CHARTS

	Page
Strawberries—Acreage and production, for the United States, 1899 to 1949	676
Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees, by States: 1950 and 1945	678
Land in fruit orchards—Acreage, for the United States: 1930 to 1950	679
Apples—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1889 to 1949: for the United States	685
Peaches—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1889 to 1949: for the United States	685
Cherries—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1889 to 1949: for the United States	685
Pears—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1889 to 1949: for the United States	686
Plums and prunes—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1889 to 1949: for the United States	686
Grapes—Number of vines of bearing age and number of vines not of bearing age, 1900 to 1950; and production, 1899 to 1949: for the United States	686
Oranges (including Satsumas, tangerines, and mandarins)—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1939 to 1949: for the United States	687
Grapefruit—Number of trees of bearing age and number of trees not of bearing age, 1890 to 1950; and production, 1939 to 1949: for the United States	687
Value of nursery products, flowers and flowering plants, vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, and mushrooms harvested for sale, by States: 1949	689
Value of standing timber sold and value of firewood, fence posts, logs, lumber, pulpwood, and piling and poles, and value of all other forest products sold, by States: 1950 Census of Agriculture	691

CHAPTER VIII.—FRUITS AND NUTS, HORTICULTURAL SPECIALTIES, FOREST PRODUCTS

Introduction.—This chapter presents statistics collected in the 1950 Census of Agriculture for berries and other small fruits; for tree fruits, nuts, and grapes; for horticultural specialties; and for forest products taken or cut on farms. Totals, for each crop or item, are usually presented for the United States, for each of the individual States and the District of Columbia, and for nine groups of States, called geographic divisions. In most of the tables, a further grouping of the State and geographic division material has been made showing totals for the North, the South, and the West. Comparable, or closely related, data from prior censuses are presented for many of the items, especially in the summary tables showing only United States totals.

Data for forest products and horticultural specialties have been included in this chapter for convenience only. Because of the lack of similarity of forest products with other items for which information is presented in this chapter, the totals for forest products have not been combined with those for fruits and nuts and horticultural specialties.

The 1950 Census of Agriculture data for small fruit and berry crops such as strawberries, blackberries, raspberries, currants, gooseberries, etc., relate only to those harvested for sale in 1949. On the other hand, 1950 Census data for tree fruits, nuts, and grapes include crops harvested for use on the farm as well as those sold. For tree fruits, nuts, and grapes, information was gathered, as of the census date, for the land area in orchards, groves, vineyards, and planted nut trees for each farm. In order to provide information on production prospects for the years ahead, figures on the number of trees of bearing age and trees not of bearing age were obtained also. For orchard crops, the quantity harvested (for home use and for sale) relates to the crop year 1949, unless otherwise shown.

The 1950 Census data for horticultural specialties relate to products grown for sale in 1949 and include information about (1) nursery products; (2) flowers and flowering plants; and (3) vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, and propagated mushrooms. Information on forest products, available from the 1950 Census of Agriculture, relates to those products of the woodland, or of individual or scattered trees or tree growth, on places enumerated as farms. These products taken or cut in 1949 include such items as standing timber sold; firewood, fence posts, and sawlogs cut for use on the farm or for sale; pulpwood, piling and poles, and other products such as bark, bolts, mine timbers, Christmas trees, hewn ties, maple products, etc.

Organization of the questionnaire—The Introduction to this volume and facsimiles of the questionnaires in the Appendix provide a description of the variation, by States, of the crop inquiries for the 1950 Census of Agriculture. The section on berries and other small fruits provided separate inquiries for the most important berry and other small fruit crops harvested for sale in each State. A "catch-all" inquiry was provided for reporting data for any small fruits for which there was no separate inquiry. The units of measure, in which the quantities harvested for sale were to be reported, varied among States. For each State, the most common unit of weight in commercial usage, or type of container, was chosen for each crop.

The section for tree fruits, nuts, and grapes on the questionnaire asked first for the acreage of land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees. Following this were inquiries on number of trees and quantities harvested for each important crop; and, in some cases, varieties of fruits were asked for. The inquiries for fruit crops varied considerably by States, both in the number of crops for which there were separate questions and in units of measure for reporting the quantities harvested. For example, the fruit section on the questionnaire for North Dakota and South Dakota comprised only three inquiries: one, for apples; another, for plums and prunes; and a third, for "other tree fruits and nuts." Any information for tree fruits other than apples and plums and prunes, and any information for grapes or planted nut trees was to be entered under this last inquiry, the kind of fruit being specified by the enumerator (or respondent if the latter filled his own questionnaire). The California questionnaire, in contrast, contained 23 separate inquiries for fruit, nut, and grape crops. Because of the importance of fruit crops in California, figures on the acreage for each fruit crop were obtained during the enumeration.

Totals for the United States and geographic divisions.—For most of the fruits and nuts, totals have been compiled for each geographic division and for the United States. Even though a separate inquiry may not have appeared on the questionnaire for each State, data for each fruit and nut have been secured by tabulating the information reported for "other fruits and nuts." However, in the case of those fruits and nuts such as cherries, pears, grapes, plums and prunes, oranges, and pecans for which data were obtained in some of the more important producing States by variety groups, totals for each of the variety groups cannot be obtained for some regions and for the United States. Inasmuch as each variety group has been treated as a separate crop, it was not possible to obtain totals for farms reporting the fruit or nut crop for those fruits for which there were separate inquiries for each variety group. In some tables, totals are shown only for specified States, i. e., States for which the data by variety groups are available.

Other published data.—Not all data available on fruits, nuts, etc., appear in this chapter. Considerable data appear for States and counties in Volume I, Counties and State Economic Areas, of the reports of the 1950 Census of Agriculture. State Table 12 in Volume I contains data on the number of farms reporting trees not of bearing age, farms reporting trees of bearing age, and farms reporting quantity harvested for many fruit and nut crops. State Table 13 presents data on the number of fruit-and-nut farms, value of fruits and nuts sold, etc., for large farms. (See Introduction to this volume for description of large farms.) County Table 6 provides data on the acreage of orchards, groves, vineyards, and

237460 O - 53 - 46

planted nut trees for "commercial" and "other" farms. County Table 7 gives the number of fruit-and-nut farms (farms with 50 percent or more of total sales derived from the sale of fruits and nuts). (See Introduction for a description of "commercial" and "other" farms and type of farm.)

Data are presented for economic areas in Volume I for a number of items relating to fruit and nut crops, etc. Economic Area Table 4 presents figures on the number of farms reporting land in orchards, vineyards, and planted nut trees, classified by acres in the orchard. This table also contains, for apples and peaches, data on farms reporting trees not of bearing age by number of trees not of bearing age; farms reporting trees of bearing age by number of trees of bearing age, and farms reporting quantity harvested by amount harvested. Economic Area Tables 9, 10, 11, and 12 provide data on the number of fruit-and-nut farms, the value of fruits and nuts sold, value of horticultural specialties sold, and value of forest products sold, by size of farm, tenure of farm operator, type of farm, and economic class of farm. These last mentioned tables in Part 18 for Florida and Part 33 for California contain data for these four major classifications for farms reporting and land in fruit orchards, vineyards, and planted nut trees. (See Introduction to this Volume.)

The number of fruit-and-nut farms is given, by States, in chapter XIII of this Volume. Selected characteristics of farms of this type are shown in that chapter. Also, comparisons are made with farms of other types.

Detailed data on the production of flowers, nursery products, bulbs, and flower seeds appear in Part 1, "Horticultural Specialties," of Volume V, "Special Reports," of the 1950 Census of Agriculture. These detailed data relate only to farms reporting a value of $1,000 or more, for the value of sales for any one of the four groups of horticultural-specialty products.

Information was obtained in the 1950 Census of Agriculture for the portions of the various crops harvested in 1949 which were grown on irrigated land. Information for farms reporting and irrigated land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees is given in County Table 5a for the following States:

Arizona	Nevada
Arkansas	New Mexico
California	North Dakota
Colorado	Oklahoma
Florida	Oregon
Idaho	South Dakota
Kansas	Texas
Louisiana	Utah
Montana	Washington
Nebraska	Wyoming

TABLE 1.—FRUITS AND NUTS AND HORTICULTURAL SPECIALTIES—FARMS REPORTING, ACREAGE, AND VALUE, FOR THE UNITED STATES: CENSUSES OF 1840 TO 1950

*Not available.
**Available data not comparable.
[1] Excludes fruit and nut acreage on farms with less than ½ acre of fruit orchards, groves, vineyards, and planted nut trees. See text.
[2] Acreage for horticultural specialties not included.
[3] Only strawberries included in small fruits. Other small fruits included in field crops.
[4] Acreage in fruit orchards, groves, vineyards, and planted nut trees not secured prior to 1930 Census.
[5] For 1949, harvested for sale only; for other years, data are for all acreage harvested.
[6] Totals and derived figures are for States for which separate inquiries were on the schedule.
[7] Value of 8 specified fruits only.
[8] Farms reporting fruit trees, not including farms reporting only grapevines and/or nut trees.
[9] Value of orchard products.
[10] Data for farms unclassified as to type excluded.
[11] Includes 169,851 acres reported by 596 farms reporting seeds with 96,564 acres devoted to seed production.
[12] Value of flower and vegetable seeds not available.

The irrigated area for land in bearing and nonbearing fruit orchards, groves, and planted nut trees, as shown for these States, represents a total only for those farms for which the entire orchard and vineyard acreage was irrigated. For example, if there were 20 acres of orchard and vineyard on a farm, comprising 10 acres each of pears and grapes, the 20 acres of orchard and vineyard would be shown in County Table 5a only if the entire 20 acres had been irrigated in 1949. On the other hand, if the 10 acres of pears had been irrigated and the 10 acres of grapes had not been irrigated, none of the acreage for that particular farm would be included in the totals for crops harvested on irrigated land. State, geographic division, and United States totals for all irrigated crops are given also in Volume III, "Irrigation of Agricultural Lands," of the 1950 Census of Agriculture reports.

Definitions and explanations.—Reference should be made to the Introduction to this volume for definitions of a farm, farms reporting, type of farm, etc. The Introduction also contains an explanation of the methods used in obtaining and compiling the data and an appraisal of the results of the 1950 Census.

Minor crops.—Data for crops not generally grown or for crops of relatively small importance were obtained under the inquiries, "other berries and small fruits," "other tree fruits and nuts," etc. Data for States for which the crop is of minor importance have been combined and are shown in the tables as "all other States." However, in such cases, data for each State can usually be found in State Table 12 of Volume I. Figures for fruit and nut crops not satisfactorily identified under "other berries and small fruits," "other tree fruits and nuts," etc., appear under the group" all other berries and small fruits," "all other tree fruits and nuts," etc.

TABLE 2.—FACTORS USED IN CONVERTING FRUIT AND NUT QUANTITIES FROM THE UNITS OF MEASURE ENUMERATED IN SPECIFIED STATES TO THE UNITS SELECTED FOR SHOWING TOTALS FOR THE UNITED STATES

Crop	Unit shown in the tables in this volume	Other units specified on the questionnaire and published in Volume I, by States		Conversion factor
		State	Unit	
Almonds	Pound	California	Ton	1 ton=2,000 pounds.
Apples	Bushel	California	do	1 ton=41.67 bushels (bushel=48 pounds).
		Oregon	Loose box	Loose box=¾ bushel.[1]
		Washington	do	Do.[1]
Apricots	do	California	Ton	1 ton=41.67 bushels.
		Idaho	Pound	48 pounds=1 bushel.
		Oregon	do	Do.
		Washington	do	Do.
Cherries	Pound	California	Ton	1 ton=2,000 pounds.
Figs	Pound, fresh weight	California	Ton, dry weight	1 ton (2,000 pounds), dry weight=6,000 pounds, fresh weight.
Grapes	Pound	California	Ton[2]	1 ton=2,000 pounds.
Grapefruit	Ton	Arizona	Field box	44.44 field boxes=1 ton (field box=45 pounds).[1]
		California	do	44.44 field boxes=1 ton (field box=45 pounds).
		Florida	do	24.39 field boxes=1 ton (field box=82 pounds).
		Louisiana	do	40 field boxes=1 ton (field box=50 pounds).[1]
		Alabama	do	40 field boxes=1 ton (field box=50 pounds).
		Georgia	do	Do.
		Mississippi	do	Do.
		South Carolina	do	Do.
Oranges, all	do	Arizona	do	37.74 field boxes=1 ton (field box=53 pounds).
		Florida	do	22.22 field boxes=1 ton (field box=90 pounds).
		Louisiana	do	28.57 field boxes=1 ton (field box=70 pounds).
		Alabama	do	35.71 field boxes=1 ton (field box=56 pounds).
		Georgia	do	Do.
		Mississippi	do	Do.
		South Carolina	do	Do.
Valencia	do	California	do	38.09 field boxes=1 ton (field box=52.5 pounds).
Navel and miscellaneous	do	California	do	39.60 field boxes=1 ton (field box=50.5 pounds).
Peaches	Bushel	California	Ton	1 ton=41.67 bushels (bushel=48 pounds).
		Oregon	Pound	48 pounds=1 bushel.
		Washington	do	Do.
Pears	do	California	Ton	1 ton=41.67 bushels (bushel=48 pounds).
		Oregon	do	1 ton=40 bushels (bushel=50 pounds).
		Washington	do	Do.
Plums and prunes	do	California	Ton, fresh weight for plums; ton, dry weight for prunes.	1 ton=35.71 bushels (bushel=56 pounds). 1 ton (2,000 pounds), dry weight=89.27 bushels fresh weight (bushel=56 pounds; 1 pound dry prunes=2½ pounds fresh).
Blackberries and dewberries	Quart	California	Pound	1½ pounds=1 quart.
		Oregon	do	Do.
		Washington	do	Do.
Blueberries (tame)	do	California	do	Do.
		Oregon	do	Do.
		Washington	do	Do.
Boysenberries, loganberries, and youngberries	do	California	do	Do.
		Oregon	do	Do.
		Washington	do	Do.
Cranberries	Pound	Connecticut	100-pound barrel	100-pound barrel=100 pounds.[1]
		Massachusetts	do	Do.
Currants	Quart	California	Pound	1½ pounds=1 quart.
		Oregon	do	Do.
		Washington	do	Do.
Gooseberries	do	California	do	Do.
		Oregon	do	Do.
		Washington	do	Do.
Raspberries	do	California	do	Do.
		Oregon	do	Do.
		Washington	do	Do.
Strawberries	do	California	do	Do.
		Oregon	do	Do.
		Washington	do	Do.
		Arkansas	24-qt. crate	24-quart crate=24 quarts.
		Louisiana	24-pt. crate	24-pint crate=12 quarts.

[1] Consideration of additional data on unit weights led to some changes in conversion factors for 1950 Census data shown in Table 2 from factors used to convert production for 1945 and earlier years in the State bulletins. The unrevised factors used for converting 1945 data in State bulletins are: Grapefruit—field box=48 pounds for Arizona and 62 pounds for Louisiana. Apples—loose box=⅝ bushel for Oregon and Washington. For 1940 and earlier years: Cranberries—1 quart=1½ pounds for Massachusetts and Connecticut.

[2] In California, the 1950 questionnaire provided for reporting raisin grape production on either dry-weight or fresh-weight basis. Reports of dry weight were converted at the rate of 1 pound raisins to 4 pounds fresh grapes.

Quantity harvested.—The term "quantity harvested" is used to designate the amount of the crop actually harvested. Quantity harvested includes culls, the amount utilized for byproducts such as apples for cider, etc. In some cases, the quantity harvested may be less than the total amount produced, as part of the crop may not have been harvested because of poor quality, unavailability of labor, low prices, etc. For all items except citrus fruits, olives, and avocados, the quantity harvested represents the amount harvested during the 1949 crop year. For Florida, Louisiana, and Texas the quantity harvested for citrus fruits represents the harvest from the bloom of 1949, while for Arizona and California, it represents the harvest from the bloom of 1948. For olives and avocados in California, the quantity harvested represents the harvest in 1949–50 from the bloom of 1949.

Units of measure.—For the tables in this chapter, the quantity harvested for each crop is shown in a common unit, except for some crops for earlier census years as shown in Table 4. The factors used in converting the units used in the enumeration to the common units shown in this chapter are given in Table 2. In the State and county tables in Volume I, the units shown were those appearing on the questionnaire for each State.

Value.—Data for two types of values are shown in this chapter, viz, "value of the quantity harvested," and "value sold." The values of berries and other small fruits and tree fruits, nuts, and grapes harvested were obtained by multiplying the quantity harvested for each crop by county-unit prices. The county-unit prices were obtained cooperatively by the Bureau of Agricultural Economics, United States Department of Agriculture, and the Bureau of the Census. The value of tree fruits, nuts, and grapes harvested is for the total quantity harvested and includes the value of any portion which may have been used on the farm as well as that harvested for sale, while the value of berries and other small fruits sold relates only to quantity sold. The value of small fruits, berries, and fruits and nuts sold was obtained for each farm. The value was to include the estimated value of the 1949 crop that would be sold.

Quantities of nursery and greenhouse products sold were not obtained in the census of agriculture. The values given for these products represent the value of sales in 1949. The values for forest products cut or produced were obtained by multiplying State estimates of average prices by the quantities cut or produced.

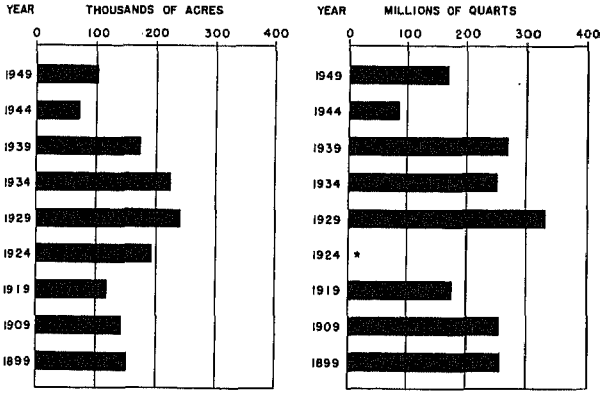
The average values of crops shown in the various tables represent weighted averages. They were obtained by dividing the total value of the crop for the State or geographic division by the total quantity harvested.

Comparability of statistics.—In general, the statistics for 1950 are comparable with those for prior censuses. Notes on the tables and comments in the text under the individual crops or items call attention to important differences in comparability resulting from changes in questionnaires.

Berries and other small fruits.—The 1950 Census of Agriculture Questionnaires provided for obtaining separate data for the acreage and quantity harvested for the several kinds of berries and other small fruits grown for sale in 1949. Nonbearing areas were not to be reported. The area was to be reported in tenths of acres. If the area harvested was materially less than one-tenth of an acre, the enumerator was instructed to report the quantity harvested but not the acreage.

Figures for berries for 1950 are for tame berries except in the case of blueberries in Maine, Vermont, Rhode Island, and New Hampshire. In those four States, in addition to tame blueberries, data were obtained for wild blueberries, when grown on land used primarily for their production.

The following inquiry regarding berries grown for home use appeared on all questionnaires for 1950:



Were any berries or other small fruits harvested last year for home use? ☐ No ☐ Yes

The answers to this inquiry were not tabulated.

In 1945, information was obtained only for the important berries and small fruits harvested in each region. Data on the quantity harvested for 1945 and the earlier years represent the total quantity harvested, including that for home use. In 1935, information was obtained only for strawberries. The acreage of strawberries for that census included some planted acreage from which no crop was harvested in 1934. A count of the farms reporting any berries, or small fruits, was not obtained in the 1950 Census.

The acreage of berries and small fruits harvested for sale in 1949 was 32.2 percent less than the total for sale and for home use in 1939. The 1949 total of 102,387 acres of strawberries harvested for sale was 41.6 percent less than the acreage of strawberries harvested for sale and for home use in 1939, and 41.2 percent greater than the acreage in 1944.

STRAWBERRIES—ACREAGE AND PRODUCTION, FOR THE UNITED STATES: 1899 TO 1949

* DATA NOT AVAILABLE
SOURCE: TABLE 3

Cranberries.—In 1950, three different units of measure, viz, 100-pound barrels, quarts, and pounds were used in the enumeration of cranberries. The conversion factors used in changing totals for barrels and quarts to the common unit of pounds given in this chapter are shown in Table 2.

The harvest of cranberries for Massachusetts and Connecticut was recorded in 100-pound barrels in 1950, and in quarts in 1945 and earlier censuses. In showing the cranberry data in State Table 12, Part 1 of Volume I, for these States, the quarts harvested secured in earlier censuses were expressed in units of 100-pound barrels. The conversion was made on the assumption that 1 quart of cranberries contained 1½ pounds. After Part 1 of Volume I was published, a review of all material relating to weights and measures for cranberries indicated that there are approximately 90 to 96 quarts of cranberries weighing from 92 to 120 pounds in a barrel. On the basis of the available data, it was decided for conversion purposes that 1 quart was equal to 1 pound, in presenting data in this chapter.

Land in fruit orchards, vineyards, and planted nut trees.—The following inquiry was on the 1950 questionnaire in all States:

How much land is in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees? ☐ Less than ½ acre OR Acres ★ 10

(Report tenths of an acre, such as $\frac{4}{10}$, $1\frac{4}{10}$, etc. Do not include berry acreage or nurseries.)

An instruction to the enumerator stated that the acreage of wild or volunteer groves of pecans should not be reported as land in planted nut trees.

TABLE 3. —BERRIES AND OTHER SMALL FRUITS [1]—FARMS REPORTING, ACREAGE, QUANTITY HARVESTED, AND VALUE, FOR THE UNITED STATES: 1899 TO 1949

[Figures for divisions and States in table 8]

*Not available.

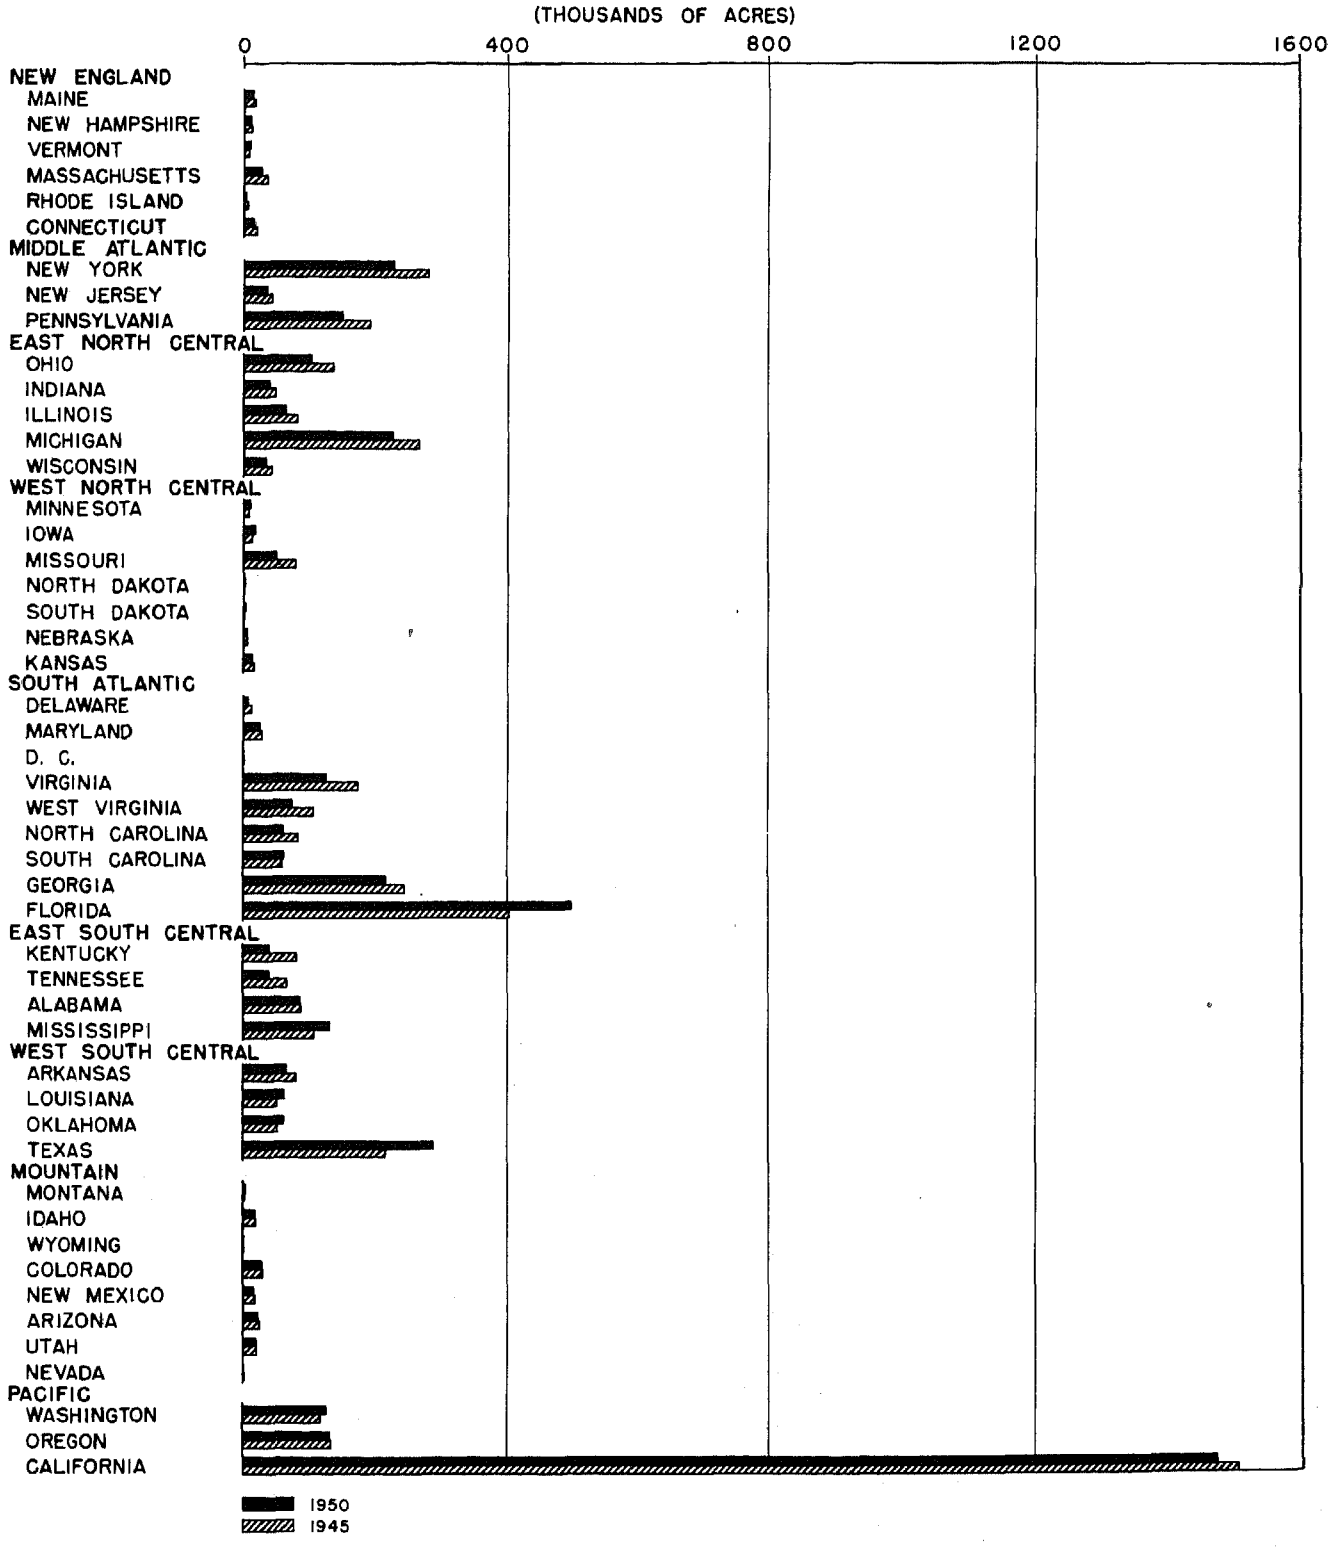
[1] For 1949, data are for acreage harvested for sale only; for other years, data are for all acreage harvested.

[2] For years prior to 1924, percentages are based on the total acreage of crops for which figures are available.

[3] Totals for States for which data are available. See text. Data not fully comparable with other years.

[4] 0.05 percent or less.

