acres of Irish potatoes and 23 States a total of 444,817 acres of sweetpotatoes. [7]Sorghum not excluded in 1939.

Table 2.—SPECIFIED FIELD CROPS HARVESTED—FARMS REPORTING, ACREAGE, PRODUCTION, AND VALUE FOR THE UNITED STATES: 1839 TO 1949—Continued

[The first agricultural census was in 1840. Increase or decrease not shown for periods of more than 10 years. Figures in reverse italics are not included in totals shown in table 1. Percent not shown when 1,000 or more. Figures for divisions and States are shown in tables 6 to 93]

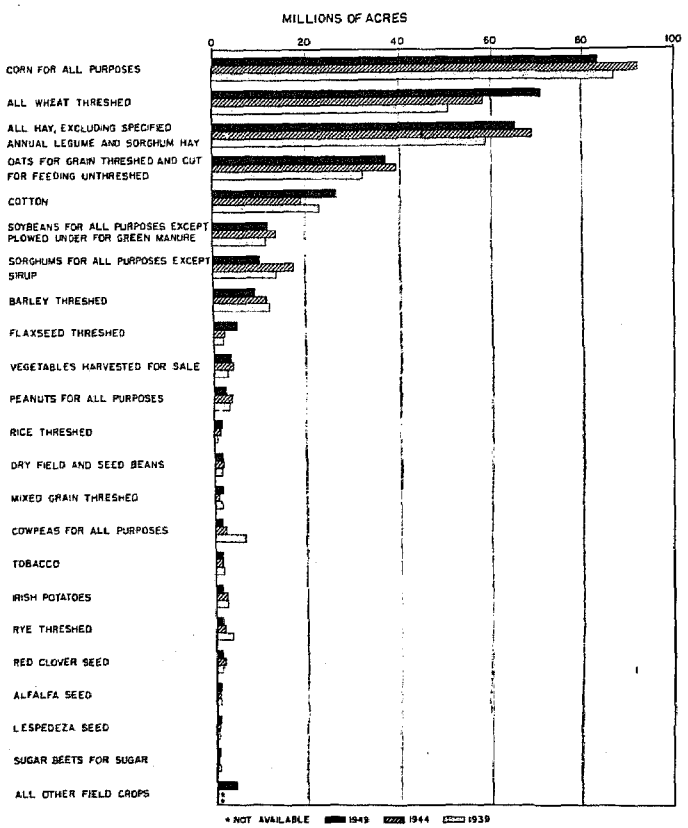
*Not available.
[1]For years prior to 1924, percentages are based on the total acreage of crops for which figures are available.
[2]0.05 percent or less.
[3]Production as reported: New York, 3,617 thousands; Oregon, 40,000 pounds; and California, 90,000 pounds.

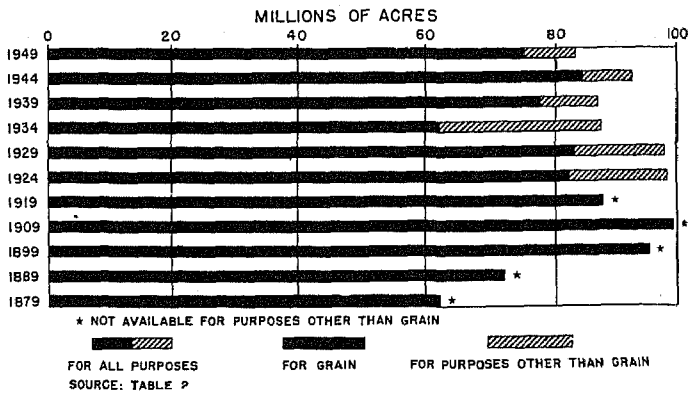


of crops, for example, small grains, hays, seeds, vegetables, etc.

Considerable differences may exist between the enumerated value of sales and the computed value of crops produced. This is true especially for feed crops since the quantity sold is considerably less than the quantity harvested because of the use on the farm for feed, seed, etc. There are differences between the enumerated value of sales and the computed value of production, even for cash crops, such as cotton and tobacco. These differences reflect (*a*) variations in values reported by farm operators and prices reported by buyers, etc.; (*b*) the reporting by farm operators of net returns from sales rather than gross values; and (*c*) the failure of some farm operators to include the sales value of such products as cottonseed.

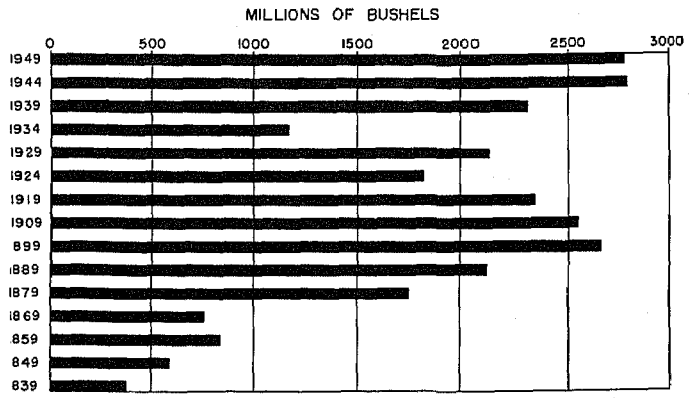
The value of individual vegetable crops shown in the tables is the value of vegetables sold, as reported. The value of production for vegetables is not shown since production figures were not obtained.

Corn.—Four inquiries on the 1950 Questionnaire called for acreage and utilization of corn as follows: (*a*) total acreage of corn harvested for all purposes; (*b*) acreage and production of corn harvested for grain; (*c*) acreage and production of corn harvested for silage; and (*d*) acreage of corn hogged, grazed, or cut for green or dry fodder (ears not husked or snapped). For California only, inquiries (*c*) and (*d*) were combined. In all States, an additional inquiry called for the bushels of last year's corn crop which were sold or were to be sold, and the value of



ACREAGE OF SPECIFIED FIELD CROPS AND VEGETABLES HARVESTED FOR THE UNITED STATES: 1949, 1944, AND 1939

corn and other corn products sold. Instructions were given on the questionnaire not to include with corn any data for sweet corn, popcorn, "Egyptian corn," broomcorn, kafir, or milo maize.



Although the unit of production was specified on all questionnaires as bushels (70 pounds of ear corn or 56 pounds of shelled corn), a number of farmers in certain areas reported their 1949 corn production in terms of baskets of ear corn, barrels of corn, or some other unit. This reporting problem happened most frequently where hand-harvesting methods involve the use of these units of measure. Areas in which corn was not reported in the correct unit are not Statewide and generally are outside the important corn-growing areas. Reports in terms of baskets of ears appeared most frequently in certain counties in New York, Pennsylvania, West Virginia, Maryland, Ohio, Michigan, and Wisconsin. Reports in terms of barrels occurred in the South Atlantic and East South Central States of Maryland, Virginia, and Tennes-

CORN FOR ALL PURPOSES AND CORN HARVESTED FOR GRAIN—ACREAGE FOR ALL PURPOSES, 1924 TO 1949; AND ACREAGE FOR GRAIN, 1879 TO 1949; FOR THE UNITED STATES

SOURCE: TABLE 2

CORN HARVESTED FOR GRAIN—PRODUCTION, FOR THE UNITED STATES: 1839 TO 1949

SOURCE: TABLE 2

see and to some extent in the Carolinas and Kentucky. In the office processing of the data on corn, those reports which stated that the production was in barrels or baskets were corrected. In other instances, where there was doubt as to the unit reported, letters were written to farmers to establish the facts in the case and the necessary corrections were made, at least in part, on the basis of the replies to these letters.

The total acreage of corn harvested for all purposes decreased from 92,259,098 acres in 1944 to 83,336,045 acres in 1949, or 9.7 percent. The acreage of corn for grain decreased from 84,349,033 acres in 1944 to 75,132,672 acres in 1949, or 10.9 percent. Production of corn for grain, however, declined less than 1 percent, thus indicating a considerably greater yield per acre in 1949 than in 1944. The increased use of fertilizer and the use of hybrid seed corn have been major factors in increasing corn yields in the past 20 years. The close relation between the higher average corn

yields reported in censuses since 1930 and the increased use of hybrid seed is shown in the figures which follow:

Year	Average corn yield per acre [1] (bushels)	Percent of corn acreage in the United States planted with hybrid seed [2]
1949	37.0	77.7
1944	33.1	59.2
1939	29.9	22.5
1934	[3] 18.8	0.4
1929	25.6	(4)

[3] Drouth year in Corn Belt States.
[4] No statistics available prior to 1933.

The 1945 Questionnaire contained only three inquiries regarding corn harvested in 1944. These questions called for (*a*) total acreage harvested for all purposes, whether for grain, silage, or fodder; or hogged off or grazed; (*b*) acreage harvested for grain; and (*c*) production in bushels (shelled basis) of the portion harvested for grain. No provision was made, therefore, for obtaining separate data on corn for silage, and on corn hogged or grazed or cut for green or dry fodder.

In 1940, the questions on corn were similar to those on the 1950 Questionnaire. Sweet corn used primarily for silage was to be reported as corn in 1940.

Sorghums.—Inquiries on sorghums, similar to those on corn, were on the 1950 Questionnaire for one or more States in all geographic divisions except the New England and Middle Atlantic Divisions. These inquiries provided for obtaining the following: (*a*) total acreage of sorghums harvested for all purposes except sirup; (*b*) acreage and production of sorghums harvested for grain or for seed; (*c*) acreage and tons (green weight) of sorghums cut for silage; (*d*) acreage of sorghums or cane hogged or grazed, or cut for dry forage or hay, and the tons (dry weight) of forage or hay cut; and (*e*) value of the sorghum crop which was sold or to be sold. In California only, items (*c*) and (*d*) were combined in the same inquiry. The unit of production for grain or seed was specified as bushels in all except three States—New Mexico, where the unit was specified as "100 pounds," and Arizona and California, where the unit was "100-lb. bags." Instructions on the questionnaire relating to these questions were that milo, hegari, atlas, sorghum cane, kafir, "Egyptian corn," sweet sorghums, etc., were to be included. For Texas, "redtop" cane was also mentioned However, any acreage of sorghum harvested for sirup was to be excluded from the sorghum inquiries and reported separately. For those States where no inquiries were on the questionnaire, provision was made for reporting sorghums under "all other crops."

The 1945 Questionnaire contained three questions relating to sorghums harvested in 1944 for all States as follows: (*a*) total acreage of all sorghums grown except for sirup; (*b*) acreage harvested for grain; and (*c*) production of grain in bushels. An additional question was provided in some of the States for obtaining the acreage and production of sorghums saved for dry forage or hay. No provision was made for obtaining separate data on sorghums for silage or sorghums hogged or grazed although the acreage thus harvested was to be included in the acreage for all purposes.

Three questions relating to sorghums harvested were on the 1940 Questionnaire for all States. These questions called for the acreage of all sorghums (*a*) harvested for grain; (*b*) cut for silage only; and (*c*) cut for hay or fodder. The acreage of sorghums hogged or grazed was not obtained separately in the 1940 Census but was included in the inquiry for "Root and grain crops (other than corn and annual legumes) hogged or grazed off."

The acreage of sorghums for all purposes decreased from 17,224,413 acres in 1944 to 10,060,390 acres in 1949. The acreage in Oklahoma, Texas, and Kansas decreased 54.9 percent, 40.7 percent, and 37.0 percent, respectively. The acreage of sorghums in 1944 was greater than for any other census year and was more than double the acreage reported in 1919.

