

Table 1. Farms, Land in Farms, and Land Use: 1974 and 1969

Table 1: Farms, Land in Farms, and Land Use: 1974 and 1969. The table is divided into two main sections. The left section shows general statistics for all farms and farms with sales of \$2,500 and over, including the number of farms, land in acres, average size of farm, and value of land and buildings. The right section details 'Land in Farms According to Use', categorized into Total cropland (harvested, not harvested, and other cropland), Total woodland, and Other land (including houselots, barnlots, ponds, roads, wasteland, etc.).

Table 2. Farm Operators—Tenure and Characteristics: 1974 and 1969

Table 2: Farm Operators—Tenure and Characteristics: 1974 and 1969. This table provides detailed information about farm operators, categorized by tenure (full owners, part owners, tenants) and characteristics such as age group and place of residence. It compares all farms with farms that have sales of \$2,500 and over. Key data points include the number and land area of operators, their ages, and their principal occupations.

1969 data are only for farms operated by Blacks. 1974 data apply only to individual or family operations (sole proprietorships) and partnerships; see text.