[5] Loganberries included with raspberries in 1909 and 1899.



[6] Total of tame blueberries and wild blueberries for specified States. For 1929, data for some States appear to include wild blueberries though enumerators were instructed to omit such acreage.

[7] Sum of farms reporting wild blueberries and tame blueberries. Data for 1940 indicate little duplication by making this summation.

[8] Includes minor acreage in 18 States enumerated as "blueberries." Instructions provided for exclusion of wild berries in these States.

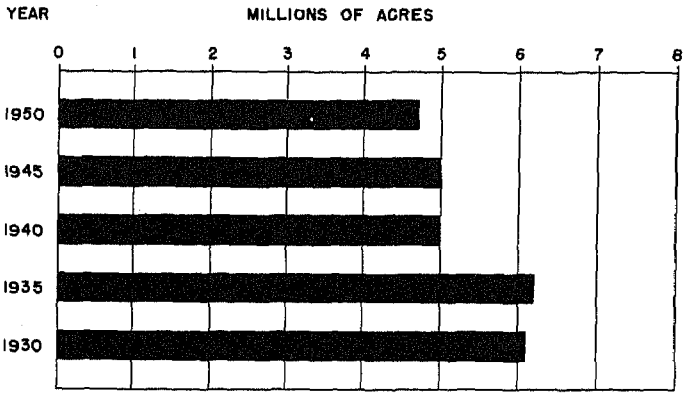
[9] Mainly gooseberries.

LAND IN BEARING AND NONBEARING FRUIT ORCHARDS, GROVES, VINEYARDS AND PLANTED NUT TREES, BY STATES: 1950 AND 1945

The 1950 inquiry as to land was different from that in the 1945 and 1940 Censuses in that it required an entry for every farm reporting trees or vines. The inquiry regarding acreage in orchards, vineyards, and planted nut trees for censuses prior to 1950 asked for the acreage or fractions of an acre. However, enumerators frequently did not report the acreage when there were only a small number of trees on the farms. In the office processing of questionnaires for prior censuses, the acreage in orchards, vineyards, and planted nut trees was entered, if it had not been entered by the enumerator, when there were sufficient trees and grapevines to occupy two or more acres. Farms with less than one-half acre in orchards, vineyards, and planted nut trees were counted as farms reporting in 1950. Inasmuch as the procedure for reporting for farms with a small area in orchards, vineyards, and planted nut trees differed in 1950 from that used in prior censuses, the number of farms reporting for 1950 is not comparable and is much greater than that shown for prior censuses. The number of farms reporting land in orchards, groves, vineyards, and planted nut trees was 2,221,381 in 1950 as compared with 1,219,678 in 1945, and 1,230,485 in 1940.

The method used for reporting the acreage of land in orchards, vineyards, and planted nut trees in 1950 affected the comparability of the data with those for prior censuses. The figures for 1950 do not include any acreage for farms having less than one-half acre in orchards, vineyards, and planted nut trees. The figures for prior censuses include some acreage for farms having less than one-half acre but do not include acreage for all farms having less than one-half acre. There were 1,621,939 farms in 1950 with less than one-half acre and 599,442 farms with one-half acre or more in orchards, vineyards, and planted nut trees. In 1940, there were 1,230,485 farms reporting orchard acreage and 1,274,319 farms reporting fruit trees and grapevines, or fruit harvested, but no acreage in orchards, vineyards, and planted nut trees. Therefore, a part (approximately one-half) of the decrease in the acreage in orchards, vineyards, and planted nut trees from 5,044,931 in 1940 and 5,000,556 in 1945 to 4,716,337 acres in 1950 is the result of the change in procedure of recording acreage of farms having less than one-half acre. The following table provides a comparison of farms reporting by acreage groups for land in fruit orchards, vineyards, and planted nut trees for 1950 and 1940:

Acreage reported in orchards, vineyards, and planted nut trees	Farms reporting	
	1950	1940
Farms reporting any tree fruits, nuts, or grapes	2,221,381	2,504,804
Less than one acre (including no report)	1,729,294	1,790,341
No report of acreage	.....	1,274,319
Under 0.5 acre	1,621,939	(*)
0.5 to 0.9 acre	107,355	(*)
0.1 to 0.9 acre	(*)	526,022
1.0 to 2.4 acres	282,423	440,463
2.5 to 4.9 acres	62,690	94,076
5.0 to 9.9 acres	54,853	68,737
10.0 to 19.9 acres	43,530	51,727
20.0 to 49.9 acres	32,591	35,368
50.0 to 99.9 acres	10,120	9,601
100.0 acres and over	5,880	4,971



*Not available.

The data in this table indicate a substantial decrease in the number of farms having orchards of less than 50 acres and an increase in farms with orchards of more than 50 acres.

The orchard acreage in Florida, Texas, Mississippi, and Washington was considerably greater in 1950 than in 1945. California has almost a third of the United States orchard acreage.

Trees and vines not of bearing age and of bearing age.—Inquiries in the 1950 Census, asking for the number of trees not of bearing age and the number of trees of bearing age, were similar to those used in previous censuses since 1920, except for 1945 when only the number of trees of all ages was obtained. The main purpose of these inquiries is to show the number and relative importance of young plantings which may be expected to come into bearing with advancing age.

LAND IN FRUIT ORCHARDS—ACREAGE, FOR THE UNITED STATES: 1930 TO 1950

SOURCE: TABLE I

Apples.—Inquiries for the number of trees not of bearing age, number of trees of bearing age, and quantity harvested in 1949 were on the 1950 questionnaire for all States except Florida. In Florida, apple information was obtained under "other tree fruits, except citrus, and other nuts." The quantity harvested was reported in bushels in all States except Washington, Oregon, and California. In Washington and Oregon, the unit of measure specified was "loose boxes" while in California, it was "tons."

The data for quantity of apples harvested for Washington and Oregon for censuses prior to 1950 given in this chapter differ from those given in Part 32 of Volume I. Prior to 1950, data on the quantity of apples harvested were obtained in bushels in these two States. Data for earlier years on quantity harvested were shown in Volume I in "loose boxes" in accordance with the unit of measure used on the questionnaire in these States in 1950. The conversion from bushels to "loose boxes" was on the basis of 1 loose box=⅝ bushel. A re-examination of available data on the conversion of loose boxes indicates that 1 loose box is equal to ¾ bushel. This conversion factor has been used in obtaining for Washington and Oregon the data on quantity harvested shown for earlier years in this chapter.

The number of apple trees has been declining consistently since the peak shown by the Census of 1910. At that time, there were 217,114,688 trees of all ages as compared to 50,586,262 trees in 1950. The sharpest decline was shown between the 1910 and 1920 Censuses. During this period, there was a decrease of nearly 66 million trees. Since that time, the number of trees has continued to decline but at a slower rate. In 1950, there were approximately 15 million fewer trees than in 1945. In both 1945 and 1950, the number of apple trees was less than the number of peach trees. The number of farms reporting apple trees has also decreased consistently since 1910. At that time, there were 2,980,398 farms reporting trees of bearing age compared with 1,556,722 reporting any trees and/or quantity harvested in 1950. On the other hand, the quantity of apples harvested has declined very little during this period as the yield per tree of bearing age has increased from census to census.

A comparison of the number of trees for 1950 and 1940 shows that trees of bearing age have decreased more than trees not of bearing age. Older trees have been removed or abandoned during recent years because of low prices, high production costs, damage by insects and diseases, higher returns from competing crops, etc. The largest decreases were recorded in the Middle Atlantic States, the East North Central States, and the South Atlantic States. However, decreases occurred in all geographic areas. Decreases

*Not available.

[1] Farms reporting trees or vines on census date and/or quantity harvested.

[2] Quantity harvested and value relate to crops for the calendar year preceding the date of enumeration with the following exceptions: citrus fruit in 1950 Census relates to the 1949–50 season (bloom of 1949) except for Arizona, and for grapefruit, lemons, and oranges in California which relate to the 1948–49 season (bloom of 1948); avocado and olive harvest for the 1950 Census relates to the 1949–50 season; citrus fruit in 1945 Census relates to the 1943–44 season (bloom of 1943); citrus fruit in 1940 Census relates to 1939–40 season (bloom of 1939) for all States except Arizona and California, which relates to the 1938–39 season (bloom of 1938); and in the Census of 1890, the products are for the year ending June 1 of the census year.

[3] Includes the value of other tree fruits and nuts for which data are not shown separately: 1940, $18,732; 1930, $67,661; 1920, $141,143; and 1910, $478,431.

[4] Farms reporting any trees or vines, Apr. 1, 1940; or production, 1939 (for citrus fruit, crop year specified).

[5] Value of 8 specified fruits only.

[6] Farms reporting fruit trees, not inc uding farms reporting only grapevines and/or nut trees.

[7] Value of orchard products.

[8] Excludes citrus fruits and nuts. See separate total for each in this table.

[9] Total for States for which data are available. See text.

[10] Farms reporting trees (or vines) of bearing age.

[11] Includes some duplication. See text discussion for this crop.

[12] Nectarines included.

[13] Less than one-tenth of 1 percent.

[14] In 1890, there were 93,686 acres in nonbearing vines, 307,575 acres in bearing vines, and 572,139 tons of grapes sold for table use, to wineries, etc.

[15] Number of plants.

[16] Less than one-tenth of 1 crate.

[17] Less than 1.

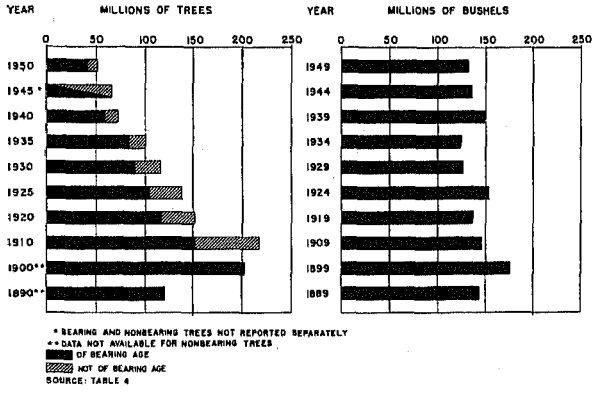
[18] See text for wording of inquiry in 1950; improved and seedling in 1945; improved and wild in 1940; cultivated and wild in 1930 and 1925; kind not specified prior to 1925.

[19] The 1940 total for number of tung trees is about 3,000,000 too large. See page 536 of Volume II of the 1945 Census of Agriculture Reports for explanation.

[20] Farms reporting trees of bearing age. For oranges, figures are for farms reporting oranges other than tangerines or mandarins. In 1920, tangerine trees of bearing age were reported on 809 farms. In 1910, tangerine trees of bearing age were reported on 332 farms and mandarin trees of bearing age on 22 farms.

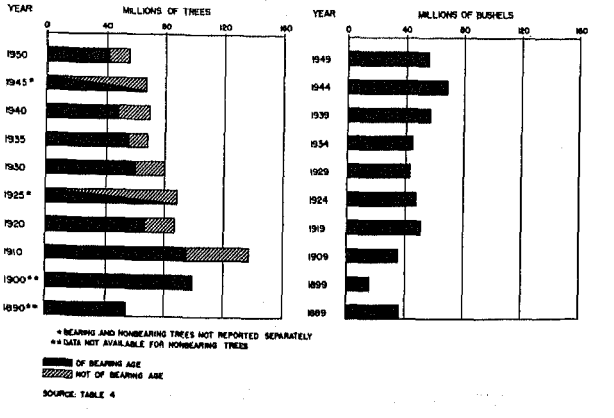
[21] Trees of bearing age only.

[22] Boxes; kind most specified.



[23] Does not include production for Louisiana which was given in number of fruits and amounted to 2,208,750 oranges.

[24] Less than one-tenth of 1 box.



in trees not of bearing age occurred in all geographic divisions except the Mountain and Pacific States where there was a substantial increase.

Table 12 shows for apples and peaches, by number of trees of bearing age, most of the data obtained for these fruits. These data add considerably to the information describing apple plantings enumerated in the 1950 Census. For the United States, 96.1 percent of the farms reporting apple trees of bearing age had less than 100 bearing trees. This group of farms had about 31.3 percent of the total number of bearing trees but only 10.8 percent of the quantity harvested. Farms with 1,000 or more bearing trees had about 38.6 percent of the apple trees of bearing age and accounted for 54.5 percent of the apples harvested in 1949. The number of farms reporting less than 25 bearing trees, 25 to 99 bearing trees, 100 to 499 bearing trees, and 500 or more bearing trees is given in Economic Area Table 4, Volume I. The number of farms reporting trees not of bearing age is also shown by these same size groups in this table.

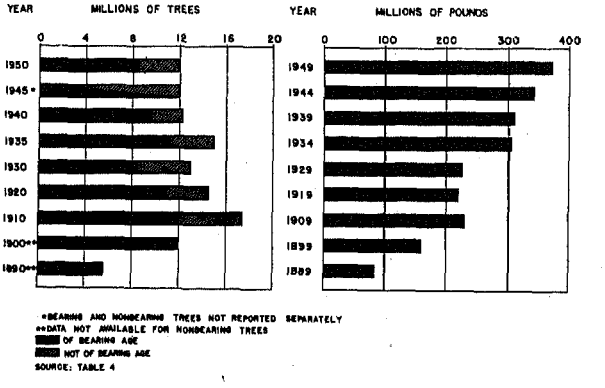
APPLES—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1889 TO 1949: FOR THE UNITED STATES

PEACHES—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1889 TO 1949: FOR THE UNITED STATES

Peaches.—Separate inquiries for peaches were on the 1950 questionnaire for all States except Minnesota, North Dakota, South Dakota, Montana, and Wyoming. Quantities harvested were enumerated in bushels in all States excepting California, where the unit was tons, and Washington and Oregon, where the unit was pounds. In California, separate data were obtained for clingstone and freestone peaches. The totals for clingstone and freestone peaches were added in order to obtain total figures for all peaches for the geographic regions and for the United States. Since the number of farms reporting any peaches was not tabulated for California, the sum of the farms reporting clingstone and the farms reporting freestone peaches is included to approximate this figure even though this procedure involves the counting of the same farm twice in those cases where farms reported both kinds of peaches.

The number of peach trees of all ages in the United States decreased from 66,470,131 in 1945 to 54,461,132 in 1950, or 18.1 percent. Decreases occurred in all geographic areas but were largest in the South Central States. The quantity harvested in the South Atlantic States in 1949 was low because of freezes at blossom time (March) and unfavorable weather conditions in the early part of the year. Freezes also damaged the crop in the East Central States.

Of the 1950 total of peach trees in the United States, 13,407,644 or 24.6 percent were classed as not of bearing age and 75.4 percent as of bearing age. In 1940, 31.5 percent were not of bearing age and 68.5 percent were of bearing age.



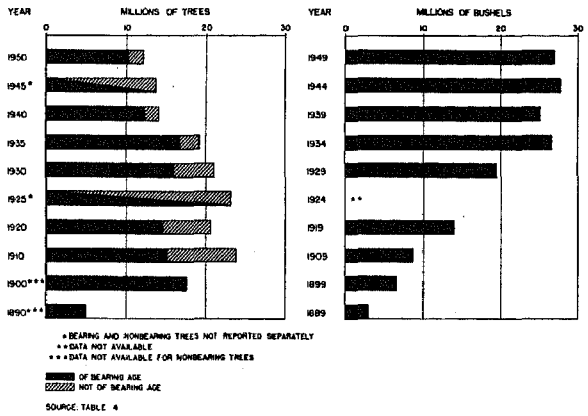
Farms reporting less than 100 peach trees of bearing age on April 1, 1950, as shown in Table 12, represented 95.4 percent of all farms with bearing trees. The same farms had 17.4 percent of the bearing trees and 6.1 percent of the quantity harvested in 1949. Farms with 1,000 or more bearing peach trees had 60.5 percent of the bearing trees and 71.0 percent of the quantity harvested,

The number of farms reporting less than 25 bearing trees, 25 to 99 bearing trees, 100 to 499 bearing trees, and 500 or more bearing trees is shown in Economic Area Table 4 of Volume I. The number of farms reporting trees not of bearing age is shown by these same size groups in this table.

Cherries.—An inquiry for cherries was on the questionnaires for all States except North Dakota, South Dakota, Florida, Louisiana, and Arizona. The unit of measure specified was "pounds" in all States except California where it was "tons." Separate data were obtained for sour cherries and sweet cherries in ten States, namely, New York, Pennsylvania, Ohio, Michigan, Montana, Idaho, Wyoming, Utah, Washington, and Oregon. The totals of sour and sweet cherries for these States do not approximate the total quantity harvested for sour and sweet cherries in the United States, as all the cherries in the other 38 States could be classified as sour or sweet cherries. Data for sour and sweet cherries were not obtained in 1945. For 1940, data on sweet and sour cherries are available for most States. Cherries grown in California, although not classified as sweet or sour cherries in either 1950 or 1940, are mainly sweet cherries.

The total number of trees of all ages was 11,914,607 or within 3 percent of the totals for 1945 and 1940.

CHERRIES—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1889 TO 1949: FOR THE UNITED STATES

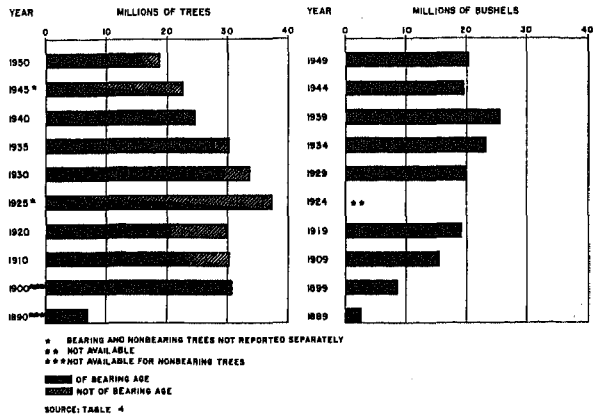


Pears.—A separate inquiry for pears was not provided on the questionnaires for North Dakota, South Dakota, Montana, and Wyoming. Reports for pears for these States were obtained in the "catch-all" question for tree fruits. Separate inquiries on Bartlett pears and pears other than Bartlett were carried on the question-

naires for Washington, Oregon, and California. The unit of measure was specified as "tons" for these three States. For all other States, the quantity harvested was obtained in bushels. Totals for farms reporting any pears for Washington, Oregon, and California were obtained by a totaling of the farms reporting Bartlett pears and the farms reporting pears other than Bartlett. This procedure results in some overstatement of the number of farms reporting any pears as the farm having both kinds of pears has been counted twice.

Totals for Bartlett pears and for pears other than Bartlett are as follows for the three States for which the data are available:

State	Bartlett pears				
	Farms reporting	Trees of all ages	Trees not of bearing age	Trees of bearing age	Quantity harvested 1949 (tons)
Total	**52,864**	**5,636,871**	**735,914**	**4,900,957**	**414,527**
Washington	20,888	1,252,133	225,982	1,026,151	83,439
Oregon	19,467	708,193	144,206	563,987	51,186
California	12,509	3,676,545	365,726	3,310,819	279,902
	Pears other than Bartlett				
Total	**23,309**	**1,741,583**	**202,366**	**1,539,217**	**151,399**
Washington	9,630	380,751	77,278	303,473	35,450
Oregon	8,298	708,933	64,698	644,235	70,540
California	5,381	651,899	60,390	591,509	45,409



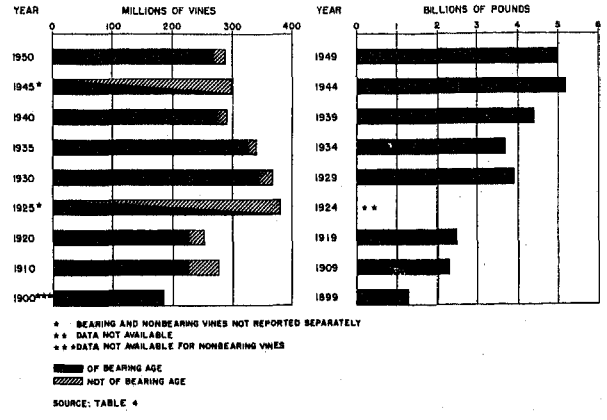
PEARS—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1889 TO 1949: FOR THE UNITED STATES

Plums and prunes.—Delaware was the only State for which a separate inquiry on plums and prunes was not on the questionnaire. In California, information was obtained for plums and for prunes separately. The quantity of prunes harvested in California was obtained in tons on a dry-weight basis. This was converted to a fresh-weight basis at the rate of 1 pound dry = 2½ pounds fresh. (See Table 2.) The quantity of plums harvested was also obtained in tons but on a fresh-weight basis. The unit of measure used for Washington and Oregon was also tons. For all other States, the unit was bushels. All data have been converted to bushels (fresh basis) for presentation in the tables. Separate figures for plums and for prunes are published in Volume I, Part 33, for California, and are not shown in this chapter. For California, the farms reporting plums and the farms reporting prunes were added to obtain the farms reporting any plums or prunes. This procedure results in an overstatement of the number of farms reporting as some farms produce both plums and prunes.

A decrease of 3,844,381 trees of all ages, or 16.9 percent, has occurred since 1945. The largest decrease has occurred in California. In comparing 1950 with 1940 data for California on tree numbers, the number of plum trees has actually increased by approximately 290,000 during this period, while the number of prune trees has decreased approximately 2,649,000.

PLUMS AND PRUNES—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1889 TO 1949: FOR THE UNITED STATES

Grapes.—The inquiry on grapes appeared on the questionnaire for all States. The questionnaire for California secured separate data for table grapes, raisin grapes, and wine or juice grapes. The quantity harvested was obtained in pounds for all States, except California, where "tons" was the unit specified. Provision was made on the questionnaire for California for reporting raisin grapes either in terms of fresh weight or dried weight. Reports of dry-weight raisins were converted to fresh-weight grapes at the rate of 1 pound dry=4 pounds fresh.



The total number of vines of all ages was 289,465,260, or about 3 percent less than in 1945. A similar decrease occurred between 1940 and 1945.

The classification by variety groups in California was made on the basis of variety and not on the basis of use.

Totals for California grapes by variety groups were as follows:

Variety groups	Farms reporting	Acres	Vines of all ages	Vines not of bearing age	Vines of bearing age	Quantity harvested, 1949 (tons, fresh weight)
Total	**32,491**	**488,720**	**232,802,935**	**16,035,398**	**216,767,537**	**2,381,897**
Table grapes (Tokay, Emperor, etc.)	11,435	97,141	44,890,087	2,949,257	41,940,830	545,916
Raisin grapes (Thompson, Muscat, etc.)	12,165	217,194	104,782,722	5,994,233	98,788,489	1,236,282
Wine or juice grapes (Alicante, Carignane, etc.)	8,891	174,385	83,130,126	7,091,908	76,038,218	599,699

GRAPES—NUMBER OF VINES OF BEARING AGE AND NUMBER OF VINES NOT OF BEARING AGE, 1900 TO 1950, AND PRODUCTION, 1899 TO 1949: FOR THE UNITED STATES

Apricots.—The 1950 questionnaire carried a separate inquiry for apricots for 15 States. The unit of measure was specified as "bushels" in 11 of these States; "pounds" in 3 States; and "tons" in California. In 1945, inquiries were on the questionnaire for 14 States. Totals for the 1945 Census represent totals for the 14 States for which there was an inquiry on the questionnaire and therefore, totals are not available for the United States. The number of trees of all ages has declined sharply since 1940. In 1940, there were 6,368,357 trees. In 1950, there were 4,843,483 or a decrease of 23.9 percent. The number of trees in California, the leading State in apricot production, decreased even more sharply than for the United States. In 1940, there were 5,392,900 trees of all ages; in 1945, 4,737,197 trees of all ages; and in 1950, 3,664,185.

Edible nuts.—Inquiries on the four leading edible nut crops—English walnuts, almonds, filberts and hazelnuts, and pecans—were on the questionnaire for States where each crop was important. The unit of measure specified for these crops was "pounds" except for English walnuts and almonds in California where "tons" was the unit specified.

Separate data were secured for improved pecans (budded, grafted, or top-worked) and for wild or seedling pecans in a number of southern States. In Illinois, Missouri, Kansas, and Tennessee, a single inquiry called for "improved and seedling pecans," while in Virginia, Arizona, and New Mexico the inquiry was limited to "improved pecans" only. Table 27 presents the data by States for all pecans with separate data for improved pecans and for wild or seedling pecans for those States for which the data were obtained. Data for Illinois, Kansas, Missouri, Tennessee, and for other States for which the questionnaire did not have separate inquiries regarding kind of pecans, are shown under "all pecans (improved and seedling)."

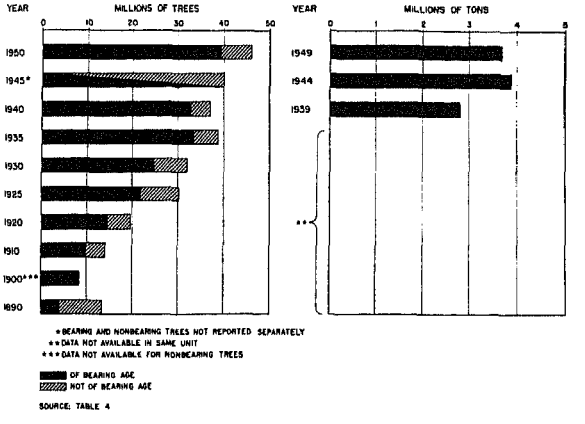
Production of the principal nut crops, other than pecans, is highly localized. Almond and English walnut production is largely centered in California. Filberts and hazelnuts are grown primarily in Oregon and Washington.

The number of almond trees of all ages has changed little since 1945. There was a large increase between 1940 and 1945. The 1950 total for English walnut trees of all ages is 3,866,474, or an increase of 198,952 trees over 1945. The number of filbert and hazelnut trees has increased 12.5 percent since 1945 to 2,418,140 trees of all ages in 1950.

Tung nuts.—This oil-producing crop is important only in the warm humid States (Mississippi, Louisiana, and Florida) along the Gulf Coast. Tung plantings increased sharply from 1945 to 1950. In 1950, there were 12,982,092 trees compared with 9,583,087 trees in 1945. The quantity of tung nuts harvested represents the weight of whole dry nuts with the husks on, not pounds of oil.

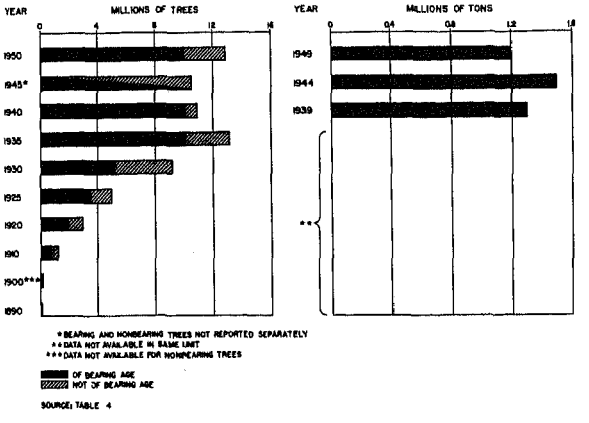
Citrus fruits.—Inquiries for citrus crops in the 1950 Census varied by States as to crops and principal varieties called for, the harvest season specified, and the units of measure. The quantity harvested in the leading citrus producing States, other than Texas, was enumerated in terms of field boxes. In Texas, the unit was tons. Totals for oranges and grapefruit for all States have been converted to tons for publication in this volume, in order to place on a uniform basis field boxes which vary considerably among States in net weight. The conversion factors used are shown in Table 2.

The harvest season specified in the different States is indicated by table footnotes and should be considered in using totals for quantities harvested. For Florida, Texas, and States other than California and Arizona, the harvest related to the crop harvested in 1949–50, from the bloom of 1949. For California and Arizona, the quantity harvested generally related to the crop of 1948–49, from the bloom of 1948. The exceptions occurred in California where reports of certain minor citrus crops, such as citrons and kumquats, were entered on the questionnaire under "other tree fruits and nuts." For these crops, the quantity harvested was from the bloom of 1949.



Considerable expansion has occurred in plantings of citrus fruits since 1940, especially for oranges in Florida, and oranges and grapefruit in Texas. Severe freezes occurred in January 1949 in Texas, Arizona, and parts of California which drastically reduced the quantity harvested of citrus crops reported in the 1950 Census. Also, some of the fruit harvested had been damaged by the freeze, resulting in lower prices to farmers.