Small grains.—The number of inquiries for small grains on the 1950 Questionnaire varied considerably by States, depending upon the number of small-grain crops considered important in the State. For example, in Minnesota, there were 11 separate inquiries on small grains while in Florida, there were only 3 separate inquiries. In a number of States, such crops as flaxseed, rye, buckwheat, and proso millet are grown to only a limited extent and were to be reported in the question for "other grain." A note under this question directed enumerators and respondents to "underline kind" of grain reported as other grain. The "other grain" inquiry was omitted from the questionnaires for the four States of California, Minnesota, Michigan, and Texas because of the large number of crop inquiries. Data for small-grain crops for which a separate inquiry did not appear on the questionnaire in these States were reported under the question "other crops." However, such data were compiled as "other grain" in these States.

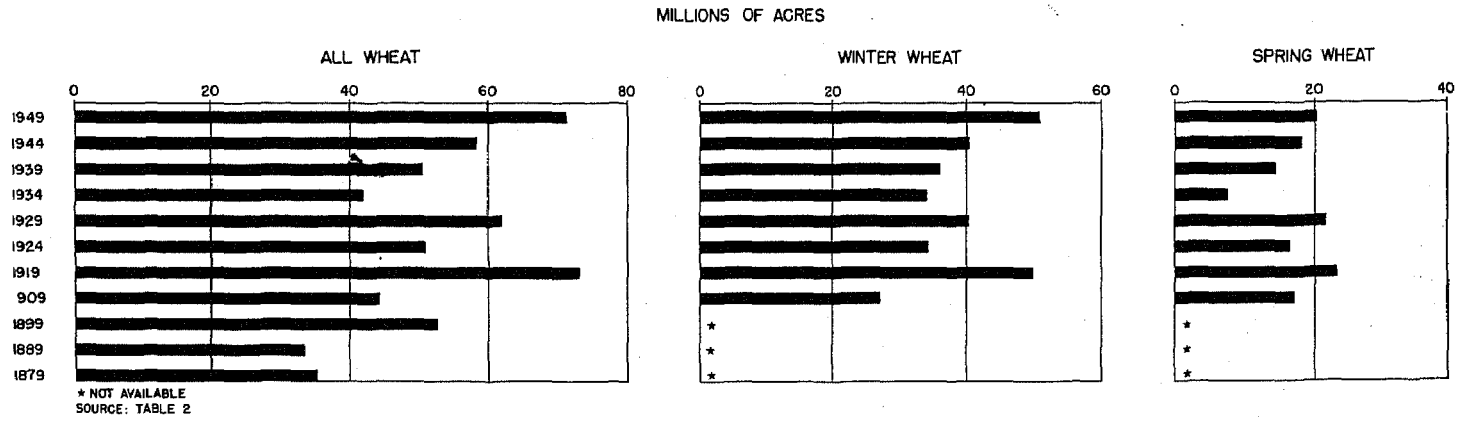
Instructions concerning small-grain crops, on mailed questionnaires and in the Enumerator's Reference Manual, specified that data for grains harvested with grain combines were to be included with grains threshed. The tables with titles such as "wheat threshed," "oats threshed," etc., include similar grains harvested by combining.

Wheat.—The number of inquiries for wheat on the 1950 Questionnaire varied by States according to the types of wheat grown. In States where only winter wheat is grown, or where winter wheat comprises practically all the wheat grown, only one inquiry on wheat appeared on the questionnaire. For other States, where both winter wheat and spring wheat are produced, separate inquiries were provided for both crops. In North Dakota, South Dakota, and Minnesota, an additional inquiry was used to obtain data on durum or macaroni wheat. Any durum or macaroni wheat grown in other than these three States was included with "other spring" wheat.

Separate inquiries in regard to wheat were not on the questionnaires in the six New England States, Florida, and Louisiana, since wheat production is of very little importance in those States. The data for any wheat harvested in those States are included in the totals for "other grains," not with the wheat totals. However, the effect on totals for wheat for the United States, because of the omission of data for these eight States, is insignificant.

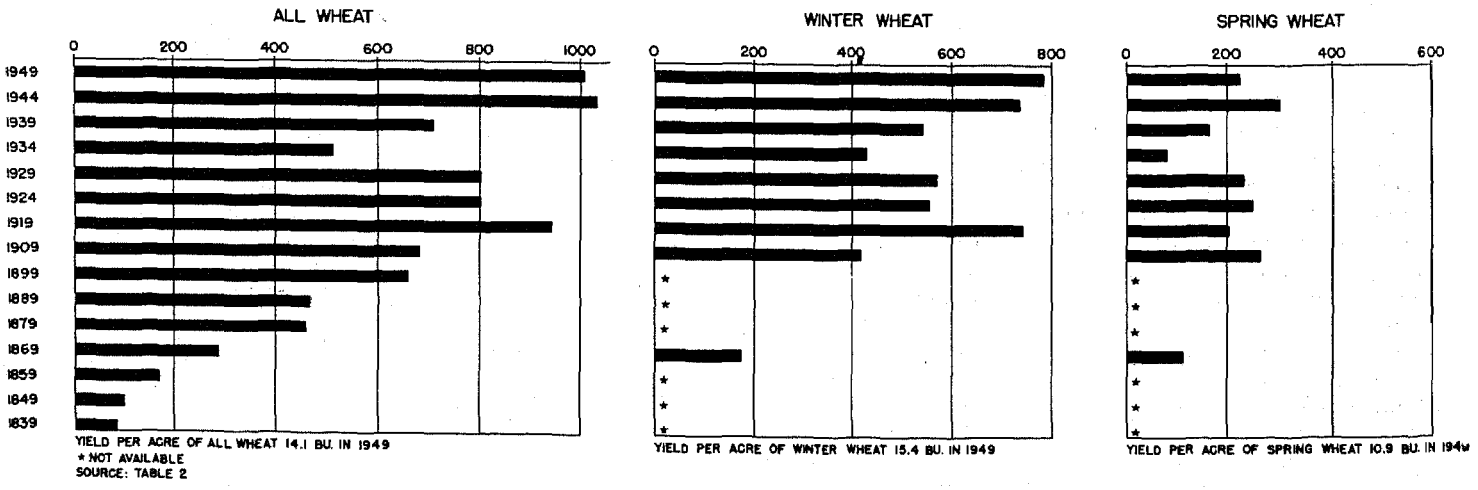
For the 1950 Census, counts of the number of farms reporting any wheat were not made during the tabulating process for States where separate reports were obtained for winter wheat and spring wheat. For all States, the sum of the farms reporting winter wheat and the farms reporting spring wheat was used to approximate the number of farms reporting any wheat. This procedure involves the counting of the same farm twice in case both types of wheat were harvested on the farm. Similar approximations for farms reporting any spring wheat were made for Minnesota and South Dakota by adding the number of farms reporting durum or macaroni wheat and the number of farms reporting other spring wheat. For North Dakota, the number of farms reporting any spring wheat was assumed to bear the same relationship to the sum of the number of farms reporting durum or macaroni wheat and the number of farms reporting other spring wheat, as existed in the 1940 enumeration. By this procedure, the count of farms reporting any spring wheat is 77 percent of the sum of farms reporting the two different spring wheat types.

Mixtures of wheat and other small grains were not to be reported as wheat but as "mixed grains." No attempt was made to allocate grains harvested as mixtures in order to obtain



separate totals for wheat and other grains. In the 1945, 1940, and 1935 Censuses, enumerators were instructed to report one-half the acreage of wheat and flax harvested as mixtures under wheat and the other half under flax.

Table 15 presents data for all wheat, showing the farms reporting, acreage, production, and bushels sold, with comparative data for the 1945 and 1940 Censuses. Table 16 shows similar information for winter wheat and spring wheat. Table 17 presents data by States on the number of farms reporting winter and spring wheat, classified by number of acres harvested and number of bushels sold. Table 19 presents similar data for durum or macaroni wheat and other spring wheat. Data on quantity of wheat sold were obtained in the 1950 Census for the first time since the Census of 1920.



The 71,161,061 acres of all wheat threshed or combined in 1949 was higher than the acreage reported in any census since 1919. The acreage of winter wheat in 1949 was 50,826,281 acres and represented 71.4 percent of all wheat. Of the 20,334,780 acres of spring wheat, 3,568,862 acres were durum or macaroni and the remainder, other spring wheat.

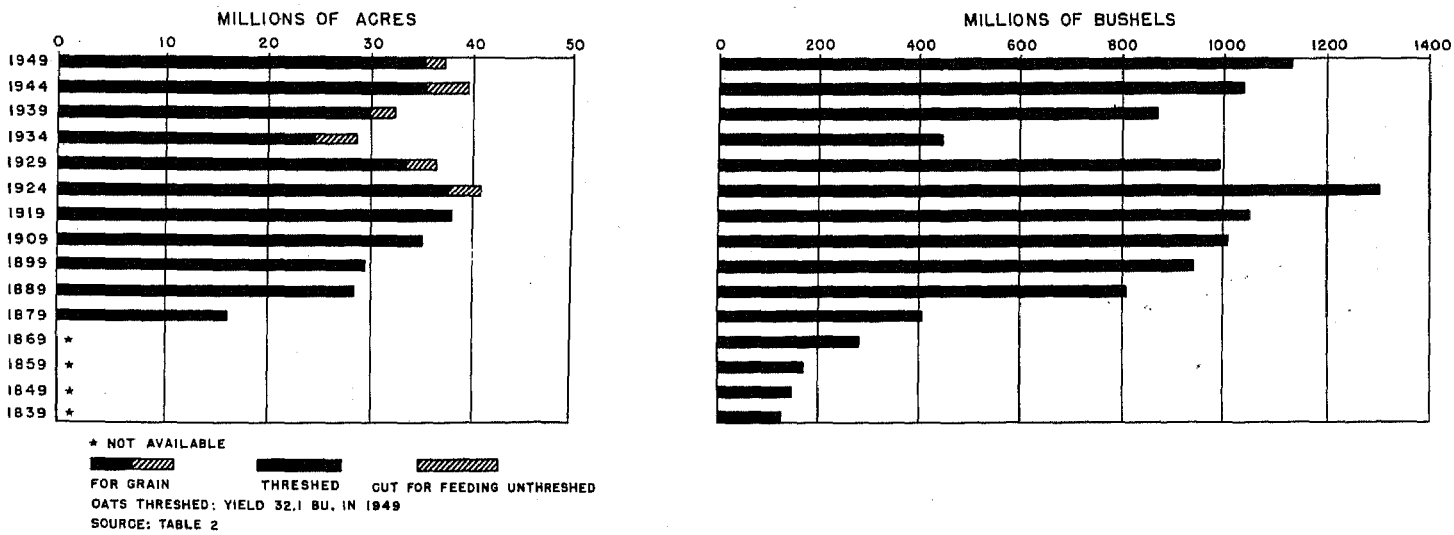
In parts of the Midwest and West, wheat production is typically a large-scale, highly mechanized enterprise. However, in the eastern part of the United States, a large number of farms produce small quantities of wheat. For example, in the South Atlantic States, of the 127,423 farms which reported wheat harvested in 1949, there were 45,531 reporting less than 5 acres and 75,597 farms reporting no wheat sold. Likewise, in the Middle Atlantic States, of the 102,751 farms reporting wheat, 21,551 reported under 5 acres harvested, and 43,068 reported none sold. In the East North Central States, of the 316,817 farms which reported winter wheat, 23,766 reported less than 5 acres and 53,267 reported none sold. For the United States, of the 932,269 farms reporting winter wheat, 111,244 reported less than 5 acres harvested, and 238,007 reported none sold.

WHEAT THRESHED—ACREAGE OF ALL WHEAT, WITH SUPPLEMENTAL DATA FOR WINTER WHEAT AND SPRING WHEAT, FOR THE UNITED STATES: 1879 TO 1949

WHEAT THRESHED—PRODUCTION OF ALL WHEAT, WITH SUPPLEMENTAL DATA FOR WINTER WHEAT AND SPRING WHEAT, FOR THE UNITED STATES: 1839 TO 1949

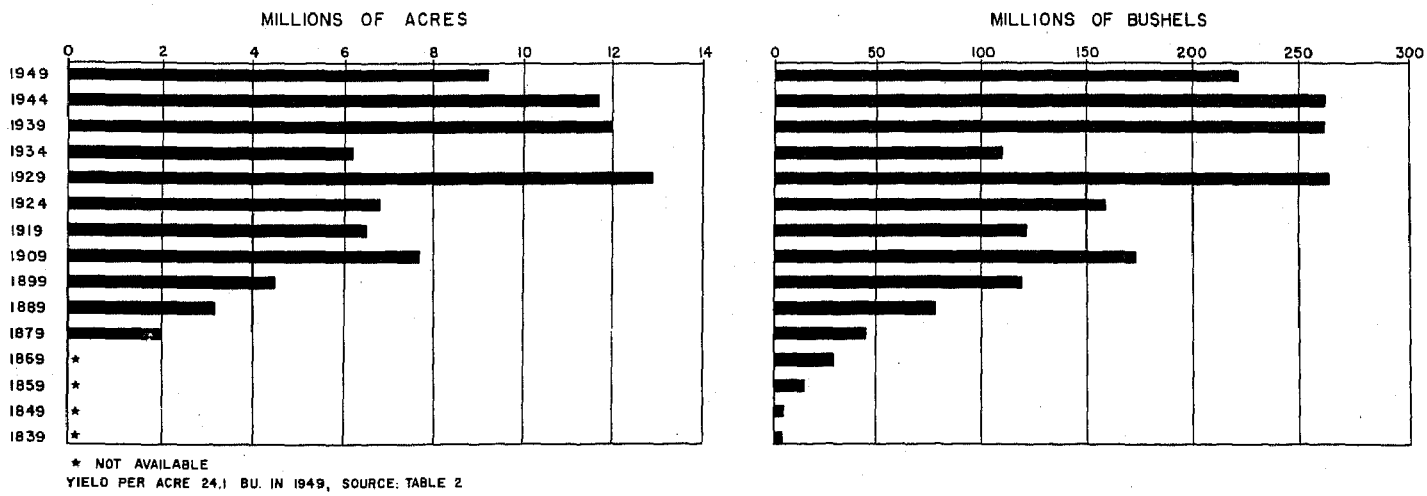
In the 1945 Census, inquiries for both winter wheat and spring wheat were on the questionnaire in those States where spring wheat production was important. In 1945, inquiries on durum or macaroni wheat were carried in nine States including North Dakota and South Dakota, but excluding Minnesota. In 1939, data on durum and macaroni wheat were secured separately for seven States.

The inquiries on wheat for the 1940 Census were similar to those for 1945. However, the inquiries in regard to winter, spring, and durum or macaroni wheat were not made in the same States



in 1945 and in 1950 and therefore, totals of the various types of wheat are not comparable for all States.

Oats.—Two inquiries on oats for grain were on the questionnaire for all States except Oregon and California. These inquiries called for (*a*) the acres harvested, bushels harvested, and bushels sold of oats threshed; and (*b*) the acres of oats cut when ripe or nearly ripe for feeding unthreshed. The unit of measure for reporting the production of oats was "bushels" in all States except Arizona, where it was "100 pounds." The inquiry on the California questionnaire was limited to oats threshed. Oats cut and fed unthreshed in California were to be reported as small grain hay. In all States, oats cut green for hay were to be reported as a hay crop and not as oats cut when ripe or nearly ripe for feeding unthreshed or oats for grain. For Oregon, the inquiries on oats threshed called for (*a*) acres harvested, bushels harvested, and bushels sold of "oats grown alone" threshed; and (*b*) bushels harvested and bushels sold of "oats cleaned out of vetch and peas for seed." Although it is a common practice in Oregon to grow oats with peas or vetch and harvest them together, the acreage of oats harvested in this manner was not asked for on the questionnaire. The acreage of land from which mixtures of oats and peas were harvested was to have been reported under the question for Austrian winter peas, while the acreage from which mixtures of oats and vetch were harvested was to have been reported under the question for vetch seed. However, a note under the mixed grain question on the questionnaire for Oregon incorrectly gave "oats and peas" as an example of crops to be enumerated as mixed grains and some enumerators reported "oats and peas" or "oats and vetch" as mixed grain and also reported the production of oats as cleaned out of vetch and peas. During the processing of the questionnaires, whenever it was clear that the enumerator had reported "oats and peas" or "oats and vetch" as mixed grains, corrections were made.



Inquiries for both oats threshed and oats cut when ripe or nearly ripe for feeding unthreshed have been on the agriculture questionnaire for each census, beginning with 1925. Prior to that time, only one specific question on oats appeared on the agriculture questionnaire under the general heading of "grains." Data on the quantity of oats sold were secured only in the 1950 and 1920 censuses.

The 35,331,447 acres of oats threshed or combined in 1949 was almost the same as in 1944. Oats cut when ripe or nearly ripe for feeding unthreshed decreased from 4,187,410 acres in 1944 to 1,833,138 acres in 1949. Part of this decrease, however, is the result of the inclusion of all oats cut and fed unthreshed with small grains cut for hay in California.

OATS FOR GRAIN—ACREAGE OF OATS THRESHED, 1879 TO 1949, AND OF OATS CUT FOR FEEDING UNTHRESHED, 1924 TO 1949; AND PRODUCTION OF OATS THRESHED 1839 TO 1949; FOR THE UNITED STATES

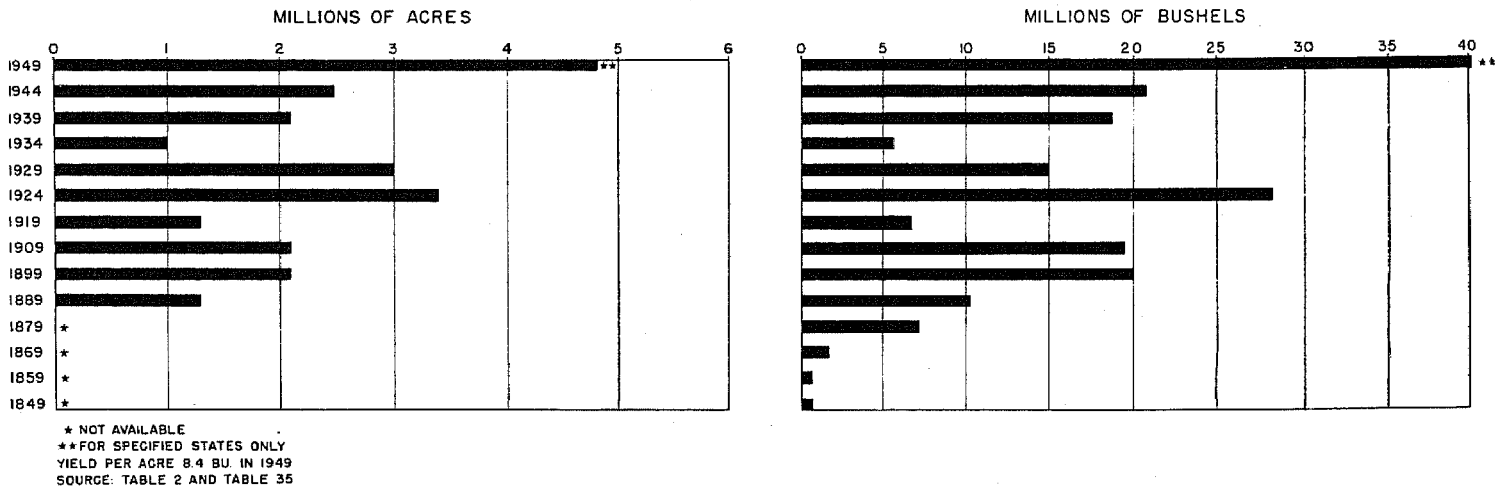
BARLEY THRESHED – ACREAGE, 1879 TO 1949; AND PRODUCTION, 1839 TO 1949; FOR THE UNITED STATES

Barley.—Inquiries on the 1950 Questionnaire called for the acreage and production of barley threshed or combined and also the number of bushels sold. Similar inquiries on the acreage and production of barley have appeared on the questionnaires for previous censuses. The inquiry on number of bushels of barley sold, however, was carried only for the 1950 and 1920 Censuses.

Where a separate inquiry for barley appeared on the questionnaire, the unit of production was specified as "bushels" in all States except Arizona and California. In Arizona and California, the unit of measure was specified as "100-lb. bags." In States where no separate inquiry was on the questionnaire, barley was to be reported under "other grain." Hence, data for barley are not available for some States. However, the exclusion of the data for barley for the States for which a specific inquiry did not appear on the questionnaire, affected the totals for barley insignificantly.

In 1949, the acreage of barley threshed or combined was 9,180,102 acres, or 21.5 percent less than in 1944.

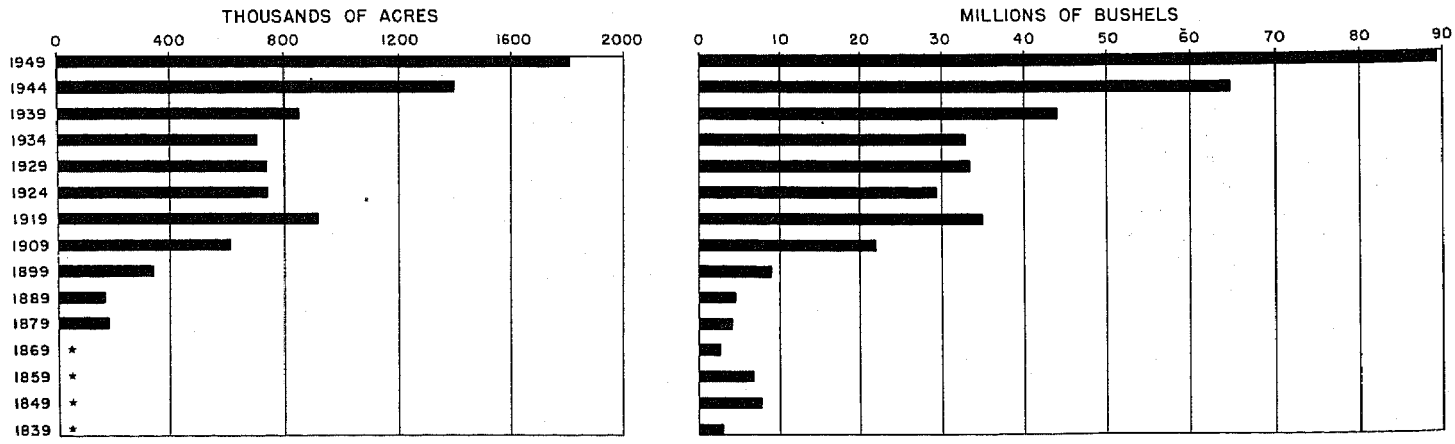
Rye.—The inquiries on rye called for the acres harvested, bushels harvested, and bushels sold. Specific inquiries on rye were omitted from the questionnaire in 14 States where, with the exception of Texas and California, the crop was of minor importance. In these 14 States, rye was reported under "other grain," hence, no data on rye are available for these States. Therefore, totals for the United States and for most of the geographic divisions are not complete.



A considerable acreage of rye is planted for grazing, or for green manure. Rye which reached maturity and was used for grazing was to be reported under "root and grain crops hogged or grazed, other than corn and sorghums," but rye grown for a green manure crop was not to be reported as a crop harvested. Mixtures of rye and other grains were to be reported under mixed grains, while rye cut for hay was to be reported under small grains cut for hay.