Oranges.—Data for oranges were obtained by variety groups in the 1950 Census in separate questions, by States, as follows:



Arizona and California—Valencia, navel, and other oranges, including tangerines and mandarins; Florida—Tangerines and mandarins, Valencia, Temple, and other oranges; Texas—Valencia, and other oranges, including tangerines and mandarins; Louisiana—All oranges, including tangerines and mandarins. Oranges in other States were reported under "other tree fruits and nuts."

The number of orange trees of all ages in the United States increased nearly one-fourth between 1940 and 1950. Between 1945 and 1950, the increase was 14.5 percent. In Florida, orange tree numbers increased 26.0 percent from 1940 to 1950 and 20.7 percent from 1945 to 1950. In California, orange tree numbers increased very little (0.8 percent) since 1945 and only 10.0 percent from 1940 to 1950. For the United States, orange trees not of bearing age comprised 15.0 percent of all orange trees in 1950, compared with 12.2 percent in 1940.

ORANGES (INCLUDING SATSUMAS, TANGERINES, AND MANDARINS)—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1939 TO 1949: FOR THE UNITED STATES

GRAPEFRUIT—NUMBER OF TREES OF BEARING AGE AND NUMBER OF TREES NOT OF BEARING AGE, 1890 TO 1950; AND PRODUCTION, 1939 TO 1949: FOR THE UNITED STATES

Proportionately larger increases in the number of Valencia orange trees than in other varieties have occurred since 1940. In 1950, the percentage of all oranges represented by Valencias was 51.9 as compared with 51.3 percent for Valencia and other late oranges in 1940. In 1950, 16.3 percent of Valencia trees were not of bearing age as compared with 12.4 percent of Valencia and other late oranges in 1940.

Grapefruit.—The number of grapefruit trees of all ages in the United States increased from 10,635,582 in 1945 to 12,891,443 in 1950. As shown in Table 23, Florida and Texas not only lead in the number of grapefruit trees, with about 87 percent of the United States total, but they also account for a large part of the increases since 1945. Texas alone increased grapefruit plantings by 1,839,064 trees in this 5-year period. In 1950, more than one-fifth, or 22.6 percent of all grapefruit trees were not yet of bearing age, compared with only 7.9 percent in 1940. Many grapefruit groves in Texas and Arizona experienced severe freezes in early 1949 with resulting crop loss and tree damage.

Miscellaneous orchard fruits and nuts.—Figures for some of the minor fruit and nut crops were obtained by tabulating reports under the question for "other tree fruits and nuts." In many States, chestnuts and walnuts were reported under "other tree fruits and nuts." It may be that many of the black walnut and chestnut trees reported in the 1950 Census were scattered trees growing along field borders or in pastures and do not represent trees planted in orchards primarily for nut production.

The harvest of avocados in both California and Florida represented the quantity harvested or to be harvested from the bloom of 1949. For some crops, it was necessary to obtain estimates for considerable amounts to be harvested after the census date. The California harvest season covered the period from October 1949 through September 1950; and the Florida season covered from July 1949 through June 1950.

The olive crop called for in California was the entire crop from the 1949 bloom, including olives harvested for oil in early months of 1950.

The crops of minor citrus fruits in all States represent quantities harvested from the bloom of 1949.

Horticultural specialties.—The questionnaire for 1950 included three inquiries regarding horticultural-specialty crops. The first of these asked for acres and value of sales in 1949 of nursery products (trees, shrubs, vines, ornamentals, etc.). The second asked for acres grown in the open, square feet under glass, and value of 1949 sales of flowers and flowering plants grown for sale. The third inquiry called for acres grown in the open; square feet under glass; and value of 1949 sales of vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, and mushrooms grown for sale. Instructions to the enumerator stated that plants grown in hotbeds should be considered as grown under glass and plants grown under shade should be considered as grown in the open. Sweet corn seed was not to be included with the vegetable seeds enumerated as horticultural specialties.

For detailed data of establishments reporting the sale of $1,000 or more of horticultural-specialty crops, reference should be made to Part 1, "Horticultural Specialties," of Volume V, "Special Reports," of the 1950 Census of Agriculture.

TABLE 5.—HORTICULTURAL SPECIALTIES—FARMS REPORTING, AREA, AND VALUE OF SALES, FOR THE UNITED STATES: 1889 TO 1949

* Not available.

** [illegible]

[1] [illegible] type excluded.

[2] [illegible] y 596 farms reporting seed. Of this acreage, 96,564 acres were devoted to seed production.

[3] Value of flower and vegetable seeds not available.

[4] Trees, plants, vines, etc., in nurseries; flower and vegetable seeds; and bulbs.

[5] The total value of horticultural products was $26,211,806, of which $14,175,328 was received from the sale of cut flowers and $12,036,478 from the sale of roses, hardy plants and shrubs, and all other plants.

[6] Separate data for square feet and for acres shown below.

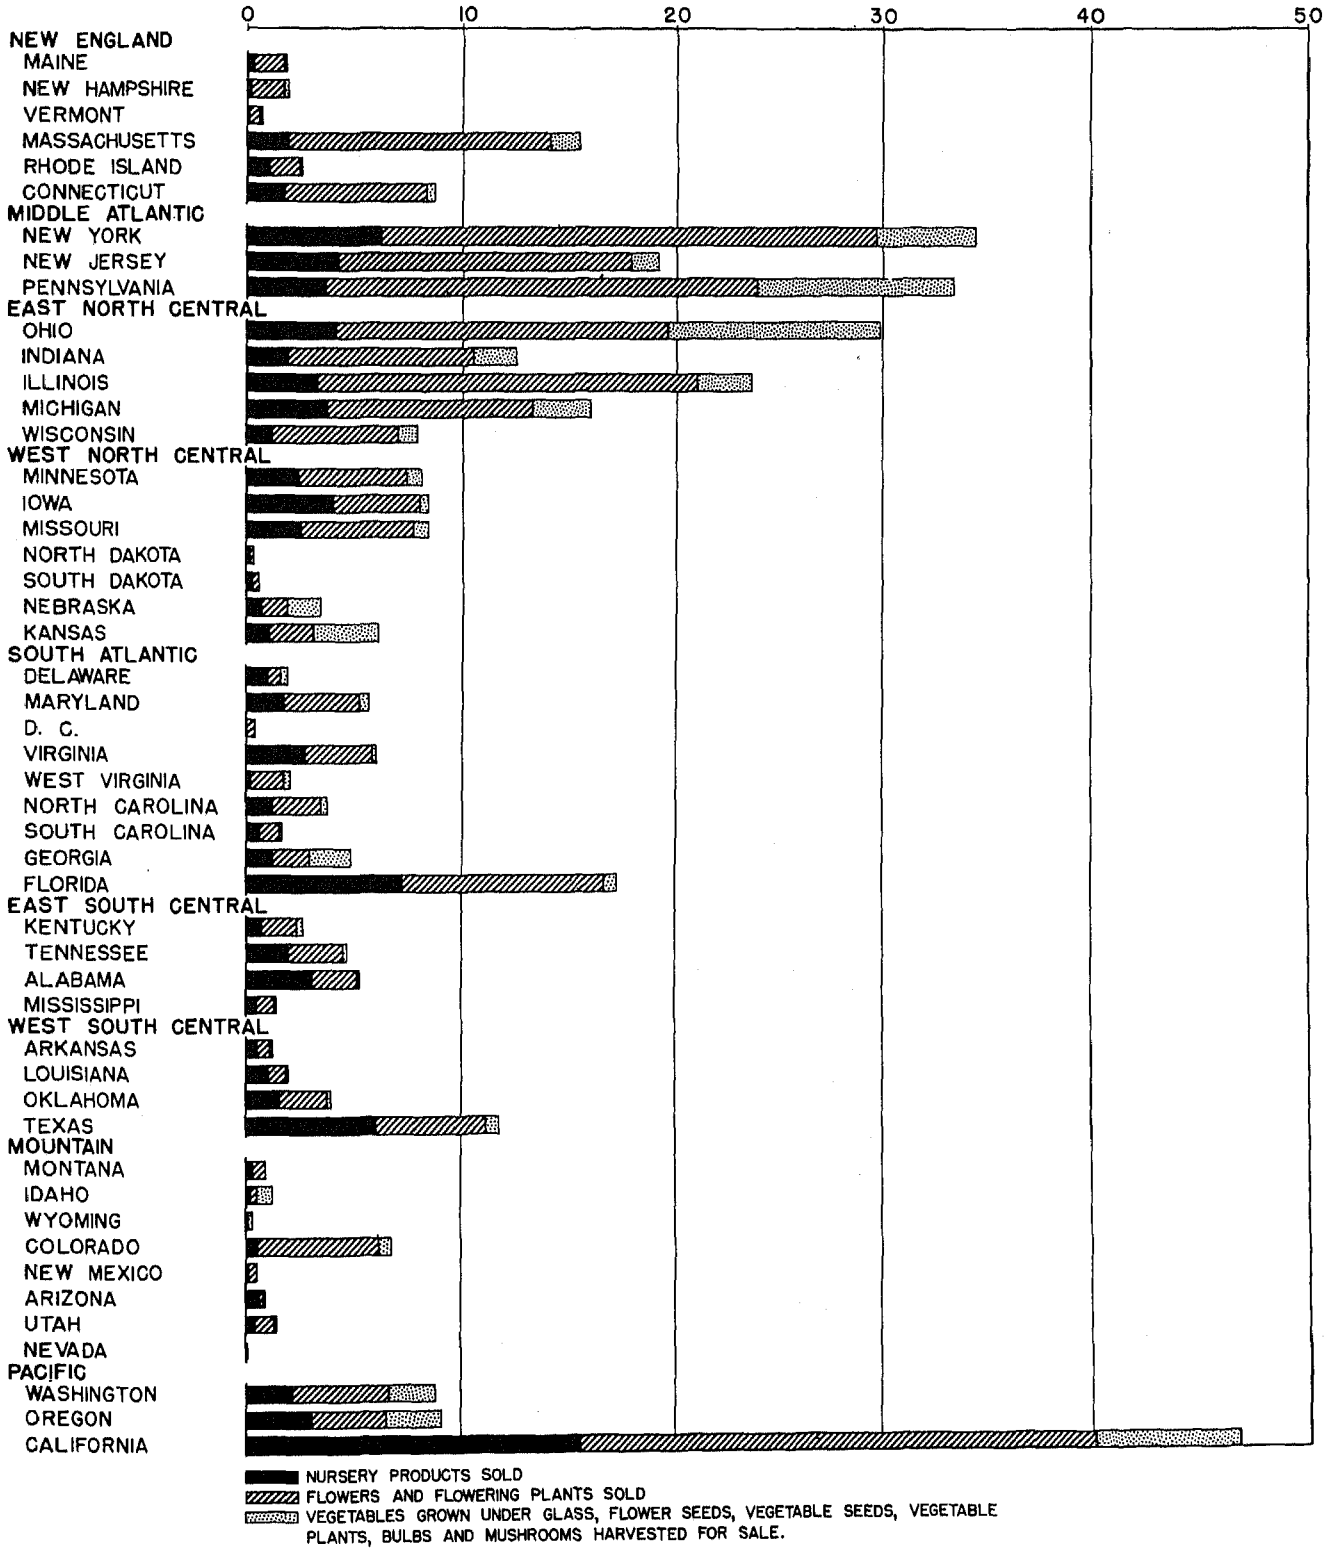
[7] Crops grown under glass (flowers, plants, and vegetables) and propagated mushrooms.

[8] Flowers, plants, and vegetables grown under glass, and flowers grown in the open.

[9] Total square feet under glass.

[10] Includes flowers and plants grown in the open. Total area of 9,307 acres including 68,030,666 square feet of glass reported by 6,070 establishments.

[11] Combined total for this group shown above.



[12] Flower and vegetable seeds, bulbs and flowers and plants grown in the open.

[13] Value of flower and vegetable seeds and mushrooms.

[14] Schedule called for vegetable and other seeds (not including grass seed, clover seed, and flaxseed).

VALUE OF NURSERY PRODUCTS, FLOWERS AND FLOWERING PLANTS, AND VEGETABLES GROWN UNDER GLASS, FLOWER SEEDS, VEGETABLE SEEDS, VEGETABLE PLANTS, BULBS AND MUSHROOMS HARVESTED FOR SALE, BY STATES: 1949

(MILLIONS OF DOLLARS)

237460 O - 53 - 47

The 1945 questionnaire contained only one inquiry regarding horticultural specialties. This inquiry asked for the value of horticultural-specialty products sold in 1944. The inquiries on the 1940 questionnaire were similar to those on the 1950 questionnaire except that the grouping of horticultural-specialty products was different on the 1940 questionnaire, i. e., the area and value of sales of all horticultural-specialty crops grown under glass (flowers, plants, and vegetables) and propagated mushrooms were combined in one question, and the area and value of sales of flower and vegetable seeds, bulbs, flowers, and plants grown in the open were similarly combined.

Forest products.—Inquiries concerning forest products were varied by States in order to specify the most common forest products of farms in each State. The inquiry on the sales of standing timber was made in all States. Also, the questions regarding the total sales of firewood, fence posts, logs, lumber, pulpwood, and piling and poles appeared on the questionnaire for all States. In 12 States, inquiries regarding the number of maple trees tapped, gallons of maple sirup, pounds of maple sugar, and dollar sales of maple sirup and maple sugar were on the questionnaire. In the 36 other States, the sale of maple products was included with sales of bark, bolts, Christmas trees, hewn ties, mine timber, maple sirup, maple sugar, and other miscellaneous forest products. Questions concerning the number of cords of firewood cut and the number of fence posts cut, and the number of board feet of sawlogs and veneer logs cut were on the questionnaires for all States, while the inquiry on the number of cords of pulpwood cut appeared on the questionnaires for 24 States; and the inquiry on the number of piling and poles cut was on the questionnaires for 28 States.

The number of piling and poles includes a considerable number of small poles such as bean poles, poles for use as tobacco sticks, etc.

Except in 1930 and 1925, data for forest products for earlier censuses have been limited to the value of all forest products sold. Comparative data for 1930 are shown for many items for which information was obtained in 1950. For 1925, comparative figures are available only on the quantity of firewood cut.

*** Not available; separate inquiry not on questionnaire for all States. See text. [1]Data for 1949 include acreage harvested for sale only; other years represent all acreage harvested. [2]Totals for States for which data are available. See text. [3]Reported in small fractions. [4]Figures for 1899 include Indian Territory. [5]Enumerated as blueberries. Separate inquiry not carried for tame and wild. Instructions provided for exclusion of wild berries.

Table 9.—LAND IN FRUIT ORCHARDS, VINEYARDS, AND PLANTED NUT TREES—FARMS REPORTING AND ACREAGE,

	Region, division, and State	Farms reporting

[1] Farms reporting trees on census date and/or quantity harvested for previous crop year. For 1950, farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested are shown in table 12. [2] For California, farms reporting represent total of farms reporting clingstone peaches and farms reporting freestone peaches. See text.

Table 12.—APPLES AND PEACHES—TREES OF BEARING AGE, TREES NOT OF BEARING AGE, AND QUANTITY HARVESTED, WITH FARMS REPORTING, CLASSIFIED BY NUMBER OF TREES OF BEARING AGE, BY DIVISIONS AND STATES: CENSUS OF 1950

Region, division, and State and number of trees of bearing age	Apples							Peaches						
	Farms reporting[1]	Trees of bearing age, 1950		Quantity harvested, 1949		Trees not of bearing age, 1950		Farms reporting[1]	Trees of bearing age, 1950		Quantity harvested, 1949		Trees not of bearing age, 1950

[1]Farms reporting trees on census date and/or quantity harvested for previous crop year.

[2]For California, separate data were obtained and tabulated in 1950 for freestone and clingstone peaches as 2 separate crops. To obtain totals for divisions, regions, and the United States, the data for freestone and clingstone peaches have been combined.

Table 13.—PEARS—FARMS REPORTING AND NUMBER OF TREES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY DIVISIONS AND STATES

[1] Farms reporting trees on census date and/or quantity harvested for previous crop year. Farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested are shown in State Table 12, Vol. I. See text. [2] For Washington, Oregon, and California, farms reporting represent total of farms reporting Bartlett pears and farms reporting other pears. See text.

Table 14.—CHERRIES—FARMS REPORTING AND NUMBER OF TREES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY DIVISIONS AND STATES

	Region, division, and State	All cherries

[1] Farms reporting trees on census date and/or quantity harvested for previous crop year. Farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested are shown in State Table 12, Vol. I. See text. [2] For California, farms reporting represent total of farms reporting plums and farms reporting prunes. See text.

Table 17.—GRAPES—FARMS REPORTING AND NUMBER OF VINES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY DIVISIONS AND STATES

[1] Farms reporting vines on census date and/or quantity harvested for previous crop year. Farms reporting for vines not of bearing age, vines of bearing age, and quantity harvested are shown in State Table 12, Vol. I. See text. [2] For California, farms reporting represent total of farms reporting table grapes, farms reporting raisin grapes, and farms reporting wine or juice grapes. See text.

237460 O - 53 - 49

Table 18.—APRICOTS—FARMS REPORTING AND NUMBER OF TREES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY DIVISIONS AND STATES

***Not available; separate inquiry not on questionnaire for all States. See text.
[1]Farms reporting trees on census date and/or quantity harvested for the following crop seasons: For 1949, the harvest relates to the 1949-50 season (bloom of 1949) in all States except Arizona and California. In those States, the harvest is from the 1948-49 season (bloom of 1948). For 1944, the harvest relates to the 1943-44 season (bloom of 1943). For 1939, the harvest relates to the 1939-40 season (bloom of 1939) for all States except Arizona and California for which the harvest is for the 1938-39 season (bloom of 1938).
[2]Totals for States for which data are available.
[3]For 1940, data are for Valencia and other late oranges.
[4]For each year the data represent oranges other than those shown by varieties or variety groups.

Table 22.—ORANGES (INCLUDING SATSUMAS, TANGERINES, AND MANDARINS)—FARMS REPORTING, 1920 TO 1940; NUMBER OF TREES, 1890 TO 1950; AND QUANTITY HARVESTED, 1889 TO 1949; BY STATES

[1]Farms reporting trees on census date and/or quantity harvested for previous crop year.
[2]Quantities harvested relate to the following crop seasons: for 1949, the 1949-50 season (bloom of 1949) in all States except Arizona and California, which cover the 1948-49 season (bloom of 1948); for 1944, the 1943-44 season (bloom of 1943); for 1939, the 1939-40 season (bloom of 1939) in all States except Arizona and California, which cover the 1938-39 season (bloom of 1938); for 1889, the calendar year ending June 1, 1890; for all other years, the calendar year preceding the enumeration.
[3]Farms reporting trees of bearing age. For oranges, figures are for farms reporting oranges other than tangerines or mandarins. In 1920 tangerine trees of bearing age were reported on 809 farms. In 1910 tangerine trees of bearing age were reported on 322 farms and mandarin trees of bearing age on 22 farms.
[4]Trees of bearing age only.
[5]Does not include production for Louisiana which was given in number of fruits and amounted to 2,208,750 oranges.

Table 23.—GRAPEFRUIT—FARMS REPORTING AND NUMBER OF TREES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY STATES

*Not available.
***Not available; separate inquiry not on questionnaire for all States. See text.
[1]Farms reporting trees on census date and/or quantity harvested for previous crop year. Farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested are shown in State Table 12, Vol. I. See text.
[2]Quantities harvested relate to the following crop seasons: for 1949, the 1949-50 season (bloom of 1949) in all States except Arizona and California which cover the 1948-49 season (bloom of 1948); for 1944, the 1943-44 season (bloom of 1943); for 1939, the 1939-40 season (bloom of 1939) in all States except Arizona and California which cover the 1938-39 season (bloom of 1938).
[3]Totals for States for which data are available.
[4]Published as less than 1 ton.

*** Not available; separate inquiry not on questionnaire for all States. See text. [1] Data are shown under "all pecans" and not separately for "improved pecans" and "wild or seedling pecans" for those States where no inquiries for pecans were on the questionnaire. In 1950, the questionnaire for Illinois, Missouri, Kansas, and Tennessee specified "improved and seedling pecans." Data for these States are also shown under "all pecans" only. All available data for the number of farms reporting any pecans in 1950, for the States included in these two groups, are published in State Table 12, Vol. I. See text. [2] Farms reporting trees on census date and/or quantity harvested for previous crop year. Farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested are shown in State Table 12, Vol. I. See text. [3] Total for States for which data are available. Division, region, and United States totals are not comparable, in many cases, since inquiries were not carried in the same States for the census years shown. [4] Value not computed.

Table 28.—ALMONDS, FILBERTS, AND WALNUTS (ENGLISH OR PERSIAN)—FARMS REPORTING AND NUMBER OF TREES, 1950, 1945, AND 1940; QUANTITY HARVESTED, 1949, 1944, AND 1939; AND VALUE, 1949; BY STATES

[1] Farms reporting trees on census date and/or quantity harvested as specified. Citrus—California, Florida, Louisiana, and Texas—1949-50 crop season (bloom of 1949); Arizona—1948-49 crop season (bloom of 1948); all other fruits and nuts—1949 crop year. Farms reporting for trees not of bearing age, trees of bearing age, and quantity harvested shown in State Table 12, Vol. I. See text.

[2] Number of plants.

[3] Less than 1 dollar.

Table 31.—HORTICULTURAL SPECIALTIES—FARMS REPORTING, AREA, AND VALUE OF SALES FOR NURSERY PRODUCTS, PLANTS, BULBS, AND MUSHROOMS PRODUCED FOR SALE,

CHAPTER IX.—VALUE OF FARM PRODUCTS

Introduction.—This chapter presents data collected in the 1950 Census of Agriculture on the total value of farm products sold, classified by source of income. The total value of products sold provides an approximation of the gross agricultural income for the various geographic areas. The value of farm products sold, by source, indicates the relative importance of the various sources of gross farm income.

Sources of data.—Data on the value of farm products sold were obtained for each farm. In the 1950 Census, inquiries were made regarding the value of farm products sold for 46 separate farm products or groups of farm products. However, not all of these value-of-sales inquiries appeared on the questionnaire for individual States, the number ranging from 31 such inquiries in Nevada to 39 in Kentucky. In most cases, data on the quantity of each of the farm products sold were obtained along with the value of sales. A tabulation was also made of the number of farms reporting the value of sales of the separate farm products or groups of farm products.

Most of the data presented in this chapter represent a summation of the sales data contained in the reports for each farm. However, the array of all farms, made for the 1950 Census according to the dollar amount of sales in 1949, was based on reports for only a sample of farms. These data appear in table 5. The estimates based on a tabulation for only a sample of farms were adjusted to make the estimated total number of farms by value groups the same as the total number of farms, as enumerated. The number of farms reporting no sales of farm products, as shown in tables 1 and 5, represents the difference between the estimated total for farms reporting sales and the total number of farms, as enumerated. A description of the sampling plan used in 1950 and data regarding the reliability of estimates based on reports for only a sample of farms are given in the Introduction to this volume.

Presentation of statistics.—The statistics are presented as totals for the United States, for three major regions, for nine geographic divisions, and for each of the States. An outline map showing the major regions, geographic divisions, and States appears in the Introduction to this volume. Comparable data for earlier censuses are shown for the purpose of providing a measure of change from census to census.

Of the 46 value-of-sales inquiries on the 1950 questionnaires, 23 related to the sales of field crops (including 1 on receipts from sale of pasture and grazing privileges), 1 to vegetables, 1 to fruits and nuts, 3 to horticultural specialties, 3 to dairy products, 3 to poultry and poultry products, 8 to livestock and livestock products other than dairy and poultry (including 1 on honey, wax, and bees), and 4 related to value of forest products sold. Data for groups of products for which there were more than one inquiry have been combined in order to show totals for related groups. These in turn have been further combined to present totals for 3 major groups of farm products sold, viz, (*a*) value of all crops sold, (*b*) value of all livestock and livestock products sold, and (*c*) value of all forest products sold. Separate data for each of the 46 sales inquiries are not shown in this chapter.

The number of farms reporting sales is shown for all combinations, when available, but is not shown for the individual sales inquiries, except for vegetables and fruits and nuts. The data for quantities sold are not presented in this chapter.

Other published data.—Data for the individual sales inquiries, for which separate dollar sales are not presented in this chapter, and data for the number of farms reporting sales which do not appear herein are shown for livestock and livestock products in Chapter VI, "Livestock and livestock products," for field-crop items in Chapter VII, "Field crops and vegetables," and for horticultural specialties and forest products in Chapter VIII, "Fruits and nuts, horticultural specialties, forest products."

Data for the value of farm products sold, by source of income, for farms classified by size of farm, appear in Chapter X of this volume; by tenure of operator in Chapter XI; by economic class of farm in Chapter XII; and by type of farm in Chapter XIII.

Data for the value of farm products sold, by source, and the number of farms classified by total value of farm products sold appear by counties in the separate State reports of Volume I, parts 1 to 33. County figures also are given in Volume I for "commercial farms" and for "other farms" showing the number reporting sales and the total value of sales of farm products. The composition of such total sales is shown only in part, being restricted to farms reporting and value of sales for livestock sold alive, for dairy products sold, and for poultry and poultry products sold.

Statistics on the value of farm products sold classified by size of farm, by tenure of farm operator, by economic class of farm, and by type of farm are also given for State economic areas in Volume I. Data also are given, by economic areas, for farms reporting and value of whole milk and of cream sold, by size of herd. Other data are given, both for counties and for economic areas, showing quantities of crop and livestock items sold.

Data for farms classified as "large farms" are given in State Table 13 of Volume I showing the value of all farm products sold, as well as the value of farm products sold, by source. (See Introduction to this volume for a description of large farms.)

DEFINITIONS AND EXPLANATIONS

Definitions having general application such as those for "a farm," "farms reporting," etc., will be found in the Introduction to this volume. The Introduction also contains an explanation of the methods used in obtaining and compiling the data for the 1950 Census.

Sales of farm products.—Data for sales of farm products represent total sales for the entire farm, regardless of who shared in the receipts. The landlord's share of crops and livestock sold or to be sold and also the crops or livestock which the landlord took from the tenant farm to his own place were considered as sales from the tenant farm. Sales of crops grown on a contract basis, livestock fed on a contract basis, or poultry raised under contract with feed dealers or others were reported as sales from

the farm. Thus, the average value of sales per farm reporting, as shown in table 1, represents gross income for the farm and not necessarily for the farm operator. The difference is particularly pronounced for States with a high proportion of land rented on a share basis.

Period represented by sales.—Sales data cover one year's operation. Crop sales are for the crop year preceding the census and represent the crops already sold as well as those yet to be sold at the time of enumeration. Some crops, such as wheat, tobacco, and cotton produced in 1949, may not have been sold by the time of the census. Livestock sales are for the calendar year preceding the census regardless of when the livestock was raised or fattened. Most livestock products are sold at the time at which they are produced. However, some products, such as wool and mohair, may be kept until the following year. The sales include the value of such livestock products produced during the year preceding the census, even though they were not sold until the following year.

The enumerator was instructed to determine the value for the items still to be sold by using current local market prices. During the office processing of the questionnaires, if sales data had not been reported, and if it was obvious that there was sufficient production for sales to have occurred, such data were supplied. Liberal quantities for farm requirements were established before supplying any sales data.

Products traded.—Farm products are sometimes traded for other products, such as trading eggs for groceries or trading hay in return for baling. The values of such products traded were to be included in the value of farm products sold. However, the enumerator was instructed not to ask specifically for information regarding farm products traded

Government payments and loans.—Government payments for specific crops, such as sugar beets, sugarcane, and potatoes, were to be included as a part of the sales of such crops. Similarly, corn and other commodities under loan were to be considered as sold at the loan prices. The value of other government payments for soil conservation, lime and fertilizer furnished, and subsidy payments, such as those for sugar beets and sugarcane, were not included. However, farmers sometimes considered subsidy payments for sugarcane as part of the payment for the crop. Such payments that may have been included during enumeration could not usually be detected during the office processing as the variation in value per unit of measure from one farm to another was too great to make possible a precise determination of the inclusion of government payments.

Costs of production.—Instructions to enumerators, which could not always be applied to respondents who filled their own questionnaires, stated that costs of production were not to be deducted in determining value of sales, nor were costs of marketing, such as cost of containers, packaging, and hauling to local markets. However, the cost of long-distance hauling, such as shipping livestock by freight, or shipping crops to distant points by water, were to be deducted. Any costs which were a part of the normal operations of the farm were not to be deducted. Products used on the place, whether by the operator and his family or by hired workers on the place, were not to be considered as sales. Also, all products purchased for immediate resale were to be deducted in order to arrive at correct sale figures for the farm. Costs of livestock and poultry purchased were not to be deducted from the value of sales. However, sales of livestock made by dealers or livestock resold within 30 days by the farm operator, if confirmed by correspondence, were excluded in the office processing of the questionnaires.

Value of sales for farms with new operators.—Special rules were established for farms with operators beginning to operate the farm in late 1949 or in 1950, in order to obtain more complete enumeration of crop and livestock sales. For reporting crop sales, the enumerators were instructed to ask the operator to estimate the sales which were made from the farm in 1949. Thus, the sales of crops were to correspond with his estimates made for acreage and production. For livestock and livestock products, the new operator was to be asked to report sales which he made on the farm he operated in 1949. If a new operator did not farm in 1949, he was to be asked to estimate the sales made from the farm he was operating at the time of the census.

Value of farm products sold for institutional farms.—Farm products for the use of inmates on institutional farms such as county poor farms, State penal institutions, and other similar types, were considered as sold. Current local market prices were to be used in determining the value of such products. The only products not considered as sold from such farms were the products consumed by livestock and the products used in the households of the manager and other hired workers.

Interfarm sales.—The value of farm products sold includes the value of some farm products sold by one farm operator to another farm operator and later resold by the second operator during the year. Feed crops may be sold by one operator to another and the feed crops fed to livestock which are later sold. Inasmuch as the total value of farm products sold was obtained by adding the value of products sold by individual farms, and as some farm products are sold by one farm operator to another, the total value of farm products for a county or State may be overstated in terms of income to agriculture.

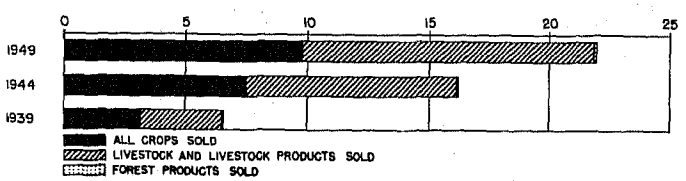
Gross farm income.—The value of farm products sold does not represent total gross farm income. The total value of farm products sold does not include the value of some farm products sold, such as the sale of baby chicks, etc., nor does it include income received by the farm operator or members of his family from nonfarm sources (off-farm work, interest, etc.); government benefit payments; or the value of farm products used by the farm operator, members of his family, or hired laborers.

Comparability of data for 1950 and prior censuses.—A much greater number of inquiries were made in the 1950 Census regarding the quantity and value of farm products sold than in prior censuses. This change in procedure probably resulted in more complete reporting of the value of farm products sold for 1950 than for prior censuses.

The sales of baby chicks were excluded from the value of poultry products sold in 1949. Receipts from the sale of baby chicks were included in the value of farm products sold in 1944 and 1939.

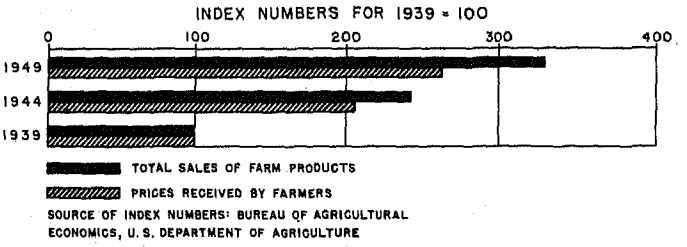
For 1950, the totals include the value of farm products sold for all farms. For 1945 and 1940, the totals do not include receipts from sales of farm products for farms unclassified as to type of farm. For the United States, there were 7,588 unclassified farms in 1945, and in 1940, there were 39,542 such farms. If the sales of farm products from these unclassified farms were added, it is estimated that the total for 1945 would probably be increased by not more than 1.0 percent.

For 1945 and 1940, unclassified farms include those for which information in regard to the production and value of products sold was incomplete or not reported.

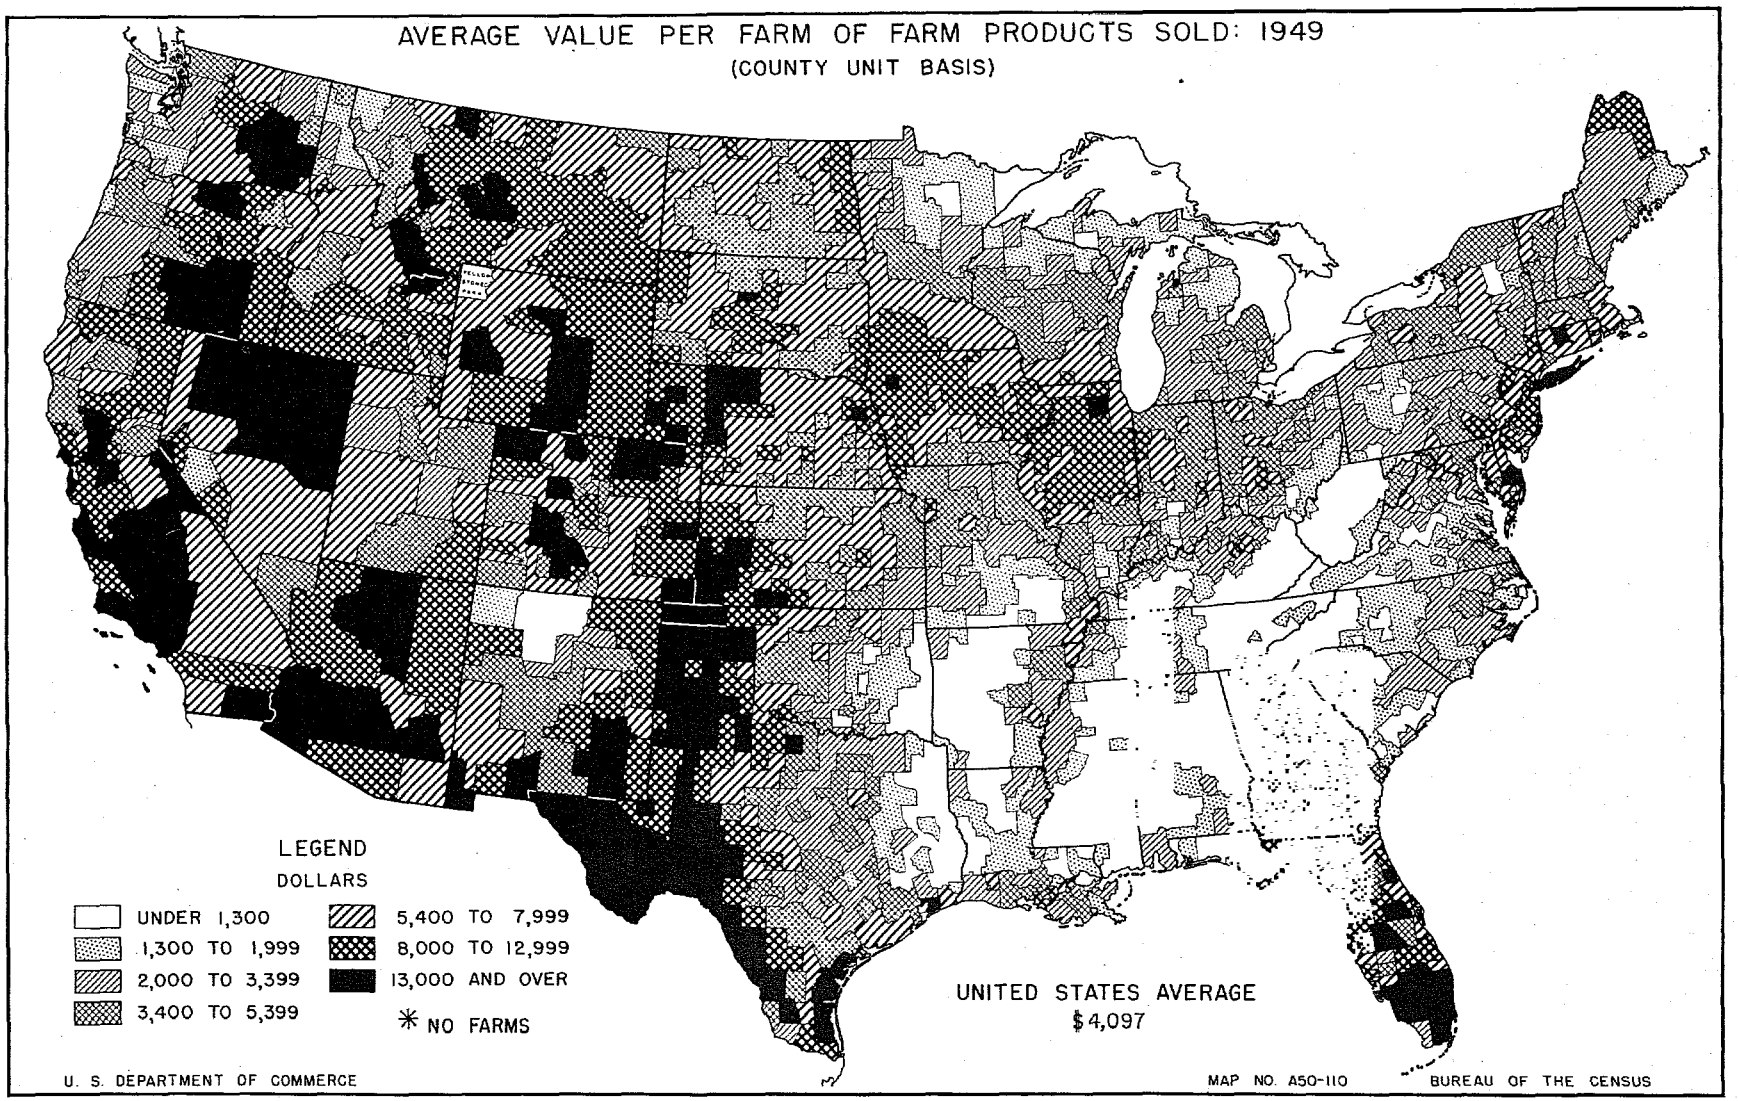


A combined value of soybeans, cowpeas, peanuts, and dry beans and peas sold is shown in table 4. The inquiry on the various State questionnaires, for the value of sales, specified only those annual legumes for which separate inquiries were carried to obtain the acreage harvested and production. For several States, there was no specific inquiry for any of these annual legume crops, either to obtain the acreage and production or the

value of sales. However, for all States, space was provided on the questionnaire for reporting, as write-in items, those annual legume crops for which there was no separate inquiry. The value of sales for the annual legume crops for which there was no specific inquiry on the questionnaire has been added to that for the value-of-sales inquiry for the annual legumes for which there was a specific inquiry on the questionnaire.



Reliability of data on the value of farm products sold.—Enumerators were instructed to report the gross value of farm products sold without making deductions of any kind. Likewise, the value of farm products produced in 1949 for sale but not sold was to be included in the value of farm products sold. These instructions were not always followed and because of the variation from farm to farm in prices, methods of sale, etc., it was not always possible to make the required corrections during the office processing. In the case of fruits, vegetables, milk, etc., deductions are often made by buyers of the farm products for packaging, handling, hauling, marketing, etc., before making payment to the farmer. In such cases, the farm operator quite often considers the amount of payment he receives as the gross value of the farm products sold. Because cottonseed is usually given in return for ginning, farm operators often fail to include the value of cottonseed with the value of the cotton sold.



A detailed analysis of the difference between the value of farm products sold as shown by the Census and gross farm income as estimated by the Bureau of Agricultural Economics and other governmental agencies has not been made. Usually the estimates of gross farm income made by other governmental agencies have been based upon reports from a sample of farms. These estimates are based upon estimates of production and percentages of the crops sold and usually the production is greater than shown by the Census. In some cases, the estimates are based upon prices received by farmer cooperatives rather than by farmers. The values reported in the census by farm operators usually represent the amounts they receive from the cooperative, and not the amount received by the cooperative.

[1] Sales figures do not include data for 7,588 farms in Census of 1945 and 39,542 farms in Census of 1940, which were unclassified as to type of farm and value of sales. Most of these farms had no sales. Their number has been included with farms reporting no sales. See text. [2] For 1950, the number of farms reporting sales and the number of farms reporting no sales were based on reports for only a sample of farms. These have been adjusted to equal the total number of farms as obtained in the complete enumeration. The value of sales are totals from the complete enumeration. See text. [3] 0.05 percent or less.

Table 2.—VALUE OF ALL CROPS SOLD, BY MAJOR GROUPS, BY DIVISIONS AND STATES: CENSUSES OF 1950, 1945, AND 1940

	Region, division, and State	Value of field crops, other than vegetables and fruits and nuts, sold[1] (dollars)			Value of vegetables sold[1] [2]								
					Farms reporting						Dollars

Table 5.—NUMBER OF FARMS, VALUE OF SALES, BY DIVISIONS AND STATES: CENSUSES OF 1950 AND 1945

[Figures for 1950 are based on reports for only a sample of farms, adjusted to equal complete enumeration. See text]

	Region, division, and State	All farms		Number of farms, by value of sales[1]									
				No sales		$1 to $249		$250 to $399		$400 to $599		$600 to $999	
		1950	1945	1950	1945[1]	1950	1945	1950	1945	1950	1945	1950	1945

[1] For 1945 there were 7,588 farms which were unclassified as to type of farm and value of sales. Most of these farms had no sales. Their number has been included with farms reporting no sales. See text.

CHAPTER X

SIZE OF FARM

CONTENTS

	Page
Introduction	769
Sources of data	769
Presentation of statistics	769
Other published data	769
Classification of farms by size	769
History of classification of farms by size	770
Size of farm as a measure of size of enterprise	771

DEFINITIONS AND EXPLANATIONS

	Page
A farm	771
Land in farms	772
Changes in size of farms	772

CHARTS

	Page
Average size of farm, for the United States: 1850-1950	769
Percent distribution of the number of farms, by size, by States: 1950	770
Percent of all land in farms represented by cropland harvested, by size of farm, for the United States: Censuses of 1950 and 1945	771
Percent of all land in farms represented by land pastured, by size of farm, for the United States: 1949 and 1944	771
Number of farms, 1880 to 1950, and land in farms, 1900 to 1950, by size of farm, for the United States	773

MAPS

	Page
Farms of less than 10 acres, number, April 1, 1950	777
Farms of 10 to 29 acres, number, April 1, 1950	777
Farms of 30 to 49 acres, number, April 1, 1950	777
Farms of 50 to 99 acres, number, April 1, 1950	777
Farms of 100 to 179 acres, number, April 1, 1950	777
Farms of 180 to 259 acres, number, April 1, 1950	777
Farms of 260 to 499 acres, number, April 1, 1950	777
Farms of 500 acres and over, number, April 1, 1950	777
Farms of less than 10 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 10-29 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 30-49 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 50-99 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 100-179 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 180-259 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 260-499 acres—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Farms of 500 acres and over—Increase and decrease in number, April 1, 1940-April 1, 1950	778
Average size of farms, April 1, 1950	778
Farms of less than 50 acres as a percent of all farms, April 1, 1950	779

TABLES FOR THE UNITED STATES

Table—	Page
1.—Farms classified by acres of improved land, for the United States: 1870 and 1860	770
2.—Number of farms under 3 acres in size, percent of all farms, minimum value of products, and index numbers of prices received by farmers; for the United States: 1880 to 1950	772
3.—Number of farms under 10 acres in size, with land in farms, for the United States: 1880 to 1950	772
4.—Number of farms by size of farm, for the United States: 1880 to 1950	774
5.—All land in farms by size of farm, for the United States: 1900 to 1950	774
6.—Average value of farms (land and buildings) per farm and per acre, by size of farm; for the United States: 1900 to 1950	776
7.—Specified classes of land in farms, according to use, by size of farm, for the United States: Censuses of 1900 to 1950	780
8.—Farms and farm characteristics by size of farm: Census of 1950	782

TABLES FOR GEOGRAPHIC REGIONS, DIVISIONS, AND STATES

Table—	Page
9.—Average acreage per farm based on all land in farms, by divisions and States: 1850 to 1950	799
10.—Number of farms, all land in farms, value of farms, and specified classes of land according to use, by size of farm; by divisions and States: Census of 1950	800
11.—Number of farms, all land in farms, and value of farms, 1950, 1945, and 1940; and specified classes of land according to use, 1949, 1944, and 1939; by size of farm: by divisions and States	820
12.—Number of farms by size of farm, by regions and States: 1880 to 1950	830
13.—Percent distribution of farms, and all land in farms, and average acreage per farm; by size of farm; by divisions and States: 1950	842
14.—Average acreage of cropland harvested per farm reporting and percent distribution of total land pastured, by size of farm; by divisions and States: Census of 1950	844
15.—Other income of family exceeding value of agricultural products sold—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: Census of 1950	846
16.—Off-farm work of 100 days or more—Operators reporting, with percent of operators reporting in each size-of-farm group; by divisions and States: Census of 1950	847
17.—Telephones—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	848
18.—Electricity—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	849
19.—Milking machines—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	850
20.—Grain combines—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	851
21.—Corn pickers—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	852
22.—Pick-up hay balers—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	853
23.—Silos—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	854
24.—Motortrucks—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	855
25.—Automobiles—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	856
26.—Tractors—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	857
27.—No tractor, horses, or mules—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	858
28.—Tractor and no horses or mules—Farms reporting, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	859
29.—Cattle and calves—Farms reporting and number, with percent distribution of the number of cattle and calves, by size of farm; by divisions and States: 1950	860
30.—All cows—Farms reporting and number, with percent distribution of the number of all cows, by size of farm; by divisions and States: 1950	861
31.—Hogs and pigs—Farms reporting and number, with percent distribution of the number of hogs and pigs, by size of farm; by divisions and States: 1950	862
32.—Chickens 4 months old and over—Farms reporting and number, with percent distribution of the number of chickens 4 months old and over, by size of farm; by divisions and States: 1950	863
33.—Corn for all purposes—Farms reporting and acres, with percent distribution of the number of acres, by size of farm; by divisions and States: Census of 1950	864
34.—Wheat threshed—Acreage, with percent distribution, by size of farm; by divisions and States: Census of 1950	865
35.—Land from which hay was cut—Farms reporting and acres, with percent distribution of the number of acres, by size of farm; by divisions and States: Census of 1950	866
36.—Expenditures for machine hire—Farms reporting and amount, with percent distribution of the amount, by size of farm; by divisions and States: Census of 1950	867
37.—Family workers—Farms reporting and number, with percentages and averages in each size-of-farm group; by divisions and States: 1950	868
38.—Hired workers—Farms reporting and number, with percent of farms reporting in each size-of-farm group; by divisions and States: 1950	870
39.—Expenditures for hired labor—Farms reporting and amount, with percent distribution of the amount, by size of farm; by divisions and States: Census of 1950	872
40.—Expenditures for feed for livestock and poultry—Farms reporting and amount, with percent distribution of the amount, by size of farm; by divisions and States: Census of 1950	873
41.—Expenditures for livestock and poultry purchased—Farms reporting and amount, with percent distribution of the amount, by size of farm; by divisions and States: Census of 1950	874
42.—Expenditures for gasoline and other petroleum fuel and oil—Farms reporting and amount, with percent distribution of the amount, by size of farm; by divisions and States: Census of 1950	875
43.—Value of all farm products sold, with average per farm reporting, by size of farm; by divisions and States: Census of 1950	876
44.—Farms under 10 acres—Selected characteristics, by divisions and States: Census of 1950	880
45.—Farms of 10 to 29 acres—Selected characteristics, by divisions and States: Census of 1950	882
46.—Farms of 30 to 49 acres—Selected characteristics, by divisions and States: Census of 1950	884
47.—Farms of 50 to 69 acres—Selected characteristics, by divisions and States: Census of 1950	886

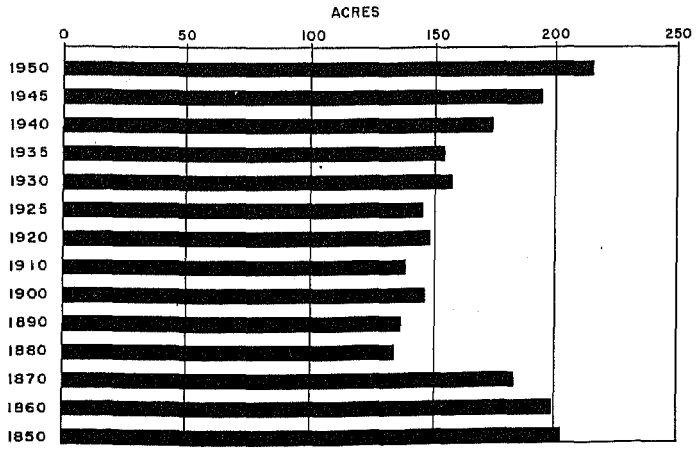
CHAPTER X.—SIZE OF FARM

Introduction.—In the 1950 Census of Agriculture, many of the data were tabulated according to four major classifications of farms, viz, size of farm, color and tenure of the farm operator, economic class of farm, and type of farm. Each of these classifications provides a detailed picture of our agricultural resources and the utilization of the resources by different producing groups.



This chapter presents statistics from the 1950 Census of Agriculture for farms classified by size as measured by the total land area in the farm. The data include such items as the number of farms, all land in farms, the value of farm land and buildings (averages only), land use, specified characteristics of the farm operator, specified farm facilities and equipment, farm labor, specified farm expenditures, the principal classes of livestock, the major crops, and sales of farm products. In the presentation, primary emphasis is placed on the number of farms, land in farms, value of farms, and land use.

Farms, as defined by the Census, vary in land area from less than one acre to many thousands of acres. Examples of some of the smaller farms, in terms of land area, are greenhouses, feed lots, broiler plants, and mushroom cellars. Typical of the extremely large operations in terms of land area are the livestock ranches in the West and Southwest.

Sources of data.—The data presented are from the 1950 Census of Agriculture with comparative data from earlier censuses. For the most part, the data from the 1950 Census of Agriculture presented in this chapter are based on the reports for only a sample of farms. Some of the items which were tabulated on a sample basis by size of farm were enumerated for all farms, while others were enumerated only on a sample basis. The totals estimated from the sample usually are not in exact agreement with the enumerated data for all farms. When data are based on the reports for only a sample of farms, the table carries a headnote to that effect.

For a description and explanation of the sampling procedures and for data showing the reliability of estimates based on reports for only a sample of farms, reference should be made to the Introduction to this volume. Also included in the Introduction is a description of the procedures used in the enumeration and in the processing of the statistics. The Appendix includes a facsimile of the questionnaire used for taking the 1950 Census of Agriculture.

AVERAGE SIZE OF FARM, FOR THE UNITED STATES: 1850 – 1950

Presentation of statistics.—The size-of-farm statistics are presented as totals for the United States, for 3 major regions, for 9 geographic divisions, and for each of the 48 States. An outline map showing the regions, geographic divisions, and States for which totals are shown, appears in the Introduction.

Data in this chapter include comparative data for earlier censuses for number of farms, land in farms, land use, and average value of land and buildings. Some of the tables present data for the 1950 Census only, while other tables include comparative data for earlier census years. Averages, percentages, and other derived data are provided as aids in using and analyzing the statistics. Although totals by size of farm for all of the specified items except farm value are shown for the United States as a whole, space requirements made it necessary to restrict the data for many items shown by States to averages and percentages. For items for which averages or percentages only are presented in this chapter, the base data may be found in the State Economic Area Tables 5 and 9 in Volume I.

The tables are supplemented by charts and maps which show graphically some of the more significant facts included in the tables.

Other published data.—Data by size of farm for counties and States on number of farms and acres in farms and data by size of farm for State economic areas on land use, farm operator characteristics, specified facilities, specified equipment, farm labor, specified farm expenditures, tenure of operator, class of farm, type of farm, and other items may be found in Volume I. (See the Introduction for availability of data for various classifications and at various geographic levels.)

Statistics for various producing groups based on other major classifications are presented in Chapter XI, "Color, Race, and Tenure of Farm Operator"; Chapter XII, "Economic Class of Farm"; and Chapter XIII, "Type of Farm." The economic class of farm is essentially a classification of farms based on size of operations as measured by the gross value of farm products sold. A count of farms by size of farm was made for each group of farms in the other three classifications. These counts are shown for the United States in table 8 of this chapter, and for States and State economic areas in Volume I. The percent distribution of farms by size of farm for each tenure is shown for States in chapter XI of this volume, for each economic class of farm in chapter XII, and for each type of farm in chapter XIII.

A table showing data for specified large farms in the United States appears in the Introduction to this volume. State Table 13 in Volume I shows such data for each State. The specified large farms were not selected solely on the basis of land area; therefore, they may fall within any of the size-of-farm groups for which statistics are presented in this chapter. The criteria used for the selection of the specified large farms appear in the Introduction to this volume.

Counts of farms classified according to the quantities of specified items, such as farms by number of acres of cropland harvested, by acres of specified crops harvested, by numbers of specified kinds of livestock, by amount of expenditures for hired labor, by numbers of hired workers, etc., are shown in the chapters covering these subjects.

Classification of farms by size.—In the 1950 Census of Agriculture, a count of farms by size based on the total land area in each farm was obtained for 13 size-of-farm groups. When

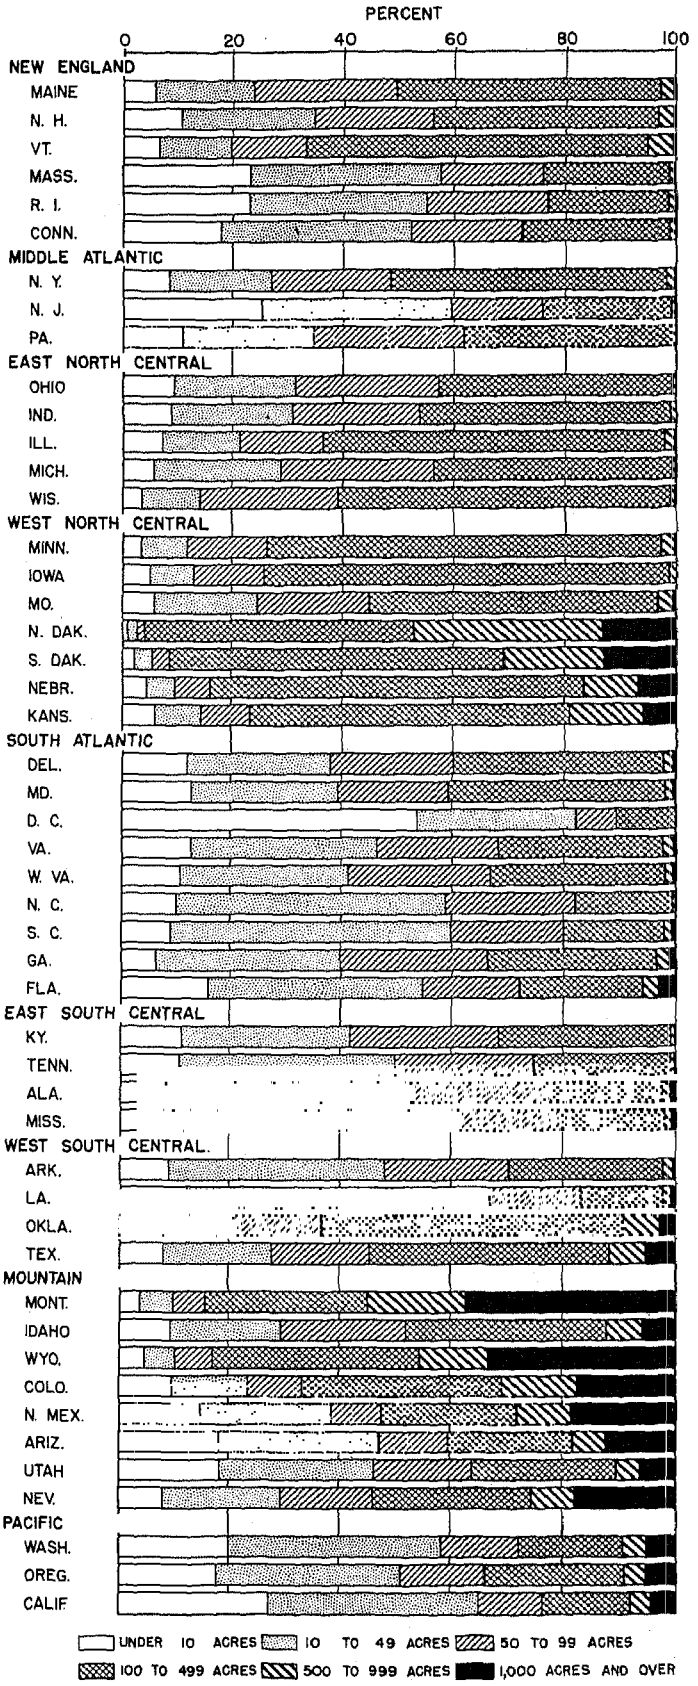
237460 O - 53 - 52

tabulating the data for land in farms, land use, and other characteristics by size of farm, totals were obtained for only 12 size-of-farm groups. The "under 3 acres" and the "3 to 9 acres" groups for which data were published in prior censuses were tabulated as a single group, "under 10 acres." However, a count of farms is available for the groups of under 3 acres and 3 to 9 acres. In establishing the size classes, consideration was given to the natural groupings which have resulted from the use of the Government land-survey system. Accordingly, the limits for the several size groups, with the exceptions of the extremely small and the extremely large farms, were selected so that each includes a multiple of, or fraction of, a quarter-section of land.