Buckwheat.—The inquiry on buckwheat appeared on the questionnaire for 14 States. In States other than these 14, data for buckwheat were included in "other grain." Figures shown in table 32 represent totals only for States for which data are available.

Flaxseed.—Inquiries for flaxseed were on the questionnaire for 12 States. In other States, flaxseed data were included in "other grain." Figures for 1949, which are presented in tables 35 and 36, represent only those States for which data are available. In the 1945, 1940, and 1935 Censuses, enumerators were instructed to report one-half of the acreage of flax and wheat harvested as mixtures under flax and one-half under wheat. A similar allocation was not called for in the 1950 Census.



Grains grown together and threshed as a mixture.—Statistics

RICE THRESHED — ACREAGE, 1879 TO 1949; AND PRODUCTION, 1839 TO 1949; FOR THE UNITED STATES

* NOT AVAILABLE
YIELD PER ACRE 49.2 BU. IN 1949
SOURCE: TABLE 2

for grains grown together and threshed as a mixture are shown under the term "mixed grains." Figures for mixed grains have been collected at every census beginning with 1920, with the exception of 1925. Inquiries were on the 1950 Questionnaire for all States except New Jersey, Delaware, Maryland, West Virginia, Florida, Alabama, Mississippi, Louisiana, Arizona, and Nevada. Notes on the questionnaire specified that mixtures of wheat and oats, wheat and barley, wheat and rye, oats and barley, and oats and peas were to be included and instructed enumerators to underline the names of the grains comprising the mixture.

Notes on the 1945, 1940, and 1935 Questionnaires, indicated that flax and wheat mixtures were not to be reported as mixed grains. Notes on the 1930 Questionnaire did not specifically exclude mixtures of flax and wheat but instructions given to enumerators stated that such mixtures were not to be included. For 1920, the inquiry specified "mixed crops not separated in harvesting." There were no instructions on the questionnaire or to the enumerators regarding how wheat and flax mixtures were to be reported.

The acreage of mixed grains threshed or combined in 1949 was 1,763,476 acres, or 53.8 percent greater than in 1944. The largest increase in acreage from 1944 to 1949 was recorded for the West North Central States.

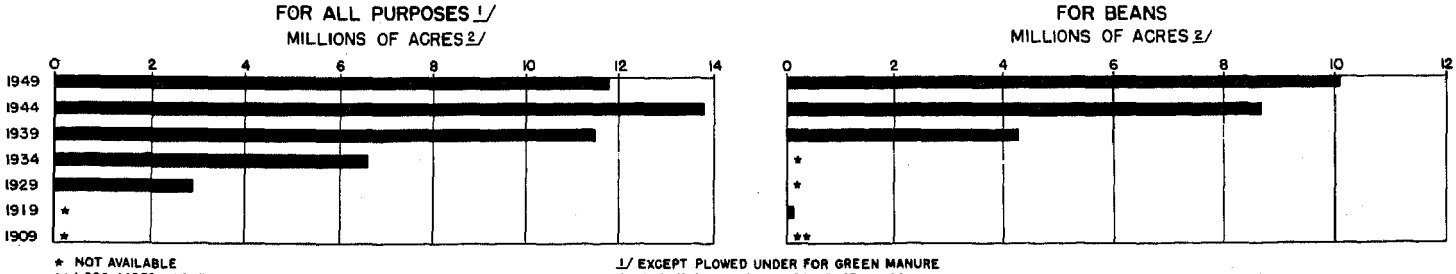
Rice.—Separate inquiries on rice in the 1950 Census were limited to four States. Production was to be reported in bushels in Arkansas, 100-pound bags in California, and 162-pound barrels in Louisiana and Texas. The same units of production were used in these States in the 1945 Census except in Arkansas where the unit of measure was 162-pound barrels. The quantity harvested in the censuses from 1910 to 1935 was reported in bushels, and prior to 1910, in pounds. Production is shown in bushels for all years in the tables in this chapter.

The acreage of rice harvested in 1949 for the specified States was 1,819,092 acres. This is an increase of 30.5 percent over the acreage harvested in 1944 and is the largest acreage recorded in any census. The rice acreage in Texas was 57.2 percent greater in 1949 than in 1944. Increases from 1944 to 1949 in other States were: Arkansas, 43.6 percent; California, 31.0 percent; and Louisiana, 6.0 percent. Rice-growing is developing in Mississippi. However, in the 1950 Census, rice figures for that State are included with "other grain."

Other grain.—A separate inquiry was not provided on the State questionnaires for grain crops which were not widely grown in the area. Data for these crops as a group were obtained in one inquiry relating to "other grain threshed." This inquiry, which appeared on all except four State questionnaires, always mentioned the names of the grain crops not called for elsewhere which were most likely to be grown in the States. Buckwheat, emmer, spelt, and flaxseed were often given as a part of this inquiry. In some States, even wheat is of little importance from the standpoint of the acreage grown, and data for wheat were obtained in the "other grain" inquiry in the New England States and in Florida and Louisiana.

Table 41 gives the information obtained in answer to this inquiry and shows the crops which were mentioned as a part of the inquiry. That table shows figures for "other grain threshed" for the four States for which the questionnaire did not have an inquiry for "other grain." This information came from write-in figures supplied in a final inquiry, "other crops," at the close of the section of the questionnaire relating to crops. This final inquiry sought information for crops not mentioned elsewhere.

Annual legumes.—Separate inquiries appeared on the 1950 Questionnaire for all annual legume crops of importance in each State. Specific data were secured for one or more of the following crops: (*a*) soybeans; (*b*) cowpeas; (*c*) peanuts; (*d*) velvetbeans; (*e*) mungbeans; (*f*) lima beans; (*g*) dry field and seed beans (or other dry field and seed beans if data were obtained separately for soybeans, lima beans, or mungbeans); and (*h*) dry field and seed peas. Vetch, when harvested for hay, was included under "hay crops," and when harvested for seed, under "seed crops." Lentils were to be reported as "other field crops."



Annual legume crops not of importance in a State were to be reported under an inquiry for "all other crops." Separate inquiries on soybeans were on the questionnaires for 29 States and the District of Columbia; on cowpeas, for 17 States and the District of Columbia; on peanuts, for 13 States; on velvetbeans, for 7 States; on mungbeans, for 1 State; for dry lima beans, for 1 State; on dry field and seed beans, for 17 States; on dry field and seed peas, for 11 States; and on dry field and seed beans and peas, for 1 State.

For soybeans, cowpeas, peanuts, and velvetbeans, the inquiries on the 1950 Questionnaire for the States in which these crops are important called for the acreage for all purposes. This included the acreage plowed under for green manure or soil-improvement. These green manure crops were not included in the 1945 and prior censuses. For these four crops, the 1950 inquiries obtained information regarding the acreage grown alone and the acreage grown with other crops in those States where the planting of these annual legumes with other crops is a common practice. For soybeans, cowpeas, and peanuts, inquiries regarding the acreage and production for the principal uses were on the 1950 Questionnaire for the States in which these crops were important.

The inquiries for soybeans called for information regarding four uses of the acreage grown for all purposes in the important producing States. In States where the questionnaire did not contain an inquiry regarding the acres grown with other crops, the acreage of soybeans was assumed to have been grown alone. For 1949, data for both acreage and production were obtained for soybeans harvested for beans. For 1944, data are available for the production of soybeans for beans for most States, but the acreage harvested for beans is not available for 20 States, most of which are located in the South. The 1944 figures for soybeans included mungbeans in accordance with specific instructions.

While there has been a large expansion in soybean acreage during the last three decades, the acreage of soybeans for all purposes, except green manure, was almost 2 million acres less

SOYBEANS—ACREAGE FOR ALL PURPOSES 1/ AND FOR BEANS, FOR THE UNITED STATES: 1909 TO 1949

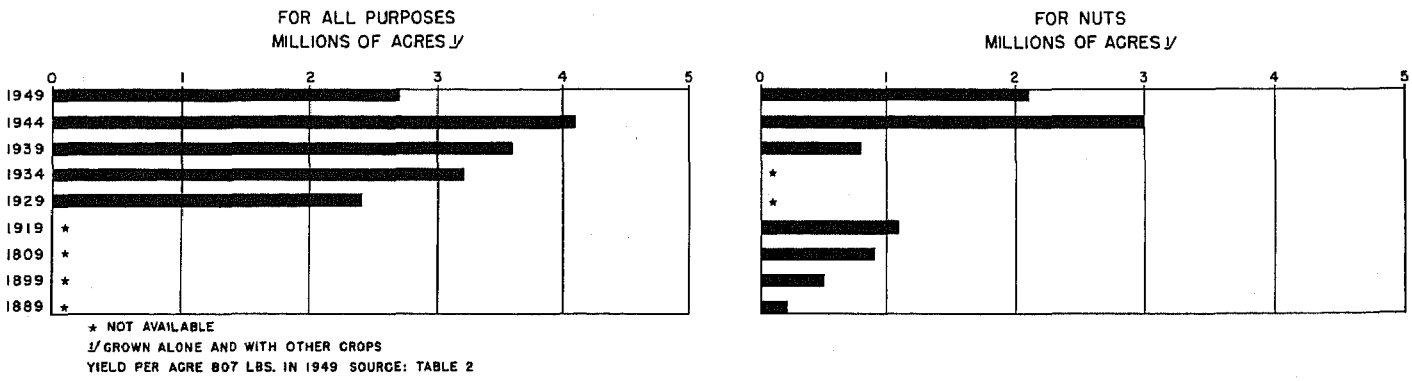
in 1949 than in 1944. However, the production of soybeans in 1949 exceeded that of 1944 by 13.2 percent and that of 1939 by 142.5 percent.

The inquiries for cowpeas on the 1950 Questionnaire were similar to those for soybeans. The questionnaire contained, however, an additional inquiry concerning cowpeas for green peas in eight States: North Carolina, South Carolina, Georgia, Florida, Alabama, Louisiana, Mississippi, and Texas. Data for green cowpeas for these eight States are included as a part of the field crop figures; in all other States, the acreage of cowpeas for green peas is included with vegetables.



The total area of cowpeas for all purposes, except green manure, was 1,165,891 acres in 1949, as compared with 2,503,552 acres in 1944, and 6,714,351 acres in 1939. The production of cowpeas for dry peas was 1,953,578 bushels in 1949 as compared with 3,602,688 bushels in 1944. In addition to the cowpeas harvested for dry peas in 1949, there were 2,091,540 bushels in the shell of cowpeas harvested for green peas in eight States: North Carolina, South Carolina, Georgia, Florida, Alabama, Louisiana, Mississippi, and Texas. The data for cowpeas harvested for green peas for these States are shown in table 93. The data for cowpeas harvested for green peas for other States are shown in table 97 where they have been grouped with vegetables.

Questionnaire. This inquiry called for the acreage for all purposes and the bushels of velvetbeans harvested.

The inquiries for mungbeans, dry lima beans, dry field and seed beans, and dry field and seed peas on the 1950 Questionnaire asked for the acreage and quantity harvested. The inquiry for mungbeans appeared on the questionnaire for Oklahoma only and the inquiry for dry lima beans appeared on the questionnaire for California only. The 1949 data for the harvest of lima beans in California were 1,628 farms reporting 169,280 acres harvested, with a production of 2,763,642 bags (100-pound) valued at $24,034,607. Data for California counties are shown in Volume I, part 33. The inquiry for dry field and seed beans was accompanied by a note listing the most common varieties of dry field beans for the State. The inquiry for dry field and seed peas excluded Austrian winter peas, which were to be reported under "all other field seed crops" (except in Idaho, Oregon, and Washington, where a separate inquiry was on the questionnaire), and cowpeas.

Hay.—The first inquiry concerning hay crops called for the total acres of land from which hay was cut in 1949. Soybean, cowpea, peanut, and sorghum hays were to be excluded. Separate inquiries were provided for these hays in States where they are important and were placed ahead of those for alfalfa, clover,

PEANUTS—ACREAGE FOR ALL PURPOSES AND FOR NUTS, FOR THE UNITED STATES: 1889 TO 1949

* NOT AVAILABLE
1/ GROWN ALONE AND WITH OTHER CROPS
YIELD PER ACRE 807 LBS. IN 1949 SOURCE: TABLE 2

The 1950 Questionnaire contained inquiries for (*a*) acreage of peanuts for all purposes, (*b*) acreage and pounds of peanuts harvested for picking or threshing, and (*c*) acreage and tons of peanut vines saved for hay or forage.

The acreage of peanuts which was hogged or grazed, or not harvested in another manner, was not asked for separately, although it was included as a part of the total acreage harvested for all purposes. A value of the peanut crop on this hogged or grazed acreage has not been calculated. Therefore, the totals for value of crop shown for peanuts are understated.

Peanut vines saved for hay or forage are usually a byproduct after picking or threshing the nuts. Many enumerators, after supplying data for peanuts threshed, did not report either acreage or tonnage of peanut hay. Others tended to report the tonnage without the acreage. In such cases, where tonnage figures had been reported without corresponding acreage figures, the acreage was supplied during the office processing of the questionnaires. However, when peanuts threshed for nuts were reported with no report of either acreage or tonnage of vines saved for hay, no attempt was made to supply the information.

Peanuts grown for all purposes decreased from 4,052,028 acres in 1944 to 2,725,473 acres in 1949 and peanuts harvested for nuts from 2,957,943 acres in 1944 to 2,133,897 acres in 1949. The production of peanuts decreased from 2,008,855,504 pounds in 1944 to 1,721,913,217 pounds in 1949. Production in 1939 was 1,155,316,299 pounds.

There was only one inquiry regarding velvetbeans on the 1950

and timothy, etc. The number of hay crops for which inquiries appeared on the questionnaire varied according to State. Generally, there were separate inquiries regarding the acreage and production of (*a*) alfalfa; (*b*) clover or timothy, alone or mixed; (*c*) lespedeza; (*d*) small grain hay; (*e*) wild hay; (*f*) all other hay; and (*g*) silage made from grass or hay crops. The kinds of hay to be reported under other hay varied according to State and may be ascertained by referring to the facsimile of the questionnaire appearing in the Appendix. A separate inquiry on vetch or peas cut for hay was on the questionnaire for Oregon.

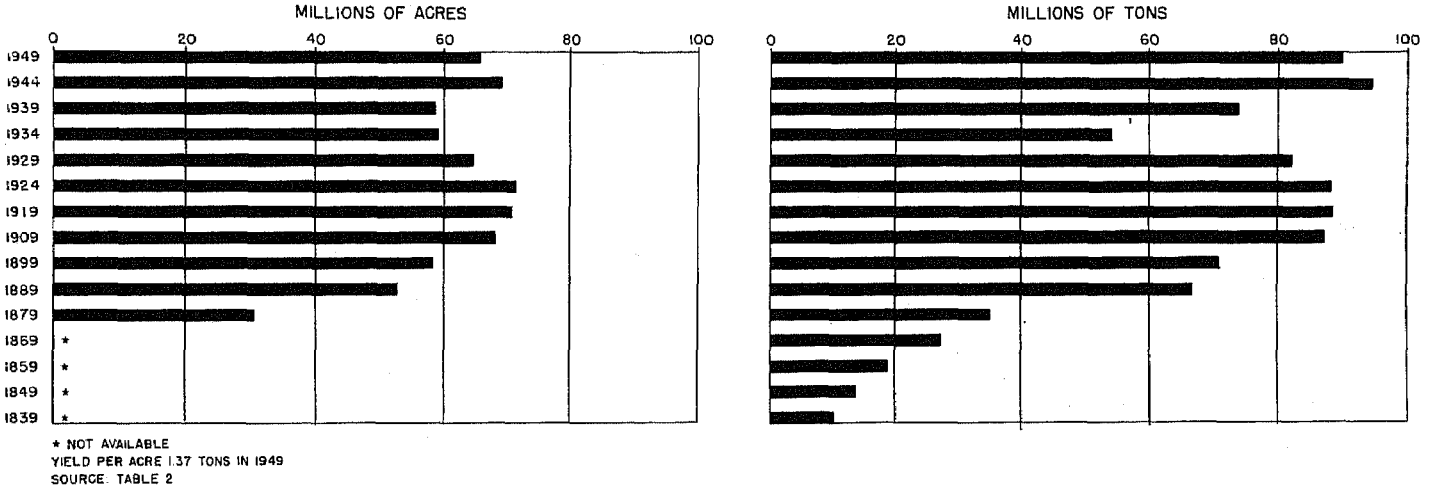
Enumerators and farmers were instructed to report the total quantity harvested from all cuttings. The production of hay was to be reported on a dry-weight basis. The acres of land from which more than one cutting of the same hay crop was made was to be reported only once. Instructions on the questionnaires stated that mixed hay was to be reported under the kind of hay that made up the largest part of the mixture.

The sum of the acreages of individual hays plus hay or grass silage exceeds the total acres of land from which hay was cut (excluding specified annual legume and sorghum hay) by less than one-half of 1 percent for the United States. This minor difference results, in part, from the practice of harvesting two or more different hay crops from the same acreage, for example, hay or grass silage is frequently cut from land which also produces cured hay from a different cutting. Also, unless the difference was significant between the sum of the individual hay acreages and the total acres of land from which hay was cut,

no adjustments were made on the questionnaires during the office processing.

The 1950 Questionnaire contained an instruction under the inquiry for clover or timothy hay that sweetclover hay was to be reported with "other hay." A similar instruction appeared on the 1945 Questionnaire. The 1940 Questionnaire contained a separate inquiry for sweetclover. The 1935 Questionnaire contained an inquiry on lespedeza and sweetclover combined. An inquiry on sweetclover, crimson clover, and lespedeza combined appeared on the 1930 and 1925 Questionnaires. Crimson clover has been included with timothy and clover hay for each census since 1935. There were two inquiries relating to timothy and clover on the 1930 Questionnaire—one asking for timothy or timothy and clover mixed, and the other, for red, alsike, and mammoth clover. Data presented in the tables for timothy or clover, alone or mixed, for 1929, were obtained by adding the figures for the two classes.

Instructions on the 1950 Questionnaire stated that hay which was cut chiefly from wild or native grasses, even though fill-in seedings of other grasses had been made, was to be reported as wild hay. Wild hay cut from public or other lands for which no rental was paid was also to be included.



hay, 4.6 percent; wild hay, 21.8 percent; other hay, 9.7 percent; and hay or grass silage, 0.5 percent.

Clover seed, alfalfa, grass, and other field seed crops.—The number of inquiries on the 1950 Questionnaires regarding clover seed, alfalfa, grass, and other field seed crops varied according to the number of such crops of importance in each State. An "all other" inquiry for field seed crops was on the questionnaire for all States so that figures could be reported for any grass or field seed crop harvested. The names of the other important seed crops were listed under the "all other" inquiry.

Data were obtained on the acreage and production of each seed crop grown, with a combined value of all field seed crops sold. The unit of production varied according to the unit most commonly used in each State. County Table 5 and State Table 12 of Volume I show production in the units enumerated in each State. Production was converted to a common unit for presentation in the tables in this chapter. Standard weights and measures were used in converting production to common units.

A notation on the questionnaire instructed enumerators and farm operators to report production of field seeds on a "clean-

ALL HAY, EXCLUDING SPECIFIED ANNUAL LEGUMES AND SORGHUM HAY—ACREAGE, 1879 TO 1949; AND PRODUCTION, 1839 TO 1949; FOR THE UNITED STATES

* NOT AVAILABLE
YIELD PER ACRE 1.37 TONS IN 1949
SOURCE: TABLE 2

The inquiry on grass or hay silage appeared on the 1950 Questionnaire for 35 States. A specific inquiry restricted to grass or hay silage had not been carried in any prior enumeration. Production of hay and grass silage was to be reported in tons (green weight). Data shown in table 65 for grass and hay silage for 1939 may not be entirely comparable with those for 1949 as the 1939 figures represent "silage crops other than corn and sorghums."

The area of land from which hay was cut in 1949, excluding specified annual legume and sorghum hay, was 65,635,943 acres. This was 5.2 percent less than in 1944 and 11.6 percent greater than in 1939. Annual legume hays, excluded from these acreage comparisons, form a substantial part of the hay in the Southern and Eastern States.

Alfalfa cut for dehydrating was included with alfalfa hay. The alfalfa acreage of 16,411,977 reported in 1949 is the largest recorded for any census. The 1949 alfalfa acreage was 9.6 percent greater than the 1944 acreage and 28.2 percent greater than the 1939 acreage. The acreage of clover and timothy hay was 4,045,467 acres less in 1949 than in 1944. The percentages of the land from which hay was cut represented by the acreage of the several classes of hay are as follows: alfalfa, 25.0 percent; clover and timothy, 28.3 percent; lespedeza, 10.6 percent; small-grain

seed" basis. However, some reports showed the harvested quantity of seed on a different basis. A large proportion of the reports for bluegrass seed were on a "green-seed" basis. The figures on production of bluegrass, therefore, are given in this report on a green-seed basis. Most reports of bluegrass seed production in Kentucky appeared to be given on a "cured-seed" basis. The production for this State has been converted to a green-seed basis in order to be comparable with the production in other States.

Cotton.—The questionnaire called for the acreage and production of lint cotton in bales. The type of bale was not specified, as it has been in previous years, because of the universal use of square-type bales. In previous censuses, the enumerator was instructed to convert round bales to equivalent square bales on the basis of two round bales to one square bale. Data for cotton acreage and production for 1949 appear in table 75 with additional data in two other tables. Table 76 presents the number of farms reporting cotton harvested arrayed according to the number of acres harvested, and table 77 presents the number of farms reporting, according to number of bales produced.