In analyzing size-of-farm statistics, the definition of a farm for purposes of the agriculture census should be taken into account. (See "Definitions and Explanations.") Census farms are considered to be operating units. They do not represent ownership tracts. If a landlord has croppers or other tenants, the land assigned each cropper or tenant is considered to be a separate farm. This is true, even though the landlord may operate the entire holding essentially as a unit in respect to supervision, equipment, rotation practices, purchase of supplies, or sale of products. In such a holding, the tenant farms often consist only of cropland and therefore tend to be smaller than other farms having a similar acreage of crops. The pastureland, woodland, and wasteland which normally would be associated with the cropland may be retained by the landlord. In such cases, the landlord's farm will have a higher proportion of pastureland, woodland, and wasteland than other farms of similar size in the area. In some instances, the expenditures, work power, and farm equipment for the tenant farms may also be reported for the farm operated by the landlord.

History of classification of farms by size.—Tabulations of data by size of farm were first made in the Census of 1860. However, for that year and also for 1870, the classification was based on the acres of "improved land" in the farm rather than on the total acres. Data for the number of farms by size (based on improved land) for these two censuses are shown for the United States in table 1.

TABLE 1.—FARMS CLASSIFIED BY ACRES OF IMPROVED LAND, FOR THE UNITED STATES: 1870 AND 1860



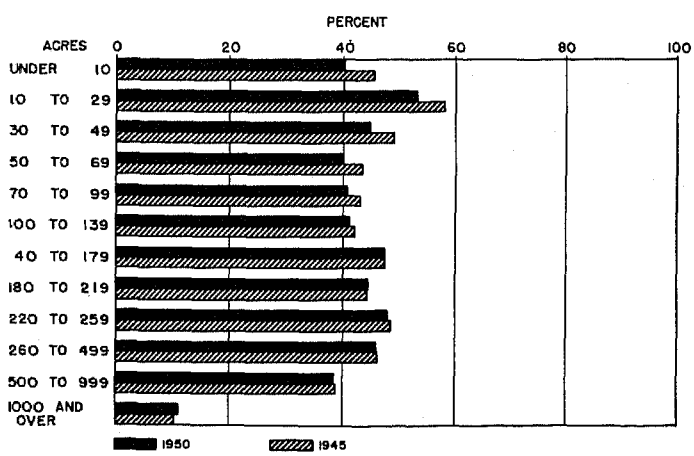
Size group (based on improved land)	Number of farms	
	1870	1860 [1]
Total	2,659,985	2,044,077
Under 3 acres	6,875	(*)
3 to 9	172,021	54,676
10 to 19	294,607	162,178
20 to 49	847,614	616,558
50 to 99	764,221	608,878
100 to 499	565,054	487,041
500 to 999	15,873	20,319
1,000 and over	3,720	5,364

*Not available.
[1] For 1860, the classification by acreage of improved land is for "Farms containing 3 acres or more." The number of farms in the various classes adds to 1,955,014 which is 89,063 less than the total number of farms.

The first classification of farms by size, based on the total farm area, was made in 1880. In that year, farms were classified by size into 8 groups. In 1890, the classification provided for only 7 groups, no breakdown having been made that year for farms under 10 acres in size. From 1900 to 1930, the classification was the same as that used in 1880 except that, beginning with 1920, farms of 1,000 acres and over were further classified by size. In 1920 and 1925, a separate classification was shown for farms of 5,000 acres and over; and in 1930, an additional group, 10,000 acres and over, was shown.

In 1935, a revised size classification was established to conform

PERCENT DISTRIBUTION OF THE NUMBER OF FARMS, BY SIZE, BY STATES: 1950



more closely with the Government land-survey system. It avoids some of the bimodal distributions of farms within class intervals which occurred under the classification used for prior censuses. The revised classification is particularly appropriate when farms are made up of fractions or multiples of the Government survey section of 640 acres. Thus, in this new classification, farms of 20, 40, 60, 120, 160 acres, etc., fall at midpoints of the class intervals. The new classification provided for 17 size groups. Some of the 17 groups were subdivided to permit exact comparisons with the size classifications used in the earlier censuses. For continuity, these subclasses were continued in 1940. However, they were not used in 1945 and 1950. For 1940 and 1945, farms of 10,000 acres and over were further classified by size into 7 subgroups, one of which related to farms of 100,000 acres and over. The subclassification of farms of 10,000 acres and over by size appears in Volume II of the 1945 Census of Agriculture reports. In the 1950 tabulations, the 17 size groups established in 1935 were reduced to 13, the size groups of 260 to 379 acres and 380 to 499 acres being combined into the group, 260 to 499 acres; the groups of 500 to 699 and 700 to 999 acres, into the group, 500 to 999 acres; and the groups of 1,000 to 4,999 acres, 5,000 to 9,999 acres, and 10,000 acres and over, being combined into the group, 1,000 acres and over.

Prior to 1900, a count only is available for farms classified by size. Beginning with 1900, the size-of-farm classification included, in addition to a count of farms, data for all land in farms, the more important classes of land according to use, and, except for 1935, the value of farms. For 1950, 1945, and 1940 data for the entire land use classification were tabulated by size of farm. In 1945, most of the major items covered in the census of agriculture were tabulated by States for a sample of farms for the 12 size groups for which data for 1950 are shown in this chapter. This special tabulation of the 1945 Census by size of farm appears in a special report of the 1945 Census of Agriculture entitled, "Farms and Farm Characteristics by Size of Farm."

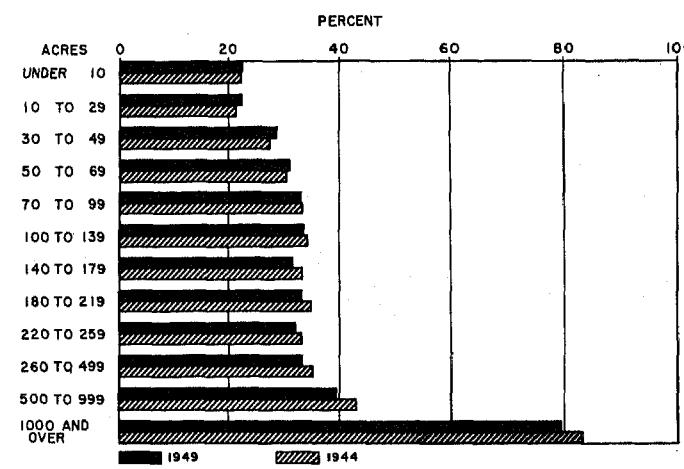
Size of farm as a measure of size of enterprise.—Because of variations in the quality of land and its suitability for crops or for grazing, farms of similar size of enterprise as measured by their total output may vary greatly in land area. One farm may consist almost entirely of cropland, another may contain a large proportion of woodland or wasteland; again, one may be fertile and another marginal in its productivity. Grouping of farms solely on the basis of the total land area may bring together, in a single size group, farms representing numerous types of agriculture and variations in intensity of production. This is especially true when data for different geographic areas are brought together, such as in State, geographic division, region, or United States totals.

PERCENT OF ALL LAND IN FARMS REPRESENTED BY CROPLAND HARVESTED, BY SIZE OF FARM, FOR THE UNITED STATES: CENSUSES OF 1950 AND 1945

However, within areas which are relatively uniform as to land resources, types of farms, and farm practices, the total output is generally highly correlated with the land area in the farm. Thus, within those States and other areas having somewhat similar agriculture the averages per farm for most inventory and production items increase with an increase in the size of farm. This correlation between averages per farm reporting and size of farm is in evidence even for areas representing considerable diversity in quality of land and in types of farming.

DEFINITIONS AND EXPLANATIONS

Definitions and explanations in this chapter are limited to those which have a particular significance in respect to the presentation of statistics by size of farm. Definitions and explanations of general application are included in the Introduction to this volume and those for specific items may be found in the chapters dealing with those subjects. For the exact phrasing of the inquiries, refer to the facsimile of the agriculture questionnaire shown in the Appendix.



A farm.—For the 1950 Census of Agriculture, places of 3 or more acres were counted as farms if the value of agricultural products in 1949, exclusive of home gardens, amounted to $150 or more. The agricultural products could have been either for home use or for sale. Places of less than 3 acres were counted as farms only if the value of sales of agricultural products in 1949 amounted to $150 or more. If a person had croppers or other tenants, the land assigned to each cropper or other tenant was considered a separate farm. Land retained by the landlord and worked by him with the help of family and/or hired labor was likewise considered a farm. Occasionally the land retained by the landlord represented pasture-land (not assigned for the exclusive use of a cropper or other tenant), woodland, or wasteland. Such land, if 3 or more acres in size, was considered a farm for census purposes even though the agricultural operations on the retained land may have been insufficient to qualify as a farm.

If a person, who was paid a salary for operating farm land for others, managed land for two or more employers, all the land managed by him was considered one farm.

For the 1945 and earlier censuses of agriculture, the definition of a farm was somewhat more inclusive. From 1925 to 1945, farms for Census purposes included places of 3 or more acres on which there were agricultural operations, and places of less than 3 acres if the agricultural products for home use and for sale were valued at $250 or more.

The definition of a farm in the 1920 and 1910 Censuses was similar to that used from 1925 to 1940 but was somewhat more

PERCENT OF ALL LAND IN FARMS REPRESENTED BY LAND PASTURED, BY SIZE OF FARM, FOR THE UNITED STATES: 1949 AND 1944

inclusive. In those years, farms of less than 3 acres with products valued at less than $250 were to be included provided they required the continuous services of at least one person.

In the definition for 1900, there were no criteria for minimum acreage or for value of production. Market and truck gardens, fruit orchards, nurseries, cranberry marshes, greenhouses, and city dairies were to be included provided the entire time of at least one person was devoted to their care. For 1890, 1880, and 1870, no tract of less than 3 acres was to be reported as a farm unless $500 worth of produce was actually sold from it during the year. For 1860, no definition was given the enumerator.

Land in farms.—The land to be included in each farm in 1950 was determined by asking the number of acres owned, the number of acres rented from others or worked on shares for others, and the acres rented to or worked on shares by others. The acres in the farm were obtained by adding the acres owned and the acres rented from or worked on shares for others, and subtracting the acres rented to or worked on shares by others. For a managed farm, the person in charge gave the total acreage managed for his employer. From the total managed acreage was subtracted any acreage which was rented to or cropped by others.

Land in farms includes considerable areas of land not actually under cultivation and some land not used for pasture or grazing. All woodland and wasteland owned by farm operators, or included in tracts rented from others, is included as land in farms unless such land was held for other than agricultural purposes, or unless the acreage of such land held by a farm operator was unusually large. If the total acreage of land owned, rented, or managed by a farm operator was 1,000 or more (5,000 or more in the Western States) and less than 10 percent of the total was used for crops, pasture, or grazing, or was rented to others, any woodland not grazed and any wasteland, in excess of the acreage used for agricultural purposes, were excluded from the farm area.

TABLE 2.—NUMBER OF FARMS UNDER 3 ACRES IN SIZE, PERCENT OF ALL FARMS, MINIMUM VALUE OF PRODUCTS, AND INDEX NUMBERS OF PRICES RECEIVED BY FARMERS; FOR THE UNITED STATES: 1880 TO 1950

[Figures for regions and States in table 12]

Year	Farms under 3 acres in size		Minimum value-of-products criterion (dollars)		Index numbers of prices received by farmers[1] (August 1909–July 1914 =100)
	Number	Percent of all farms	All farm products sold or used by farm households	Farm products sold	
1950	76,606	1.4	----------	150	256
1945	98,966	1.7	250	----------	206
1940	35,977	.6	250	----------	100

[1] From "Agricultural Statistics, 1950," table 678, United States Department of Agriculture. For 1910, the index number is for that calendar year. For all other years, each index number is for the calendar year preceding the census date.

[2] "Or requiring for its agricultural operations the continuous services of at least one person."

[3] No minimum limit used in the 1900 Census on value of products. "All agricultural establishments with less than three acres were reported as farms whenever their operation or management required the constant services of at least one individual."

Except for range open to community use and grazing lands used under government permit, all grazing land was to be included as land in farms. Land used rent free was to be included with land rented from others.

Changes in size of farms.—Changes in the definition of a farm have affected the number of farms included in the various censuses, particularly the number under 3 acres. The effect of changes in definition is discussed in the Introduction to this volume. Table 2 presents the number of farms under 3 acres for each census beginning with 1880, the minimal value criteria relating to such farms as given in the Census definitions, and the index numbers of prices received by farmers.

The change in 1950 in the procedures for determining the acreage in a farm resulted in a better enumeration of land controlled by farm operators.

Many of the changes in size of farm, other than those due to definitions and procedures, occurred because of places which are in and out of agriculture. At one census, such places may have sufficient agricultural production to be counted as farms and at another census, they may have no agricultural production or too limited production to be included as farms. For the most part, such places are small and represent rural homes. The increase in the number of persons living in rural areas who are employed in cities or are dependent on nonfarm incomes has been responsible for much of the general upward trend in the proportion of all farms represented by farms under 10 acres. Also, the variations in the agriculture on such places have been responsible for much of the fluctuation in the numbers included at each census. Table 3 shows the number of farms under 10 acres which have been included in each census beginning with 1880. Farms of under 10 acres increased from 139,241 in 1880 to a high of 594,561 in 1945, slightly more than a three-fold increase. From census to census, farms under 10 acres have shown fluctuations ranging from increases of 77.9 percent in the decade 1890 to 1900 and 59.2 percent in the 5-year period 1930 to 1935 to decreases of 18.4 percent from 1945 to 1950 and 13.8 percent from 1910 to 1920.

Much of the trend toward larger farms, as shown by the distribution of farms by size for the various censuses, has been due to the consolidation of farms into larger operating units made possible by increased mechanization.

*Not available. [1]For 1944 and 1939, land reported as cropland on which all crops completely failed, plus cropland idle or fallow. [2]Nominally includes all land regularly yards, etc. [3]Cropland harvested, cropland used only for pasture, and cropland not harvested and not pastured. [4]Cropland harvested, cropland used only for pasture plowed

SIZE OF FARM; FOR THE UNITED STATES: CENSUSES OF 1900 TO 1950

classification. All 1950 data are based on reports for only a sample of farms. See text. Figures for regions and States in tables 10 and 11]

Table 8.—FARMS AND FARM CHARACTERISTICS

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Size of farm			
			Under 10 acres	10-29 acres	30-49 acres	50-69 acres
	FARM LABOR WEEK PRECEDING ENUMERATION—Continued					
	Proportion of farms reporting—					
1	Family and/or hired workers....percent..	84.5	67.8	77.7	82.0	83.9
2	Family workers, including operator....percent..	83.1	66.9	76.8	81.1	82.8
3	Operators working 1 hour or more....percent..	78.9	62.0	72.2	76.1	78.0
4	Unpaid members of operator's family working 15 hours or more....percent..	34.4	20.3	25.1	31.4	33.6
5	Hired workers....percent..	13.1	4.8	5.0	6.0	8.1
6	Regular workers....percent..	9.4	2.5	2.4	3.1	4.5
7	Seasonal workers....percent..	5.0	2.7	3.0	3.4	4.2
8	Regular hired workers and no seasonal workers....percent..	8.0	2.1	2.0	2.7	3.9
	Average per farm reporting—					
9	Family and hired workers....persons..	1.9	1.4	1.5	1.6	1.7
10	Family workers, including operator....persons..	1.6	1.3	1.4	1.5	1.5
11	Hired workers....persons..	2.2	1.9	1.9	1.8	1.8
12	Regular workers....persons..	2.0	2.0	1.8	1.6	1.5
13	Seasonal workers....persons..	2.0	1.6	1.7	1.7	1.7
	Proportion of farms reporting hired workers represented by those reporting—					
14	Regular workers....percent..	71.7	52.2	47.8	51.0	56.4
15	Seasonal workers....percent..	38.6	57.1	59.5	55.9	52.1
	Kind of workers:					
16	Both family and hired workers....farms reporting..	625,790	18,527	35,192	32,150	29,596
17	Family workers only....farms reporting..	3,844,813	302,823	619,776	473,619	323,288
18	Operators only....farms reporting..	2,224,587	212,553	417,879	288,684	190,966
19	Unpaid members of operator's family only....farms reporting..	203,293	22,477	37,356	29,817	19,206
20	Hired workers only....farms reporting..	77,344	4,457	7,845	5,472	4,778
	Proportion of farms reporting—					
21	Both family and hired workers....percent..	11.6	3.9	4.1	5.2	6.9
22	Family workers only....percent..	71.5	63.0	72.7	76.0	75.9
23	Operators only....percent..	41.4	44.2	49.0	46.3	44.8
24	Unpaid members of operator's family only....percent..	3.8	4.7	4.4	4.8	4.5
25	Hired workers only....percent..	1.4	0.9	0.9	0.9	1.1
	SPECIFIED FARM EXPENDITURES IN 1949					
26	**Specified farm expenditures**....farms reporting..	4,782,184	369,560	686,848	534,697	376,813

Table 8.—FARMS AND FARM CHARACTERISTICS

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Size of farm			
			Under 10 acres	10-29 acres	30-49 acres	50-69 acres
	FARMS BY TENURE					
	Classification of commercial farms by tenure of operator:					
1	Full owners.....number..	1,812,999	86,683	150,399	177,428	154,988
2	Part owners.....number..	729,275	4,735	28,851	36,251	37,491
3	Managers.....number..	19,705	428	727	632	464
4	All tenants.....number..	1,144,433	44,989	234,907	133,131	73,715
5	Cash tenants.....number..	133,277	4,478	13,773	14,398	9,945
6	Share-cash tenants.....number..	190,046	396	4,142	4,325	3,156
7	Share tenants.....number..	459,335	7,165	63,588	53,462	33,156
8	Crop-share tenants.....number..	347,260	6,850	62,377	51,771	30,791
9	Livestock-share tenants.....number..	112,075	315	1,211	1,691	2,365
10	Croppers[2].....number..	278,466	28,135	141,686	51,085	20,700
11	Other and unspecified tenants.....number..	83,309	4,815	11,718	9,861	6,758
12	Farms not classified by tenure within each size group.....number..	1,672,838	343,538	438,072	276,140	159,390
	Percent distribution of commercial farms by tenure:					
13	All farms.....percent..	100.0	100.0	100.0	100.0	100.0
14	Full owners.....percent..	33.7	18.0	17.6	28.5	36.4
15	Part owners.....percent..	13.6	1.0	3.4	5.8	8.8
16	Managers.....percent..	0.4	0.1	0.1	0.1	0.1

Table 8.—FARMS AND FARM CHARACTERISTICS

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Size of farm			
			Under 10 acres	10-29 acres	30-49 acres	50-69 acres
	VALUE OF FARM PRODUCTS SOLD					
1	All products sold.....dollars..	22,279,562,599	594,062,179	1,143,659,624	998,213,162	826,912,642
2	All crops sold.....dollars..	9,819,185,008	234,465,432	688,519,230	565,184,624	433,059,636
3	Field crops, other than vegetables and fruits and nuts, sold.....dollars..	8,032,079,094	58,506,456	448,665,661	411,762,016	320,549,863
4	Vegetables sold.....dollars..	620,397,332	11,415,139	48,585,005	42,383,156	34,561,244
5	Fruits and nuts sold.....dollars..	792,814,981	29,182,043	113,127,438	86,117,841	59,585,399
6	Horticultural specialties sold.....dollars..	373,893,601	135,361,794	78,141,126	24,921,611	18,363,130
7	All livestock and livestock products sold.....dollars..	12,325,622,579	359,034,427	452,627,244	428,047,291	387,711,023
8	Dairy products sold.....dollars..	3,139,529,000	35,708,936	84,464,924	110,785,107	119,785,996
9	Poultry and poultry products sold.....dollars..	1,888,201,872	250,699,172	235,381,095	153,081,272	118,667,271
10	Livestock and livestock products, other than dairy and poultry, sold..dollars..	7,297,891,707	72,626,319	132,781,225	164,180,912	149,257,756
11	Forest products sold.....dollars..	134,755,012	562,320	2,513,150	4,981,247	6,141,983
12	Farms reporting sales of any farm products.....number..	5,018,221	382,241	746,733	569,181	397,109
13	Average sales per farm reporting.....dollars..	4,440	1,554	1,532	1,754	2,082
14	Proportion of farms reporting.....percent..	93.3	79.6	87.5	91.3	93.2
	Percent distribution:					
15	All products sold.....percent..	100.0	2.7	5.1	4.5	3.7
16	All crops sold.....percent..	100.0	2.4	7.0	5.8	4.4
17	Field crops, other than vegetables and fruits and nuts, sold.....percent..	100.0	0.7	5.6	5.1	4.0
18	Vegetables sold.....percent..	100.0	1.8	7.8	6.8	5.6
19	Fruits and nuts sold.....percent..	100.0	3.7	14.3	10.9	7.5
20	Horticultural specialties sold.....percent..	100.0	36.2	20.9	6.7	4.9
21	All livestock and livestock products sold.....percent..	100.0	2.9	3.7	3.5	3.1
22	Dairy products sold.....percent..	100.0	1.1	2.7	3.5	3.8
23	Poultry and poultry products sold.....percent..	100.0	13.3	12.5	8.1	6.3
24	Livestock and livestock products, other than dairy and poultry, sold.....percent..	100.0	1.0	1.8	2.2	2.0
25	Forest products sold.....percent..	100.0	0.4	1.9	3.7	4.6
	Percent distribution within each size group:					
26	All products sold.....percent..	100.0	100.0	100.0	100.0	100.0
27	All crops sold.....percent..	44.1	39.5	60.2	56.6	52.4
28	Field crops, other than vegetables and fruits and nuts, sold.....percent..	36.1	9.8	39.2	41.2	38.8
29	Vegetables sold.....percent..	2.8	1.9	4.2	4.2	4.2
30	Fruits and nuts sold.....percent..	3.6	4.9	9.9	8.6	7.2
31	Horticultural specialties sold.....percent..	1.7	22.8	6.8	2.5	2.2
32	All livestock and livestock products sold.....percent..	55.3	60.4	39.6	42.9	46.9
33	Dairy products sold.....percent..	14.1	6.0	7.4	11.1	14.5
34	Poultry and poultry products sold.....percent..	8.5	42.2	20.6	15.3	14.4
35	Livestock and livestock products, other than dairy and poultry, sold.....percent..	32.8	12.2	11.6	16.4	18.1
36	Forest products sold.....percent..	0.6	0.1	0.2	0.5	0.7
	SPECIFIED LIVESTOCK					
	Livestock on farms, April 1, 1950:

[1] 0.05 percent or less.
[2] See text.
[3] Totals for States for which data were tabulated by size of farm.
[4] Farms reporting are for the most commonly grown kind of wheat in each of the States where there were inquiries for 2 or more kinds of wheat.
[5] Includes only farms reporting burley tobacco for Kentucky and Tennessee.

BY SIZE OF FARM: CENSUS OF 1950—Continued

Data for States in tables 13 to 55 and in Volume I]

[1] North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively. The 1870 figures are for Dakota Territory. [2] In 1860 and 1850, Virginia included the area now known as West Virginia.

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, waste land, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, waste land, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland, 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 10.—NUMBER OF FARMS, ALL LAND IN FARMS, VALUE OF FARMS, AND SPECIFIED CLASSES OF LAND

[Data are based on reports for

	Region, division, State, and size group	Number of farms, 1950	All land in farms, 1950 (acres)	Cropland harvested, 1949			Cropland used only for pasture, 1949 (acres)	Cropland not harvested and not pastured, 1949 (acres)			Woodland pastured, 1949 (acres)	Woodland not pastured, 1949 (acres)	Other pasture (not cropland and not woodland), 1949 (acres)	Other land (house lots, roads, wasteland, etc.), 1949 (acres)
				Farms reporting	Acres	Percent of all land in farms		Total	Cultivated summer fallow[1]	Other

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text.]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

Table 12.—NUMBER OF FARMS BY SIZE OF FARM, BY REGIONS AND STATES: 1880 TO 1950—Continued

[Data in reverse italics indicate size-of-farm groups shown for earlier censuses which do not represent subdivisions or consolidations of the 1950 classification. Data for 1950 are based on reports for only a sample of farms. See text]

*Not available.

[1]0.05 percent or less.

[2]North Dakota and South Dakota admitted as States in 1889. Figures for 1880 obtained by consolidating data for the counties which then occupied the areas now known as North Dakota and South Dakota, respectively.

[3]Figures for 1900 are for Oklahoma Territory and Indian Territory; those for 1890 are for Oklahoma Territory alone, no data being available for Indian Territory; no data available for 1880.

Table 13.—PERCENT DISTRIBUTION OF FARMS AND ALL LAND IN FARMS AND AVERAGE

[1] Data are based on reports for only a sample of farms.

	Region, division, and State	Percent distribution of farms in each size-of-farm group												Percent distribution of all land in farms, by size of farm

Table 20.—GRAIN COMBINES—FARMS REPORTING AND NUMBER, WITH PERCENT OF FARMS REPORTING IN EACH SIZE-OF-FARM GROUP; BY DIVISIONS AND STATES: 1950

[Data are based on reports for only a sample of farms. See text. Base data in Volume I]

	Region, division, and State	Grain combines		Percent of farms in each size-of-farm group reporting grain combines												
		Farms reporting	Number	Total, all farms	Under 10 acres	10-29 acres	30-49 acres	50-69 acres	70-99 acres	100-139 acres	140-179 acres	180-219 acres	220-259 acres	260-499 acres	500-999 acres	1,000 acres and over

Table 38.—HIRED WORKERS—FARMS REPORTING AND NUMBER, WITH PERCENT OF FARMS

[Data are based on reports for only a sample of farms.

	Region, division, and State	Hired workers						Percent of farms in each size-of-farm group reporting any hired workers						
		Total (regular and seasonal)		Regular		Seasonal		All farms	Under 10 acres	10-29 acres	30-49 acres	50-69 acres	70-99 acres	100-139 acres
		Farms reporting	Number	Farms reporting	Number	Farms reporting	Number

Table 45.—FARMS OF 10 TO 29 ACRES—SELECTED CHARACTERISTICS,

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 10 to 29 acres	Average for farms 10 to 29 acres				Percent of land in farms 10 to 29 acres represented by—		Percent of farms 10 to 29 acres reporting—										
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Land pastured	Land owned	Land rented from others	Land rented to others	Cropland harvested	Cattle and calves	Milk cows	Hogs and pigs	Chickens 4 mo. old and over	No tractor, horses, or mules	Tractor with or without horses and/or mules	Electricity	Electric washing machine
				Per farm	Per acre

Table 47.–FARMS OF 50 TO 69 ACRES–SELECTED CHARACTERISTICS,

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 50 to 69 acres	Average for farms 50 to 69 acres			Percent of land in farms 50 to 69 acres represented by—			Percent of farms 50 to 69 acres reporting—				Percent of total value of farm products sold for farms 50 to 69 acres represented by expenditures for—					
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Cropland not harvested and not pastured	Land pastured	Tractor		Electricity	Electric washing machine	Machine hire	Hired labor	Feed	Purchase of livestock and poultry	Gasoline and other petroleum fuel and oil	Farm machinery repairs
				Per farm	Per acre					With horses and/or mules	Without horses or mules

Table 49.—FARMS OF 100 TO 139 ACRES—SELECTED CHARACTERISTICS,

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 100 to 139 acres	Average for farms 100 to 139 acres				Percent of land in farms 100 to 139 acres represented by—			Percent of farms 100 to 139 acres reporting—				Percent of total value of farm products sold for farms 100 to 139 acres, represented by expenditures for—					
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Cropland not harvested and not pastured	Land pastured	Tractor		Electricity	Electric washing machine	Machine hire	Hired labor	Feed	Purchase of livestock and poultry	Gasoline and other petroleum fuel and oil	Farm machinery repairs
				Per farm	Per acre					With horses and/or mules	Without horses or mules

Table 50.—FARMS OF 140 TO 179 ACRES—SELECTED CHARACTERISTICS,

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 140 to 179 acres	Average for farms 140 to 179 acres				Percent of land in farms 140 to 179 acres represented by—			Percent of farms 140 to 179 acres reporting—				Percent of total value of farm products sold for farms 140 to 179 acres represented by expenditures for—					
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Cropland not harvested and not pastured	Land pastured	Tractor		Electricity	Electric washing machine	Machine hire	Hired labor	Feed	Purchase of livestock and poultry	Gasoline and other petroleum fuel and oil	Farm machinery repairs
				Per farm	Per acre					With horses and/or mules	Without horses or mules

Table 52.—FARMS OF 220 TO 259 ACRES—SELECTED CHARACTERISTICS.

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 220 to 259 acres	Average for farms 220 to 259 acres				Percent of land in farms 220 to 259 acres represented by—			Percent of farms 220 to 259 acres reporting—				Percent of total value of farms products sold for farms 220 to 259 acres represented by expenditures for—					
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Cropland not harvested and not pastured	Land pastured	Tractor		Electricity	Electric washing machine	Machine hire	Hired labor	Feed	Purchase of livestock and poultry	Gasoline and other petroleum fuel and oil	Farm machinery repairs
				Per farm	Per acre					With horses and/or mules	Without horses or mules

Table 54.—FARMS OF 500 TO 999 ACRES—SELECTED CHARACTERISTICS.

[Data are based on reports for only a sample of farms.

	Region, division, and State	Number of farms 500 to 999 acres	Average for farms 500 to 999 acres			Percent of land in farms 500 to 999 acres represented by—			Percent of farms 500 to 999 acres reporting—				Percent of total value of farm products sold for farms 500 to 999 acres represented by expenditures for—					
			Total land per farm (acres)	Value of land and buildings (dollars)		Farm products sold per farm (dollars)	Cropland harvested	Cropland not harvested and not pastured	Land pastured	Tractor		Electricity	Electric washing machine	Machine hire	Hired labor	Feed	Purchase of livestock and poultry	Gasoline and other petroleum fuel and oil	Farm machinery repairs
				Per farm	Per acre					With horses and/or mules	Without horses or mules

CHAPTER XI

COLOR, RACE, AND TENURE OF FARM OPERATOR

CONTENTS

Introduction 909
Sources of data 909
Presentation of the statistics 909
Other published data 909
History of Census classifications by color and tenure of farm operator 911

DEFINITIONS AND EXPLANATIONS

A farm 912
Farm operator 912
Land owned, rented, and managed 912
Land owned 912
Land rented from others 912
Land managed for others 912
Land rented to others 912

DEFINITIONS AND EXPLANATIONS—Continued

Tenure of operator 913
Comparability of the 1950 tenure data with those for earlier censuses 914
Full owners with grazing permits 916
Tenants related to landlord 916
Farm operators with landlord living on farm 916
Color and race of farm operator 917
Color of farm operator 917
Race of farm operator 917
Changes in the number of farms by tenure 917
Change in rented land 920

CHARTS

Number of farm operators, by tenure, and percent of tenancy, for the United States and regions: 1880-1950 910
Farm acreage, by tenure, for the United States and regions: 1900-1950 911
Number of farms, by tenure of operator and size of farm, for commercial farms only, for the United States: 1950 911
Percent distribution of farm operators, by tenure, by States: 1950 and 1945 913
Percent distribution of farm operators, by color, by States: 1950 and 1945 916
White farm operators—Percent distribution, by tenure, for the United States: 1900-1950 917
Nonwhite farm operators—Percent distribution, by tenure, for the United States: 1900-1950 917

MAPS

Farms operated by full owners, number, April 1, 1950 918
Farms operated by part owners, number, April 1, 1950 918
Farms operated by all tenants, number, April 1, 1950 918
Farms operated by cash tenants, number, April 1, 1950 918
Farms operated by share-cash tenants, number, April 1, 1950 918
Farms operated by crop-share tenants, number, April 1, 1950 918
Farms operated by livestock-share tenants, number, April 1, 1950 918
Farms operated by croppers, number, April 1, 1950 918
Most frequent method of renting farms, April 1, 1950 919
Percentage of all farms operated by tenants, April 1, 1950 919
Nonwhite farm operators, number, April 1, 1950 920
Farms operated by nonwhite tenants, number, April 1, 1950 920
Percent of all farms operated by nonwhite operators, April 1, 1950 920
Farms operated by full owners—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by part owners—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by all tenants—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by croppers—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by nonwhite operators—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by nonwhite tenants—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Farms operated by nonwhite croppers—Increase and decrease in number, January 1, 1945-April 1, 1950 921
Counties in which at least half the farms were operated by tenants, April 1, 1950 928
Counties in which at least half of the land in farms was under lease to the operator, April 1, 1950 928

TABLES FOR THE UNITED STATES

Table—
1.—Number, acreage, and value of cropper farms, by color of operator, for seven southeastern Missouri counties: 1930 to 1950 914
2.—Tenure classes included in the reports for each census, with the number of farms in each class: 1880 to 1950 915
3.—Number, acreage, and value of farms, by color and tenure of operator, for the United States: Census of 1950 922
4.—Number of farms, by color and tenure of operator, for the United States: 1880 to 1950 924
5.—Number of farms, by color and tenure of operator, for the South: 1880 to 1950 924
6.—All land in farms, by color and tenure of operator, for the United States: 1900 to 1950 926
7.—All land in farms, by color and tenure of operator, for the South: 1900 to 1950 926
8.—Average value of farms (land and buildings) per farm and per acre, by tenure of operator, for the United States: 1900 to 1950 929
9.—Average value of farms (land and buildings) per farm and per acre, by color and tenure of operator, for the South: 1900 to 1950 929
10.—Specified classes of land in farms according to use, by color and tenure of operator, for the United States: Censuses of 1900 to 1950 930
11.—Commercial and other farms—Number, land in farms, cropland harvested, and farm value, by tenure of operator, for the United States: Census of 1950 932
12.—Commercial and other farms—Number, land in farms, cropland harvested, and farm value, by color and tenure of operator, for the South: Census of 1950 932
13.—Owned and rented lands, by tenure of operator, for the United States: 1925 to 1950 934
14.—Land rented from others and land rented to others, by class of tenants, for the United States: 1950 935
15.—Part owners and tenants related to landlord, 1950 and 1930; and part owners and tenants with landlord living on a farm, 1950; by color and class of tenant: for the United States 935
16.—Tenants related to landlord, for the North and West: 1950, 1930, and 1925 936
17.—Full owners with grazing permits, with corresponding data for all farm operators; for specified States: 1950 937
18.—Number of nonwhite farm operators and land in farms, by race, 1900 to 1950; and by race and tenure, 1930 to 1940; with available data for cropland harvested: for the United States 936
19.—Farms of Negro and other nonwhite operators by tenure—Farms and land in farms by use, for the United States: Censuses of 1950 and 1940 939
20.—Farms and farm characteristics by tenure of operator, for the United States: Census of 1950 940

TABLES FOR THE GEOGRAPHIC REGIONS, DIVISIONS, AND STATES

Table—
21.—Number of farms, land in farms, and cropland harvested, Censuses of 1950, 1945, and 1940; with specified classes of land according to use and value of farms, Census of 1950; by tenure of operator (color and tenure for the South), by divisions and States 956
22.—Number of farms, by color and by tenure of operator, and land in farms by tenure of operator, by divisions and States: 1880 to 1950 992
23.—Owned and rented lands, by tenure of farm operator, by divisions and States: 1950 1001
24.—Land rented from others and land rented to others, by class of tenants, by divisions and States: Census of 1950 1004
25.—Part owners and tenants related to landlord, 1950 and 1930; and part owners and tenants with landlord living on a farm, 1950; by class of tenant, with color for the major geographic regions and the Southern States: by divisions and States 1008
26.—Farms of Negro operators—Farms and land in farms classified according to use, by divisions and States: Census of 1950 1024
27.—Farms of Negro operators by tenure—Farms and land in farms, 1900 to 1950; farms by tenure, 1910 to 1950; and land in farms by tenure, 1950: by divisions and 1025
28.—Farms of nonwhite operators other 1028
29.—Number of nonwhite operators othe 1029

CHAPTER XI.—COLOR, RACE, AND TENURE OF FARM OPERATOR

Introduction.—In the 1950 Census of Agriculture, much of the information was tabulated by four major classifications, viz, (*a*) size of farm (as measured by total land area in the farm); (*b*) color and tenure of operator; (*c*) economic class of farm; and (*d*) type of farm. Each of the classifications provides a detailed picture of our agricultural resources and the utilization of the resources by different producing groups.

This chapter presents statistics for farms by color, race, and tenure of the farm operator. The statistics by the tenure under which farm operators held the land they operated include such items as number of farms, land in farms, value of land and buildings, land use, operator characteristics, facilities and equipment, farm labor, farm expenditures, principal classes of livestock, major crops, and sales of farm products. In presenting data by tenure, primary emphasis is placed on the number of farms, land in farms, value of land and buildings, and land use.

Statistics by color and race of operator are limited to number of farms, land in farms, land use, and a few other items. Many of the data presented by color are restricted to the Southern States. Data for only a few of the major items are shown separately for Negroes, Indians, and other races comprising the nonwhite group. Most of the data shown by color or by race are presented for each color or race by tenure.

Sources of data.—The data presented are from the 1950 Census of Agriculture with comparative data from earlier censuses. Some of the data shown, particularly those for items presented for commercial farms only, represent estimates based upon reports for only a sample of farms. (See chapter XIII for a definition of commercial and other farms.) All tables which include estimates based on a sample of the farms have a headnote indicating which of the figures represent estimates for a sample. When only a part of the 1950 data in a table are based on the sample, the sample information is shown in italics.

The estimates based on the sample do not agree exactly with the totals for enumerated data for all farms and are subject to sampling errors. Tables giving reliability of estimates, based on the sample, are given in the Introduction to this volume. The Introduction also presents a description of the procedures used in the enumeration and processing of the statistics and of the sampling plan used in 1950.

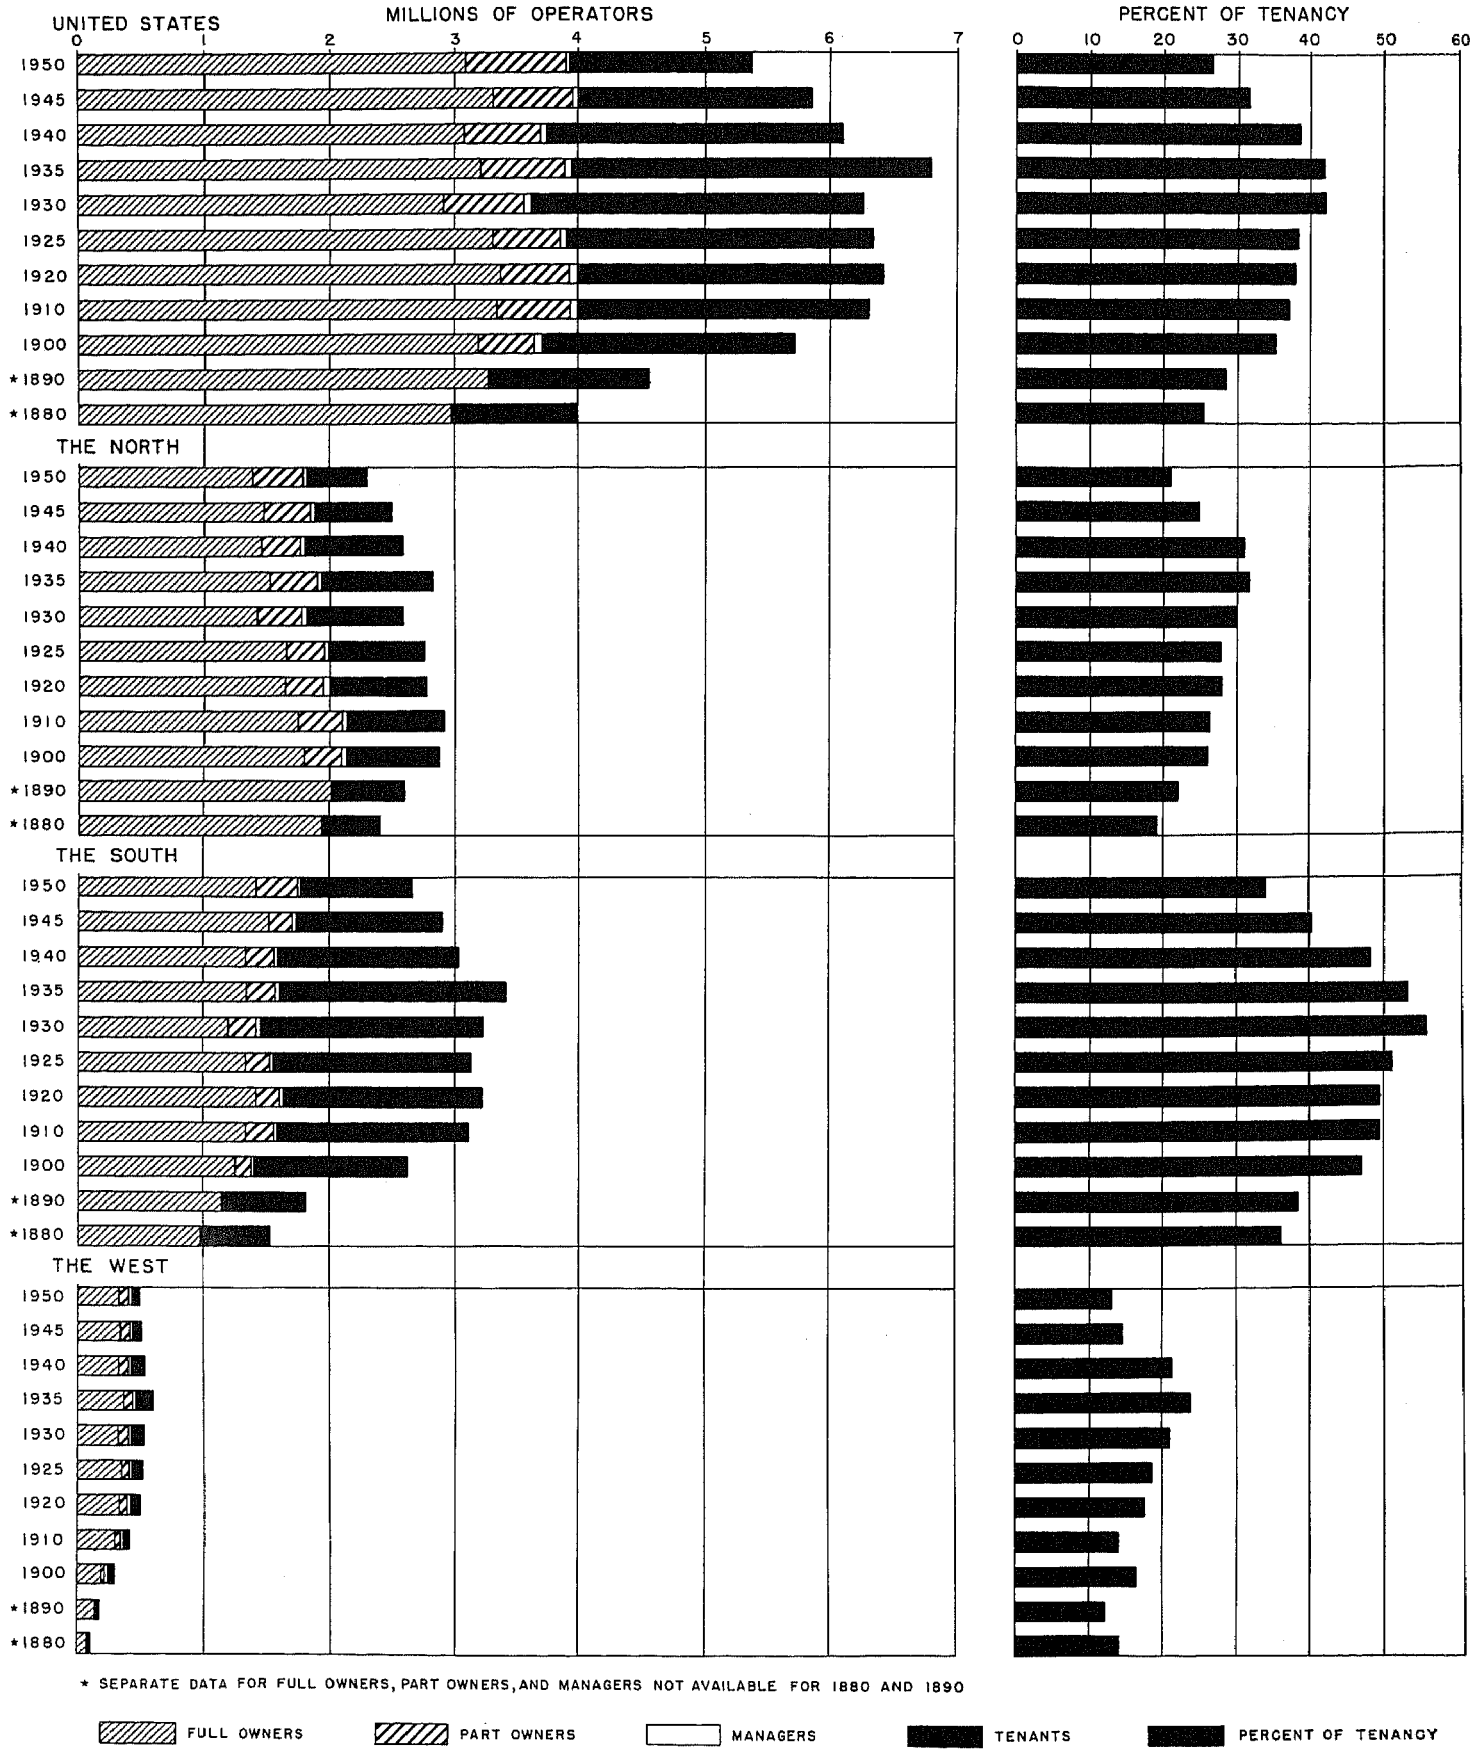
Presentation of the statistics.—The statistics are presented as totals for the continental United States, for 3 major regions, 9 geographic divisions, and for each of the 48 States and the District of Columbia. An outline map showing the States and the geographic divisions and regions for which totals are shown appears in the Introduction to this volume.

Comparable data from earlier censuses provide a measure of the changes that have taken place from census to census. Most of the available comparative data are shown for the United States. Comparative data for regions, divisions, and States are shown only for selected census years. Headnotes, footnotes, or the wording of the stub or of the column headings indicate any significant lack of comparability with earlier census years which may have resulted from changes in the wording of the inquiries, in the instructions or definitions, or in the procedures followed in collecting and compiling the data.

Averages, percentages, and other derived data are provided as aids in using and analyzing the statistics. Except for value of farm land and buildings, both totals and derived data are shown for the United States for all items. The values for land and buildings shown by tenure of operator, are on a per-farm and a per-acre basis. Derived data only are shown by divisions and States for some items. The totals on which these derived data have been based may be found in Economic Area Tables 6 and 10 in Volume I.

The tables are supplemented by charts and maps which show graphically some of the more significant facts included in the tables.

Other published data.—Data for counties by color and tenure of the farm operator are shown in Volume I of the 1950 Census of Agriculture reports. Data for counties by tenure of operator include a classification of all farms by tenure showing the number of farms, land in farms, and cropland harvested, and a count of commercial and other farms (part-time, residential, and abnormal), by major tenures. For white and nonwhite operators, only the number of farms is shown for all counties. For all counties in the South and for seven counties in southeastern Missouri, figures for the number of farms, land in farms, and cropland harvested are shown for white and nonwhite operators by tenure.

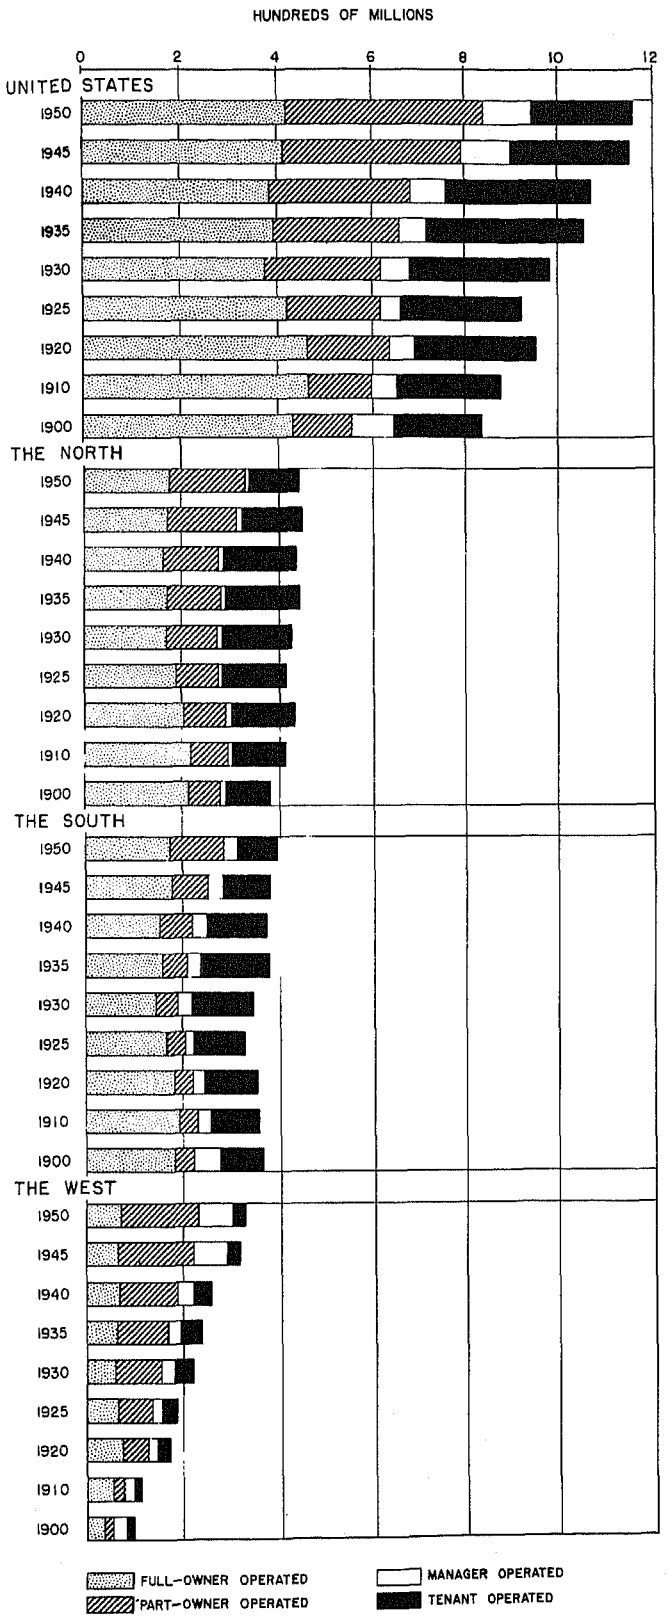


Data for State economic areas (groups of counties within the State having similar agricultural, demographic, climatic, physiographic, and cultural characteristics) are also shown in Volume I for commercial farms by tenure of operator. These data include number of farms, land in farms, value of land and buildings, land use, operator characteristics, farm facilities and equipment, principal classes of livestock, principal crops, expenditures, and farm labor.

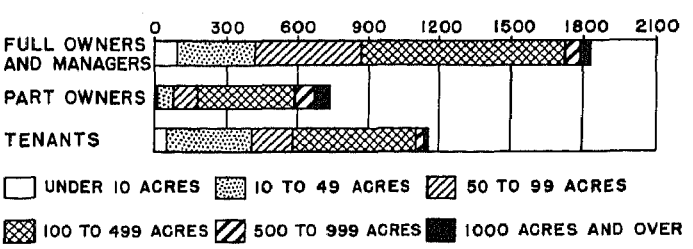
Some data, by color and tenure of the farm operator, not shown in Volume II appear in Volume I. For each of the 48 States, data for number of farms, land in farms, and land use are shown by tenure for white and nonwhite operators in State Table 14 of Volume I. For each of the Southern States, characteristics of commercial farms by tenure are shown for white and nonwhite operators in State Tables 15 and 16. These totals include data for the same items shown for commercial farms by tenure for State economic areas in Volume I. Data relating to hired farm labor and wage rates are shown for each of the Southern States, for farms of white and nonwhite operators, and for the commercial farms for each color by tenure of operator, in State Tables 20 and 25 in Volume I.

Statistics are presented for multiple-unit operations in Volume V, part 2, of the reports for the 1950 Census of Agriculture. A multiple-unit operation is defined as a landlord holding of two or more subunits (Census-defined farms) one of which may consist of land not assigned to tenants, including croppers, but the other subunit or subunits must represent land assigned to croppers.

Statistics regarding farms and farm characteristics by the other major classifications of farms are presented in Chapter X,



NUMBER OF FARM OPERATORS, BY TENURE, AND PERCENT OF TENANCY, FOR THE UNITED STATES AND REGIONS: 1880–1950



* SEPARATE DATA FOR FULL OWNERS, PART OWNERS, AND MANAGERS NOT AVAILABLE FOR 1880 AND 1890

FULL OWNERS PART OWNERS MANAGERS TENANTS PERCENT OF TENANCY

FARM ACREAGE, BY TENURE, FOR THE UNITED STATES AND REGIONS: 1900-1950

NUMBER OF FARMS, BY TENURE OF OPERATOR AND SIZE OF FARM, FOR COMMERCIAL FARMS ONLY, FOR THE UNITED STATES: 1950

"Size of Farm"; Chapter XII, "Economic Class of Farm"; and Chapter XIII, "Type of Farm." A count of commercial farms by tenure of operator was made by size of farm, by type of farm, and by economic class of farm. These counts are shown for the United States in table 20 of this chapter, and for each State in Economic Area Table 10 in Volume I. A percentage distribution of farms by tenure of operator for each economic class of farm is shown for States in chapter XII, and of commercial farms by tenure of operator for each type of farm in chapter XIII of this volume. A percentage distribution of commercial farms by size of farm for each tenure is shown for States in this chapter.

Additional information on characteristics of farm operators by color and tenure of operator appears in chapter II, and on farm labor and wage rates by tenure of operator in chapter IV, of this volume.

A description of the plan of presentation of the data tabulated from the 1950 Census of Agriculture, is given in the Introduction to this volume. Items covered in the census of agriculture are shown by the facsimile of the agriculture questionnaire appearing in the Appendix.

History of Census classifications by color and tenure of farm operator.—Census data were first classified by tenure of the farm operator in the 1880 Census. For the Census of 1880 and that of 1890, only the number of farms was classified by tenure. Classifications by color and race of the farm operator and cross-classifications by color and tenure were first made in the Census of 1900. The classifications and cross-classifications by tenure, color, and race, and the items of information available by these classifications have varied from census to census. In 1880 and 1890, data were published on the number of farms cultivated by owners, the number of farms rented, the number rented for a fixed money rental, and the number rented for a share of products.

The particular tenure classes used for each census and their relation to the 1950 classification are shown in table 1. For all years, the color classification has consisted of two groups, white and nonwhite, with the nonwhite further classified by race for the decennial censuses.

DEFINITIONS AND EXPLANATIONS

Definitions and explanations in this chapter are limited to those which have a particular significance in respect to the presentation of statistics by color, race, and tenure of the farm operator. Definitions and explanations of general application are included in the Introduction to this volume and those for specific items may be found in the chapters of this volume dealing with those subjects. The descriptive terms and explanations refer principally to the 1950 Census of Agriculture, although, in general, they are also applicable to earlier censuses. The definitions consist primarily of a résumé of the questionnaire wording, occasionally supplemented by the more essential parts of instructions and procedures for enumerating and processing the questionnaires. For

the exact phrasing of the inquiries, reference should be made to the facsimile of the 1950 Census of Agriculture Questionnaire shown in the Appendix.