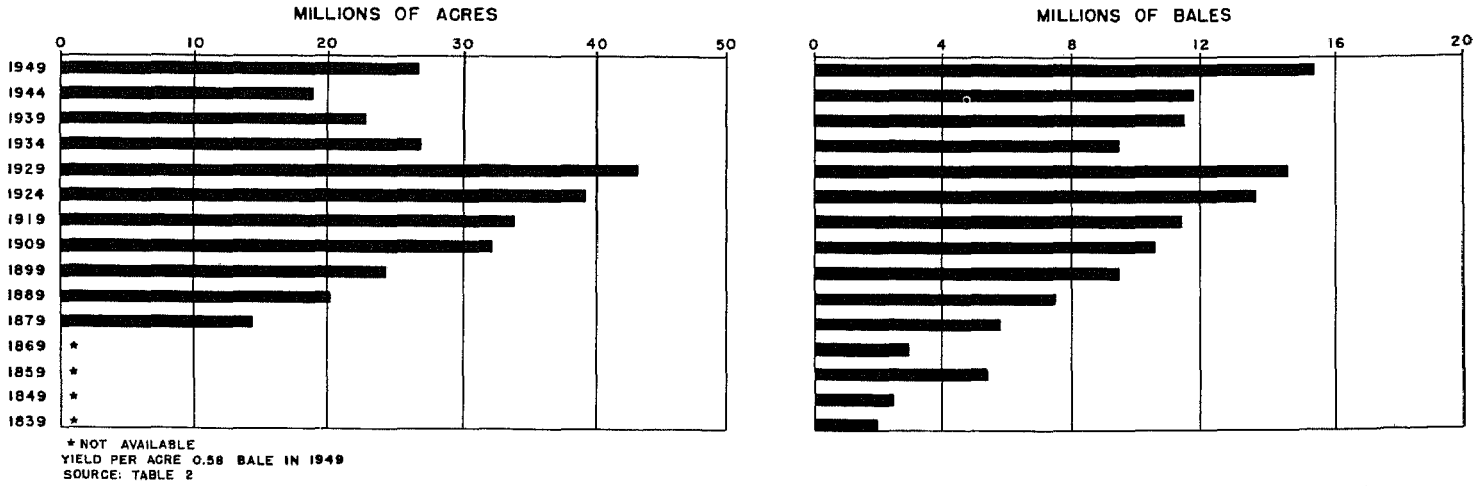
The production of cottonseed for 1949, 1944, 1939, and 1909 was computed on the basis of the production of lint cotton. For 1929, the production of cottonseed was obtained by an inquiry on the Census questionnaire. The total production of cottonseed for

1949, for each State, was calculated by using the following formula:

$$\frac{\textit{Total net weight of lint cotton} \times \textit{percentage seed is of seed cotton}}{\textit{2,000 lb.} \times \textit{percentage lint is of seed cotton}}$$

The individual State factors used in these calculations are given in the following table:

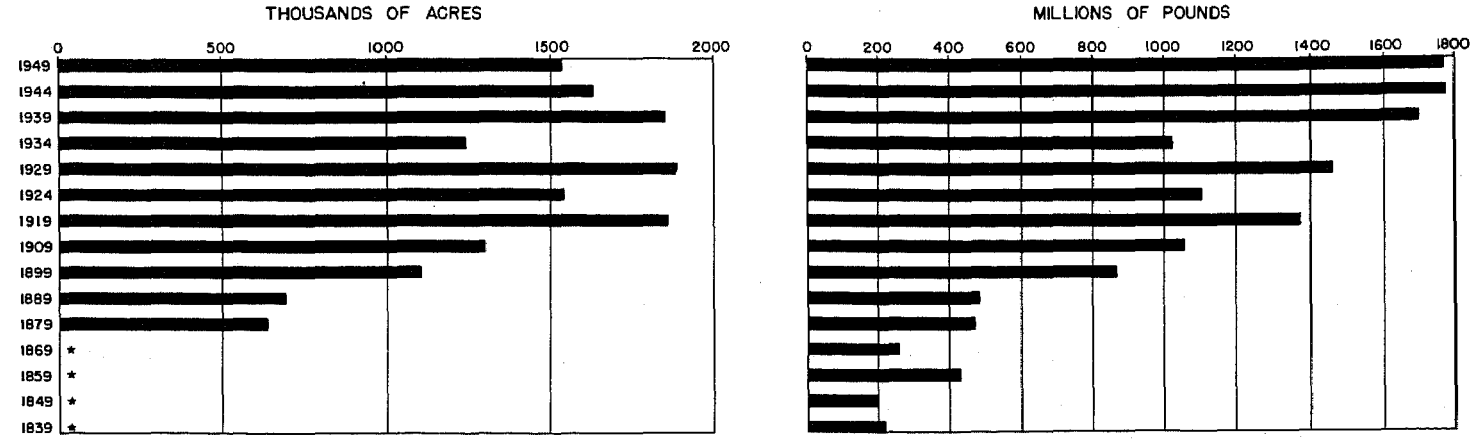
FACTORS USED FOR CALCULATING COTTONSEED PRODUCTION, BY STATES: 1949



State	Average weight per bale (pounds)	Percent lint cotton is of seed cotton	Percent cottonseed is of seed cotton
Alabama	483.1	36.8	63.2
Arizona	473.4	37.1	62.9
Arkansas	488.6	36.7	63.3
California	472.7	38.2	61.8
Florida	462.4	36.1	63.9
Georgia	473.8	36.5	63.5
Illinois	462.6	37.0	63.0
Kansas	490.0	37.3	62.7
Kentucky	448.5	37.5	62.5
Louisiana	495.2	37.2	62.8
Mississippi	487.1	36.8	63.2
Missouri	457.0	35.4	64.6
Nevada	472.7	38.2	61.8
New Mexico	481.7	37.7	62.3
North Carolina	457.5	36.1	63.9
Oklahoma	490.0	37.3	62.7
South Carolina	468.1	36.2	63.8
Tennessee	486.5	36.7	63.3
Texas	496.5	36.9	63.1
Virginia	477.4	35.8	64.2

In comparing data for 1949 and 1944, it should be noted that cotton acreage and production are not available for 1944 for Illinois, Kansas, and Nevada. The United States acreage of cotton was 18,961,891 in 1944 as compared with 26,599,263 acres in 1949. The 1949 acreage was very much less than the 43,227,488 acres for 1929. The number of bales increased from 11,838,351 in 1944 to 15,419,458 in 1949. Most of this increase has occurred in Texas, California, Arizona, and New Mexico. Cotton production in 1949 was less than in 1944 in several of the States east of the Mississippi River.

Tobacco.—The 1950 Questionnaire had separate questions for the acreage and production of tobacco and value of tobacco sold in the 16 leading tobacco-producing States. Tobacco harvested in other States was reported as "other field crops." In Kentucky and Tennessee, data were obtained separately for the three leading types grown in those States, namely, burley, dark-fired, and dark air-cured tobacco. The 1945 Questionnaire, and all previous questionnaires except 1940, called for the acreage and production of tobacco harvested (all types). Although provision was made on the 1940 Questionnaire to report tobacco by type, only total figures for tobacco of all types were published.



The number of farms reporting any tobacco in 1949 is available for each State, except Kentucky and Tennessee. For these two States, the number of farms reporting has been approximated by adding the number of farms reporting each of the three types of tobacco. This procedure results in some overstatement of the number of farms reporting tobacco, as farms reporting two or more types of tobacco have been counted two or three times.

TOBACCO HARVESTED—ACREAGE, 1879 TO 1949; AND PRODUCTION, 1839 TO 1949; FOR THE UNITED STATES

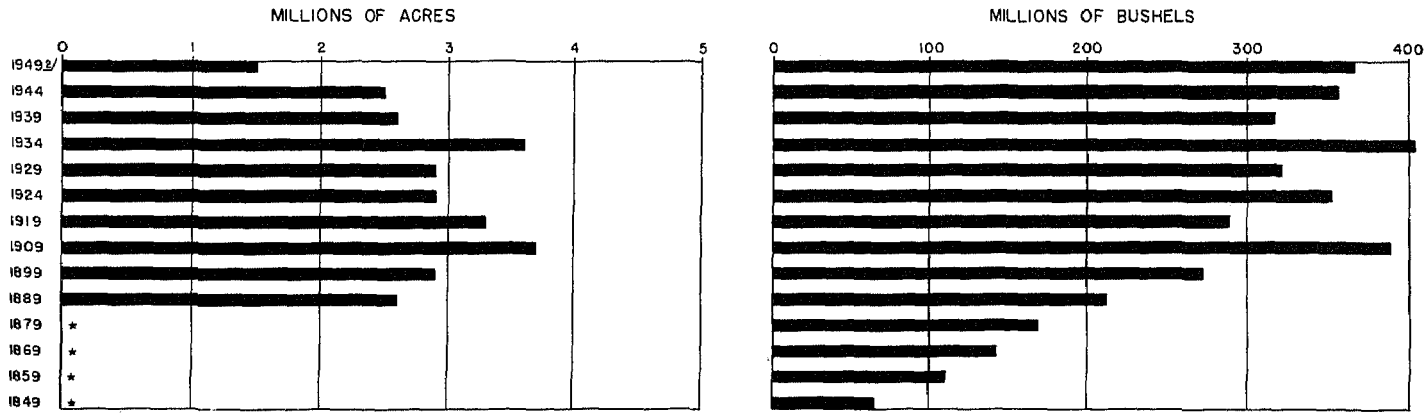
* NOT AVAILABLE
YIELD PER ACRE 1,155 LBS. IN 1949
SOURCE: TABLE 2

The 1,532,298 acres of tobacco reported in 1949 is less than the acreage reported for any previous census since 1919, except for 1934. The production in 1949 of 1,769,769,030 pounds is the second largest reported in any census and has been exceeded only by the production of 1,778,769,446 pounds in 1944.

Irish potatoes and sweetpotatoes.—The 1950 Census inquiries for Irish potatoes and sweetpotatoes called for acres harvested, quantity harvested, and the value of the amount sold. The questionnaire for the 1950 and for previous censuses provided for the reporting of fractions of acres of Irish potatoes and sweetpotatoes harvested. Notes on the questionnaire and instructions to enumerators, however, specified that it was not necessary to report the area harvested if less than 15 bushels (or 10 bags in specified States) of Irish potatoes or if less than 15 bushels (or 1,000 pounds in California) of sweetpotatoes were harvested. This procedure was used to facilitate the enumeration of Irish potatoes and sweetpotatoes harvested from small plots largely for home use. If an acreage figure was reported on a questionnaire where the quantity harvested was less than these minima, the acreage figure was not tabulated, in the office processing. This is indicated by the figures presented in table 88 for Irish potatoes and in table 89 for sweetpotatoes. In censuses prior to 1950, the acreage harvested was usually reported or estimated for Irish potatoes and sweetpotatoes harvested from small plots. Because of the difference in procedures for reporting the acreage harvested when the production was less than 15 bushels, the acreage data for the 1950 Census are not fully comparable with the acreage for prior censuses. Differences are most important in areas where the production is largely for home use.

The unit of measure for Irish potatoes harvested was 100-pound bags for most of the Western States, and bushels for other States. Production for all States is given in this chapter in bushels.

Irish potatoes, classified by the number of acres harvested. Of the 1,649,906 farms producing potatoes in the United States in 1949, there were 1,486,215, or 90.1 percent, on which less than one acre was harvested, assuming that all farms reporting less than 15 bushels had less than one acre of the crop.



Instructions to enumerators stated that yams were to be included with sweetpotatoes and any sweetpotatoes or yams harvested for livestock feed were to be included also. The acreage of sweetpotatoes, 392,291 for 1949, was the smallest recorded for any census. Production in 1944 was 63,288,203 bushels as compared with 39,423,735 bushels in 1949. Almost 90 percent of the sweetpotatoes are produced in the South.

Sugarcane and sweet sorghum for sirup.—The inquiries on the 1950 Questionnaire regarding the acreage, production, and value of sales of crops harvested for sirup were limited to 19 Southern States. In North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Louisiana, and Texas, the inquiry called for data on "sugarcane or sorghum for sirup." For the other 10 States, the inquiry called for data on sweet sorghum for sirup. The inquiries for sugarcane and sweet sorghum for sirup for censuses prior to 1950 differed somewhat from those for 1950. The 1945 Questionnaire had an inquiry on sugarcane for sirup but none on sweet sorghum for sirup. The 1940 Questionnaire contained separate inquiries on sweet sorghum for sirup and sugarcane for sirup.

Sugar beets for sugar.—The 1950 Questionnaire called for the acreage, production, and value of sales of sugar beets in 10 States where this crop was important. Reports for other States were obtained under "other field crops."

Popcorn.—There was a separate inquiry for the acreage, production, and value of sales of popcorn in the 10 leading popcorn-

IRISH POTATOES 1/—ACREAGE, 1889 TO 1949; AND PRODUCTION, 1849 TO 1949; FOR THE UNITED STATES

1/ FOR HOME USE OR FOR SALE
2/ FOR 1949, DOES NOT INCLUDE ACRES FOR FARMS WITH LESS THAN 15 BUSHELS HARVESTED
YIELD PER ACRE 242.1 BU. IN 1949
SOURCE: TABLE 2

The acreage of Irish potatoes in 1949 was 1,514,097 as compared with 2,536,715 acres harvested in 1944. A relatively small part of this decrease resulted from the difference in the procedure for reporting acreage for farms with very small production. Although the acreage in 1949 was less than in 1944, the production was 366,527,787 bushels in 1949 as compared with 356,547,428 bushels in 1944.

The five leading States in Irish potato production in 1949 were: Maine, California, Idaho, New York, and Pennsylvania. These five States produced 51.3 percent of the total 1949 crop.

Table 88 presents figures on the number of farms reporting, acreage harvested, and bushels harvested for farms producing

producing States. Production was to be reported in units of 100 pounds of ear corn. The use of this unit of measure was not fully satisfactory in all States, as the reports for farms with small quantities were frequently in bushels, which required conversion to 100-pound units. In 1945, data were not obtained for popcorn. In 1940, the unit of measure was specified as bushels. For the tables in this chapter, production for 1949, as well as other years, has been converted to 1,000 pounds of ear corn.

Minor crops.—Data for crops not frequently grown or for crops of relatively small importance were obtained under the inquiries "other grain," "other field seed crops," "other vegetables," and under a general inquiry, "other crops," at the end of the section

on crops on the questionnaire. Data for each crop reported under these inquiries, except for "other grain" were tabulated separately and are shown by States. A few crops of very minor importance were combined and are shown as "unspecified grass seeds," "unspecified vegetables," and "unspecified field crops." In the presentation of data for some minor crops, the information for several States with small acreages has been combined and is shown as "all other States." However, data for such crops for each State usually appear separately in State Table 12, of Volume I.

Vegetables harvested for sale.—The 1950 Questionnaire contained inquiries regarding the acreage of each vegetable crop harvested for sale in 1949 and one inquiry regarding the total value of all vegetable crops sold. Production data for vegetables harvested for sale have not been obtained in any census since 1920, largely because of difficulty in getting data reported in uniform units for the many kinds and sizes of containers used for marketing vegetables.

The number of inquiries concerning vegetable crops varied from State to State in accordance with the number of vegetable crops of considerable importance in the State. Space was provided on the questionnaire for writing in the names and acreage of other vegetables for which there was no separate inquiry. A list of vegetables appeared under the space for reporting of these other vegetables to remind enumerators and respondents regarding the crops to be reported. Provision was made for reporting fractional acreage for all vegetable crops harvested for sale. Questionnaire notes and instructions to enumerators specified that if two or more plantings of the same crop were made, either on the same land or on different land, the total acres harvested of the several plantings were to be reported. Vegetables harvested from land from which other crops were also harvested were to be reported.

The acreage of vegetables harvested for sale in 1949 totaled 3,717,924 as compared with 4,370,281 acres harvested in 1944, a decrease of 14.9 percent. The 1944 acreage was large because of the production of vegetables for processing to meet wartime demand. The acreage of vegetables in tables 95 to 97 do not include the acreage of cowpeas harvested for green peas in the eight States for which a separate question appeared on the questionnaire. Cowpeas harvested for peas in these eight States are shown with miscellaneous field crops in table 93. Data for cowpeas harvested for green peas reported for other States are included with vegetables in table 97.

Home gardens.—A count of farms harvesting vegetables for home use in 1949 constitutes the only information concerning home gardens collected in the 1950 Census. A total of 3,821,962 farms, or 71.0 percent of all farms, reported vegetables grown for home use in 1949. In 1944, a total of 4,946,594 farms, or 84.4 percent of all farms, reported vegetables for home use. Table 4 gives an enumerated total of $456,033,437 as the value of vegetables produced for home use in 1944.

ACREAGE OF SPECIFIED VEGETABLE CROPS HARVESTED FOR SALE FOR THE UNITED STATES: 1949, 1944, AND 1939

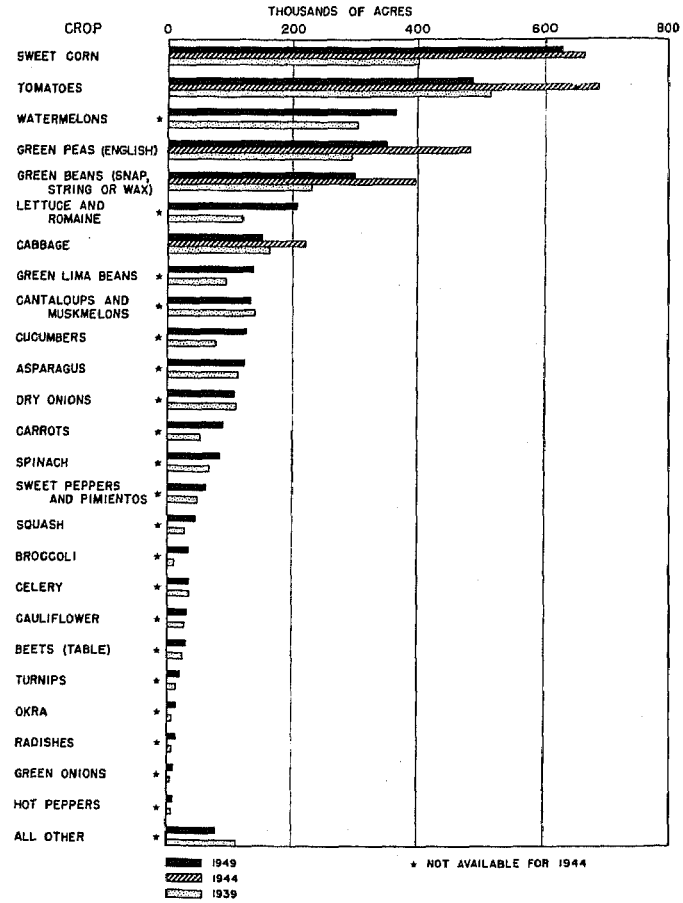

Table 3.–SPECIFIED VEGETABLES–FARMS REPORTING AND ACREAGE, FOR THE UNITED STATES: 1909 TO 1949

[Data by States for 1949, 1944, and 1934 are shown in tables 94 to 97]

Crop and year	Farms reporting		Acreage			
	Number	Percent of all farms	Total	Increase or decrease (-)		Average per farm reporting
				Acres	Percent	
Vegetables harvested for home use (other than Irish and sweet potatoes)[1]						
1949	3,821,962	71.0	(*)	(*)	(*)	(*)
1944	4,946,594	84.4	(*)	(*)	(*)	(*)

*Not available. [1]Farm garden vegetables for home use, exclusive of Irish potatoes and sweetpotatoes, except for 1919. [2]For 1909, vegetables other than Irish and sweet potatoes were reported by 4,969,539 farms. Vegetables were not classified as raised for sale or home use. Of the farms reporting, 707,763 had no report of acreage or value, and of those reporting value, 4,220,045 had less than $500 each, with a total value of $156,152,564. Data for vegetables raised on tracts of 1 acre or more are given under "Vegetables harvested for sale." The figures shown do not include all vegetables raised for sale, since the aggregate of market vegetables produced on tracts less than 1 acre must have been considerable. [3]In 1934, only 5 vegetables were specified on the schedule, viz, green beans, cabbage, sweet corn, tomatoes, and watermelons. In 1924, cantaloups and muskmelons, lettuce, and onions (dry) were harvested for sale from 278,550 acres. Vegetables other than those for which data are given were not reported. [4]Excludes anise and herbs which were included with medicinal crops in 1929. [5]0.05 percent or less. [6]Includes honeydews, honeyballs, etc. [7]Totals and derived figures are for States for which separate inquiry was carried on questionnaire. [8]Does not include 150,649 acres of green cowpeas grown for home use and for sale in the 8 principal producing States of Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas. Data for these States included with field crops in tables 2 and 93. [9]Lettuce and romaine reported separately in 1939; includes 102 farms reporting 381 acres of romaine. [10]Includes data for celery, sweet corn, and lettuce reported in States where separate inquiries were not on the questionnaire. [11]Includes mixed vegetables.

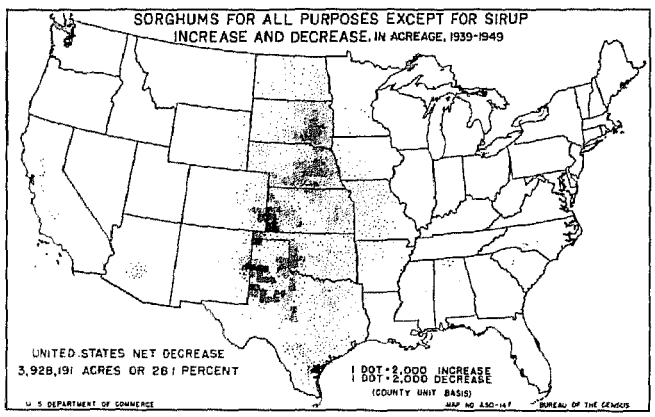

Table 4.—SPECIFIED CROPS—TOTAL VALUE AND PERCENT OF TOTAL REPRESENTED BY THE SEVERAL CROPS, FOR THE UNITED STATES: 1949 AND 1944

[1]Total of corn harvested for grain and corn cut for silage. 14,502,932 acres of corn cut for fodder were excluded, as most of this acreage was probably duplicated in the acreage of corn harvested for grain.

ACREAGE, 1919 TO 1949; AND VALUE, 1949: BY DIVISIONS AND STATES

"Egyptian corn," kafir, and milo maize not included]

Acreage—Continued																				Value, 1949 (dollars)

[1]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively.

[2]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

TO 1949; AND ACREAGE, 1879 TO 1949: BY DIVISIONS AND STATES

[1]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory. [2]In 1859, 1849, and 1839, Virginia included the area now known as West Virginia. [3]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

1949: AND YIELD PER ACRE, 1879 1949; BY DIVISIONS AND STATES

*** Not available; separate inquiry not on questionnaire for all States. See text. [1] Sorghum cut for silage in California in 1949 included with dry forage. [2] 1949 data include farms reporting and acreage of sorghum hogged or grazed; excluded in previous years. For comparability, see text. [3] Excludes sorghum for sirup. [4] For 1949, one inquiry called for "Sorghum harvested for all purposes except sirup," and a second, for "Sorghum or cane hogged or grazed, or cut for dry forage or hay." Difference between these totals represents acreage for grain and for silage.

AND VALUE; BY DIVISIONS AND STATES: 1949, 1944, AND 1939

Sorghum cut for silage[1]									Sorghum or cane hogged or grazed, or cut for dry forage or hay[2]

Table 14.—SORGHUM HARVESTED FOR GRAIN OR FOR SEED—FARMS REPORTING, ACREAGE, AND PRODUCTION; BY DIVISIONS AND STATES: 1899 TO 1934

[Includes sorghum for grain and sorghum for seed, except as otherwise noted. For 1919, separate inquiries were carried for grain and for seed; farms reporting for that year represent sorghum for grain only. The inquiry for 1909 was restricted to kafir corn and milo maize; and for 1899, to kafir corn. Farms reporting, acreage, and production for 1949, 1944, and 1939, in table 13]

	Region, division, and State	Farms reporting			Acreage						Production (bushels)

*Not available. ***Not available; separate inquiry not on questionnaire for all States. See text. [1]For 1949, farms reporting were obtained as follows for States reporting both winter and spring wheat: farms reporting any wheat assumed to be sum of farms reporting winter wheat and farms reporting any spring wheat. Farms reporting any spring wheat in Minnesota and South Dakota assumed to be sum of farms reporting durum or macaroni wheat and farms reporting other spring wheat; for North Dakota, this sum was adjusted to eliminate serious duplication on the basis of 1940 Census data. See text. [2]Except for Minnesota, North Dakota, and South Dakota, inquiry related to any spring wheat. [3]Totals States for which data are available. [4]0.05 percent or less.