A farm.—For the 1950 Census of Agriculture, places of 3 or more acres were counted as farms if the value of agricultural products in 1949, exclusive of home gardens, amounted to $150 or more. The agricultural products could have been either for home use or for sale. Places of less than 3 acres were counted as farms only if the value of sales of agricultural products in 1949 amounted to $150 or more.

If a landlord had croppers or other tenants, the land assigned each cropper or other tenant was considered a separate farm. Land retained by the landlord and worked by him with the help of family and/or hired labor was likewise considered a farm.

For the 1945 and earlier censuses of agriculture, the definition of a farm was somewhat more inclusive than for 1950. (The Introduction to this volume presents a discussion of the effect of changes in definition of a farm on the number of farms.)

Farm operator.—A "farm operator" is a person who operates a farm, either performing the labor himself or directly supervising it. He may be an owner, a hired manager, or a tenant, renter, or share cropper. If he rents land to others or has land cropped for him by others, he is listed as the operator of only the land which he retains. In the case of a partnership, only one of the partners was considered as the operator. The number of farm operators is considered the same as the number of farms.

Land owned, rented, and managed.—Replies to inquiries on land owned, land rented from others, land managed for others, and land rented to others determined the land to be included in each farm and also provided the basis for the classification of farm operators according to the tenure under which they held the land they operated. For most States, these inquiries were worded as follows:

OWNED LAND:
[8] How many acres of land do you OWN?..... ☐ None
(Whole acres)

(If you own more than one tract of land, INCLUDE ALL not only

LAND RENTED FROM OTHERS:
9. How many acres of land do you RENT FROM others, including any worked on shares?..... ☐ None
(Whole acres)

(Include any separate fields, meadows, pasture land, woodland, wasteland, etc. Also include land used by you rent free.)
If "None," check and skip to question [13]

LAND MANAGED FOR OTHERS:
[13] How many acres do you operate for others as a HIRED MANAGER?..... ☐ None
(Whole acres)

(If you manage land for others and also operate land on your own account, fill a separate questionnaire for each operation.)

LAND RENTED TO OTHERS:
14. How many acres are RENTED TO others, including land worked on shares?..... ☐ None
(Whole acres)

(Include any separate fields rented to others. Land worked by members of your household with your equipment should not be considered as rented to others.)

15. *Acres in this Place.*—To obtain this acreage, add *acres owned* (question 8) and *acres rented from* others (question 9); then subtract the *acres rented to* others (question 14)..... →
(Acres)

(If a hired manager, subtract acres in question 14 from acres in question 13.)

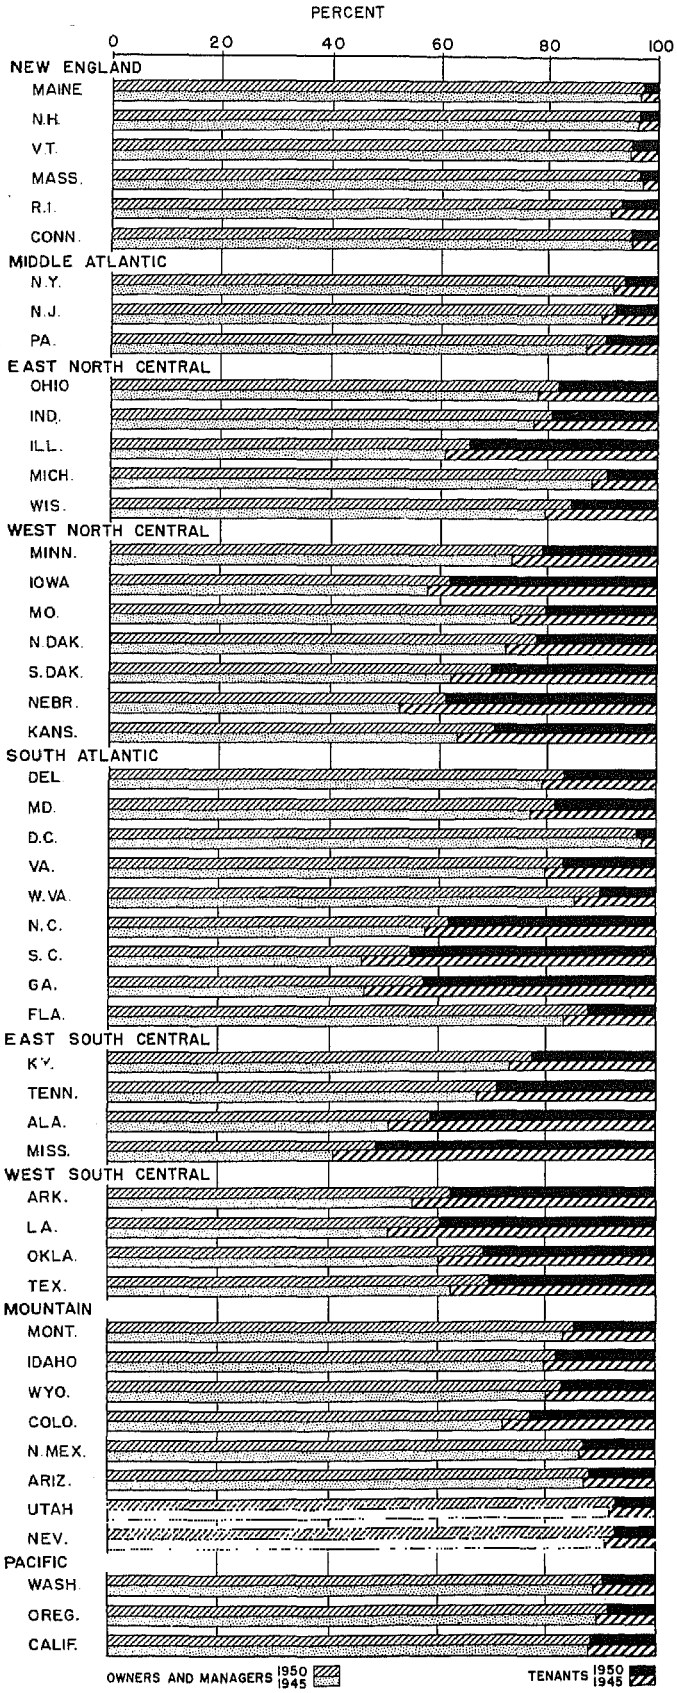
In the West, the wording of the note under the inquiry for land rented from others included an instruction to omit grazing lands used under government permit. In the South, the inquiry on land rented to others stressed the inclusion under this inquiry of land worked on shares by croppers or tenants.

The acres in the farm were obtained by adding the acres owned and acres rented from or worked on shares for others, and subtracting the acres rented to or worked on shares by others. If a farm was operated by a hired manager, the person in charge was asked the total acreage managed for his employer. From this total managed acreage, was subtracted any of the acreage which was rented to or worked on shares by others.

In earlier censuses, the enumerator was instructed to include as acres in the farm all land rented from others and to exclude all land rented to others. Only that portion of the acreage owned and the acreage rented from others which was retained by the farm operator was to be reported.

For 1950, the replies to the inquiries on land owned, land rented from others, land managed, and land rented to others provided a basis for classifying land in farms according to whether owned, rented, or managed by the farm operator. For operators reporting land owned and no land rented from others (full owners), the owned land operated by the owner was obtained by subtracting any land rented to others. For operators (tenants) who reported land rented from others and no land owned, the rented land operated by the tenants was obtained by subtracting any land subrented to others. Likewise, for operators reporting land managed for others (managers) the managed land operated was obtained by subtracting any land rented to others. However, for operators who both owned land and rented land from others (part owners) there was no way of determining whether land rented to others represented land owned by the operator or land rented by the operator from others.

Land owned.—Land owned includes all land which the operator or his wife, or both, held under title, purchase contract, homestead law, or as one of the heirs, or as a trustee of an undivided estate. For a partnership, all the land owned by any of the partners and operated as a partnership was to be included as land owned. In the case of an Indian operator, land allotted in trust and also any reservation lands assigned him for his own use were to be considered as land owned.



Land rented from others.—Land rented from others includes land worked on shares for others, and land used rent free, as well as all land rented or leased under other arrangements. Grazing land used under government permit was not included. Open range and grazing lands used under permit were not to be included as land in farms.

Land managed for others.—Land managed is land operated under the supervision of a person who is paid a wage or salary to operate the land. All land operated for a government agency (Federal, State, or local), a corporation, or an institution was considered managed, even though no person was specifically designated as the farm manager. Similarly, grazing lands held or controlled by cooperative groups, such as grazing associations, were considered managed. Likewise, Indian reservation lands operated for Indians and not reported by individual Indians were considered managed. Land in Indian reservations not reported by individual Indians or not rented to non-Indians was to be reported in the name of the cooperative group using the land. Thus, in some instances, the entire reservation was reported as one farm.

In the office processing of the questionnaires for the 1950 Census, land was not considered as managed if the person reported as manager appeared to be a caretaker or hired laborer. Land operated for employers other than government agencies, corporations, and institutions, was considered managed only if it represented a large farm or if the value of sales of farm products in 1949 amounted to $5,000 or more, or the inventory and production items indicated that normally the farm could be expected to produce for sale products amounting to $5,000 or more. (See the Introduction to this volume for the criteria for specified large farms.)

Land rented to others.—Many farm operators rent land to others. For the most part, the land rented to others represents agricultural lands but it also includes tracts rented for residential

PERCENT DISTRIBUTION OF FARM OPERATORS, BY TENURE, BY STATES: 1950 AND 1945

237460 O - 53 - 61

or other purposes. When land is leased, rented, or cropped on shares, the tenant or cropper is considered the farm operator, even though his landlord may exercise supervision over his operations. The landlord is considered as operating only that portion of the land not assigned to tenants or croppers.

Tenure of operator.—In the 1950 Census, farm operators were classified according to the tenure under which they held their land on the basis of the replies to the inquiries on total land owned, total land rented from others, and total land managed for others.

Owners are farm operators who own land.

Full owners own land but do not rent land from others.

Part owners own land and rent land from others.

Managers operate farms for others and are paid a wage or salary for their services.

Persons acting merely as caretakers or hired as laborers are not classified as managers. Farms operated for institutions or corporations were considered managed, even though no person was specifically designated as the farm manager. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If a farm operator managed land for two or more employers, all the land managed was considered one farm.

Unlike most tenants, a manager usually has no capital invested in the farm business. However, in some instances, he may receive a share of the products or a share of the profits in addition to his salary. A manager differs from a caretaker or hired worker in that the manager has more control over the farm operations.

Tenants rent land from others or work land on shares for others. They do not own land.

A tenant operator may exercise independent management or he may be closely supervised by his landlord. He may own the livestock and equipment, or have them furnished in whole or in part by his landlord, or he may rent work power and other equipment by special arrangement with his landlord. The contractual arrangements between landlords and tenants are extremely varied. At one extreme, the tenant may pay a cash rental and have full control of the land. At the other extreme, he may be assigned to a definite acreage to work under the close supervision of his landlord who provides all the productive resources with the exception of labor. In the latter case, the tenant shares in the risk of making a crop and receives a share of the produce in lieu of a cash wage.

Tenants were further classified on the basis of their rental agreement with the landlord as indicated by the replies to the following inquiries on the questionnaire:

Does the landlord furnish ALL the work animals or tractor power (as a part of his share in the operation of this place)? ☐ No ☐ Yes

Answer all parts (a) through (d)

(a) Do you pay to your landlord any cash as rent? ☐ No ☐ Yes

(b) Do you pay to your landlord any share of the crops? (Such as ¼, ⅓, ½.) ☐ No ☐ Yes

(c) Do you pay to your landlord any share of the livestock or livestock products? (Such as ¼, ⅓, ½.) ☐ No ☐ Yes

(d) Do you have this land under any other arrangement? (A fixed quantity of any product, upkeep of land and buildings, payment of taxes, keep of landlord, rent free, etc.) ☐ No ☐ Yes

Cash tenants pay a cash rental, such as $10.00 per acre, or $1,000 for the use of the whole farm.

Tenants were classed as cash tenants if they reported cash paid as rent and no share of crops or livestock paid. This group includes those who rented tracts primarily as places of residence when such tracts qualified as farms under the Census definition.

Share-cash tenants pay a part of the rent in cash and a part as a share of the crops or of the livestock or livestock products.

Share tenants pay a share of either the crops or livestock or livestock products, or a share of both. Share tenants were further classified as—

Crop-share tenants if they paid a share of the crops and no share of the livestock.

Livestock-share tenants if they paid a share of the livestock or livestock products. Livestock-share tenants may or may not also have paid a share of the crops.

Croppers are, in general, crop-share tenants whose landlords furnish all work power. Traditionally, a cropper (*a*) provides labor (his own and that of his family); (*b*) works under close supervision of his landlord who provides land, management, work power, and equipment; (*c*) shares in the risk of production; and (*d*) receives a share of the crop in return for his labor.

The furnishing of work power by the landlord has been the most satisfactory criterion for the classification of croppers. The use of the single criterion of the furnishing of work power includes as croppers some tenants who do not pay a share of the crop. However, in the South where croppers are numerous, very few tenants other than those paying only a share of the crops have all the work power furnished by the landlord. Moreover, in that area, other tenants with work power furnished generally represent croppers, as they are closely supervised.

Croppers are numerous only in the Southern States and in southeastern Missouri. Therefore, the inquiry as to whether all work power was furnished by the landlord was included on the agriculture questionnaires only for the South and for Missouri. All data presented separately for croppers, except those in table 2, are for the South only. For Missouri, the data for croppers are included with those for crop-share tenants. However, separate data for croppers in 7 southeastern Missouri counties, as a group, are presented in table 2. Data are also shown separately for each of these 7 counties in County Table 2a in Volume I.

Table 1.—NUMBER, ACREAGE, AND VALUE OF CROPPER FARMS, BY COLOR OF OPERATOR, FOR SEVEN SOUTHEASTERN MISSOURI COUNTIES: 1930 TO 1950

[Croppers in Missouri are not included in the totals for croppers for the United States or for the South. The seven counties for which data are shown are Butler, Dunklin, Mississippi, New Madrid, Pemiscot, Scott, and Stoddard. County figures are shown in Volume I, part 10. Data in italics are based on reports for only a sample of farms. See text]

Color of operator and year	Number of farms	All land in farms (acres)	Cropland harvested (acres)	Value of farms (land and buildings) (dollars)	
				Average per farm	Average per acre
Seven counties in southeastern Missouri:					
Total croppers.....1950..	5,226	179,463	160,648	*5,094*	*142.90*
1945..	5,569	216,167	188,088	3,589	92.46
1940..	4,369	149,712	114,983	1,762	51.42
1935..	6,065	186,829	154,572	1,212	39.34
1930..	7,181	238,639	185,165	2,159	64.96
White.....1950..	3,669	148,350	131,069	*6,046*	*141.66*
1945..	3,898	178,916	153,456	4,209	91.70
1940..	2,896	125,671	93,745	2,216	51.06
1935..	3,669	139,221	110,909	1,429	37.66
1930..	4,232	172,272	126,861	2,519	61.89
Nonwhite.....1950..	1,557	31,113	29,579	*2,799*	*149.74*
1945..	1,671	37,251	34,632	2,143	96.14
1940..	1,473	24,041	21,238	870	53.30
1935..	2,396	47,608	43,663	879	44.25
1930..	2,949	66,367	58,304	1,641	72.93

Other tenants include those who pay a fixed quantity of any product; those who pay taxes, keep up the land and buildings, or keep the landlord in exchange for the use of the land; those who have the use of the land rent free; and others whose rental arrangement required payment other than cash or of a share of products.

Unspecified tenants include those tenants whose rental agreement was not reported or could not be determined from the information reported.

Comparability of the 1950 tenure data with those for earlier censuses.—The tenure classes as determined for each census are shown in table 1. Corresponding tenure classes for earlier censuses differ from those for 1950 only as to procedure of classification and as to minor differences in definition.

For most of the census years for which tenure data are available, information required for the tenure classification was obtained during the enumeration and the tenure classes were determined on the basis of this information during the office processing, as in 1950. For 1880 and 1890, the enumerator merely indicated whether the farm operator was an owner, whether he rented for fixed money rental, or rented for shares of products. For 1900 and 1910, the enumerator determined the tenure on the basis of definitions provided in his instructions.

For 1920, full owners, part owners, and tenants were determined by specific inquiries on the questionnaire as to whether the operator owned all the land in the farm, owned part but not all, or rented from others all land in the farm. For the Censuses of 1925 to 1945, the classification was determined from inquiries for the acres in the farm owned and for the acres in the farm rented from others. The enumerator was instructed to include as land in farms all land rented from others and to exclude all land rented to others.

The organization of the Agriculture Questionnaire for the 1950 Census affected the comparability of the 1950 data for part owners with those for prior censuses. The questionnaire for 1950 did not provide for the identification of land rented to others as land owned or land rented by the part owner. Part owners in 1950 renting to others all the land owned would have been classified as tenants in prior censuses. Likewise, part owners in 1950 renting to others all the land rented from others would have been classified as full owners in prior censuses. In 1950, of the 824,923 part owners in the United States, 121,920 or 14.8 percent reported land rented to others. Data obtained in the post enumeration survey for the 1950 Census of Agriculture for a sample of 1,050 part owners, indicated that 2.8 percent either rented to others all the land owned or all the land rented. These data also indicated that 1.8 percent of all part owners rented all the owned land to others, and 1.0 percent of the part owners subrented to others all the land rented from others. On the basis of these estimates, based on a very small sample and, therefore, subject to rather large sampling errors, the method used for the 1950 Census resulted in an overstatement of the number of part owners by approximately 23,000. On the basis of procedures used in prior censuses, about 15,000 of these part owners would probably have been classified as tenants and 8,000 as full owners.

For the 1945 and prior censuses, farms were classified as operated by managers on the basis of the answer to the inquiry of the farm operator approximately as follows: "Do you operate this farm as a paid manager?" For 1950, the classification was based on the report as to the number of acres of land managed by the farm operator. The word "manage" or "manager" has been interpreted incorrectly by farm operators and census enumerators in every census. Caretakers, hired workers, and relatives of the farm owner have often considered that they manage the farm on which they were employed. Variations in the interpretation of the inquiry regarding managers, and also in the extent of the review during the office processing of farms classified as operated by managers, have greatly affected the comparability of the number of farms operated by managers from census to census.

The further classification of tenants on the basis of method of rental for the 1920, 1925, 1930, and 1940 Censuses was based upon the description of the kind of rent reported by the census enumerator. For the 1945 Census, enumerators were asked to specify the kind of rent, as cash, share, share-cash, or other. Under this procedure, some enumerators did not always fully report the kind of rent especially in the case of share-cash, or in the case of the rental of pasture land for cash. The failure to report fully the kinds of rent paid in such cases, resulted in an overstatement in the number of cash tenants and share tenants and an understatement in the number of share-cash tenants.

Table 2.—TENURE CLASSES INCLUDED IN THE REPORTS FOR EACH CENSUS, WITH THE NUMBER OF FARMS IN EACH CLASS: 1880 TO 1950

1950	1945	1940	1935	1930	1925	1920	1910	1900	1890	1880
Full owners 3,089,583	Full owners 3,301,361	Full owners 3,084,138	Full owners 3,210,224	Full owners 2,911,644	Full owners 3,313,490	Owners owning entire farm 3,366,510	Owners owning entire farm[1] 3,354,897	Owners 3,148,648 Owners and tenants[1] 53,299	Cultivated by owners 3,269,728	Cultivated by owners 2,984,306

[1] "Owner and tenant" farms were operated jointly by the owner and a tenant working for a share of the products. This tenure class was recognized in the instructions to enumerators for both the 1910 and 1900 Censuses. Inasmuch as the number of such cases was very limited and the owner was often a parent and the tenant a son, this class was consolidated in the 1910 reports with farms operated by their owners.
[2] For 1935, all tenants other than croppers were published as "Other tenants"; for 1930 and 1925, all tenants other than cash tenants and croppers were published as "Other tenants."
[3] See text.

The further classification of tenants on the basis of method of rental for 1950 was made on the basis of the "Yes" or "No" replies to the four inquiries relating to the rental agreement. While the 1950 Questionnaire provided for reporting methods other than the payment of cash or a share of the products, it did not provide for reporting information regarding the kind or amount of such payments.

For the 1880, 1890, and 1900 Censuses, tenants were further classified into only two subclasses, viz, cash tenants and share tenants. For 1880 and 1890, no information is available as to how tenants reporting both cash and share, those reporting a fixed quantity of the farm products, those reporting other miscellaneous methods of payments, or those not reporting method of payment, were classified. For the 1900 Census, tenants reporting a fixed quantity of the products paid as rent (standing renters) were classified as cash tenants. Those not specifying the method of payment were also included with cash tenants and those paying both cash and a share of products, were classified as share tenants. For both 1900 and 1910, standing renters were classified as cash tenants. For 1920, standing renters for the Northern and Western States were classified as cash tenants, while those for the Southern States were classified separately. Standing renters for 1920 for the South have been combined with other and unspecified tenants, to provide data comparable with 1950. For the 1925, 1930, and 1940 Censuses, standing renters were included with other and unspecified tenants.

Tenants reporting rental payments in cash only were classified as cash tenants for 1920 and 1925. For 1930 and 1940, cash

PERCENT DISTRIBUTION OF FARM OPERATORS, BY COLOR, BY STATES: 1950 AND 1945

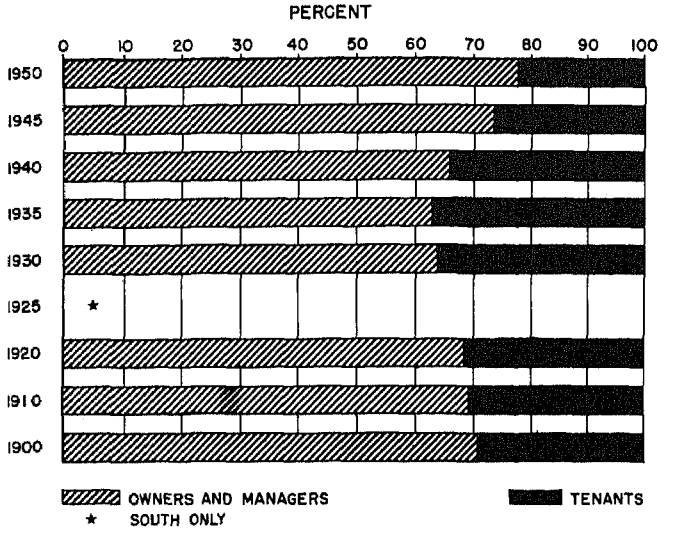
tenants included, in addition to tenants reporting cash rental payments only, tenants making payments closely akin to cash, such as payment of taxes, repairs, upkeep of the farm, etc.

Share tenants for 1920 and 1940 included tenants reporting a share of products only. Share-cash tenants for 1920 and for 1940 included tenants reporting both cash and a share of the products but no payments other than share or cash. Tenants reporting payments in addition to cash or a share of the products were included with "other" tenants for 1920 and 1940.

Rental payments other than cash or a share of the products were not considered in making the classification of cash tenants, share-cash tenants, or share tenants for 1950.

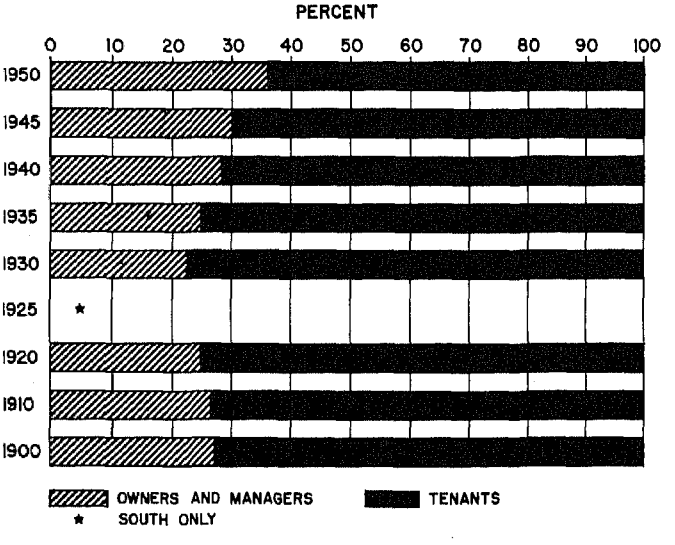
Generally, tenants have been classified as croppers on the basis of whether work power was furnished. For 1920 and 1930, tenants paying a share of the products as rent and having all work animals furnished by the landlord were classed as croppers. For 1935, the classification of croppers was made entirely on the basis of work power furnished. For 1940 and 1945, tenants paying a part of their rental in cash and a part on a share basis were classed as croppers if all work power was furnished by the landlord. For 1940 and subsequent censuses, tractor power furnished by the landlord has been considered as work power furnished.

The comparability of data by tenure for the various censuses, particularly for small areas, is also affected by the proportion of tenants for whom the rental arrangement was not specified. Other and unspecified tenants represented, for the United States, 10.8 percent of all tenants for 1950; 9.5 percent of all tenants for 1945; and 8.9 percent of all tenants for 1940.



Full owners with grazing permits.—Owner-operators who rent grazing land from others are considered as part owners. Owner-operators who rent no land from others but use grazing lands under a permit are classed as full owners but differ from part owners renting grazing lands only in that the grazing land is used under a permit rather than under a lease arrangement. Information on grazing permits was obtained for 11 Western States. The number of full owners using nonfarm grazing lands under permit from any public agency or grazing association is shown for these 11 States in table 17. These data are shown by counties in County Table 2 in Volume I of the reports for the 1950 Census of Agriculture.

Tenants related to landlord.—All farm operators who rented land from others were asked, "Do you rent any of this land from your own or your wife's parent, grandparent, brother, or sister?" For operators renting from two or more landlords, the inquiry on whether land was rented from a relative referred to any of the land rented. Data for the number of farm operators related to their landlords were tabulated for all part owners and tenants as a group, and for each subclass of tenants. Totals for part owners and tenants related to their landlord are given in Economic Area Table 1, in Volume I. Data for the number of tenants by subclasses related to landlord are published only for States. Figures regarding the number of part owners related to their landlords may be obtained by subtracting data for all tenants from the total for part owners and all tenants.



Farm operators with landlord living on farm.—The inquiry on residence of landlord was to be answered separately for each landlord. However, the data presented in this chapter on residence of landlord relate only to the first landlord listed. Data for the number of tenants and part owners with the landlord living on the farm, were tabulated for all part owners and all tenants combined and separately for each subclass of tenants. Figures on the number of all tenants with the landlord living on the farm are shown in County Table 2, of Volume I.

Data for tenants with landlord living on the farm are shown by subclass of tenant only for States. Figures regarding the number of part owners with landlord living on the farm are

WHITE FARM OPERATORS—PERCENT DISTRIBUTION, BY TENURE, FOR THE UNITED STATES: 1900–1950

NONWHITE FARM OPERATORS—PERCENT DISTRIBUTION, BY TENURE, FOR THE UNITED STATES: 1900–1950

not shown separately, but may be obtained by subtracting the total for all tenants from the total for all part owners and all tenants.

Color and race of farm operator.—For 1950, the classification of farm operators by color and race was made on the basis of the answers by the enumerator or by the respondent who filled his own questionnaire to the following inquiry for the farm operator:

What is your race? (*Check one*) (a) ☐ White (b) ☐ Negro (c) ☐ Other; What race? _____

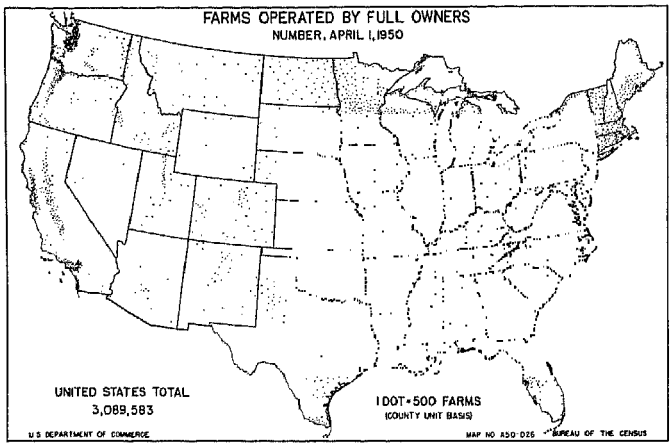
The enumerator was instructed to determine the race by observation and then to check the square for the appropriate race. If the race was other than white or Negro, he was to write in the name of the race.

Color of farm operator.—Farm operators are classified by color as "white" and "nonwhite." Nonwhite includes Negroes, Indians, Chinese, Japanese, Filipinos, and other nonwhite races, plus operators reported under "other" with the race not specified.

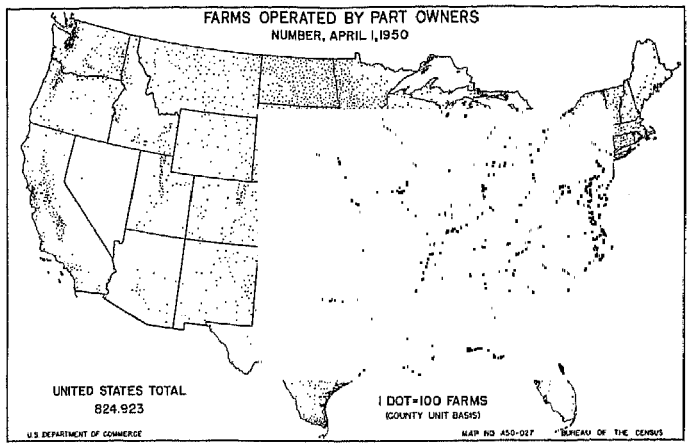
Race of farm operator.—Nonwhite farm operators are classified by race as Negroes, Indians, Chinese, Japanese, Filipinos, and "other and unspecified." The "other and unspecified" group includes minor nonwhite races such as Korean, Hawaiian, Asiatic Indian, persons of mixed white, Negro, and Indian ancestry, and persons designated as "other" with the race not specified.

Table 29 gives a distribution of the nonwhite farm operators by race. The "other and unspecified" group comprised 605 operators for 1950, 24 operators for 1945, and 87 operators for 1940. The number for 1950 is much larger than for prior censuses largely because the name of the race was not always given for other races by the census enumerator.

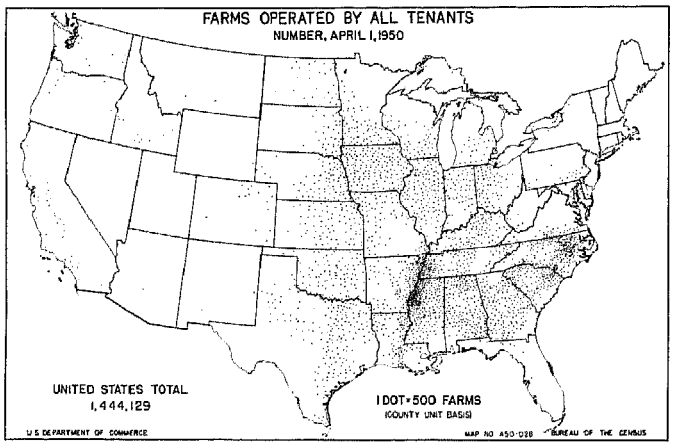
For 1950, land in Indian reservations used for agricultural purposes and not reported by individual Indians or not rented to non-Indians was considered to be operated by Indians regardless of the color or race of the person reported to be in charge of the operations. In former censuses, such farms were classed as Indian-operated if an Indian was named as the operator and as white-operated if the Indian Agent or some other white person was reported as the person in charge.



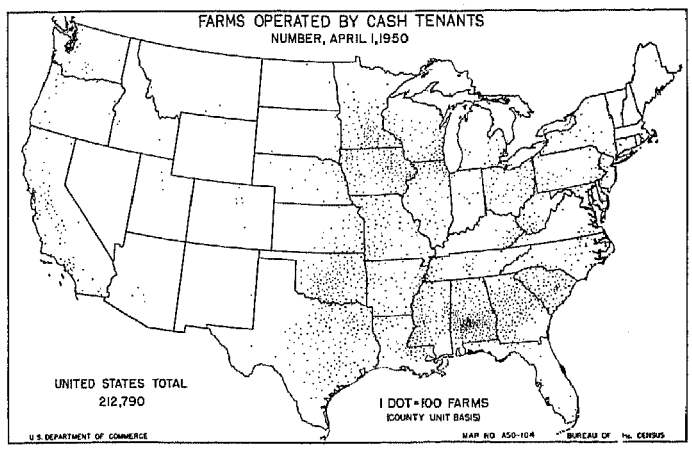
Changes in the number of farms by tenure.—Changes in the Census definition and procedures have affected the number and distribution of farms by tenure of farm operator. Information regarding the effect of the change in the definition of a farm on the total number of farms is given in the Introduction to this volume.



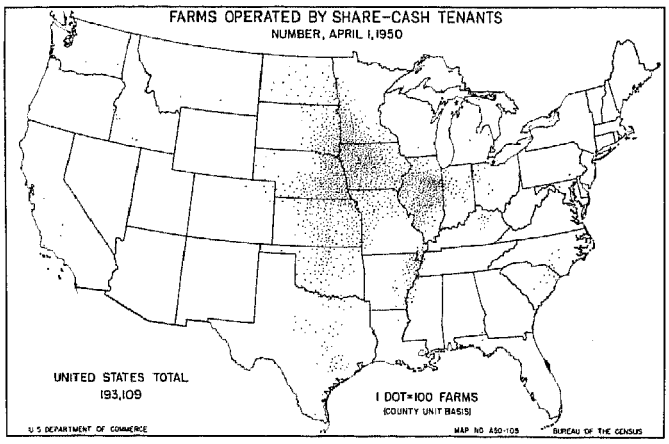
Most of the 150,000 to 170,000 change in the number of farms between 1945 and 1950, resulting from the change in the definition of a farm, represented farms operated by owners. Notwithstanding this decrease in the number of farms because of the change in farm definition, the proportion of farms operated by owners increased from 67.6 percent in 1945 to 72.7 percent in 1950.



The number of part owners in the United States increased from 615,039 in 1940 to 660,502 in 1945 and to 824,923 in 1950. Most of this increase in the 1945–1950 period occurred in the South. The number of part owners in the South was 216,607 in 1940, 193,607 in 1945, and 325,999 in 1950. Some of the increase in the number of part-owner operators may have been the result of the procedure used in 1950 for classifying farms by tenure on the basis of the total land owned and the total land rented from others, instead of on the basis of the land retained, as in 1945. A part of the decrease from 1940 to 1945 and part of the increase from 1945 to 1950 in the number of part owners may have been the result of the procedure followed in 1945 for the enumeration of farm land in multiple units. In 1945, if a farm operator who was operating land as a cropper or a tenant in a multiple-unit operation also operated additional land, two reports were required, as though the land represented two separate farms.



> "In 1945 a multiple-unit operation was one in which two or more subunits were handled as a single-farm enterprise. A multiple-unit operation consisted of two or more subunits, one of which had to be a cropper or tenant operation under the close supervision of the multiple-unit operator."



If a farm operator, who was a cropper or tenant and a part of a multiple-unit operation, also operated some land that he owned, he would have been considered as operating two farms, in 1945. On the farm of which he was the owner, he would have been classified as a full owner; and on the farm forming a part of the multiple-unit operation, he would have been classified as a tenant. For all censuses other than that of 1945, only one farm would have been included in the census for such an operator, and the farm would have been classified as operated by a part owner. Most of the increase in the number of part-owner operators, however, resulted from full-owner operators increasing the size

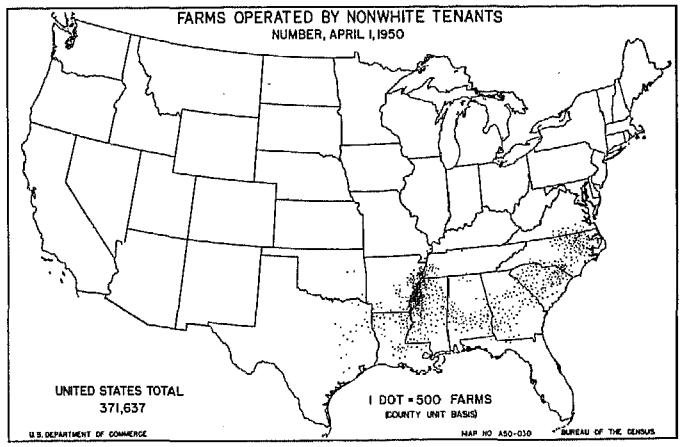
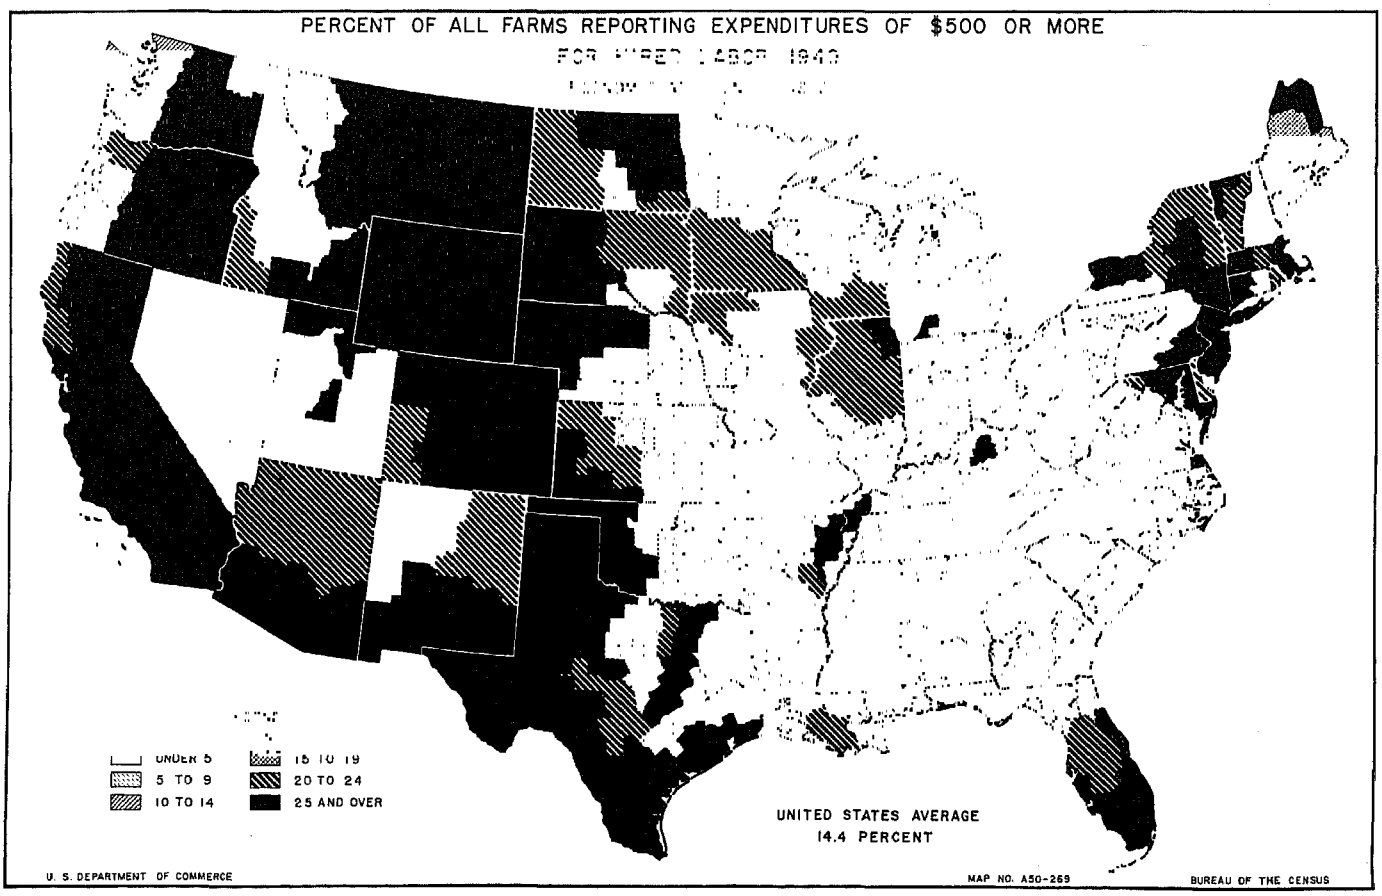
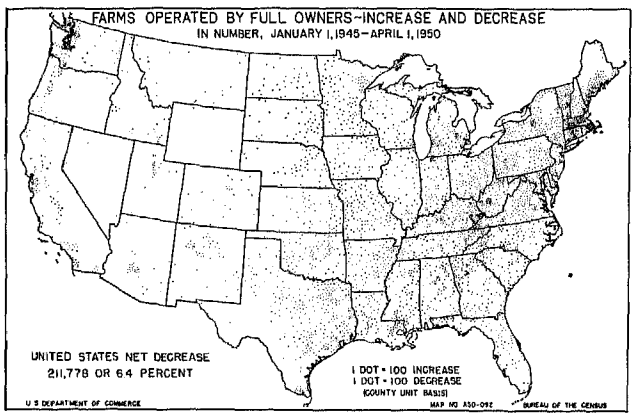
of their operations by the renting of additional land from others.



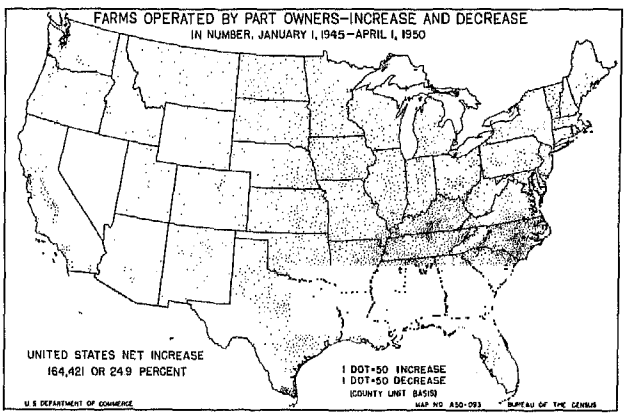
Farm tenancy was lower for 1950 than for any census since 1880. For 1880, the proportion of farms operated by tenants was 25.6 percent. The proportion of tenancy increased at each census from 1880 until 1930, when it was 42.4 percent. Since 1930, the proportion of farms operated by tenants has declined. For 1950, only 26.8 percent of the farms were operated by tenants.



Decreases in the number of tenants between 1945 and 1950 occurred generally throughout the entire United States. However, there were increases in the number of tenants in some counties in the South, accompanied by increases in acreages of cotton and tobacco. Decreases in the number of tenants were largely the result of (*a*) reduction in the number of farms because of the elimination or curtailment of agricultural activities on places with limited farm production, (*b*) consolidation of farms into larger operating units, and (*c*) increases in farm ownership.



The reduction in the number of farms operated by tenants because of the elimination or curtailment of agricultural activities on some places was probably responsible for a small part of the decrease in the number of tenant-operated farms. This factor affected the number of farms operated by cash tenants more than the number of farms operated by any other subclass of tenants. The consolidation of farms into larger operating units that accompanied the mechanization of farms affected the number of tenant-operated farms, particularly in parts of the South. The increase in farm ownership was brought about in many cases by the purchase of farms by operators who had previously been tenants.



Change in rented land.—From 1945 to 1950, the rented land in farms decreased by approximately 6.0 percent while the number of tenants decreased by 22.3 percent. Land in tenant-operated farms decreased from 251,634,186 acres in 1945 to 211,960,028 acres in 1950, or a total decrease of 39,674,158 acres. An increase of approximately 14,000,000 acres in the rented land in part-owner farms offset part of the decrease in the total acreage of rented land.

*Not available.
**Available data not comparable. See table 1.
[1] Managers included with owners in 1880 and 1890.
[2] For 1920, standing renters (renters paying a fixed quantity of products) for the Northern and Western States were included with "Cash tenants," and those for the South with "Other tenants"; for 1910, standing renters were included with "Cash tenants" for all States.
[3] See text.
[4] Available for the South only.

*Not available.
**Available data not comparable.
[1] For 1944, crop failure plus cropland idle or fallow.
[2] Nominally includes all land regularly tilled or mowed; land in pasture that has been cleared or tilled; land lying fallow; land in gardens, orchards, vineyards, and nurseries; and land occupied by buildings.
[3] Cropland harvested; cropland used only for pasture; and cropland not harvested and not pastured.
[4] Cropland harvested; cropland used only for pasture plowed within 7 years; and cropland not harvested and not pastured.
[5] Cropland harvested; crop failure; cropland, idle or fallow; and plowable pasture.
[6] For 1920, standing renters (renters paying a fixed quantity of products) for the Northern and Western States were included with "Cash tenants," and those for the South with "Other tenants"; for 1910, standing renters were included with "Cash tenants" for all States.
[7] South only. See text.
[8] Available for the South only.

Table 20.—FARMS AND FARM CHARACTERISTICS BY TENURE OF OPERATOR,

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Commercial farms by tenure			
			Commercial, total	Full owners	Part owners	Managers
	FARM OPERATORS—Continued					
	Operators by age:					
1	Under 25 years.....operators reporting..	163,726	121,380	16,912	10,614	573
2	25-34 years.....operators reporting..	791,323	573,283	157,869	105,338	3,364
3	35-44 years.....operators reporting..	1,186,918	832,925	330,045	198,423	5,175
4	45-54 years.....operators reporting..	1,157,085	806,949	416,652	187,855	3,917
5	55-64 years.....operators reporting..	1,000,350	696,096	443,878	133,819	2,464
6	65 years and over.....operators reporting..	744,594	452,191	343,553	55,390	978
7	Average age.....years..	48.3	47.6	52.5	46.7	44.0
	Proportion of operators reporting as to age—					
8	Under 25 years.....percent..	3.2	3.5	1.0	1.5	3.5
9	25-34 years.....percent..	15.7	16.5	9.2	15.2	20.4
10	35-44 years.....percent..	23.5	23.9	19.3	28.7	31.4
11	45-54 years.....percent..	22.9	23.2	24.4	27.2	23.8
12	55-64 years.....percent..	19.8	20.0	26.0	19.4	15.0
13	65 years and over.....percent..	14.8	13.0	20.1	8.0	5.9
	Operators by years on present farm:					
14	Less than 5 years.....operators reporting..	1,855,558	1,240,238	391,111	173,557	7,852
15	1 year or less.....operators reporting..	471,320	287,736	63,580	23,335	2,215
16	5-9 years.....operators reporting..	1,011,185	703,266	327,830	157,485	4,136
17	10 years or more.....operators reporting..	2,191,287	1,554,174	983,701	360,789	5,924
18	Average on present farm.....years..	13	13	17	14	10
	Proportion of operators reporting as to years on farm—					
19	Less than 5 years.....percent..	36.7	35.5	23.0	25.1	43.8
20	1 year or less.....percent..	9.3	8.2	3.7	3.4	12.4
21	5-9 years.....percent..	20.0	20.1	19.3	22.8	23.1
22	10 years or more.....percent..	43.3	44.4	57.8	52.1	33.1
	Percent distribution of operators on present farms—					
23	Less than 5 years.....percent..	100.0	66.8	21.1	9.4	0.4
24	1 year or less.....percent..	100.0	61.0	13.5	5.0	0.5
25	5-9 years.....percent..	100.0	69.5	32.4	15.6	0.4
26	10 years or more.....percent..	100.0	70.9	44.9	16.5	0.3
	SPECIFIED FACILITIES					
27	Telephone.....farms reporting..	2,057,556	1,583,467	852,279	368,989	11,953
28	Electricity.....farms reporting..	4,213,599	2,980,354	1,544,422	620,954	16,703
29	From a power line.....farms reporting..	4,154,359	2,927,852	1,525,682	597,873	16,078
30	Average of last monthly electric bill.....dollars..	7.39	8.29	8.10	9.67	52.81
31	From a home plant.....farms reporting..	59,240	52,502	18,740	23,081	625
32	Electric water pump.....farms reporting..	2,018,578	1,536,582	867,717	354,821	12,113
33	Electric hot-water heater.....farms reporting..	936,066	728,774	418,548	180,740	7,310
34	Home freezer.....farms reporting..	650,512	518,245	281,865	134,569	4,942
35	Electric washing machine.....farms reporting..	3,160,141	2,289,966	1,236,969	510,978	12,552
36	Electric chick brooder.....farms reporting..	800,477	647,316	341,623	147,894	4,122
37	Electric power feed grinder.....farms reporting..	61,923	51,999	29,143	12,481	1,427
	Proportion of farms reporting—					
38	Telephone.....percent..	38.2	42.7	47.0	50.6	60.7
39	Electricity.....percent..	78.3	80.4	85.2	85.1	84.8
40	Electric water pump.....percent..	37.5	41.5	47.9	48.7	61.5
41	Electric hot-water heater.....percent..	17.4	19.7	23.1	24.8	37.1
42	Home freezer.....percent..	12.1	14.0	15.5	18.5	25.1
43	Electric washing machine.....percent..	58.7	61.8	68.2	70.1	63.7
44	Electric chick brooder.....percent..	14.9	17.5	18.8	20.3	20.9
45	Electric power feed grinder.....percent..	1.2	1.4	1.6	1.7	7.2
	Proportion of farms reporting electricity that also reported—					
46	Electric water pump.....percent..	47.9	51.6	56.2	57.1	72.5
47	Electric hot-water heater.....percent..	22.2	24.5	27.1	29.1	43.8
48	Home freezer.....percent..	15.4	17.4	18.3	21.7	29.6
49	Electric washing machine.....percent..	75.0	76.8	80.1	82.3	75.2
50	Electric chick brooder.....percent..	19.0	21.7	22.1	23.8	24.7
51	Electric power feed grinder.....percent..	1.5	1.7	1.9	2.0	8.5
	SPECIFIED EQUIPMENT ON FARMS					
52	Milking machine.....farms reporting..	636,341	614,347	322,493	147,372	4,096

Table 20.—FARMS AND FARM CHARACTERISTICS BY TENURE OF OPERATOR,

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Commercial farms by tenure			
			Commercial, total	Full owners	Part owners	Managers
	FARM LABOR WEEK PRECEDING ENUMERATION—Continued					
	Proportion of farms reporting—					
1	Family and/or hired workers....percent..	84.5	90.1	88.7	93.8	90.2
2	Family workers, including operator....percent..	83.1	88.5	86.7	92.0	80.0
3	Operators working 1 hour or more....percent..	78.9	85.2	82.7	89.0	78.8
4	Unpaid members of operator's family working 15 hours or more....percent..	34.4	38.5	38.6	44.1	15.3
5	Hired workers....percent..	13.1	17.0	17.2	25.0	67.9
6	Regular workers....percent..	9.4	12.7	12.5	20.0	62.9
7	Seasonal workers....percent..	5.0	6.1	6.5	8.2	18.8
8	Regular hired workers and no seasonal workers....percent..	8.0	10.9	10.7	16.8	49.2
	Average per farm reporting—					
9	Family and hired workers....persons..	1.9	2.0	2.0	2.3	9.2
10	Family workers, including operator....persons..	1.6	1.6	1.6	1.7	1.3
11	Hired workers....persons..	2.2	2.3	2.0	2.4	10.7
12	Regular workers....persons..	2.0	2.0	1.8	2.1	9.0
13	Seasonal workers....persons..	2.0	2.1	1.8	2.4	8.6
	Proportion of farms reporting hired workers represented by those reporting—					
14	Regular workers....percent..	71.7	74.8	73.0	79.9	92.6
15	Seasonal workers....percent..	38.6	36.0	37.6	32.9	27.6
	Kind of workers:					
16	Both family and hired workers....farms reporting..	625,790	571,326	274,729	169,107	11,393
17	Family workers only....farms reporting..	3,844,813	2,709,269	1,297,216	501,559	4,380
18	Operators only....farms reporting..	2,224,587	1,491,410	702,006	244,780	3,058
19	Unpaid members of operator's family only....farms reporting..	203,293	105,515	61,531	17,479	105
20	Hired workers only....farms reporting..	77,344	59,563	36,939	13,436	1,996
	Proportion of farms reporting—					
21	Both family and hired workers....percent..	11.6	15.4	15.2	23.2	57.8
22	Family workers only....percent..	71.5	73.1	71.6	68.8	22.2
23	Operators only....percent..	41.4	40.2	38.7	33.6	15.5
24	Unpaid members of operator's family only....percent..	3.8	2.8	3.4	2.4	0.5
25	Hired workers only....percent..	1.4	1.6	2.0	1.8	10.1
	SPECIFIED FARM EXPENDITURES IN 1949					
26	**Specified farm expenditures**....farms reporting..	4,782,184	3,455,629	1,707,767	712,353	18,222

Table 20.—FARMS AND FARM CHARACTERISTICS BY TENURE OF OPERATOR,

[Data are based on reports for only a sample of farms. See text.

	Item	Total, all farms	Commercial, total	Commercial farms by tenure		
				Full owners	Part owners	Managers
	FARMS BY SIZE					
	Classification of farms by size of farm—					
1	Under 10 acres..... number..	480,373	136,835	86,683	4,735	428
2	10-29 acres..... number..	852,956	414,884	150,399	28,851	727
3	30-49 acres..... number..	623,582	347,442	177,428	36,251	632
4	50-69 acres..... number..	426,048	266,658	154,988	37,491	464
5	70-99 acres..... number..	620,131	444,218	287,558	58,745	769
6	100-139 acres..... number..	581,099	462,467	271,100	81,162	1,100
7	140-179 acres..... number..	522,272	453,984	232,688	78,162	1,323
8	180-219 acres..... number..	276,283	245,968	110,740	61,890	1,050
9	220-259 acres..... number..	213,972	196,633	79,801	53,880	925
10	260-499 acres..... number..	477,558	445,385	168,578	148,179	3,188
11	500-999 acres..... number..	183,913	174,380	59,575	75,941	3,146
12	1,000 acres and over..... number..	121,063	117,558	33,461	63,988	5,953
	Percent distribution of farms by size:					
13	All farms..... percent..	100.0	100.0	100.0	100.0	100.0
14	Under 10 acres..... percent..	8.9	3.7	4.8	0.6	2.2
15	10-29 acres..... percent..	15.9	11.2	8.3	4.0	3.7
16	30-49 acres..... percent..	11.6	9.4	9.8	5.0	3.2
17	50-69 acres..... percent..	7.9	7.2	8.5	5.1	2.4
18	70-99 acres..... percent..	11.5	12.0	15.9	8.1	3.9
19	100-139 acres..... percent..	10.8	12.5	15.0	11.1	5.6
20	140-179 acres..... percent..	9.7	12.2	12.8	10.7	6.7
21	180-219 acres..... percent..	5.1	6.6	6.1	8.5	5.3
22	220-259 acres..... percent..	4.0	5.3	4.4	7.4	4.7
23	260-499 acres..... percent..	8.9	12.0	9.3	20.3	16.2
24	500-999 acres..... percent..	3.4	4.7	3.3	10.4	16.0
25	1,000 acres and over..... percent..	2.3	3.2	1.8	8.8	30.2
	FARMS BY TYPE					
	Classification of farms by type of farm—					
26	Field-crop farms..... number..	1,449,117	1,449,117	447,068	269,387	3,421
27	Cash-grain..... number..	430,389	430,389	135,885	130,810	1,215
28	Cotton..... number..	609,307	609,307	152,534	79,629	1,417
29	Other field-crop..... number..	409,421	409,421	158,649	58,948	789
30	Vegetable farms..... number..	46,415	46,415	25,134	10,844	451
31	Fruit-and-nut farms..... number..	82,178	82,178	66,569	8,171	2,459
32	Dairy farms..... number..	602,093	602,093	389,178	119,336	3,462
33	Poultry farms..... number..	175,876	175,876	146,285	15,882	817
34	Livestock farms other than dairy and poultry..... number..	806,080	806,080	446,690	182,514	6,717
35	General farms..... number..	494,285	494,285	251,330	118,288	1,332
36	Primarily crop..... number..	84,569	84,569	41,557	18,467	458

[1] See text.
[2] 0.05 percent or less.
[3] Totals for States for which data were tabulated by tenure of operator.
[4] Farms reporting are for most commonly grown kind of wheat in each of the States where there were inquiries for 2 or more kinds of wheat.
[5] Includes only farms reporting burley tobacco for Kentucky and Tennessee.

FOR THE UNITED STATES: CENSUS OF 1950—Continued

Data for States in tables 31 to 74 and in Volume I]