AND 1939; AND VALUE AND QUANTITY SOLD, 1949: BY DIVISIONS AND STATES

data were not obtained for spring wheat. Percent not shown when more than 1,000.]

Table 16.—WINTER AND SPRING WHEAT THRESHED—ACREAGE AND PRODUCTION, 1949, 1944, AND 1939; AND VALUE OF CROP AND QUANTITY SOLD, 1949: BY DIVISIONS AND STATES

[Farms reporting winter and spring wheat in table 15. For 1949, all wheat is considered as winter wheat in those States for which separate data were not obtained for spring wheat. Data for durum or macaroni wheat in table 18]

	Region, division, and State	Winter wheat threshed or combined													
		Acreage			Production (bushels)			Average per acre			Value of crop, 1949 (dollars)		Quantity sold, 1949

Table 16.—WINTER AND SPRING WHEAT THRESHED—ACREAGE AND PRODUCTION, 1949, 1944, AND 1939; AND VALUE OF CROP AND QUANTITY SOLD, 1949: BY DIVISIONS AND STATES—Continued

[Farms reporting winter and spring wheat in table 15. For 1949, all wheat is considered as winter wheat in those States for which separate data were not obtained for spring wheat. Data for durum or macaroni wheat in table 18]

	Region, division, and State	Spring wheat threshed or combined (including durum or macaroni)													
		Acreage			Production (bushels)						Value of crop, 1949 (dollars)		Quantity sold, 1949

*Not available. ***Not available; separate inquiry not on questionnaire for all States. See text. [1]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. [2]Discrepancy in North Dakota between farms reporting any wheat and spring wheat. Figures not revised. [3]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

1879 TO 1934; WITH SUPPLEMENTAL DATA FOR WINTER AND SPRING WHEAT; BY DIVISIONS AND STATES

***Not available; separate inquiry not on questionnaire for all States. See text. [1]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory. [2]In 1859, 1849, and 1839, Virginia included the area now known as West Virginia. [3]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

AND OF WINTER WHEAT, 1869, 1909 TO 1934; BY DIVISIONS AND STATES

1944, and 1939 in table 15]

[1]Cut for grain when ripe or nearly ripe and fed unthreshed. [2]0.05 percent or less. [3]Data for Oregon, 1949, include 1,372,043 bushels of oats cleaned out of vetch and peas harvested for seed, valued at $1,084,441, and 877,941 bushels sold. 1,949 farms reporting oats cleaned out of vetch and peas excluded from farms reporting oats threshed. [4]Figures are for oats threshed only; separate inquiry not on questionnaire for oats cut for feeding unthreshed.

VALUE, 1949; WITH FARMS REPORTING, ACREAGE, AND PRODUCTION OF OATS THRESHED, 1949, 1944, BY DIVISIONS AND STATES

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Cut for grain when ripe or nearly ripe and fed unthreshed. [2]Totals for States for which data are available. [3]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory. [4]Excludes 1,174 farms reporting oats cleaned out of vetch and peas harvested for seed.

THRESHED, 1879 TO 1949; AND FARMS REPORTING AND ACREAGE OF OATS CUT FOR FEEDING UNTHRESHED, 1924 TO 1949: AND STATES

threshed in table 25]

Oats threshed—Continued					Oats cut for feeding unthreshed[1]

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North

[2] Figures for 1949 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory. [4] Includes 1,372,043 bushels cleaned

YIELD PER ACRE, 1879 TO 1934: BY DIVISIONS AND STATES

1944, and 1939 in table 22]

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Total for States for which data are available. [2]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1859 figures are for Dakota Territory. [3]In 1859, 1849, and 1839, Virginia included the area now known as West Virginia. [4]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

[1]See text discussion for "flax" and "mixed grains."
[2]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively.
[3]Figures for 1899 include Indian Territory.

Table 38.—MIXED GRAINS THRESHED—FARMS REPORTING, ACREAGE, AND PRODUCTION, 1919

[Data exclude wheat and flax mixtures

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Includes soybeans grown with other crops as well as those grown alone. The 1944 figures include mungbeans. See text. [2]Total quantity harvested divided by acreage grown alone only. [3]Based on those States for which acreage and production are shown. [4]Totals for States for which data are available. [5]Reported in small fractions.

1949; AND VALUE, 1949; WITH FARMS REPORTING BY ACRES HARVESTED, 1949; BY DIVISIONS AND STATES

as grown alone in those States for which separate data were not obtained for acreage grown with other crops]

Production (bushels)						Value, 1949 (dollars)		Farms reporting soybeans for beans grown alone by acres harvested, 1949

***Not available; separate inquiry not on questionnaire for all States. See text. [1]The 1944 and 1939 figures do not include acres plowed under for green manure. [2]Not available for 1929. [3]Farms with less than 1 acre of cowpeas which reported a quantity harvested for peas have been included with total farms reporting cowpeas (table 45) and with farms reporting quantity harvested for peas (also table 45) but have not been included with farms reporting cowpeas grown alone or with farms reporting cowpeas grown with other crops. [4]Total for States where separate inquiry was on questionnaire. [5]Reported in small fractions.

WITH FARMS REPORTING BY ACRES GROWN ALONE, 1949; BY DIVISIONS AND STATES

which separate data were not obtained for acreage grown with other crops]

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Includes quantity of peas harvested from acreage grown with other crops as well as that from acreage grown alone. [2]Farms with less than 1 acre grown alone or less than 1 acre grown with other crops are not included in totals for farms reporting and acreage grown alone or grown with other crops. Such farms are represented in total farms reporting the crop and in production. [3]Total quantity harvested divided by acreage grown alone only. [4]Totals for States for which data are available. [5]Reported in small fractions.

AND VALUE, 1949; WITH FARMS REPORTING BY ACRES HARVESTED, 1949; BY DIVISIONS AND STATES

not obtained for acreage grown with other crops. Figures for green cowpeas for peas in table 93]

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Totals for grown with other crops represent States for which data are available.

Table 47.–COWPEAS CUT FOR HAY; HOGGED OR GRAZED, OR CUT FOR SILAGE; AND PLOWED UNDER FOR GREEN MANURE–FARMS REPORTING, ACREAGE, AND VALUE, BY DIVISIONS AND STATES: 1949

[For 1949, all acreage is considered as grown alone in those States for which separate data were not obtained for acreage grown with other crops]

	Region, division, and State	Cowpeas cut for hay								Cowpeas hogged or grazed, or cut for silage						Cowpeas plowed under for green manure

[1]For 1929, data exclude velvetbeans for soil-improvement. For 1909, harvested for beans only.
[2]Cowpeas not included.
[3]Acreage of velvetbeans, vetches, Canada, and other ripe field peas, and companion crops.

Table 53.—DRY FIELD AND SEED BEANS HARVESTED FOR BEANS[1]—FARMS REPORTING, ACREAGE, AND PRODUCTION, 1949, 1944, AND 1939; AND VALUE OF CROP AND FARMS REPORTING BY ACRES HARVESTED, 1949; BY DIVISIONS AND STATES

[1] For 1949 and 1944, excludes soybeans, cowpeas, and peanut vines for hay; for 1930, excludes annual legume hay. See text. [2] Includes coarse forage. [3] Includes an undetermined tonnage of sorghum cut for hay. [4] North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory. [5] In 1859 and 1849, Virginia included the area now known as West Virginia. [6] Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory. [7] Excludes hay and grass silage which have been included in tables 2 and 4.

[1]For Oregon, farms reporting represents the sum of farms reporting hairy vetch and farms reporting other vetch and involves some duplication.
[2]Excludes hog or proso millet.

(***)Not available; separate inquiry not on questionnaire for all States. See text.
[1]Total for States for which data are available.
[2]0.05 percent or less.
[3]Reported in small fractions.
[4]Figures for 1899 and 1889 include Indian Territory, those for 1879 are for Indian Territory.
[5]Running square bales, counting round as half bales. Bales of 400 pounds in 1839, 1849, and 1859, and bales of 450 pounds in 1869.
[6]Production of cottonseed for 1929 as reported; production for other census years has been computed. See text.
[7]Less than 1 bale.

OF CROP AND VALUE OF SALES, 1949; WITH SUPPLEMENTAL DATA ON COTTONSEED: BY DIVISIONS AND STATES

*Not available.
***Not available; separate inquiry not on questionnaire for all States. See text.
[1]Farms reporting for Kentucky and Tennessee represent sum of farms reporting different classes (Burley, dark-fired, dark air-cured) and include some duplication.
[2]0.05 percent or less.
[3]Reported in small fractions.

VALUE OF SALES, 1949 AND FARMS REPORTING BY ACRES HARVESTED, 1949; BY DIVISIONS AND STATES

[1]Reported in small fractions. [2]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the area now known as North Dakota and South Dakota, respectively. The 1859 figures are for Dakota Territory. [3]In 1859 and 1849, Virginia included the area now known as West Virginia. [4]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

PRODUCTION, BY DIVISIONS AND STATES: 1849 TO 1939

1944 in table 78]

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Where figures in the first two columns are identical the inquiry related to sweet sorghum for sirup. In these States there were no reports of sugarcane in the write-in inquiry. In other States for which farms reporting are shown in column 1, the inquiry related to sugarcane or sorghum for sirup. [2]Totals for States for which data are available. [3]Reported in small fractions.

VALUE OF CROP AND VALUE OF SALES, 1949; WITH DATA ON SUGARCANE FOR SIRUP, 1929; BY DIVISIONS AND STATES

Production (gallons)—Continued					Value of crop, 1949 (dollars)				Value of sales, 1949						Sugarcane for sirup, 1929

[1]Reported in small fractions.

[2]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory.

[3]In 1859, Virginia included the area now known as West Virginia.

[4]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

[1]Separate inquiry on sugarcane for sugar not on 1944 schedule for Florida. A supplemental tabulation of the crops reported under "Crops harvested not covered elsewhere on schedule" indicated that 19 farms in this State harvested 27,497 acres of sugarcane for sugar, valued at $3,266,674. No production data for these farms are available from the reports.

[1]Does not include acreage for farms with less than 15 bushels harvested. See text. [2]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory. [3]In 1859, Virginia included the area now known as West Virginia. [4]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

***Not available; separate inquiry not on questionnaire for all States. See text. [1]Does not include acreage for farms reporting less than 15 bushels harvested. See text. [2]Reported in small fractions. [3]North Dakota and South Dakota admitted as States in 1889. Figures for 1879 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1869 and 1859 figures are for Dakota Territory. [4]In 1859 and 1849, Virginia included the area now known as West Virginia. [5]Figures for 1899 include Indian Territory; those for 1889 are for Oklahoma Territory alone, no data being available for Indian Territory.

AND PRODUCTION; BY DIVISIONS AND STATES: 1849 TO 1949

Production (bushels)

[1]For 1909, vegetables other than Irish and sweet potatoes were reported by 4,969,539 farms. Vegetables were not classified as raised for sale or home use. Of the farms reporting, 707,763 had no report of acreage or value, and of those reporting value, 4,220,045 had less than $500 each, with a total value of $156,152,564. Data for vegetables raised on tracts of 1 acre or more are given under "Vegetables harvested for sale." The figures shown do not include all vegetables raised for sale, since the aggregate of market vegetables produced on tracts less than 1 acre must have been considerable.

237460 O - 53 - 45
